1950 The news that Mr Douglas Nicholes is disposing of his well-known drapery and outfitting business in Mill Road will be received with regret by local people who admire the pioneer spirit and enterprise of a family concern. There are still people who can remember the early days of what was then a small lock-up shop surrounded by fields – known as Feke's Meadows - on both sides of the roads on the town side. It is 68 years since Mr W.D. Nicholes founded the business. In those early days they were the largest wholesalers of foreign goods in East Anglia. The retail side was developed later and menswear has always been a speciality c50 09 26

1951 Downing Street : old Corn Exchange demolished [2.9,5.5]

1951 Lensfield Road : demolition for new Chemistry Labs [IC.6.2]

1951 Lion Yard : carpark plans [3.6]

1951 Cambridge town planning committee say there can be no justification for a spine relief road between Histon Road corner and Jesus Lane merely to preserve for a few years more buildings on the west side of Magdalene Street which, although of some architectural interest, are sub-standard from every other point of view. Pending demolition the commercial use of the buildings should be terminated, doing away with the necessity for vehicles to wait outside c51 01 23

1952 East Road : 91% of properties in "short life" or "no life" categories - 100 years old & in poor condition propose East Road as traffic route [3.11]

1952 Magdalene St - Sir. Twenty-five years ago Magdalene College started a scheme which might have involved the widening of Magdalene Street and the removal of buildings opposite the college. But it does not now contemplate the completion of the scheme and is now strongly opposed to the widening of the street and the demolition of the buildings on the west side. The College would be strongly prejudiced if it should be divided by a street similar in character to the widened part of Bridge Street and would strongly object to such a change of character and loss of amenity in the neighbourhood – Henry Willink, Master. CDN 52 01 14

1952 Magdalene St - The County Development Plan public inquiry took a dramatic turn when Magdalene College announced it had decided to oppose proposals to widen Magdalene Street. The "donnish mind" did not often descend to take part in proceedings of this kind but this is a "bad plan and would be a disaster both to the University and the City of Cambridge", their counsel said. "You should not have motor traffic moving so fast that the lives of pedestrians and motorists are imperilled". Everyone wants Cambridge to remain a place in which the pedestrian, the cyclist and the motorist are more or less on an equal footing. c52 10 23

1952 Magdalene St - Cambridge City council has decided not to proceed with their proposal to widen Magdalene Street and reconstruct the great bridge. They had heard objections by the University and a statement on behalf of Magdalene College & believed that with mutual co-operation between the city and colleges some of the causes for the present traffic congestion could be removed. But if it became a choice of either the spine relief road or of widening Magdalene Street then they would choose the latter alternative. c52 10 30

1953 Market Hill - top of fountain in Market Hill removed - 50% material useless, would cost £2,200 to rebuild; figures removed to Folk Museum [5.1,5.6]

1953 Market Hill - The condition of the stone of the conduit head on Cambridge Market Hill has been found to be much worse than anticipated during recent demolition work and so the Council will be recommended not to rebuild it. The condition of the stone was such that the only part which could be safely re-used was the four pillars and the cost of restoration would be at

least £4,000, double the previous estimate. They propose to loan the carved figures from the conduit to the Folk Museum. c53 10 15

1953 Market Hill - A decision not to rebuild the Conduit head in Market Hill, Cambridge was described as a retrograde step by Ald James. "I know it is the fashion to run down Victorian architecture but I think it was very seemly. I think we should rebuild it in the same style". But Ald Priest said "If in ten years' time people see pictures of the Conduit as it was, there will be nothing to prevent them from replacing it by photographs. The majority of people are quite satisfied and the Secretary of the Preservation Society has written to say how nice we have made it". c53 10 16

1954 Sidney St - Cambridge planners are contemplating the rebuilding of premises in Sidney Street to complete the road widening between Petty Cury and Holy Trinity Church. In 1939 the Essex Insurance Company agreed to rebuild nos 62-64 Sidney Street but owing to the war the scheme was postponed. Then in 1943 they sold no.64 to Messrs Boots who are now seeking planning permission for change of use and this is an opportune time for the scheme to go ahead. CDN c 19.1.1954

1954 Emmanuel Street : redevelopment plans [3.12]

1954 St Andrew's St - Emmanuel College has announced proposals for building a new block of shops and offices on the corner of St Andrew's Street. They will lease the property to the Prudential Assurance Company who will undertake what is by far the largest and most important commercial development since the opening of Woolworth's Stores in Sidney Street. The existing buildings will be completely taken down and a new block erected in their place with shops on the ground floor and offices above. With the parking problem so much in the forefront it will provide sufficient car parking for its occupants. Though they may be some who will regret the disappearance of the cottages in Emmanuel Street few will argue against the removal of the red brick 'giant' known as Rance's Folly with its towering storeys and overblown construction which is now used as University offices. CDN 6.8.1954

1955 Lensfield Road : Lensfield House demolished [IC.6.1]

1955 Emmanuel Street : demolition [3.13,3.14]

1955 Emmanuel St - Miss Kathleen Payne, 76, is retiring after a lifetime in the newsagents' business as her shop in Emmanuel Street is to be pulled down. It marks the end of one of Cambridge's familiar landmarks. The business was started by her father who remembered selling his first C.D.N. in 1888. Miss Payne has lived there all her life & recalls when chickens used to run down St Andrew's Street before the days of super shops, large cinemas and motor buses 55 07 02

1956 Park Street : demolition, includes no 60, the home of Spurgeon [3.18,3.19]

1956 Castle St - A planning inquiry into who owns a garage in Castle Street, Cambridge, came to an abrupt end when an agreement was reached. Mr L.N. Reynolds will be allowed to pull down two condemned cottages and erect a paint store. The whole of the site was ugly and it would not destroy the amenities of the area. The County was interested in it for 'local government purposes' as it allowed a clear view of Castle Mound. 56 02 01

1956 Corn Exchange St Demolition is taking place in Corn Exchange Street as part of the final scheme for the redevelopment of the area. Although final plans are as yet unsettled empty offices are being demolished and the land will be used as an extension to the Lion Car Park. A number of dilapidated houses in Park Street that were condemned before the war are also being pulled down. 56 02 28b & c [3.18]

1956 East Road demolition – 56 02 10a & b [3.17]

1956 Fitzroy St - An enquiry heard that Cambridge city council had wanted to purchase land at the junction of Fitzroy Street and Wellington Street, pull down the old houses and use the land to

re-site industry displaced from the East Road area. They offered to pay the current price but the owner, a former chairman of the Council's Finance Committee, said that if the land had potential for light industry then the price should be higher. Eventually negotiations broke down. Now he applied to redevelop the area, but the council opposed his plans. 56 04 19a & b

1956 Thoday St - The origin of Thoday Street – 56 04 21b

1956 Garry Drive, a private street and a cul-de-sac just off King's Hedges Road which ends at the railway, was constructed by a Mr Naylor. He put down kerbs and channels and in May 1939 was contemplating finishing the road himself, but the war intervened. He then left for Australia but his wife owns three properties and has written from Melbourne objecting to the council's proposed charge for making up the road. 56 11 10b

1956 Christ's Lane - A proposal to close Christ's Lane and provide an alternative footway between Drummer Street and St Andrew's Street was approved in 1954. But now Christ's College have proposed an alternative consisting of an arcade leading into a central courtyard then through another arcade to Drummer Street. The council would be responsible for maintaining, cleaning and lighting it 56 11 27a

1957 Bradwells Court : plans [3.22]

1957 Hurst Park Avenue windmill demolished [4.29]

1957 Lensfield Rd - The central island containing the underground public convenience at Hyde Park Corner is to be removed to make way for new traffic signals. The toilets might be resited on Lensfield Road where trees and a fence will provide a screen from the Scott Polar Research Institute. But the University suggests that Parker's Piece would be a better location. 57 04 16a

1957 St Andrew's St - Rance's Folly, the large redbrick house now being demolished in St Andrew's Street once had several lifts, four bathrooms and central heating – as well as a swimming pool. Guests even played tennis on the roof. It was built by Henry Rance who was Mayor in 1878 and 1882 – when he held council meetings in his dining room - and included a ballroom whose floor was laid by experts brought specially from Germany. Here his granddaughters were never at a loss for partners. 57 06 21 & 21a [IC.9.15,5.7]

1957 Trinity St - Trinity College has started its first large-scale works this century. They will reconstruct nos.29-34 Trinity Street with hardly any alterations to the facade. The shops will remain on the ground floor but everything above is to be reconstructed to house 43 undergraduates in a small new court. This will reduce the overcrowding resulting from the termination of military service. 57 09 14 & a

1957 Tenison Rd - Great Eastern House, the new British Railways office in Tenison Road, is a functional modern building with the high standard of architectural design necessitated in a University city. Shaped like a vast cube, its tiers of windows catch the light row upon row. Inside is the railwayman's dream. Gone are the rickety stairs, the walls in green or chocolate and cramped offices with old-fashioned coal fires. Instead there is light, ivory-coloured walls and glass partitions, a lecture room, bar and two billiard tables 57 12 19a, b, c [5.8]

1958 Hills Road : houses demolished to make way for Highsett [4.1]

1958 Sidney Street : Boots shop front set back & rebuilding near Holy Trinity Church [4.2]

1958 Fitzroy St - Reston House, Fitzroy Street – John Reston, Master of Jesus 1546 bequeathed land which sold in 1956 to fund building - 58 05 10a

1958 Gothic Street Clearance. Work is under way to clear sub-standard houses in Gothic Street and Doric Street, Cambridge. The site will soon be in use as a car park and will accommodate about 150 cars. It will have a temporary surface which will later be replaced with a permanent surface of tarmac. 58 05 09

1958 Peas Hill - King's College announced a new rebuilding scheme in the city centre which will mean the demolition of the Central Hotel and café to provide more accommodation for students and a better headquarters for the Cambridge branch of the Midland Bank. The Bursar

said the structure of the existing building is in a very parlous state and they could not for structural safety do less than rebuilding completely the whole interior. However this would only be forcing new wine into an old bottle so they had commissioned the design of a new building by Mr K.W. Capon of Architects' Co. Partnership 58 12 12c

1959 Emmanuel Street : redevelopment on St Andrews Street corner [4.3]

1959 Sidney St - Work has begun on greatly increasing the area of Messrs Boots the Chemist's premises in Sidney Street by the demolition of the old Essex and Suffolk Assurance Company buildings. It will double the width of the frontage and the shopping area behind and provide twin entrances on to the street. The staff accommodation will be more than doubled and the facilities vastly improved. Boots believe that the staff cannot be expected to look after customers properly unless their own interests are properly served by the company: contented staff means contented customers. 59 02 12b & c

1959 St Andrew's St - The giant new Prudential Building on the junction of St Andrew's Street and Emmanuel Street incorporates the latest building techniques with heating and hot water provided by electrical units which take power from the mains during 'off-peak' hours and store it for use during the day. Acoustic ceiling tiles provide quieter working conditions, floors are of a coloured plastic tile and decorations in pastel shades. The basement contains a large garage and special storage to cater for the large use of bicycles by staff. 58 06 18

1959 Henrietta Street and St Eligius almshouses – 59 09 12c & d, 59 09 26, 59 09 28

1959 The controversy surrounding the Central Hotel in Peas Hill, which King's College want to knock down and replace by a new hostel for students has reached a new stage with the publication of a booklet. The St Edward's Committee was established when it was announced that the Central Hotel, a largely 17th-century building forming an integral part of a square around St Edward's churchyard, was to all appearances doomed. They believe it could be preserved and are pressing for a public inquiry into the proposals. 59 12 21c & d

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Bradwells Court : opened [4.5,4.6]

1960 Christ's Lane : closed [4.5]

1960 Sidney Street : widened [4.7]

1961 Arbury Road : demolition of house at entrance to Manor Farm, later site of Campkin Road [IC.1.2]

1961 King St : almshouses demolished for multideck park & new shopping centre [446.13.18]

1961 Petty Cury : Lion purchased July 1961 by Jack Cotton & Chas Clore for City Centre properties; largest single property transaction in Cambridge; by 1964 hotel closed & just bars open [446.16.3]

1961 Prziborsky's barbers shop in Ram Yard is to be swept away by demolition and redevelopment. The site is to be incorporated into a new road leading to Park Street car park. It was founded in 1879 by Count Prziborsky after he left his position as barber at the Imperial Austrian court. The family connection elapsed in 1934 when the Count's son died and Mr Frederick Osborne took over the business. A ladies' hairdressing side catered for Girton and Newnham girls but was discontinued during the war 61 08 31a [446.16.8]

1961 Station Road : Ketts house demolished, Kett House built [IC.5.5,6.7]

1961 Ram Yard cottages (pic), demolition area [6.17,6.22]

1961 Park St alterations [6.18]

1961 The 'promontory', a building that formerly housed Prziborsky's hairdressing shop, with Ram Yard to its left and Round Church Street to the right, is to be cleared by the City Council to

provide a wide lead-in to the new car park in Park Street. The cottages are not very beautiful and most have been condemned as unfit by the Public Health Department. But they are home to a small community of tenants including Tim Eiloart who crossed the Atlantic in a small balloon, Jasper Rose the artist-don who has a studio there and Graham Pollard, a numismatist at the Fitzwilliam Museum. Their lives are interconnected, they give supper parties and meet together to play Bach in an upstairs room. But now they must move elsewhere 61 03 10 & a

1961 The whole of 'The Broadway' on Mill Road is being put up for sale. It runs from Cavendish Road to Sedgwick Street and is the largest shopping area in the eastern half of Cambridge. It was built 23 years ago and consists of 14 shops with eight flats above. The London company that owns the site says it is a good investment: the properties currently realise £2,848 a year in rents which will increase to more than £4,000 in three years time. 61 05 09

1961 Herbert Robinson's premises in Regent Street were erected in the early 1930s to the design of George Banyard, a well-known architect responsible for a number of Cambridge's principal buildings. They comprise extensive showrooms, garages and workshops together with substantial office premises known as Llandaff Chambers. Now they are transferring to spacious new premises on Newmarket Road and the property is being offered for sale. The firm are retaining the electrical showrooms at 14 Regent Street 61 07 20 [12.8]

1961 A bold scheme to transform Cambridge Market Hill into the 'finest piazza in Europe' would involve banning traffic in King's Parade, demolition of a few buildings on the corner of St Mary's Passage and the complete clearance of the Market Place. The screen in front of King's college would be removed and the Senate House and Law Department buildings linked together to form one magnificent spacious vista, says architect G.M. Vickers 61 12 01b

1962 Park St & Round Church St alterations [6.19]

1962 Norfolk St - 60 Norfolk St demolished [6.20]

1962 old buildings : call for negotiation before destruction [6.21]

1962 King St demolition [7.1]

1962 Market St - Macintoshes demolition [7.2]

1962 Castle Street : demolition of cottages [4.8]

1962 King Street : almshouses demolished [4.14]

1962 Park Street : design for new Union Building [4.12]

1962 Prospect Row : demolished, Free Press alone in sea of destruction [4.10]

1962 Station Road : Rattee & Kett building demolished to reveal Kett House [4.9]

1962 An inquiry into the Bradmore Street area heard that 119 houses between Petersfield, East Road, Broad Street and the CCAT were unfit for human habitation and should be demolished under the slum clearance plan. The area would be used for extensions to the college and the Mill Road Sorting Office. But six householders objected. One lady had lived in her home for 50 years, she was 89 and blind and would find it difficult to move. Another had been deaf and dumb from birth; she had lived there for 54 years and was frightened at the prospect of being relocated. 62 05 03a

1962 The clean-cut façade of the offices of Messrs Ellison & Co. show up well at the end of the little court in the passageway between the Lion Hotel and Heffer's bookshop in Petty Cury. The offices were acquired by the Clore-Cotton Group's City Centre Properties when they bought the premises occupied by Heffer's and the freehold of that part of the Lion Hotel formerly held on lease from Emmanuel College. The area is scheduled for redevelopment as part of the Lion Yard scheme. 62 05 10a

1963 Mill Road : Playhouse Cinema demolished for Fine Fare Supermarket [IC.7.5]

1963 Until a few weeks ago there was a farm in the heart of Cambridge where cattle grazed in fields not a stone's throw from the University Library. Now Mr Dale of Grange Farm, Adams Road is moving and the livestock and implements have been sold. In 1939 the farm, owned by St

John's, extended to some 200 acres but part of this was used for the building of a repair shop and later Churchill College. The farm house itself is large and rambling with 14 rooms and an absolute contrast to the nearby house on Herschel Road recently built by Lord Rothschild 63 05 27

1963 Parts of a tall building overlooking Cambridge Market Square are having to be evacuated because it is a danger to both occupants and the public. Some movement has taken place at 15 Market Street which is partially occupied by Watches of Switzerland. Premier Travel and the United Dominions Trust have already moved to temporary offices. Workmen will start shoring up the building from the inside to stabilise it and remove the danger 63 08 03

1963 Ferry Path houses should be preserved – 63 08 16a

1964 Planned buildings for St Catharine's and King's colleges – 64 02 29 [446.8.1]

1964 Fears that the new ultra-modern building in Cambridge market square would bring an outcry from nearby traders have not materialised. Instead many of them say that the building, which replaces Mackintosh's the ironmongers, is an example to be followed. There will be shops on the ground floor and luxury flats above. Mr D.F. Yates, manager of Crown Wallpapers thinks it is an example of what neighbouring premises should look like. Mr A. Hall manager of Saxone Shoe Company agrees. But Mr Victor Balham of Bacon Bros the tobacconists does not think it the best of contemporary architecture. 64 11 16a Market St - Macintosh replacement building opens - new ultra-modern, next Watches of Switzerland [494.4.17]

1964 Wray's Court, Sidney Street to be demolished – 64 02 29

1964 Buildings in Jordan's Yard, Round Church Street and Bridge Street should be acquired by council for preservation and extension Park Street car park – 64 11 27i

1964 Sir – Magdalene College's plan to pull down a row of cottages, nos.8-18, in Northampton Street and replace them with a garden would alter its character and leave a gap in this distinctive part of old Cambridge. The row at present makes a beautiful curve, a fitting foil to the more splendid Cory House and no.13 Magdalene Street. In view of the college's highly successful treatment of Magdalene Street where the aspect has been retained, I hope they will find some other solution short of complete demolition – Elizabeth Harland 64 12 28

1965 King St - Jesus announce plans redevelop King St includes rerouting Hobson St traffic - 65 06 29 [494.5.2]

1965 Laurie & McConnal modernising the whole of their shop frontage in Fitzroy Street; new display windows will replace the arcade-type ones there since 19th century – 65 07 30a

1966 Old Post Office, Petty Cury, Ministry of Pensions manned by a single clerk in room that precious housed counter activities; small corner occupied by National Savings Movement. Wide corridors lead to Overseas Students Club used by 10-12 students. Petty Cury shops well-maintained but accommodation above ground floor level has been condemned for years. Must all be demolished – letter – 66 07 15

1967 Emmanuel street demolition [7.3]

1968 Bene't Street : property adjoining Barclays Bank demolished [IC.1.16]

1968 Corn Exchange Street : Masonic Hall demolished [IC.3.8]

1968 Trinity Street : Matthews site redeveloped for Heffers [IC 12.2]

1969 King St : Jesus plan development [7.4]

1969 Trumpington St : 300 year old stables behind Lt Rose demolished for student accommodation - perhaps Hobson's [446.17.6]

1969 Trinity St - Matthews old shop (formerly largest grocery shop in Cambridge) to become Heffers while large shop Sidney St (formerly Eaden Lilley) becomes Sainsbury who want to replace antiquated premises Sidney St with 2 new shops - Sidney St & Burleigh St area [494.5.14,5.15]

1970 Kite : comprehensive development agreed [2.4]

1970 Lion Yard : plan accepted [2.3]

1971 Elizabeth bridge opened [2.5]

1971 Jesus Lane demolition [7.4]

1971 King St : architects slammed for 'inhumanity', have ruined environment , Architectural Review claims – 71 09 04

1971 Bridge Street debacle: the two faces of Cambridge – laments crumbling buildings; feature 'A city in shackles' – 71 06 10 & a

1972 Clement Place - thatched cottage demolished [7.5]

1972 Petty Cury : pedestrianisation [2.6] Councillor Gough-Goodman dines in Petty Cury as no entry experiment starts – 72 02 01, 01a

1972 The preservation and restoration of the historic frontage of 10-16 Bridge Street, Cambridge is assured in new plans for a 40,000 sq.ft. development by the Scottish Mutual Assurance Company. An earlier version of the scheme was turned down after a public inquiry. It involved knocking down the corner building and replacing it with a new structure which the inspector at the inquiry described as "aggressive in design". The new plans preserve the Bridge Street frontage. The scheme occupies a prominent site at the corner of Round Church Street and Bridge Street which has been a topic of heated discussion between developers, planners and preservationists for several years c72 08 29

1972 Norwich Union building, corner St Andrew's Street and Downing Street – history – 72 01 18 & a b

1972 Shelley Row redevelopment and archaeology of area – feature – 72 01 28

1975 St Andrews Hill : Bun Shop & Whitmores bottling factory demolished [IC.1.1]

1976 Bridge St : lost facade comes to light in restoration [446.9.5]

1977 Bridge street : new development & restored frontage [4.26]

1977 Bridge St - The new Bridge House office block and restored 16th-century buildings in Bridge Street, Cambridge, are a landmark and inspiration, said the Mayor, Coun Bob May, when he opened the £1.3 million redevelopment. "If only the architects had been involved at Lion Yard then things might have turned out differently there", he said. He praised the skill with which the historic and environmentally important site had been handled by the Scottish Mutual Assurance Society and its architects, Saunders Boston of Cambridge. It was an outstanding example of how a new building could be fitted into an old environment and how old buildings could be preserved. CDN c 19.4.1977

1979 Rose Crescent : rebuilt 'best planning gain for long time' [2.14]

1980 Aussex Street shops – 80 12 16

1982 Bridge St - One of Cambridge's most successful rebuilding schemes, Bridge House in Bridge Street, has received a top conservation award. The project involved rebuilding and refurbishing 16th century buildings which had fallen into a sad state of decay by 1970 – Tudor

houses no longer fit to live in and derelict workshops. It was judged to be an outstanding piece of restoration work: the frontage was preserved and behind it was built a new office-block which can hardly be seen from the street. 82 10 14a

1983 Hobson St : County Hall sold to college in one biggest deals in city location many years, £1.25M [446.13.7]

1983 New Square : returned to grass [IC.7.20]

1983 Coronation Street used to be a real community with two breweries, three pubs, a general store, hard-ware shop, tailors' and a greengrocer's. Small houses with pretty cottage gardens lined the street and the inhabitants knew each other's business in the nicest possible way. Change came when the council pulled down a line of old homes and rehoused many streeters in nearby flatblocks. More work bulldozed the Victorian streetscape and now it is one of the most modern-looking in Cambridge, clean and possibly rather sterile. 83 02 22a

1984 Kite : Queen opens Grafton Centre [2.7]

1986 Corpus plan facelift when lease run out 1987 - new rooms, offices, revamping buildings [446.14.1]

1986 Quayside : demolition [IC.10.6]

1987 Developers are eying-up property in Newmarket Road. They have approached Greene King about acquiring the Seven Stars, Corner House, Five Bells, Rose and Crown and Bird in Hand public houses Already Eastern Gas has sold off more than three acres of the former gas works and the disused Chapman and Arber scrap yard has also attracted interest. Gray's the tobacconist has sold up, Jack Reynold's sweet shop closes next month and Grosvenor will soon start work on the old Carioca nightclub site which will house offices and small businesses 87 09 14b

1987 Ferry Path houses once threatened with demolition – review – 87 11 05a

1988 Market St - plan to reshape Market Passage & link with Rose Crescent to form modern shopping precinct ¢CEN 25.6.88

1988 Regent St - in the last few years Regent Street has rapidly changed from retail trading to mainly commercial and therefore ceased to attract the shopper" ¢CEN 23.9.88

1989 Market Hill - Marks & Spencer open although city refused planning permission 3 years ago ¢CEN 14.9.89

1990 Quayside shops and office development formally opened by Duke of Edinburgh – 90 07 18a

c.44.6 : street changes A-Z (to 27 Jul 2009)

Arbury Road : demolition of house at entrance to Manor Farm, later site of Campkin Road [IC.1.2]	1961
Barnwell - A London newspaper describes Barnwell as a slum area of Cambridge chiefly inhabited by brickmakers; it claims there is little traffic along the road but within four minutes walking one passes 14 alehouses, some positively next door to each other. However in recent years the area has undergone a great improvement with the building of the Abbey Estate, and the amount of traffic has increased. But no one will gainsay the comments on the number of superfluous public houses. 06 12 29d	1907
Barton Road : Newnham Villa demolished to allow road straightening [IC.1.13,4.22]	1937
Bene't Street : cobbles to be replaced with wooden paving [4.17]	1906

It was judged to be an outstanding piece of restoration work: the frontage was preserved and behind it was built a new office-block which can hardly be seen from the street. 82 10 14a	1982
Bridge St - Sir – I have traced the history of Blackmoor Head Yard, Bridge Street, for nearly 100 years, and find it has been the custom for occupants to hang their washing across the yard. Laundresses have lived there and dried everything in the same way. Dr Dennis Adams had the stables at the bottom of the yard and when our King was up at Cambridge he often used to come there and hold the linen up with his stick to pass under it without making any fuss at all. Where must we dry them now? In the bedrooms? – S. Collingwood 08 05 02b	1908
Bridge St - The new Bridge House office block and restored 16 th -century buildings in Bridge Street, Cambridge, are a landmark and inspiration, said the Mayor, Coun Bob May, when he opened the £1.3 million redevelopment. "If only the architects had been involved at Lion Yard then things might have turned out differently there", he said. He praised the skill with which the historic and environmentally important site had been handled by the Scottish Mutual Assurance Society and its architects, Saunders Boston of Cambridge. Bridge St : lost facade comes to light in restoration [446.9.5]	1976
Bridge Street : demolition progresses [4.25]	1939
Bridge Street : Evans Passage demolished, demolition for cycle sheds Castle St Police houses & Recreation Room constructed [IC.2.17, 2.19]	1937
Bridge street : new development & restored frontage [4.26]	1977

- Bridge Street : road widening [IC.2.1] 1928
- Bridge Street : rumours that St Johns to build & tenants under notice to quit - "have heard same story last 25 years [5.14] 1914
- Brooklands Ave - It was an attempt to make a road from Hills-road to Trumpington-road. At present the greater part of the Avenue was open but it was in regard to the smaller part at the Trumpington-road end that the application was made. At the present time there was a gate fastened there and kept locked by the owner. He understood that people going to houses in the Avenue were allowed to go though and he could understand that the gentleman would like to keep it a quiet place. Personally he would oppose it if he lived there. CDN c 12.3.1922 1922
- Castle St - A planning inquiry into who owns a garage in Castle Street, Cambridge, came to an abrupt end when an agreement was reached. Mr L.N. Reynolds will be allowed to pull down two condemned cottages and erect a paint store. The whole of the site was ugly and it would not destroy the amenities of the area. The County was interested in it for 'local government purposes' as it allowed a clear view of Castle Mound. 56 02 01 1956
- Castle St - Fire gutted Mr Huggins sweet and confectionary premises at 51 Castle Street, just beyond the County Shire hall, Cambridge. Neighbouring shopkeeper, Mr Clayden, broke down the door and tried to extinguish the flames with mats while others threw buckets of water on it before the fire brigade arrived. The shop stood in the midst of some old properties which were in great risk of being destroyed, but they escaped with scorched walls. 1908
- Castle St - Sir – a report in the News says a new public house is to be built in place of the Three Tuns in Castle Street 'to fit in with the building going on in the neighbourhood'. Already quite a third of this district has been depleted of its residents by transferring them to new estates far away and then pulling down their old homes with a consequent detriment to trade. While agreeing to the demolition of uninhabitable houses I would like to know when building is to commence on the many plots of land which now lie derelict and so bring back some of the lost trade to the district – 'Tradesman' 34 93 96 1934
- Castle St - Sir – what good will be served by the narrowing of Castle Street? For as long as I can remember there have been cobbled areas alongside the pavements and cars have stood on them to avoid obstructing the main road. Now kerbs are being placed there. I regret the loss of one of the old-world features which used to make Cambridge an interesting town, though such things seem to count for little nowadays – A.S. Ramsey 30 07 12a 1930
- Castle St - The junction of Castle Street and Northampton Street, Cambridge, was continually congested and the corner ought to be improved. The council wanted to demolish a cottage and widen the road, but the owner wanted £260 for a property that a few years ago was worth £120: that was too great an increase 06 06 14a-c 1906
- Castle St : Cambridge Paving Committee had approached the vicar and churchwardens of St Giles' church to ascertain whether it would be possible to acquire a portion of the churchyard for the widening of Castle Street. They would agree provided that the work of excavating and collecting human remains be screened by a hoarding & the bodies reverently re-interred. Chesterton Road corner was a most dangerous one and when the improvement was carried out one corner out of the four would be cut back. 02 07 16 1902
- Sir – the de-population of Castle End has brought a serious decline in trade in this district. Slum clearance has seen the departure of many young families to the new residential estates in other parts of Cambridge and we are left with the old people whose requirements are practically nil.

When a house is vacant it is condemned and pulled down so consequently no new residents come to take their place. Some sites have been empty for years and are growing a plentiful supply of weeds and thistles. When are we going to have new houses built on these vacant sites – Tradesman 35 12 16

Castle Street : demolition of cottages [4.8]	1962
Castle Street : to purchase property to widen [1.7]	1901
Cherry Hinton Road - Ring road from Cherry Hinton Road across Coldham's Lane under construction – photo – 31 10 02t	1931
Chesterton Lane : buildings at junction of Magdalene St demolished [IC.3.2]	1912
Christ's Lane - A proposal to close Christ's Lane and provide an alternative footway between Drummer Street and St Andrew's Street was approved in 1954. But now Christ's College have proposed an alternative consisting of an arcade leading into a central courtyard then through another arcade to Drummer Street. The council would be responsible for maintaining, cleaning and lighting it 56 11 27a	1956
Christ's Lane : closed [4.5]	1960
Clement Place - Cambridge's only thatched cottage, Clement Place, has thatch renewed [5.4]	1949
Clement Place - thatched cottage demolished [7.5]	1972
Coe Fen : road opened [3.5]	1926
Coe Fen : scheme for road across approved [3.2]	1923
Corn Exchange St Demolition is taking place in Corn Exchange Street as part of the final scheme for the redevelopment of the area. Although final plans are as yet unsettled empty offices are being demolished and the land will be used as an extension to the Lion Car Park. A number of dilapidated houses in Park Street that were condemned before the war are also being pulled down. 56 02 28b & c [3.18]	1956
Corn Exchange Street : Masonic Hall demolished [IC.3.8]	1968
Coronation Street used to be a real community with two breweries, three pubs, a general store, hard-ware shop, tailors' and a greengrocer's. Small houses with pretty cottage gardens lined the street and the inhabitants knew each other's business in the nicest possible way. Change came when the council pulled down a line of old homes and rehoused many streeters in nearby flatblocks. More work bulldozed the Victorian streetscape and now it is one of the most modern-looking in Cambridge, clean and possibly rather sterile. 83 02 22a	1983
Downing Street : building to start on corner of St Andrews Street : site cleared months ago, have needed police to regulate traffic since view obstructed by hoardings [4.15,4.16]	1905
Downing Street : Downing Court (south side near St Andrews Street) demolished [IC.3.13]	1913
Downing Street : old Corn Exchange demolished [2.9,5.5]	1951
East Road : 91% of properties in "short life" or "no life" categories - 100 years old & in poor condition propose East Road as traffic route [3.11]	1952
East Road demolition – 56 02 10a & b [3.17]	1956
Elizabeth bridge opened [2.5]	1971

Emmanuel St - An agreement had been made between the Borough Council and Emmanuel College for the closure of Emmanuel Street and the creation of a new road further north. As a result the college had taken no steps to erect new buildings on the site of two dilapidated houses that had been pulled down and had lost ground rent for several years. Now the council had changed its mind. They should make compensation by providing, free of cost, a subway to link college property on either side of Emmanuel Street 06 05 17b & c	1906
Emmanuel St - Miss Kathleen Payne, 76, is retiring after a lifetime in the newsagents' business as her shop in Emmanuel Street is to be pulled down. It marks the end of one of Cambridge's familiar landmarks. The business was started by her father who remembered selling his first C.D.N. in 1888. Miss Payne has lived there all her life & recalls when chickens used to run down St Andrew's Street before the days of super shops, large cinemas and motor buses 55 07 02	1955
Emmanuel St : Southgate Lodge & house adjoining being demolished for new wing of Emmanuel College - are only modern houses in street, built 40 years ago by R.R.Rowe as architects office. Borough had intended to swap this Street for new land on which could have built another road, CDN campaigned against & proposal dropped; however to install underpass [6.2]	1911
Emmanuel Street : demolition [3.13,3.14]	1955
Emmanuel Street : last picturesque houses on north side of new subway disappear [5.16]	1914
Emmanuel Street : redevelopment on St Andrews Street corner [4.3]	1959
Emmanuel Street : redevelopment plans [3.12]	1954
Emmanuel street demolition [7.3]	1967
Fitzroy St - An enquiry heard that Cambridge city council had wanted to purchase land at the junction of Fitzroy Street and Wellington Street, pull down the old houses and use the land to re-site industry displaced from the East Road area. They offered to pay the current price but the owner, a former chairman of the Council's Finance Committee, said that if the land had potential for light industry then the price should be higher. Eventually negotiations broke down. Now he applied to redevelop the area, but the council opposed his plans. 56 04 19a & b	1956
Fitzroy St - Reston House, Fitzroy Street – John Reston, Master of Jesus 1546 bequeathed land which sold in 1956 to fund building - 58 05 10a	1958
Garry Drive, a private street and a cul-de-sac just off King's Hedges Road which ends at the railway, was constructed by a Mr Naylor. He put down kerbs and channels and in May 1939 was contemplating finishing the road himself, but the war intervened. He then left for Australia but his wife owns three properties and has written from Melbourne objecting to the council's proposed charge for making up the road. 56 11 10b	1956
Gothic Street : tenants petition re proposed demolition [2.8]	1949
Gothic Street Clearance. Work is under way to clear sub-standard houses in Gothic Street and Doric Street, Cambridge. The site will soon be in use as a car park and will accommodate about 150 cars. It will have a temporary surface which will later be replaced with a permanent surface of tarmac. 58 05 09	1958

Grange Rd - Corpus Christi college is to auction 'Pinehurst' and eight acres of land facing Selwyn College, close to the new University Library. There is every reason to think that apart from preventing the covering of the site with ordinary houses, its purchase for collegiate use would in time be found to be a very wise step. The vendors may be trusted to give the friendliest consideration to any proposal that may tend to the advantage of the college. 32 04 15c	1932
Grange Road proposed new road, Adams Road – 33 04 18 & 33 94 21	1933
Guildhall Street : proposed new thoroughfare [2.19]	1897
Hills Road - Many residents have been plagued by the clouds of dust raised by motor cars and other traffic. Dust-destroying measures have usually involved evil-smelling solutions but now Cambridge is to experiment by pouring boiling tar over the surface of Hills Road and sprinkling it with granite chips. The section chosen where the wood paving ends near Brooklands Avenue, but it carries heavy traffic and is constantly watered so the new surface may peel off. 06 09 08c	1906
Hills Road : houses demolished to make way for Highsett [4.1]	1958
Hobson St : County Hall sold to college in one biggest deals in city location many years, £1.25M [446.13.7]	1983

King Street : Jubys Court "insanitary" [3.25]	1889
King's Lane scheme – 06 02 23b	1906
King's Parade - Cambridge fire brigade undoubtedly saved a portion of King's Parade, St Edward's Passage and Peas Hill from destruction by fire. There are numerous old houses, warehouses, sheds and outhouses of all descriptions, many constructed chiefly of wood. It broke out at Mons Buol's bakery, 17 Kings Parade; the bakehouse was gutted and hundreds of pounds of chocolate, almonds and sugar damaged. 06 08 07	1906

King's Parade - There is praise for the improvements along King's Parade effected by the substitution of the low stone balustrade for the old hurdles and the construction of the light railings to separate King's College and Senate House Yard. All the work has been done by local labour. Messrs Coulson and Rattee and Kett have been the builders and the iron railings have been made by George Lister and Sons. 32 05 14a	1932
Kings Lane to vanish in Kings/St Caths development [446.8.1]	1964
Kings Parade : heavy railings in front of Kings College removed [3.9]	1927
Kings Parade : Kings removed railings & build wall, stone by Rattee & Kett, railings by George Lister to separate Kings from Senate House Yard [1.4,1.16]	1932
Kings Parade : Mr Sadd moves business to St Edwards Passage thus ending the Sadd & Greef juxtaposition of shops in April, falls from Kings Sept [NI.3.17]	1914
Kite : comprehensive development agreed [2.4]	1970
Kite : Queen opens Grafton Centre [2.7]	1984
Lensfield Rd - The central island containing the underground public convenience at Hyde Park Corner is to be removed to make way for new traffic signals. The toilets might be resited on Lensfield Road where trees and a fence will provide a screen from the Scott Polar Research Institute. But the University suggests that Parker's Piece would be a better location. 57 04 16a	1957
Lensfield Road : demolition for new Chemistry Labs [IC.6.2]	1951

Lion Yard : carpark plans [3.6]	1951
Lion Yard : plan accepted [2.3]	1970
Long Road : windmill pulled down [IC.6.4]	1898
Magdalene St - Another example of the 'new Cambridge' in the making is the extensive site on which Magdalene College intends erecting an imposing new wing. It is at the rear of the Pickerel and Cross Keys yards originally occupied by Bird's vinegar and mustard factory. Mallory Court will provide the principal access but eventually a complete transformation will be effected by the demolition of all the property between the bridge and Northampton Street making Magdalene Street a broad and handsome thoroughfare. 30 09 03c	1930
Magdalene St - Cambridge City council has decided not to proceed with their proposal to widen Magdalene Street and reconstruct the great bridge. They had heard objections by the University and a statement on behalf of Magdalene College & believed that with mutual co-operation between the city and colleges some of the causes for the present traffic congestion could be removed. But if it became a choice of either the spine relief road or of widening Magdalene Street then they would choose the latter alternative. c52 10 30	1952
Magdalene St - Large new buildings designed by Sir Edwin Lutyens are part of a comprehensive extension scheme by Magdalene College on land originally occupied by Bird's vinegar and mustard factory. For two years it has been one of Cambridge's biggest building contracts but the comparative obscurity of the site has kept it out of the public eye. Eventually the whole of the west side of Magdalene Street from the bridge to Northampton Street will be cleared for reconstruction with a more imposing bridge and a further college wing at right angles to the present one. 32 04 13	1932

Magdalene St - Magdalene College hopes that a start will soon be made on the building of a new court on the opposite side of the Street. Plans have been drawn up for a three-sided brick court open to the river, traditional in style. The flank parallel with Magdalene Street will not interfere with the existing shops, but the thoroughfare is long overdue for widening and from the remodelled bridge there would then be a noble prospect of the new court with a lawn or gravel forecourt separated from the pavement by a low parapet. c28 03 11 1928

Magdalene St - Sir. Twenty-five years ago Magdalene College started a scheme which might have involved the widening of Magdalene Street and the removal of buildings opposite the college. But it does not now contemplate the completion of the scheme and is now strongly opposed to the widening of the street and the demolition of the buildings on the west side. The College would be strongly prejudiced if it should be divided by a street similar in character to the widened part of Bridge Street and would strongly object to such a change of character and loss of amenity in the neighbourhood – Henry Willink, Master. CDN c 21.1.1952 1952

Magdalene St - The County Development Plan public inquiry took a dramatic turn when Magdalene College announced it had decided to oppose proposals to widen Magdalene Street. The “donnish mind” did not often descend to take part in proceedings of this kind but this is a “bad plan and would be a disaster both to the University and the City of Cambridge”, their counsel said. “You should not have motor traffic moving so fast that the lives of pedestrians and motorists are imperilled”. Everyone wants Cambridge to remain a place in which the pedestrian, the cyclist and the motorist are more or less on an equal footing. c52 10 23 1952

Magdalene Street : Magdalene College plan to demolish west side, doubling width; first stage implemented with Fisher Lane demolition [2.10] 1932

Market Hill

1934

Gonville and Caius College’s scheme for the complete rebuilding of the block of shops and houses on the north side of Cambridge Market Hill has been finally approved. At present the site from Rose Crescent to St Mary’s Court is occupied by a group of houses, mostly of the 18th century. Their disappearance will be regretted, even by those who knew how dilapidated they had become behind their neat Georgian facades. But the whole effect of the completed block should stifle these regrets. The shops will be set back seven feet with upper rooms carried on slender pillars.34 08 01

1953

A decision not to rebuild the Conduit head in Market Hill, Cambridge was described as a retrograde step by Ald James. “I know it is the fashion to run down Victorian architecture but I think it was very seemly. I think we should rebuild it in the same style”. But Ald Priest said “If in ten years’ time people see pictures of the Conduit as it was, there will be nothing to prevent them from replacing it by photographs. The majority of people are quite satisfied and the Secretary of the Preservation Society has written to say how nice we have made it”. c53 10 16 1989

Marks & Spencer open although city refused planning permission 3 years ago cCEN 14.9.89

	1905
Market Hill - The condition of the stone of the conduit head on Cambridge Market Hill has been found to be much worse than anticipated during recent demolition work and so the Council will be recommended not to rebuild it. The condition of the stone was such that the only part which could be safely re-used was the four pillars and the cost of restoration would be at least £4,000, double the previous estimate. They propose to loan the carved figures from the conduit to the Folk Museum. c53 10 15	1953
Market Hill - top of fountain in Market Hill removed - 50% material useless, would cost £2,200 to rebuild; figures removed to Folk Museum [5.1,5.6]	1953
Market Hill - What is probably the largest single deal in Cambridge business property ever known has just been completed. A well-known local young man has purchased property with frontages in Market Hill, Petty Cury and Sidney Street and this will be developed by a company consisting of Cambridge people. It includes premises occupied by the Craft Shoe Company, the Cambridge Chronicle offices and printing works and Boots the chemist. As Messrs Boots recently secured a large amount of property in Petty Cury and Sidney Street it would appear that big changes will be seen in this part of town when both sites are developed. c28 10 31	1928
Market Hill : big rebuilding scheme approved, new college rooms & shops to be erected between Rose Crescent & St Mary's Court [1.1,1c.6.17]	1934
Market Hill : block of property 2-3 Market Hill & 16-18	1903
Market Hill : Guildhall canopy removed as dangerous [IC.6.14]	1933
Market Hill : rebuilding on corner of Rose Crescent [IC.6.15]	1935
Market Hill : roads around Market Square widened [5.12]	1911
Market Passage - Since the Cambridge Conservative Club in Market Passage had been destroyed by fire there had been many busybodies who knew exactly what was going to happen to the club premises and the site. The Chairman could now tell them: it was going to be rebuilt and rise like a Phoenix from the ashes. A very satisfactory arrangement had been made with the Northern Insurance Company and they had today received a cheque from the company. CDN c12.2.1927	1927
Market St - Changing face of Cambridge – Stetchworth diaries Market Street shop – 58 08 28	1933
Market St - Macintosh replacement building opens - new ultra-modern, next Watches of Switzerland [494.4.17]	1964
Market St - Macintoshes demolition [7.2]	1962

Mill Pool - Kings Mill demolished [4.30]	1927
Mill Pool - Kings Mill site replacement [1.12]	1928

- Mill Road Sir – The Mill Road footbridge over the railway line was opened to the public on Monday August 3rd 1889. I was the last one to take the keys of the gates to the station – William Nelson. Sir - The iron footbridge over the railway on Mill Road had wooden steps and gave access to the open fields beyond it. In fact, so countrified was the area that when the Royal Standard was built it was known as ‘Apthorpe’s Folly’ from William Apthorpe the brewer who built it. The bridge now stands on Coldham Common where it spans the Newmarket Line – H.D.C. 35 01 26 1889
- Mill Rd - Up to last night there was a cluster of buildings, workshops, tool-sheds and fowl houses at the apex of a triangle formed by property facing Mill Road, Hemingford Road and Belgrave Road, Cambridge. Today nothing remains but a heap of charred timber and twisted iron. Fire has made a clean sweep of the evidences of industry of several inhabitants and caused damage of about £250. Mr G. Woolfenden, an electrician, has lost a workshop. Most people living in the three roads have a wooden erection of some kind at the end of their gardens and those burnt down stood side by side or back to back in an area covered by 20 square yards. CDN 17.11.1904 1904
- Mill Road - Cambridge Corporation’s new Mill Road storeyard is nearing completion on land behind the Free Library. Here material for the repair and making of roads is stored, vehicles housed and mended and appliances for any contingency kept in readiness. It has a siding to the railway for granite or cement, an open shed for refuse vehicles and stables together with accommodation for two steam rollers. There are blacksmiths, carpenters and wheelwright’s shops and a men’s mess room 05 12 09a & b 1905
- Mill Road - Fire gutted the Mill Road Boot Stores adjoining St Barnabas Church, Cambridge. The flames rose to a great height and melted some of the lead of the windows of the church. The building was a one-storeyed erection, largely composed of wood. A number of wooden packing cases at the rear formed a source of danger as they connected with a thatched cottage and a stonemason’s yard adjoining was also seriously placed. 06 01 0 1906
- Mill Road : bridge opened [2.21] 1889
- Mill Road : Playhouse Cinema demolished for Fine Fare Supermarket [IC.7.5] 1963
- Mill Road : Romsey Town Labour Club opened [IC.7.2] 1928
- Mill Road : Salisbury Working Mens Club built [IC.6.19] 1891
- Milton Rd - Cambridge councillors have received consent for a new road from Milton Road to Histon Road at a cost of £18,135. St John’s College would give the land which was required for housing purposes, it would be one of the best estates and the frontages would sell at very high price. Grants have been received for King’s Hedges and Green End Road as part of the unemployment scheme with one-third of the labour being imported from the distressed areas. 30 07 25d 1930
- On one of the finest main roads of Cambridge has arisen a new garage that has been named ‘Riley House’. No hastily conceived building this with its rows of pumps and oil cans bedecked in signs and colours. Here is a garage of dignity and restraint, logical in planning and design, fitted to be the new local headquarters of ‘the Finest Light Car in the World’. Here one can fill up with petrol completely under cover while the workshop is equipped with the latest pressure greasing plant. Tom Cox Motor Co., Chesterton Road, Cambridge – Advert 35 01 19 1935
- New Square : converted from grass to car park [IC.7.17] 1931
- New Square : returned to grass [IC.7.20] 1983

Newnham Mill : demolition of 2 nd chimney [6.14]	1925
Norfolk St - 60 Norfolk St demolished [6.20]	1962
Norfolk Street : Labour Party Hall opened [IC.8.8]	1927
Northampton St - Collins Passage, off Northampton Street, consisted of a number of very dilapidated houses closely packed together. They had low ceilings and the floor was insecure. There was no ventilation behind and a high brick wall at the front so they got no sun at all except for half-an-hour at the height of summer. They were unfit for human habitation. A good many other premises in the area were defective but did not justify wholesale demolition. 06 04 19c	1906

Park Street : demolition, includes no 60, the home of Spurgeon [3.18,3.19]	1956
Park Street : design for new Union Building [4.12]	1962
Peas Hill. The controversy surrounding the Central Hotel in Peas Hill, which King's College want to knock down and replace by a new hostel for students has reached a new stage with the publication of a booklet. The St Edward's Committee was established when it was announced that the Central Hotel, a largely 17 th -century building forming an integral part of a square around St Edward's churchyard, was to all appearances doomed. They believe it could be preserved and are pressing for a public inquiry into the proposals. 59 12 21c & d	1958
Peas Hill. There are a quarter of an acre of tunnels under Peas Hill which were used as air raid shelters during the War. They were wired for electricity, lavatories were installed and wooden seats fitted in the tunnel recesses. Oil lamps were kept close at hand in case of emergency. Quite a number of people used the shelter during day-time raids and some slept down there when there was night bombing. 'Roadsters' used them every night to sleep. They were terribly damp when first used but after a few days became quite comfortable. 59 12 17	
Peas Hill - King's College announced a new rebuilding scheme in the city centre which will mean the demolition of the Central Hotel and café to provide more accommodation for students and a better headquarters for the Cambridge branch of the Midland Bank. The Bursar said the structure of the existing building is in a very parlous state and they could not for structural safety do less than rebuilding completely the whole interior. However this would only be forcing new wine into an old bottle so they had commissioned the design of a new building by Mr K.W, Capon of Architects' Co. Partnership 58 12 12c	
King's College has replied to criticism of its plans to demolish the 17 th -century Central Hotel on the corner of St Edward's Passage and Peas Hill. Whilst the Midland Bank premises are scheduled as an ancient monument, the St Edward's Passage premises are not. The College has considered eleven schemes for the site, some of which would preserve the façade, but the preservation of the interior was a hopelessly haphazard proposition. Their architect has taken infinite care to ensure the new building preserves the essentially domestic character of St Edward's Passage, says Noel Annan, the Provost. 60 01 08b	1960

- Peas Hill : houses on west side demolished for Arts Theatre [IC.8.15] 1935
- Peas Hill fire [6.10] fire at Corporation property Peas Hill, used by Bell as corn merchants premises [2.4] - CDN 3.6.1904 1904
- Petty Cury - Sir – the alarm about the old Falcon Inn, Petty Cury, being demolished unrecorded seems to me unnecessary. Certainly within the last 40 years I have sent out almost as many drawings of it, to say nothing of the etchings. It, with the old Wrestlers Inn, has been a small gold mine to me. One noticeable thing I might mention: it was the last inn to hang out a flag as a sign that the recruiting sergeant was at home – Robert Farren c03 08 22 1903
- Petty Cury - An outbreak of fire occurred at the premises of Messrs Hallack and Bond, wholesale grocers, Petty Cury, Cambridge. About 11.18 pm smoke and flames were discovered issuing from a store room. The alarm was at once given and the horsed fire escape, tender and hose cart were soon on the scene. With the aid of one hydrant, the inmates of the building and the firemen succeeded in extinguishing the outbreak just in time to prevent a serious conflagration 05 05 02b 1905
- Petty Cury - Falcon Inn Yard, Petty Cury demolished Our attention has been drawn to the fact that another link with the fascinating past of Cambridge is being severed by the almost entire demolition of the one-time famous 'Falcon Inn'. Many years ago the front of the building, with its fine old gables facing Petty Cury, disappeared and about eight years ago the buildings on the left side of the Falcon Yard were demolished to make way for business extensions. Now the rooms on the right side are in process of demolition for extra accommodation for the Lion Hotel. The back part possessing a small specimen of the open gallery remains – CDN 11.8.03 1903
- Petty Cury - Heffer's wonderful new shop in Petty Cury, Cambridge, is a book lovers' paradise. In the basement are 'remainders' at reduced prices while the ground floor is devoted to the latest publications and an extensive foreign literature section. A wide range of second-hand volumes occupies most of the first floor where connoisseurs of original editions will find much to interest them at prices from £5 to £250. On the second floor are oriental, foreign travel and fine art books while higher still are Heffer's own publications, many of local interest. There is a special reference department and out-of-print books service. The front design successfully combines and old-world impression with a modern style. CDN 5.12.1929 1929
- Petty Cury - Our attention has been drawn to the fact that another link with the fascinating past of Cambridge is being severed by the almost entire demolition of the one-time famous 'Falcon Inn'. Many years ago the front of the building, with its fine old gables facing Petty Cury, disappeared and about eight years ago the buildings on the left side of the Falcon Yard were demolished to make way for business extensions. Now the rooms on the right side are in process of demolition for extra accommodation for the Lion Hotel. The back part possessing a small specimen of the open gallery remains c03 08 20 1903

Petty Cury - Sir – I believe a great number of antiquarians in Cambridge will learn with regret that the Falcon Inn Yard in Petty Cury has been removed to make way for modern improvements. So quietly has the old Falcon taken flight that I fear our local photographers have not secured pictures of the old buildings and its destruction has escaped even the lynx-eyed representatives of the Press. I am consoled that I have retained my water-colour drawing of this famous inn, which I made 25 years ago for 'Old Cambridge' – W.B. Redfern c03 08 19	1903
Petty Cury : Lion purchased July 1961 by Jack Cotton & Chas Clore for City Centre properties; largest single property transaction in Cambridge; by 1964 hotel closed & just bars open [446.16.3]	1961
Petty Cury : pedestrianisation [2.6]	1972
Petty Cury : Post Office opened [3.16]	1885
Petty Cury : Veysey House demolition [2.15]	1889
Petty Cury : widening [1.19]	1934
Petty Cury has been closed to vehicular traffic during the operation of replacing the Val de Travers cement that was removed to admit the underground telephone wires. This work by Italian workmen has been watched with much interest. The material in the form of steaming hot powder is placed on its concrete bed and rammed and levelled with hot irons. The rapidity with which the stuff hardens and becomes fit for use is quite remarkable. CWN 08 09 11 p5	1908
Prospect Row : demolished, Free Press alone in sea of destruction [4.10]	1962
Quayside : demolition [IC.10.6]	1986

Sedgwick Avenue : proposed road between Newnham & Selwyn Colleges suggested by Prof. Sedgwick in letter [3.28]	1889

- Sidney St - An interesting improvement scheme will shortly be undertaken in Petty Cury and Sidney Street. Messrs Boots the Chemist have acquired extensive property with a view to re-housing their old establishment which has grown during some 30 years. Now the time is ripe to erect an emporium to provide an attractive shopping centre for patrons of all classes. The architect is Mr Percy J. Bartlett of Nottingham and his primary consideration is an external appearance that will harmonise with Cambridge's noble architectural traditions and raise the standard of commercial architecture. Building operations will commence early in the New Year
CDN 2.12.1929 1929
- Sidney St - Cambridge planners are contemplating the rebuilding of premises in Sidney Street to complete the road widening between Petty Cury and Holy Trinity Church. In 1939 the Essex Insurance Company agreed to rebuild nos 62-64 Sidney Street but owing to the war the scheme was postponed. Then in 1943 they sold no.64 to Messrs Boots who are now seeking planning permission for change of use and this is an opportune time for the scheme to go ahead. CDN c 19.1.1954 1954
- Sidney St - Demolition work has just begun on the Sidney Street corner of Sussex Street as a first step towards the most important of reconstruction scheme for the improvement of Cambridge for many years. Sidney Sussex College will develop the whole side on modern lines; within the next year an imposing block of buildings, providing shops and offices will rise. It will be connected to Hobson Street by an artistically-designed crescent and colonnade of 12 shops which will allow vehicles to pass freely in the middle of Sussex Street. The most striking feature will be seen in the further development of the north side 30 03 19b 1930
- Sidney St - Proposals to set back the line of buildings in Sidney Street would leave only two small properties jutting out between Woolworth's and the corner. There was no room for people to move on the pavement and it would be a great improvement. But Mrs Rackham said it was unreasonable to pay so much money: the owners demanded compensation that equated to nearly half a million pounds an acre. This was not new: when a building line was prescribed in King Street, property which formerly sold at £1,500 immediately fetched £2,000. 33 05 26 f & g 1933
- Sidney St - Work has begun on greatly increasing the area of Messrs Boots the Chemist's premises in Sidney Street by the demolition of the old Essex and Suffolk Assurance Company buildings. It will double the width of the frontage and the shopping area behind and provide twin entrances on to the street. The staff accommodation will be more than doubled and the facilities vastly improved. Boots believe that the staff cannot be expected to look after customers properly unless their own interests are properly served by the company: contented staff means contented customers. 59 02 12b & c 1959
- Sidney St : rebuilding, Eaden Spearing & Raynes demolished [IC.10.21] 1913
- Sidney Street : 27,380 feet in Sidney Street & Hobson Street bought by G.P.Hawkins for £32,000 [2.23] 1919

Sidney Street : widening proposed [1.2,1.19]	1934
Silver Street : demolition for Walnut Tree Court, Queens College [IC.11.15,6.3]	1935
Silver Street : houses demolished [IC.11.13]	1891
St Andrew's St - Emmanuel College has announced proposals for building a new block of shops and offices on the corner of St Andrew's Street. They will lease the property to the Prudential Assurance Company who will undertake what is by far the largest and most important commercial development since the opening of Woolworth's Stores in Sidney Street. The existing buildings will be completely taken down and a new block erected in their place with shops on the ground floor and offices above. With the parking problem so much in the forefront it will provide sufficient car parking for its occupants. Though they may be some who will regret the disappearance of the cottages in Emmanuel Street few will argue against the removal of the red brick 'giant' known as Rance's Folly with its towering storeys and overblown construction which is now used as University offices. CDN 6.8.1954	1954
St Andrew's St - Rance's Folly, the large redbrick house now being demolished in St Andrew's Street once had several lifts, four bathrooms and central heating – as well as a swimming pool. Guests even played tennis on the roof. It was built by Henry Rance who was Mayor in 1878 and 1882 – when he held council meetings in his dining room - and included a ballroom whose floor was laid by experts brought specially from Germany. Here his granddaughters were never at a loss for partners. 57 06 21 & 21a [IC.9.15,5.7]	1957
St Andrew's St - The giant new Prudential Building on the junction of St Andrew's Street and Emmanuel Street incorporates the latest building techniques with heating and hot water provided by electrical units which take power from the mains during 'off-peak' hours and store it for use during the day. Acoustic ceiling tiles provide quieter working conditions, floors are of a coloured plastic tile and decorations in pastel shades. The basement contains a large garage and special storage to cater for the large use of bicycles by staff. 58 06 18	1959
St Andrew's St new Police & fire station opens [5.2]	1901
St Andrews Hill : Bun Shop & Whitmores bottling factory demolished [IC.1.1]	1975

St Andrews Street : Llandaff House pulled down [1.17]	1932
St Andrews Street : site cleared for new Post Office [IC.9.10]	1931
St Edwards Passage bought by Barrett for £8,000 [3.23]	1903
St Johns Street : St Johns College gateway restored [IC.5.18]	1934
St Mary's St - Great St Mary's church council replied to the Corporation's plans to widen St Mary's Street. They cannot sanction obtaining a faculty for the proposed work as increased heavy motor traffic coming so close to the church will be a very real danger to the safety of the foundations and fabric. Widening the street would create a death-trap and they propose to adopt every means in their power to prevent the scheme being carried out. CDN c 4.4.1927	1927
St Peter's street : old primitive Methodist chapel & houses in hands of house breakers & others will rise [5.15]	1914
Station Road : Ketts house demolished, Kett House built [IC.5.5,6.7]	1961
Station Road : Rattee & Kett building demolished to reveal Kett House [4.9]	1962

Sussex St - There never was a time surely when there were so many works of destruction going on as at present. Little bits of old Cambridge are going one by one and elaborate new buildings are rising up in their place. Following demolition in Petty Cury and Sidney Street now we see old houses and shops in Sussex Street being knocked down. No wonder that those who come back to the town after a few years' absence express amazement at the changes they see. When we think of the bridges built at Newnham and Chesterton, of the streets that have been widened, the new recreation ground opened and the great business changes effected in the heart of the town we may well gasp. 30 03 22 a	1930
Sussex St demolition 1929-30, rebuild 1931 [6.13]	1931
Sussex Street : council decide to widen end to end to 28 feet, proposed cinema on island site [2.24,2.25]	1920
Sussex Street : island site sold to Sidney Sussex College [3.10]	1928
Sussex Street : new shops open [1.5]	1932
Sussex Street : north side demolished, rebuild similar to south side [1.24]	1936
Sussex Street : site withdrawn at £20,000 [3.8]	1927
Tenison Rd - Great Eastern House, the new British Railways office in Tenison Road, is a functional modern building with the high standard of architectural design necessitated in a University city. Shaped like a vast cube, its tiers of windows catch the light row upon row. Inside is the railwayman's dream. Gone are the rickety stairs, the walls in green or chocolate and cramped offices with old-fashioned coal fires. Instead there is light, ivory-coloured walls and glass partitions, a lecture room, bar and two billiard tables 57 12 19a, b, c [5.8]	1957
Tenison Road : council want to borrow £4,000 to build [3.24]	1888
Tenison Road : opened, all but completed [2.20,3.26]	1889
Thoday St - The origin of Thoday Street – 56 04 21b	1956
Trinity St - Matthews old shop (formerly largest grocery shop in Cambridge) to become Heffers while large shop Sidney St (formerly Eaden Lilley) becomes Sainsbury who want to replace antiquated premises Sidney St with 2 new shops - Sidney St & Burleigh St area [494.5.14,5.15]	1969
Trinity St - Trinity College has started its first large-scale works this century. They will reconstruct nos.29-34 Trinity Street with hardly any alterations to the facade. The shops will remain on the ground floor but everything above is to be reconstructed to house 43 undergraduates in a small new court. This will reduce the overcrowding resulting from the termination of military service. 57 09 14 & a	1957
Trinity Street : Matthews site redeveloped for Heffers [IC 12.2]	1968
Trinity Street : St Michaels Court built [IC.10.16]	1888
Trumpington St - St Catharine's was one of the colleges whose elaborate extension schemes met with a setback through the war. There was to have been a full elevation to Trumpington Street with a completely enclosed court beyond. Now the porter's lodge will be replaced, the cobbles removed and the whole area sown with grass to give a more balanced frontage. It is eight years since that the elm trees, which formed a grove, were cut down.	1932
Trumpington St : 300 year old stables behind Lt Rose demolished for student accommodation - perhaps Hobson's [446.17.6]	1969

Trumpington Street : buildings demolished for Addenbrooke's Outpatients Department [IC12.3]	1914
Trumpington Street : Peterhouse Hostel demolished [IC 12.5]	1927
Trumpington Street : trees in front of St Catharine's College removed [IC 12.4]	1929
Victoria Avenue : widening suggested [3.21]	1927
Wheeler St new building - old cottages swept away gaining 2 yards for thoroughfare, corner premises set back so Bell Inn protrudes prominently [6.16]	1915

1935 Demolition work on Peas Hill for the new Guildhall has led to an architectural discovery of outstanding interest. It has revealed the residence and business premises of a well-to-do Tudor merchant which was subsequently divided up into a detached and two semi-detached houses. The magnificent front was covered up with lath and plaster in the reign of Queen Anne and finished with mock bricks. Dummy eaves were also added. Now each piece has been carefully taken down and numbered for preservation and re-erection. 35 04 10

c.44.7 – bridges & ferries

Dant, Cutter ferry history and account of barge traffic – 62 08 03b & c

headlines

In 1880-81 Headley and Edwards built an iron bridge over the river near Coe Fen and in 1897-8 the sum of £411 15s was paid for Robinson Crusoe bridge. But mystery surrounds the name. Leases from 1500 call the site the Swan's Nest which, with the old stock of boats, was sold by auction in 1895. Readers recall there was previously a ferry boat. Mr Edward Goode lived with his sister in a little cottage beside the bridge and a former Chief Constable used to have a garden there. Mrs Robson loved to sit in the garden beside the boatman's house 39 08 05

1883 Fen Ditton ferry boat sinking 1883 – personal memories – 38 07 16b

1888 much debate about proposal to build new bridge (Victoria Bridge) to link Cambridge & Chesterton (which would open the way for the amalgamation of Chesterton Urban District into Cambridge) [1.16]

1888 “people of Chesterton have got Cambridge people to pay half the expense of the bridge” [1.17]

1888 poll approves bridge proposal by 2,784 to 1,754; apply for Act of Parliament to authorise construction of this and a second bridge further downstream [1.18]

1889 Sir – The Mill Road footbridge over the railway line was opened to the public on Monday August 3rd 1889. I was the last one to take the keys of the gates to the station – William Nelson. Sir - The iron footbridge over the railway on Mill Road had wooden steps and gave access to the open fields beyond it. In fact, so countrified was the area that when the Royal Standard was built it was known as ‘Apthorpe’s Folly’ from William Apthorpe the brewer who built it. The bridge now stands on Coldham Common where it spans the Newmarket Line – H.D.C. 35 01 26[1.8]

1889 Victoria Bridge foundation stone laid, November

1889 Mill Road railway bridge was built in 1889 and Percy North, the well-known chiropodist, remembers playing under the bridge arches when they were being constructed. There was a level crossing over the railway then but it was not much used because there was hardly any traffic. There was nothing beyond, Great Eastern Street and Argyle Street were just ballast pits for the railway and the only house was a large one where the Broadway stands today, he recalls. 60 08 06 & a

1890 Victoria Bridge opens, December [1.2]

1892 ‘High Back’ bridge at Jesus lock replaced by more convenient design

1893 petition for another bridge across river at Abbey road [NI.3.20]

1895 new bridge over Cam (?commentary or report) [NI.3.21]

1897 Sir - Now that the Jubilee accounts have been reckoned up it seems fitting we should start afresh the matter of the new bridge. The question of a new bridge to connect Chesterton with Cambridge at the Abbey Estate is of supreme importance. The ferryman knows no rest. All the people at Old Chesterton have to be crossed over long before the omnibuses are astir. The wheels of progress anywhere in the vicinity have moved round in the past with about the same velocity as a farmer's cart!. Is this to drag on for ever?. The advantage of another bridge over the now-sweetened Cam would be a great gain to both Chesterton and Cambridge in equal proportion - letter signed "Chestertonian c1897 08 04

1898 Sir - the new bridge at Abbey Road Cambridge has become a supreme necessity. Everyone admits it now. Boats and plants have had their day, and should be done away with. Omnibuses of first class order are unable to carry people to most convenient places, and at low prices, for the want of another bridge to bring them into Cambridge. What enormous advantages to both Chesterton and Cambridge another bridge at this spot holds out. The great increase in traffic calls loudly for another bridge. The people near the Abbey again insisted upon another bridge but the Cambridge Rip Van Winkles sleep on, oblivious of anything. Procrastination is the great curse of Cambridge, and Chesterton should take warning by keeping abreast with the requirements of this important suburb – Chestertonian c1898 04 02

1899 Sir – The population of Chesterton is mainly composed of people who have been turned out of Cambridge to make way for college and other improvements, and nearly all are employed in that ancient town. Every day brings evidence of the great need of another crossing of the Cam & that Abbey Road is the place goes without saying. The De Freville Estate, are absolutely dependent upon the old punts and other obsolete marine structures for crossing over to

Cambridge. . It must be conceded that a bridge over this part of the Cam is of the highest importance – “Chestertonian” - 1899 97 11

1901 A proposal to erect a new footbridge over the Cam between the De Freville Estate and Cambridge was advanced at a meeting of occupiers. It would put them in more direct communication with Fitzroy Street. A member of Chesterton Urban District Council thought it should be erected at the Fort St George ferry to benefit the owners of the new Central Estate; but this was a thing of the future. If they waited for this development they might wait five or ten years. They wanted a bridge for De Freville inhabitants immediately and would circulate residents for donations c01 08 13

1902 Sir – A beautiful permanent memorial of the Coronation year would be the building of a bridge at De Freville Avenue. The Avenue is planted with elm trees on each side, the houses are all substantially, and some very tastefully, built; they are all set back and have flower gardens in front, making a very attractive approach to the proposed new bridge. It would provide a safe road for children attending the best Cambridge schools and provide the nearest way to Newmarket Road and the Railway Station, thus benefiting labourers, working men, college servants etc. The more bridges there are built over the river the more surely you bind communities together to the advantage of both Cambridge and Chesterton – F.R. Leach CDN 1902 03 22

1904 moves to annul clause re new road bridge, poll opposes bridge & traffic it would cause; committee report favours Walnut Tree Avenue as best site at cost £20,000 [2.7]

1904 No reasonable person expects to find a ferryman on duty after ten at night and is reconciled to the necessity of grinding himself across the few yards of water. About midnight a husband and his wife returning from Chesterton determined to make a short cut across the river as rain was pouring down in pitiless fashion. The husband seized the handle of the grind to get to the other side as quickly as possible. But when they got to the middle the ferry stuck fast, nor would it go back no matter how hard he strained and pushed. For ten minutes they wrestled with that ferry in the pouring rain and were just about to shout for help when the unwieldy affair began to work and they got back to the bank they had left. As they walked around the road home they decided that ferries were contrivances of the Evil One CDN 19.11.1904

1904 Chesterton council considered a petition for the construction of a footbridge across the Cam between Victoria Bridge and Dant’s Ferry, subject to £200 being raised by private subscription towards the cost. But by asking for a subscription they would be setting a precedent and they would never be able to carry out public improvements without asking local occupiers to put their hands in their pockets to help them. It would be an advantage to those on the De Freville, but they all paid rates. The bridge would be an advantage, but not a pecuniary one. If it was placed at the Fort St George it would benefit a very large number of people and no ratepayer would object to a farthing rate for the project CDN 8.12.1904 [2.2]

1904 P.C. Winter told an inquest that he went to Dant’s Ferry and found a body in the water fully dressed with the head towards Victoria Bridge and the feet under the ferry boat. He raised the head out of the water but the body was caught in the chains and he could not lift it. The Coroner said that a bridge instead of a ferry would probably be better and the number of accidents would be less. The ferry boat was a private concern, people paid tuppence a week and pulled themselves across early in the morning or late at night. There was no blame, it was one of those unfortunate circumstances which had happened at the same spot before. CDN 23.12.1904

1905 Cambridge councillors were told of a fatal accident at Dant’s Ferry a few days prior to Christmas when the breadwinner of a family was drowned. It was only one of many; during the present winter at least five persons had tumbled into the water at that spot. There should be a

bridge in the neighbourhood of Abbey Road. But Victoria Bridge was not a long way from Dant's Ferry and before any bridges were built Chesterton would have to join Cambridge. 050126

1905 A meeting of Chestertonians was held in furtherance of the scheme for constructing a bridge across the Cam at the Fort St George. The Council has accepted the necessity of a bridge and will spend £500 provided another £200 is raised by private subscription. It was not a large sum for such a district. Inhabitants should remember that once it was built they would save further expense on ferries. Several promises were made on the spot and various college boat clubs will be approached. 05 02 23a

1905 The sinister hand of Death has cast its shadow over Cambridge in its most joyous mood. In the very midst of the May Week holiday three people were drowned through the capsizing of the ferryboat known as the Red Grind at Fen Ditton. Two journeys had been made after the racing, the ferry crowded each time and when the boat was ready for the third about 20 people commenced the fateful voyage. Two University men jumped on at the last moment, the ferry gave a lurch and turned turtle pitching the screaming occupants into six feet of water 05 06 12 [1.3]

1905 Words cannot describe the scene at Fen Ditton when the ferry sank. People in the grounds of the Plough rushed to the bank, one or two men plunged into the water, others seized chairs and hurled them towards the struggling mass in the river. Pleasure boats hurried and scurried in answer to frantic appeals for help and the Ditton men shoved off in their black fishing boats. Off the twenty or so who went down with the ferry all but three were saved.

05 06 12a-c

1905 Miss Violet Handscombe was engaged to Mr Thomas Day and together they enjoyed a visit to the May races. From the Plough pleasure gardens they stepped aboard the ill-fated Red Grind ferry. When it sank Mr Day became separated from his intended bride and managed to reach the bank unassisted. Eagerly he looked for his betrothed but she had become entangled with the rail when the ferry capsized; he plunged into the river again and brought her to dry land but she had been so long under water that life was extinct. 05 06 12

Miss Minnie Murkin is the central figure of the Fen Ditton ferry sinking. Today she was to have been a happy bride but now her body will be borne to the tomb. At her home in Selwyn Terrace the last few days have witnessed all the preliminary events that precede the wedding; presents have been arriving and her finance came from Swansea. He was on the bank, witnessed the upsetting of the boat and endured the agony of seeing his prospective bride dragged beneath the surface by the sinking craft. 05 06 12a-c

1905 The inquests on the three victims of the ferry sinking was opened in Fen Ditton schoolroom. The jury proceeded to the melancholy task of viewing the bodies. Those of Mrs Annie Thompson and Miss Minnie Murkin were laid side by side in a darkened room at the Plough, attired in white as for burial, and awaiting outside were the coffins. They then proceeded to a house in which Miss Handscombe was already laid in her coffin. Next they viewed the boat which had been raised from the river. 05 06 13a

1905 Licensing magistrates were told that the old ferry at the Plough, Fen Ditton, scene of the tragic sinking, would not be used again and a new boat would be obtained. The old tenant had no knowledge of boats but the new one was a lighterman by trade and understood the workings of a ferry. The old ferry was a 'death trap' and the new one must be a safe one and competent to carry passengers. 05 07 17a

1905 Mr Thomas Day, whose sweetheart, Miss Violet Handscombe, was one of the victims of the Fen Ditton Red Grind ferry disaster, has died in Addenbrooke's Hospital aged 25. He was with her on the ferry when it upset and they became separated. He reached the bank, then plunged back into the river and found her, but she later died. The shock had a detrimental effect on his physical condition and when he was attacked with illness quickly succumbed. He died of bronchial pneumonia and rupture of the lungs. 05 12 12

1909 New bye-laws relating to the illumination of chain ferry boats and barges after dark were adopted. CWN 09 12 24

1910 A Trinity College undergraduate was summoned for riding a motor cycle on the footway in Garret Hostel Lane. P.S. Merry said there were about 100 people on the bridge watching the boats when defendant rode down the lane and, without sounding his horn, went through the posts on to the bridge at a speed of five miles an hour. It was a public footpath and even if police had not prosecuted cyclists before, there was no reason why they should not if necessary. The lad said police had seen him do it before and he'd since asked at the Police Station and been told it was all right. The case was dismissed. 10 05 27b

1910 Ferry boats to be lighted – 10 07 08c

1911 Upware Ferry. At a meeting of County School Attendance Committee a letter was received from Mr Benjamin Read stating that he had obtained a new boat for ferrying the children across the river at Upware and asking that the payment to him might be increased from £6 to £8 per annum. Seven-tenths of the cost will be charged to the parish of Waterbeach 11 04 07

1911 Cambridge Town Council wanted Victoria Bridge and its approaches to be declared a main road and maintained by the County Council. But they did not agree: the Bridge had been built under an Act of Parliament at the expense of Chesterton UDC and Cambridge Town Council. After the bridge was built Victoria Avenue had been declared and made a main road. But there was already a main road from Chesterton to Cambridge via Magdalene Street and over the Great Bridge 11 11 03i & j

1912 Borough ordered to build new road bridge as part of provisions of Local Government Board Extension Order [2.3]

1912 The bridge over the brook at Burrell's Walk should be replaced with one a foot higher so as to prevent it being covered with water in time of flood. A post should be placed at each end to compel cyclists who rode over it to do so at a moderate pace, councillors heard. But this was a waste of money: it only flooded once every five years and it was only a short diversion to come down by the tennis court. The scheme was dropped. 12 03 01a

1912 Councillors should consider a footbridge over the river near the Fort St George ferry. If anyone saw the large amount of people who passed over the ferries and the waste of time entailed they would agree that a bridge was most desirable. The system was antiquated and in times of flood they had to rely on Victoria Bridge only. Last winter when the river was running high, the custodian had chained the ferry up to the lamp post. There had been a sum of money guaranteed when it was proposed to put the bridge opposite the end of De Freville Avenue. But the scheme fell through because of the large sum required to purchase the land to get through Jesus College boat yard. – 12 05 17c & d

1913 Borough decide that a bridge to replace Fort St George ferry is now necessity (have discussed it for 25 years). Annual revenue from ferry is £100 after expenses, causes delays to people wishing to cross & when ferryman not on duty need to pull it to their side of bank using damp & weedy chain. Will cost £1-2,000 [2.4]

1913 Two sites were considered for the erection of a footbridge over the river; one at Ferry Path and the other at Pretoria Road. It was undesirable to land the steps of the bridge at the front door of the Fort St George public house – however welcome that might be to the landlord. In addition Ferry Path landowners demanded a great deal of money for a strip of land to give access. The Pretoria Road site could not be as expensive so councillors agreed to a bridge 8ft 6inches wide there 13 06 13 p7 CIP

1914 There is a great need for a footbridge across the Cam near Snob's Point, a meeting heard. It would open up one of the finest rambles and be the nearest route to the railway station. But it would interfere with the ladies' bathing place; there would be such publicity they would have to shift it. And they already had one footbridge and if they wanted the area developed they must have a road bridge 14 03 20b

1914 Chesterton need for new traffic bridge, footbridge Ferry Path or Pretoria Road – 14 04 10c, e

1914 The Cam Conservators were told that if they relaid the floor of Jesus Green Bridge in reinforced concrete, the council would pay half the cost. It had been put up to replace an old wooden bridge. There was formerly a lock and weir at Fort St George, and a bridge there. When the lock was moved to Jesus Green the liability attached to the old bridge was moved on to the new bridge. There was a public right of way over the bridge and the Conservators thought it more convenient to build an iron bridge 14 05 08

1914 Tom Jolley acted as ferryman at Caron's Ferry at the Pike & Eel, Old Chesterton for 39 years. The ferry is a small punt boat near the larger ferry and is used by members of the University boat clubs who pay the ferryman a termly allowance. It was worked by his father and grandfather before him. Mr Jolley was universally known as 'Caron' and his cheery good nature made him a great favourite. 14 08 14 p4

1914 Under the 1912 boundary extension proposals Cambridge had to erect a bridge over the Cam to Chesterton within five years. Walnut Tree Avenue was the best site but whether this was the best time was a matter of debate. An Inspector from London had told them what they had to do and it was now the Law of the Land. Chesterton people had voted against it - in fact nobody wanted it. The only way to overturn the order was by going through all the expense of obtaining another Act of Parliament. 14 10 23

1919 Heavy snowfall, Garret Hostel bridge – many more people have passed over this bridge during the past four years on their way to First Eastern General Hospital than throughout the whole of its previous existence – 19 02 05c

1924 The Town Clerk reported the receipt of a petition against the erection of a bridge over the river at Walnut Tree Avenue, Cambridge. It stated that the present extensive outlook of considerable beauty across the Commons was much appreciated by the residents and this would be practically eliminated by the approach to the proposed bridge. The value of property would be considerably depreciated c24 12 09

1925 Coun Porter said councillors might not realise what an old crock the ferry over the Cam at Chesterton was. When one went over in rough weather the water had to be baled out and the sides of the ferry shook. At the time of the fair the ferryman would not risk taking over a crowd of people because it was so dangerous. Children were taking a very great risk in using the ferry and the council taking the greatest risk of all in not taking steps to prevent somebody being drowned. The ferry was obsolete, it should be condemned at once and done away with c25 09 25

1925 There was another 'battle of the bridges' at Cambridge Town Council when the question of the erection of bridges across the Cam was brought forward. With the opening up of Mill Road there were people who only got ten minutes home to dinner owing to delay at the ferry. The Paving committee recommended that the footbridge at Pretoria Road be proceeded with and that a temporary footbridge be erected at Dant's Ferry pending construction of a vehicular bridge. It was dangerous to go over Victoria Bridge and they must have a new vehicular bridge if only to modify that danger c25 10 26

1926 The official testing took place of the bridges along the new road through Coe Fen, The Fen Causeway. They are Snobbs' Bridge, Flood Water Bridge and the River Bridge. The last is

the most important and five steam rollers and one steam tractor, together weighing 63 tons were driven across it, passing each other, thus making 63 tons rolling weight, equivalent to about 100 tons dead weight. The Cambridge Borough Surveyor and councillors boarded a punt and viewed the deflectometer under the bridge, which gave a satisfactory reading. The foundations consist of 100 piles of 40 feet length, weighing about four tons each c26 12 03

1926 Fen Causeway, the new and important link between Newnham and the rest of Cambridge, was opened by the Mayor. The bridge and its approaches were gaily decorated with bunting and presented a colourful scene. The project of relieving Silver Street traffic had started as long ago as 1904 and discussion had gone on for nearly 20 years before the Town Council approved the plan in 1923. Nine proposals had been put forward and had it not been for the urgency of the unemployment question the same position would have existed today, only instead of nine there might have been nineteen different schemes (Laughter) c26 12 11

1927 new footbridge opened at Dant's Ferry, near Walnut Tree Avenue [1.11]

1927 The Cam Conservators reported they had got the Fort St George ferry up, but it sank again. It was impossible to do anything with the boat and impossible to get another one. They had agreed to employ a man to do the work but could not undertake the risk. At lunchtime too many people crowded on to the boat and a man could not order them off. The Conservators had carried on the ferry at a loss for years. They had a contract to take the people across the water and had to do something. Chesterton people felt they had been badly treated. CDN c 8.4.1927 [Ch 9.3.27p9]

1927 There was a good deal of grouching before the inhabitants of Chesterton had a footbridge over the Cam at Dant's Ferry. Now they have got one they have found something else to grouse about. At five minutes to eight every morning the instrument workers at Pye's are hurrying to work from the other side of the river. They curse and groan, trip and stagger under the burden of carrying their bicycles up and down a steep double flight of steps. Sooner or later some panting person carrying a bicycle will fall backwards or pitch into the river. The bridge was not made for cyclists who should get up earlier and ride up Victoria Avenue. [CDN 23rd July 1927].

1927 Chesterton folk looked very happy at the opening of the Pretoria Road footbridge and there was a fairly large crowd on both sides of the river. The bridge has been a very long time coming. There is an old proverb: "Bridges were made for wise men to walk over, and fools to ride over". Cyclists should remember this and the warning of the penalties awaiting those who do not dismount when crossing the bridge. c27 09 03 [1.12, 1.15]

1928 Sir – I protest against the ejection of Mr Pauley and his family from the ferry house, Midsummer Common. They have done their best to find a house but without success. The man and his son worked the ferry over the river, night and day, including Sundays, and in all weathers for the convenience of the Cambridge ratepayers, thus filling one of the most monotonous jobs; the man for 35 years and the boy for 16. On the completion of the footbridge they are completely cast over, no compensation being paid and no pension. To send people adrift in this matter is neither a moral or Christian act – Charles Porter. c28 04 14

1929 Dant's ferry footbridge and bicycles – CDN 13.7.1929

1930 new railway bridge erected over Cam, old one cut up & removed [1.10]

1930 The 'skeleton' of the Chesterton vehicular bridge came out of the municipal cupboard. It had been suggested when Victoria Bridge had been erected but the council subsequently rejected the proposals. In the meantime a temporary bridge had been erected at Dant's Ferry with the intention of moving it towards the Pike and Eel. Now it will be kept in the present position and lowered to make it easier to cross with perambulators. But it was a shame to spend £1,600 on a structure which had not been right when it was put up. 30 12 12c

1930 Proposed footbridge Fort St George – 05 12 07

1932 Back to the Ferry – Dant's ferry being used again while approaches to footbridge reconstructed – photo – 32 02 17 [CIP 19.2.32p12]

1935 Cambridge University and Town Gas Light Company needed to lay a main from their works in Newmarket Road to Cam Road. The first proposal was to lay it under the river but negotiations were opened with a view to the erection of a footbridge which would serve the Company and also meet the growing needs of the residents in the neighbourhood. The cost would be £4,000 of which the Gas Company offered to pay a quarter providing the skeleton of the bridge was provided during this financial year 35 05

1936 Long Road new railway bridge – photo – 36 03 03

1936 The High Back Bridge at Jesus Lock was 40 years old and not designed for prams. Recently two little children were trying to push one across when it overturned and the baby was thrown out. However they were getting less bulky and when one of the heavier prams came along people were not backward in giving a helping hand. A long sloping ramp would be very detrimental to the quaint old lock and increase the danger from cyclists. The Surveyor was instructed to provide two cycle ramps on the steps on Jesus Green side of the bridge 36 07 31

1938 Queens' College have to underpin the foundations of the Essex Buildings and may rebuild it further from the road instead of on its present alignment. They asked whether the Corporation wished to acquire the land released and expedite the rebuilding of Silver Street bridge. This could be widened to 40 feet instead of 28 feet as present. The erection of new college buildings and the construction of the bridge would proceed at the same time with the bridge completed by October 1939 38 06 22

1938 Silver Street Bridge was at present 21ft 6ins wide. Some years ago the Council bought land on the south side to enable it to be increased to 28ft when re-building was done. But it was unnecessary to increase it to 40ft as the road beside the old buildings of Queens' College could not be widened. Now the college wanted to redevelop and had offered land provided the bridge was widened – 38 07 23a & b Borough council decide to apply for funding – 38 07 27

1938 The foundation of Silver Street bridge, built about 1850 has been partially washed away by the rush of water from the King's Mill sluice, a diver underpinning Queens' College discovered. The Cambridge Borough Survey donned a diving suit and personally inspected the damage. There is no danger of it collapsing yet but as a precaution buses and heavy lorries will be banned. For many years heavy vehicles have been limited to a speed of five mph. In June the Council adopted a scheme to construct a new one by acquiring land from the college. But the County Council opposed it. 38 08 27

1939 Clayhithe's New Bridge which has superseded the old toll bridge, was formally opened. The first vehicle which crossed over the bridge after the opening was a pony and trap driven by Ald. Francis. 39 06 09 CIPof

1940 Silver Street Bridge closed to buses as foundations unsafe – 40 05 04b

1953 Magdalene Bridge restricted to 12 tons [1.13]

1956 Territorial Army sappers erected a bridge across the Cam to act as a substitute for the Jesus Green footbridge which is temporally closed for repairs. A large crowd watched them build the floating bays made up of folding boats, road bearers and decking. The folding boat equipment bridge is normally used by 3-ton military lorries but the City Surveyor has added additional handrails for public use. 56 06 12

1956 Robinson Crusoe footbridge linking Sheep's Green with Coe Fen was built years before Fen Causeway bridge and was then the only way across the river. But it was now structurally unsound and should be closed. Coun A.C. Taylor said he once used it three times a week to go to the Sheep's Green bathing shed but now few people knew where it was; Coun Mrs Henn said she'd lived in the area for 30 years and never had occasion to use it. 56 07 30 [1.14]

1958 Silver Street bridge demolished, temporary bridge erected while rebuilding takes place (reopened August 1959) [1.22,1.24]

1958 Changed scene in Silver Street: work on new bridge – 58 08 02a

1958 Traffic over Hills Road railway bridge, a bottleneck on the principal road into Cambridge, is extremely heavy. Visibility over the summit is severely restricted and many accidents have occurred there. The existing steel plate girder bridge has deteriorated with age and now work will start to provide a new twin two-lane carriageways and footpaths. The new bridge will be designed to allow for widening should additional railway tracks be needed in the future 58 12 19b

1959 Hills Road railway bridge reconstructed [CDN12.8.59p9]

1959 John Trusted offers Garret Hostel bridge, opens 1960 [3.3]

1959 Silver Street bridge open to traffic – 59 03 20d

1959 The new Silver Street Bridge is now fully open and there can be no doubt it is an exceptionally handsome piece of work. But after traffic had been admitted it was reduced to a single line again, pumps were sent for, coffer dams sunk and the word went round that all was not well. Rumours said that contractors had discovered an underground cavity, the bridge was sinking and that concrete was having to be pumped in. The County Surveyor cancelled a meeting with the press but a councillor said it was normal settlement and there was nothing wrong. 59 08 14d [3.7]

1959 More traffic went along Newmarket Road than any other and congestion often occurred at Four Lamps Corner. Any small incident – circuses on the Common or even May Balls - holds up traffic. Victoria Bridge vibrated when heavy vehicles had to stand on it with their engines running. We need a new bridge over the river at Walnut Tree Avenue. But a temporary bridge could be thrown over the Cam in six months by using the site of the old horse ferry next to the Chesterton footbridge. There would be a natural route for traffic up Garlic Row, Ald Symonds said. 59 10 16a & b

1959 An anonymous gentleman has offered to fund a new bridge across the Cam at Garret Hostel Lane. It will have a span of 15 feet greater than the present one and the height above water level will be increased by five feet. The current bridge is a Victorian cast iron structure painted green beneath which various pipes and cables are slung in a manner out of keeping with this part of the river. 59 11 21c

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 new Garret Hostel bridge opened, the gift of the Trusted family [1.25,1.27] Garret Hostel bridge handed over, history – 60 10 24

1960 The City Council is to pressure the Ministry of Transport about the proposed new bridge over the river at Chesterton. The route was approved four years ago and both Messrs Pye and Marshalls – the two large employers of labour in the area – consider it to be a matter of urgency. But the Mitcham's Corner improvement scheme would be relatively inexpensive and was being forced on them by the Government. This would further delay the proposals to provide a complete bypass on the Chesterton route. 60 03 11

1960 It took twenty men twenty hours at the week-end to demolish Cambridge's old Hills Road bridge – twice as long as the contractors had anticipated. Originally it was thought that the removal of 140 tons of steel girders would take a little over eight hours, but the trains passing underneath proved a little more troublesome than expected. The men took advantage of the frequent breaks to wipe the sweat from their brows and light a cigarette. The scene resembled firework night for, as the oxyacetylene guns cut through the girders, a spray of red hot sparks would fall on the ground giving an impression of a 'golden rain' 60 06 21

1960 The steepness of the new Garret Hostel Bridge brings complaints, muffled in puffs and pantings, from cyclists, pedestrians and pram-pushers. A gentleman made his laborious way, pulling himself up the slope with the help of the elegant bronze balustrade. A lady, pushing her cycle loaded with laundry in the front basket, exclaimed "Horrible bridge it is now, isn't it". Another added "If it gets ice on it in winter it will be worse still". In fact the council have already been putting grit on the bridge to combat the early frost on its surface. But, as one woman remarked, "There's nothing they can do about it now, of course" 60 12 02

1960 Hills Road railway bridge is functioning almost as normal again. After a year's work during which the traffic has had to contend with considerable difficulties, the road is now suitable for two-lane traffic. Resurfacing will not be carried on for another 12 months in order to allow the sufficient subsidence of the present structure and for several more weeks workmen will be patching up. Work on Churchill College continues as does work on 13 three-storey terrace houses and 60 maisonettes at East Road. Most have their roofs on and one block of houses has its windows in. 60 12 17b

1961 Fen Ditton ferry sinks, dozens in water, lent Bumps; previously 1905, removed rest of boating season; called 'Red Grind' due bright colouring & chain operating devise; operator 1947-57 says only operated when pub open [6.1-6.3]

1961 Dozens of people were thrown into the fast flowing River Cam on Saturday afternoon when the ferry at Fen Ditton suddenly sank. Undergraduates who were watching the Lent Bumps plunged into the water to help the men, women and children who were striking out for the bank. Several were taken into nearby public houses where medical students assisted them and two people went to Addenbrooke's Hospital suffering from shock 61 03 06 Inquiry – 61 03 10d

1961 Steps are being taken to prevent another accident on the river ferry at The Plough public house, Fen Ditton. Police will ensure that no more than 20 people board the boat at once and Whitbread's brewery will erect removable crush barriers during race weeks to control crowds. The accident happened when one man tried to jump on the ferry as another jumped off. The balance of the boat was upset and it began rocking in the water. At the time the police had been called away to sort out a serious traffic tangle in the village. 61 04 06

1961 The ferry across the River Cam at Fen Ditton has been removed for the rest of the current boating season by its owners, Whitbread's Brewery, in the interest of public safety. A few weeks ago, at the end of the University Lent bumping races, the chain operated ferry sank throwing more than 30 people into the water. Known to University students as the 'Red Grind' because of its bright colouring it has been part of the Cambridge river scene for many years 61 06 07

1961 Permission to build a temporary Bailey Bridge over the River Cam at Chesterton has been refused. The Minister appreciates the council's desire to reduce the amount of cross river traffic using the Victoria Avenue – Victoria Bridge route but it would attract additional vehicles through narrow and tortuous roads. Proposals to restrict the bridge to local traffic and impose

weight restrictions to prevent its use by heavy lorries would not work, he says. Now the Council will proceed with plans for a new permanent bridge 61 07 01

1961 The River Cam Conservators will approach Whitbread's to try and bring back the ferry that connected the grounds of 'The Plough' at Fen Ditton with the opposite river bank. After the ferry overturned last March, throwing many people into the water, the brewery considered erecting safety barriers on the bank but then decided to remove the boat altogether. It was later taken to Ely 61 10 05c

1962 Dant's Ferry, memories and 'Cuckoo' Dant – 62 04 11b

1963 New barriers have been erected on the Green Dragon Bridge, Chesterton in a bid to stop cattle and motor cyclists using it to cross the river. But it is now difficult to get coach-built prams through – they certainly won't get under with the hoods up. If the posts were further apart, cattle would get past, the council says. Motor cycles and scooters are officially prohibited from the bridge but there is no objection to pedal and motor-assisted cycles provided they are pushed across. 63 09 13d

1965 Minister of Transport to authorise the building Elizabeth Bridge following public inquiry – 65 05 17

1971 Elizabeth Bridge opened, July : roughly on the site of the second bridge envisaged in the 1888 Act [1.6]

1978 The 150-year-old Magdalene Bridge in Cambridge is in grave danger of collapsing, councillors were told. For the last 11 years there has been a three-ton vehicle restriction but sometimes the inter-continental 'juggernaut' lorries travelling through the city take a wrong turning and pass over the bridge. Now the abutments, which support the bridge at both ends, are moving apart and if this continues it could eventually break its back. Plans were made to rebuild the bridge but environmentalists objected and at a public inquiry it was decided the bridge should be strengthened, retaining its present appearance. But Government engineers came up against

insuperable technical problems in the use of the cast-iron parapets and have suggested cast-steel instead. c78 06 18

1980 new Mill Road railway bridge [2.8]

1981 Magdalene Bridge to be strengthened – [3.5]

1982 Magdalene Bridge reopens [3.5]

1986 Victoria Bridge is rusting away. The 97-year old structure has taken a battering from heavy vehicles over the years, despite a lorry ban and weight limit. It is in such a bad state of repair that it needs to be entirely rebuilt – a project which will cause chaos for 18 months. Engineers hope to keep traffic moving by repairing half the bridge at a time. All the county's other 2,000 bridges are also being inspected 86 06 13

Sir – I happen to live opposite the field-gun in Tenison Road. It is not a relic of the Great War but a captured trophy from the Boer War. To me it represents history and the enormous sacrifices made by the pick of our population. Our war memorials tell our children of a great deliverance. Had we been defeated no doubt we should have had more hideous monuments, probably statues of the Kaiser and the boastful Hindenburg, at which some of the pro-Germans could kneel. Let these small tokens that speak of victory over injustice be preserved for all time – C.J. Challess –

1804 The 250-year-old Tithe Barn in Shelley-Row, Castle End is to be pulled down to make way for new houses. It is still in good repair with patches of new straw used to mend the high and thickly-thatched roof. It was used as a resting-place by the French prisoners taken in the Peninsular War during their journey to the prison camp at Norman Cross. Many people bought objects such as dice and dominoes they made from the bones of the meat supplied to them. The 'True Blue' in Hobson Street was also one of the billets. CWN 09 12 31

186 - By the death of Charles Stearn of Brookfields Cambridge loses one of its few Crimean veterans. He was born at Barrington and joined the Cambridgeshire Regiment in 1846 with whom he fought at the Alma where at least 1,400 men lost their lives. At Inkerman the Russians came right up to the bayonets and the Russian dead numbered six to each Englishman. After a couple of years in the Crimea the Regiment was sent off to Canada where their boat struck a rock off Newfoundland and went down in half an hour. He had his wife and youngest son on board and got them into the lifeboats with difficulty. Later he was landlord of the Seven Stars on Newmarket Road CWN 10 03 04j & k

1860 formation of 1st & 8th Cambs Rifle Volunteer Corps at Cambridge; received colours on Parker's Piece 25 May 1860 – RC

1861 When the Prince of Wales inaugurated the new butt and parade ground of the Cambridge University Rifle Volunteers at Grange Road in October 1861 he presented a cup described as 'of massive silver, but chaste in design – a kneeling rifleman surmounting the lid, in the act of taking aim'. It is still awarded to the best shot at 1,000 yards. The Corps at first had a ground on Mill Road in conjunction with the 1st Cambridgeshire (Town Corps) but the range was found to be too short. The Grange Road ground consisted of two fields with the butt at the extreme end. 61 11 01

1872 merged into one unit – 1st A.B.Cambs.R.V. - RC

1897 The officers of the 3rd (Cambs) Volunteer Battalion Suffolk Regiment has issued an appeal for subscriptions to enable them to build a new armoury. The present headquarters in Corn Exchange street are totally inadequate for the requirements of the corps. The present is a good year for patriotic effort. The Volunteer Force is no longer on its trial; it occupies an important place in the scheme of military defences; and we have much pleasure in commending the movement just initiated to the general consideration of the public - Editorial CDN c 27.4.1897

1897 scarlet patrol jacket for officers – RC

1897 The annual inspection of the Third (Cambs) Volunteer Battalion, Suffolk Regiment took place at the University Rifle Range. Various battalion movements were executed and the inspection concluded with a sham fight in which the cycling section and the machine gun were opposed to the main body of the troops. The sham fight would have been done better if the non-commissioned officers in charge of the sections had not repeated the words too quickly c1897 07 11

1897 On Saturday night a Western force was advancing on Cambridge from the direction of St Neots and an Eastern force had been assembled to protect the town. They established a line of outposts from Cotton to Barton church. At about three o'clock the opposing forces came into collision. The first firing took place in Barton village. Barton hill formed a strong point in the defence and here Colonel Cronin, much assisted by the Maxim-guns made a prolonged stand, but the numerical superiority of the attacking force compelled him at length to retire, fighting hard c1897 11 13

1898 The third meeting of the Eastern District Tactical Society was held at Newmarket and orders issued for an exercise in the open country. The general idea was that a Western army was advancing from Cambridge with the object of driving an Eastern army out of Bury St Edmunds. This gave commanders of regiments some useful experience in the organisation of columns of march, some of the troops being supposed to be located at Cambridge, and others around Newmarket. On Thursday the central position was Cheveley, and the outpost were formed along the line, Limekilns, Cheveley, Kirtling. The members of the Society were engaged in working out the dispositions, and the exercises concluded with some general remarks on the action supposed to follow CDN 1898 04 25

1899 Coldham's Common, Cambridge where the Suffolk Regiment is to undergo its annual training is a scene of bustle and animation, the recruits of the regiment having arrived to go through their musketry course before the whole regiment assembles. The camp occupies the whole of the town side of the common. The officers quarters are situated at the bridge end and extend in three rows to the railway. There are the usual latrines and cooking paraphernalia. In this regiment the old earthen ovens are to be abolished, and army cooking ranges, and an ingenious device known as the Aldershot oven substituted. A hospital tents is, of course, an item c1899 05 05

1899 Home there are today in the town and county of Cambridge which are without a head because husbands and fathers have responded to the call upon Reserves to join their regiments. Cambridgeshire has already made a significant contribution to the British strength in South Africa, while those left behind are in deepest anxiety as to the safety of their absent ones. We owe it to ourselves as Englishmen to see that the wives and children do not suffer in material comfort because the breadwinners have gone forth to fight. Many are reduced to living upon the Government allowance of a few shilling in the week. We would take the liberty of suggesting that the Mayor Of Cambridge should open a fund for the families of Reserve men and the active interest of Alderman Kett makes it appropriate that he should put himself at the head of the movement. – Editorial 1899 10 16

1899 From a Cambridge man at the front, Pietermaritzburg, South Africa. "I am out here now and we have to go up to the Transval and pump some lead for Kruger, and I hope to present a

lock of his whiskers to our Fitzwilliam Museum. There are plenty of Cambridge lads out here in the Fifth Lancers who have just gone up to Ladysmith. Every man has 109 round of lead & I have been selected to fill the post of stretcher bearer to pick up dead or wounded comrades; but perhaps I might be picked up myself. I hope to come out safe and I won't forget Kruger's whiskers" - Paddy Hopkins c1899 10 22

1899 The war in South Africa has already levied toll upon Cambridge. Among those who were killed at Glencoe was Private J. Best, whose parents reside here, and on the list of the wounded at Elands Laagte is Lance Corporal Henry Turner, a Cambridge man. Their relatives have the very sincere sympathy of the people of Cambridge. Whether the end of this war come soon or comes late, it will have cost the British Army dear. Already hundreds of brave fellows have found their graves among the hills of Natal 1899 10 23

1899 The announcement that a number of Reserve men belonging to the Suffolk Regiment would leave Cambridge to join the regiment sufficed to bring thousands of people together in the Market Hill to give them a hearty send off. . It detracted somewhat from the picturesqueness of the effect that the Reserve men were not in uniform but in their ordinary clothes but they could not have evoked greater enthusiasm on the part of the public. Heads of colleges were there, undergraduates in caps and gowns rubbed shoulders with farm workers from the country. Old soldiers wearing their medals had come to live over again stirring scenes from their youth. Women were there and children also. It was a crowd thoroughly resolved upon manifesting its goodwill to the men who were going away 1899 11 06

1899 Two more constables of the Cambridge police force have received notice to join their regiments preparatory to leaving for South Africa. These are P.C.s John Waylett and Goodchild. The former left Cambridge by train, being accompanied to the station by Sergt Baker and eight of his comrades in the police force. As the train steamed out of the station three cheers for the gallant 44th were lustily given by the policemen 1900 43 NCOs and men served South Africa with section of Volunteer Service Company of Suffolk Regiment under Sir John French – RC c1899 11 10

1899 Cambridge has got a long railway station, but there would not have been an inch of standing room to spare on the platform if all the people who desired to get in had been permitted to do so. Shortly before noon the procession of Reservists arrived and from that time till the train left all was wild excitement. The difficulty was to get the men who were leaving away from their friends, and in the long run there was nothing for it but to effect something like a forcible separation. Eventually, amid vociferous cheering the train got away and the defenders of the country were fairly on their way to do the country's bidding 1899 11 13

1899 The London Scottish Rifle Volunteers arrived in Cambridge for the purpose of engaging with the University Volunteer Corps in certain field operations. The idea was for the Scots to gain an entrance to Cambridge. The University Volunteers marched in the direction of Shelford, where they expected to meet the attacking force. The opposing forces formed up at Caius College Farm and then proceeded via Hills Road to Cambridge - 1899 11 25

1899 Following their manoeuvres at Shelford the London Scottish Rifle Volunteers had a further engagement with the University corps in the vicinity of Caius Farm, near the Gog Magogs. The Scots marched out to occupy the farm and were reinforced at Fulbourn by a company of the Newmarket Suffolk Volunteers. The actual firing operations began at 2.45. The farm having been taken the defending and attacking forces were formed up in line and the march home was begun, the Scottish pipers leading the way 1899 11 27

1900 bonfire on Market Hill to celebrate Relief of Ladysmith, another on Midsummer Common for Mafeking [1.1,1.2]

1900 For the second time since the Boer ultimatum the consequences of war have been brought very close to Cambridge. This morning there was a second demonstration in which Town and Gown joined hands in a common feeling of respect for those who, though not compelled by laws

to leave the old country, were nevertheless anxious to lend a hand in the war. Shortly after ten o'clock the special train steamed out of the siding, kisses were blown and the Volunteers who will represent Cambridge at the front were out of sight, but not out of mind CDN 1900 01 20 1900 Mr G.W. Rawlinson of Mill Road, Cambridge has received a letter from Private Caswell, who is well known in the town. He writes: "at daybreak we attacked the Boers who were holding a low-lying hill from which they poured a very severe fire. We kept steadily on till we were within 100 yards of them, when we fixed bayonets and charged them. In retiring they had to cross a valley. We poured volley after volley into them with deadly effect. Later I was struck on the ankle by a shell which did not burst and which has made me an invalid for a fortnight" c00 01 21 1900 Graces are to be submitted to the Senate of Cambridge University to authorise the Vice Chancellor to grant the use of the Senate House for a meeting to consider an increased establishment of the University Rifle Volunteers, and to allow the use of the Senate House as a drill room for recruits at times when it is not required for University purposes c00 02 01 1900 The greatest possible excitement followed the receipt of the news of the relief of Ladysmith. The telegrams conveying the announcement was received at the chief Post office shortly after 10 o'clock and the intelligence spread with marvellous rapidity to all parts of the town. When a private wire was posted in the Market Place the excitement was intense. From all approaches people could be seen rushing to get a view of the telegram and the wildest enthusiasm prevailed. The crowd raised hearty cheers and there was much waving of hats and handkerchiefs c00 02 28

1900 There was great rejoicings in Cambridge on the relief of Ladysmith and despite the edict sent forth by the University authorities the conduct of the undergraduate element was again such as to necessitate the intervention of the police. The Varsitymen managed to draw police attention off the market place to scenes elsewhere and, during their temporary absence, succeeded in lighting a bonfire. There was great excitement as one by one the wooden frameworks of the stalls was committed to the flames. The band-stand on Christ's Pieces was attacked and the seats removed to the Market and quickly consumed. Similar damage was occasioned in all parts of the town c00 02 29

1900 The first khaki wedding in Cambridge was held at St Botolph's church. The bride was attired in regulation khaki tight-fitting bodice, braided Hussar, with braid to match, khaki straw hat, trimmed with white chiffon and silk. She wore a spray of orange blossom and carried a bouquet of lilies of the valley and snowdrops, covered with maidenhair fern. The bridesmaids wore khaki shirts with silk tunics to match. They also wore scarlet shoes and hats c00 03 09

1900 Private Percy Darby, one of the Cambridge men serving in South Africa, describes the rations of an ordinary fighting man. They got two biscuits for a day's rations, and as for bread he had not seen any for a month. The number of prisoners coming into the English camp made matters worse for our troops had to give half their rations to the captured enemy. He saw two wagon loads of dead Highlanders brought into the camp. "They looked horrible; their heads and legs hanging over the sides of the wagon as blue and black as anything. They buried 59 of them in one long grave and it made me feel quite bad" c00 04 06

1900 Cambridge has suffered intense anxiety regarding the welfare of Baden-Powell and his gallant men who for the past seven months have been locked up in Mafeking. It was about ten when the glad news was first made known regarding the relief and people began to assemble in crowds to await with baited breath the confirmation. The some half-doze individuals emerged from Sidney Street and their lusty cheers led many to the conclusion that the garrison had really been relieved. As the little crowd moved along the streets the cheering increased, and people seemed intoxicated with excitement c00 05 22

1900 In Cambridge every precaution had been taken to keep the great bonfire on Midsummer Common intact until the news of the relief of Mafeking had been confirmed, and special constables barricaded the enclosure within which the wood and other material had been stacked. Subsequently another posse of police constables arrived and the pile was made practically secure.

There were attempts to fire it, however. Matches, vestas in particular, were in great demand and there seemed a determination on the part of many to have a blaze. One young man procured a box of matches, lighted them and then threw the burning mass on the brushwood. The police promptly scaled the fence and extinguished the flames. Tomorrow night we will light the biggest bonfire that has ever been seen in Cambridge c00 05 24

1900 Cambridge has celebrated the relief of Mafeking and it has done it right nobly. There was no recurrence of the riotous scene witnessed on the occasion of the relief of Ladysmith, no destruction of property. This was due to one thing, the discretion shown by the powers that be in organising a bonfire on Midsummer Common. People poured in in thousands from the country in anticipation of the festivities and so great was the influx that some streets were rendered well night impassable. Still, the crowds were orderly and the police had no difficulty regulating the traffic c00 05 25

1900 Mrs Doggett, of Gt Eastern Street, Cambridge, has received a letter from her son in South Africa, who has been a prisoner. He sent his mother a South African caterpillar with a rose. On arrival the rose had disappeared, and the letter was partially eaten. The caterpillar was very thin, but alive c00 11 07

1900 On Saturday the Inns of Court Mounted Infantry joined the Cambridge University Rifles in a field day on the Newmarket Road. The tactical scheme presumed that a convoy from Newmarket was desirous of entering Cambridge along the main road through Quy and south of Fen Ditton. The CURV were told to attack, capture, hamper or destroy this convoy. Most interesting operations followed with cyclists, horsemen and infantry all fully employed. As dusk set in the convoy seized its opportunity and slipped past. The public schools and town and local corps were unable to attend at the last moment as their rifles had been called in for Government inspection c00 11 28

1901 South African volunteers return home & granted Freedom of the Borough [1.3]

1901 The special manoeuvres for cycling troops began on Good Friday. Frequent bright sunshine made the day a pleasant one for the riders traversing the Essex roads and it is to be regretted that the numbers participating have not proved so large as anticipated. The Home District Force's expected thousand cyclists have diminished by quite three hundred. The great purposes is to learn whether it is possible to employ with advantage cyclist troops in large bodies for the defence of the country, using them against the flanks and rear of an advancing enemy. The general idea is that an enemy landed at Aldeburgh has send forth a cycling forced reconnoitring towards London; while the Home Army has sent out a similar force towards the invaders to keep them in check whilst the ordinary troops are taking up their positions as a defending line CDN 1901 04 06

1901 A large gathering of Post Office employees bade farewell to three of their number who have recently received appointments as telegraphists in South Africa. They might be sent to any part of an unsettled country and it was though an appropriate token of goodwill would be a weapon of self-defence. Accordingly three revolvers were purchased and presented to H. Emmerson, H. Winny and E.W. Gee. They hoped the only use they would have of them would be to hang them over the mantelpiece and look at them while they smoked c01 05 04

1901 Today Cambridge formally recognises and honours the loyalty of her sons who have been at the war in South Africa. The arrival of the Volunteers at Cambridge Station was very quiet and orderly. There were no decorations but a barrier had been drawn across the platform & as time wore on the railway officials became more stringent as to whom they allowed within. There was excitement as a train was seen slowing steaming in with khaki-coloured arms and bronzed faces thrust out of the windows and in another minute the men were standing on the platform, after fifteen months' experience of war and travelling CDN 1901 05 06

1901 Sanguine people imagined that the rejoicing for the return of the South African Volunteers would pass off quietly. A parental Corporation had taken the wise precaution to secure materials for a fine bonfire on Midsummer Common to prevent the destruction of

property. This time it was a plan doomed to partial failure. The fire was comparatively short-lived and undergraduates found a wealth of additional fuel in King Street where a wooden hoarding was dragged off to the Common and triumphantly flung upon the bonfire. Policemen stood guard over the bandstand on Christ's Pieces c01 05 08

1901 Sir – I learn with surprise that the starting of the proposed Cyclist Volunteer Company at Cambridge is “hung up” and may be abandoned owing to an insufficient number of names having been sent in. I hope we shall be able to prevent such a conspicuous admission of the want of patriotism on the part of Cambridge cyclists. We ought not to lag behind Bury St Edmunds where they are organising a company. Ten more names are wanted to make up the 75 required. – A Would-Be Cyclist Volunteer c01 05 21

1902 Not long ago the remotest of all probabilities seemed to be that a time would come when, at Cambridge, Briton and Boer would grasp hands in perfect concord. Yet that strange event has come to pass. Boers visited and received a cordial welcome from a large number of people. But unfortunately their reception by a certain section of the inhabitants had neither the element of cordiality nor of welcome. The appearance of our former foes was the signal for a hostile demonstration. A huge crowd gathered in front of the Auckland Road Circus to witness the arrival of the Generals, whose visit was to raise money to restock Boer farms. Bricks and stones were hurled upon the zinc roof and hooting and shouting mingled with the other noises. CDN 1902 10 25

1903 Freedom of Borough granted to Suffolk Regiment [1.9]

1903 Cambs Regt Prize Distribution attended by Sir John French – RC

1903 The visit of General Sir John French will remain memorable for his reception by all sections of the inhabitants. The famous cavalry leader was sought after, first at the railway station when he arrived and later when he proceeded to the Guildhall where he received the freedom of the Borough. Lord Kitchener's is the first name on the roll of Cambridge Freemen and its fitting that the name of General French should follow his illustrious Commander in the South African war. Many who have already been presented with the freedom have served under him and learned to admire him as an ideal commander who never asked them to do what he was not prepared to do himself. c03 01 23

1904 discussion about site for War Memorial, one suggestion is at junction of Hills Road & Station Road, finally decide to erect it at East end exterior of Gt St Mary's church [1.10]

1904 Three Cambridge lads were charged with committing damage to the Cambridge Volunteer Corps rifle butts. Quartermaster-Sergt Rumbolt said that no sooner had shooting concluded than these boys invaded the butts and pulled the earthwork about in their search for bullets. This is a great nuisance and a great deal of expense has been incurred in restoring them. The Corps could obtain £20 per ton for the bullets CDN 6.9.1904

1904 Our Special Correspondent gives a graphic account of the days fighting at the Essex manoeuvres which resulted in the defeat of the defenders and the fall of Colchester. The Bedfordshires had just entrenched themselves when suddenly the sentries gave the alarm that the enemy was upon them in the darkness. They endeavoured to make a stand and began firing vigorously but General French attacked with nearly a whole division and in the end they had to clear out of their camp or be captured. CDN 9.9.1904 et seq

1905 mock battle between CURV & HAC [1.11]

1905 The memorial to the men of Cambridge who fell in the South African War has been completed. It takes the form of a brass tablet designed by Mr W.W. Fawcett affixed to the wall of Great St Mary's church. It is surrounded by stone moulding surmounted by the badge of the Suffolk Regiment but commemorates all local men who died in the war. 05 05 23 [NL3.22]

1905 Some 500 working men have been spending a very pleasant month under canvas just outside Colchester. They have been comfortably housed in spacious bell tents, fed on the best of food and entertained between meals by military exercises, shooting competitions and the like. Nor has the holiday been an expensive one. On the contrary each man has received a shilling a day pocket money. In other words the 4th Battalion (Cambs) Suffolk Regiment have been enjoying their annual training. 05 06 09

1905 The memorial to the Cambridge men who died during the South African War was unveiled at Great St Mary's Church. It is not inside the church but looks out upon the Market Place, seeming to say that in the midst of life we were in death. A guard of honour consisting of a hundred men of the Cambridge Town Volunteers together with a detachment of the Suffolk Militia, a dismounted body of Hussars, Cambridge University Rifle Volunteers and the band of the Scots Grays joined old soldiers who had seen service in South Africa to witness the proceedings 05 06 13c

1905 The unveiling of the South African war memorial was marred by two small incidents. The Mayor of Cambridge was without his trusty mace-bearers - apparently the maces were securely locked up and the individual who holds the keys was not to be found. Then police failed to recognise the military veterans and refused them admittance to the ceremony to which they had been invited. There was a considerable amount of confusion until the constables were enlightened as to the nature of the guests and allowed them to pass. 05 06 17

1906 khaki for all ranks - RC

1906 A miniature rifle range for Morris tube practice opened on the premises of Mr W.H. Rickwood. It is central, comfortable and contains all the essential points of a good range, making it a valuable addition to the equipment of the Ely Volunteers. To make the Empire safe it was important that every man could shoot and shoot straight. Capt Stuart, the new Militia adjutant formally opened it by firing down the range and Lieut Bullock also shot. 06 03 08e

1906 The Battle of Haggis and Dumpling Farms took place on Wednesday. They stand on either side of the road from Coton to Grantchester and here the Cambridge and Oxford University Rifle Volunteer Corps engaged in an interesting encounter. About 1,800 combatants included cadets from the Leys and County Boys Schools, with mounted infantry and cycle contingents on both sides. The rifle fire was continuous and maxim guns added their sinister bark to the noise. Fortunately the weather was fine. 06 03 08a & b

1906 The militia assembled at Ely barracks for training. Recruit numbers are a record: it provides men with a healthy enjoyable holiday and brings them in winter, when wages are low and work scarce, a bounty which must prove acceptable. They are paid a shilling a day, a sum that scores of farm labourers would regard as munificent. They also receive certain articles of clothing and boots which they are allowed to retain and last till the next training. The barracks have a pleasant recreation room and good food, regular hours, drill and discipline improve the men both physically and morally. 06 03 15d

1906 Patrick Canty was born in County Kerry and fought at Sebastopol during the Crimean campaign when he went to the rescue of a French general and was awarded the Legion of Honour, one of the few Irishmen to have received that medal. He emigrated to the USA before coming to Cambridge as licensee of the Crown and Harp pub in John Street. 06 04 02

1906 A most regrettable accident occurred at Ely Conservative Club garden party to inaugurate the new Morris Tube range and bowling green. Part of the proceedings consisted of a shooting competition for ladies on the indoor miniature range. A number had shot when a rifle held by Mrs J.S. Barnett accidentally exploded and the bullet struck her husband in the neck while he was writing his wife's name on the target. Fortunately the wound was not serious but it spread horror and dismay over the gathering 06 05 09b

1906 A rifle range was opened at Abington by Mr Binney. After firing a few shots he said we imagine that our insular position made England unassailable. We have not suffered the disaster of

blockade and do not realise what a dangerous position this island is in. In other countries shooting took the place of our cricket and football. Every man ought to be able to handle a rifle and this was a move in the right direction. 06 07 31b

1906 The British Army of the future will possess a body of men unique in the history of warfare. 'The Legion of Frontiersmen' are men prepared to take their part in operations in time of war, guiding and scouting rather than fighting; not so much soldiers as guerrillas. They include J.H. Thornton of Teversham and W. McArthur of Quy who took part in the suppression of the American Indian rebellion. The uniform includes khaki pants, dark blue shirt and a Stetson hat with a loosely-slung cartridge belt and revolver. 06 08 11a & b

1906 Joseph Moule was a veteran of the Crimea but rarely talked of his hardships in the trenches outside Sebastopol or of the stirring relief of Lucknow. Then as one of the gallant 90th Foot he was one of the hardened campaigners who went direct from the perils of the Crimea to the horrors of the Indian Mutiny. He expired suddenly at his home in Mill Road aged 72, thus the ranks of veterans get thinner and thinner 06 10 06

1906 Group photos of soldiers when 3rd Volunteer Battalion of Suffolk Regiment became 1st Battalion Cambs Regiment 1906 – 46 10 16

1907 General Sir John French and 80 army officers arrived in Cambridge by special train with 27 cars containing Army Motor Reserve officers joining them at Trinity College from all parts of the country. They are part of the 'Blue' army, a Continental power capable of mobilising three million troops, which has landed on the East coast after 'Redland' – the UK – lost command of the sea. The exercise is designed to give the higher commanders an opportunity of considering the strategical problems and working out tactics. 07 09 09

1907 Cambridge is taking very placidly the invasion of East Anglia by a foreign foe under the command of that redoubtable warrior, Sir John French. The brilliant cavalry leader is comfortably ensconced in rooms at Trinity College and in the quietude of the Great Court can carry out his plans for the annihilation of the British troops. 07 09 14 [1.12]

1907 The old Volunteer force has ceased to exist after a splendid record of 50 years' service. Now territorial battalions will be under county organisations and in touch with the county line battalions on the one hand and the civilian population on the other. In Cambridgeshire the Lord Lieutenant, Viscount Clifden, has already invited a number of county gentlemen, military and civilian, to confer with him. Unless it has the hearty support of all classes there would be no alternative to compulsory military service. 07 11 02 & a, c, d

1907 A miniature rifle range just opened at the Beaconsfield Club is equipped with the best Winchester rifles. It is the first duty of every citizen to learn to use a rifle and the club should have a useful existence. In the warfare of the future everybody should be able to handle a rifle, move about with the lightest possible equipment and be able to seek cover when there is no advantage to be gained by being marked in the open. 07 11 08 & a

1907 "The Fighting Fullers" were three brothers who served in the Indian Mutiny and the Crimean War. John Fuller who lives at Newton fought at the Alma, Balaclava and Sebastopol. His brother James was invalidated out of the army with a pension of 8d a day – which a grateful country halved. But Lord Wolseley sent him £5 and got the pension raised to 9d. Nathan Fuller was wounded by a piece of shell but in those days the British soldier had to endure suffering bravely and he could not be spared from the fighting to go to hospital. Later he lost all his toe nails from frost bite. 07 12 04 & a

1908 old Volunteers disbanded, recruiting to new starts

1908 full dress with scarlet tunics for ceremonial and 'walking out' - RC

1908 cavalry on exercise "repelling German invasion" [1.13]

1908 Everybody in Cambridgeshire is concerned in the attempt to induce the War Office to retain the 4th Battalion Suffolk Regiment, better known as the Cambs Militia. It now only trains

once a year and inculcates habits of discipline to the men who join. During the Napoleonic wars it had an exciting time and went to Ireland in 1799. In 1816 they assisted the Royal Dragoons to overpower the Littleport rioters but by 1852 there was only an old sergeant major and some antiquated sergeants at Ely. 08 01 10 h i - more history

1908 Colonel Barnet William Beales of Sidney Street, was a splendid type of local patriot. He was a pioneer in the Cambridge Volunteers, treasurer of the Church Defence Association and churchwarden of St Michael's. To mention all the associations of his long and honourable career would involve re-telling many pages of Cambridge history but he found time for the duties of an Income Tax Commissioner and the Panton Brewery. Nine years ago he was knocked down by a retriever dog and never completely recovered. 08 02 15f

1908 Military manoeuvres attracted considerable attention. One force, including Perse School cadets, was ordered to hold the line of the Cam from Trumpington to the Mill Inn, Hauxton. Timber and cordage was seized from some scaffolding and the engineering section constructed a bridge sufficient to have carried Cavalry. The whole of the Cambridge University mounted infantry was captured, which would have had disastrous results in a real war. 08 03 19a

1908 Volunteer colours to GSM, history – 08 03 28c 08 03 31 & a & b - RC

1908 More than 1000 people gathered on Cambridge Market Hill at midnight to witness the official extinction of the Third (Cambs) Volunteer Battalion of the Suffolk Regiment. As the clock chimed the buglers played 'The Last Post' and the Volunteers were no more. But after a few seconds 'Reveille' was sounded, melancholy vanished and cheers greeted the new Cambridgeshire Battalion of the Territorial Force. The bugle band played the officers back to the mess room where they sang 'Auld Lang Syne' 08 04 01 a & b

1908 An appeal to the patriotism of members of the University is never made in vain. Scenes of the greatest enthusiasm reigned in the Senate House when the Secretary of State for War appealed to the University to do its part in supplying the deficiency of about 8,000 officers in the Army. The science of war had progressed and they fought not with a rabble but with organised bodies of men on a great scale who went through the opposing forces without resistance. An Officer's Training Corps gave a man a second opportunity: if he went to the bar and did not like it, then he could become an Army officer. 08 05 16 & a

1908 The Lensfield club's new miniature rifle range off Newmarket Road was opened by Colonel Harding. Membership had risen from six to 100 in a year, it was a step towards handling the service rifle and ammunition and taking an interest in the Territorial Army. Now they wanted a new pavilion. CWN 08 07 03 p5

1908 A miniature rifle range and air rifle club has been formed in connection with the Church of England Young Men's Society at their large room in St Edward's Passage. The two targets can be placed in two positions – for shooting standing up or lying down – and two good air rifles have been provided. Englishmen should learn to shoot in order to defend their own hearths and homes and the Corporation should establish a range open almost all hours of the day. CWN 08 09 11 p8

1908 If the safety of England can be gauged by her miniature rifle clubs, then England must be safe indeed. Everywhere these little societies of keen shots have been springing up like mushrooms and nowhere has been more prolific than Cambridge. The latest club meets at the Bell Inn, Newmarket Road and already has a membership of 50. They would learn not only to hit the bull's eye at practice, but in times of dire necessity to shoot straight at other targets and so keep their land intact in case of invasion. CWN 09 09 25 p3

1908 For several hours the district between Lord's Bridge and Haslingfield was the scene of warfare which, had it been real, would have strewn the countryside with dead and dying. The C.U. Officers' Training Corps was joined by the Leys, Perse, Cambridge County and other schools as several hundreds of troops, cavalry, infantry and engineers were engaged. The idea was that a hostile army was retiring towards Royston and being harried by the home army. Their retreat was attended with difficulty since all the bridges over the Cam were destroyed and fords existed for mounted troops only CWN 08 11 13 p5

1909 new colours from King at Windsor, 19 June – RC

1909 The new Abbey miniature rifle range opened in the grounds of the coffee tavern at 158, Newmarket Road. The eight targets, which can be set and returned for inspection by a winding mechanism, are illuminated by incandescent gas burners and the building is absolutely fireproof. It is hoped to build a pavilion and to have an open-air range in the summer. The district can now boast of two clubs, the other being at the 'Bell'. 09 01 22

1909 The Saxon Cement Works' Miniature Rifle Range was opened by Major Bourke, of Rorke's Drift fame. It has a range of up to fifty yards where rifle shooting may be practiced in fair weather and foul, in daytime or at night, electricity affording the requisite illumination. In rain the bull's eyes are accessible to the bullet fired from the verandah of a comfortable club house. Every member possesses his own rifle. 09 01 22

1909 In military exercises around Grantchester the University Officer Training Corps attacked Dumpling Hall, near Haggis Gap Farm. Engineers rapidly and noiselessly constructed a bridge of boats across the river and the force advanced over the fields. The night promised to be foggy but turned out bright and starlight with a strong moon so the troops were unusually conspicuous. By the time they arrived the enemy general who had been based there had managed to escape 09 02 05

1909 The gallant band of old soldiers who fought in the Crimea and the Indian Mutiny gets smaller every year. Cambridge man James Gray died in the workhouse, where the poor are so well looked after and was buried at Mill Road cemetery. There was no time to arrange for a military funeral but Captain Heal sent a large Union Jack to be placed on the coffin. Four members of the Territorial Force volunteered to act as pall bearers but assembled at Newmarket Road cemetery. On realising their mistake they drove to Mill Road which they reached just after the sorrowful ceremony had concluded and the mourners had left 09 02 19

1909 During military night operations around Cambridge residents were discomforted by the activity of an eight-inch howitzer entrenched in a capitally-constructed earth fort on the high ground of Madingley Hill. It was attacked by the Cambridge University officer Training Corps who found the rush uphill on the double was too long and exhausting. There was the danger of troops arriving out of breath and in scattered formation being charged with the bayonet. So they marched across country, crossing fences and ditches in silence. After the roar of an explosion, symbolising the destruction of the howitzer they retired to Coton 09 03 05

1909 Airships were the real menace, Burwell Rifle Club was told. Foreign nations had an immense number of them capable of living up in the air for 48 hours away from their base. They could carry half a ton of dynamite. They could not dodge over floating ironclads and attack them but they could drop dynamite into our naval dockyards and a navy without a base was not a navy at all. The authorities in the United States were very worried about them 09 02 19

1909 It is a surprise that Cambridge has long been immune from the raids of the 'scareship'. There are splendid places such as the roof of King's College chapel where a Zeppelin might find a lovely anchorage. Now a flag flaunting an eagle rampant has been picked up in the dead of night. This gaudy tinselled thing lies stowed away in the police station bearing the inscription 'This flag, believed to have been dropped from an airship, was found on Midsummer Common'. Nervous readers should be assured that it is a flimsy trifle, two inches square, and it is thought improbable that the owners will return in search of their missing property 09 06 11 [1.14]

1909 The latest addition to the numerous miniature rifle clubs has been formed in connection with the Loyal Suffolk Hussars at Ye Olde Castel Hotel, St Andrew's Street. - CWN 09 11 19

1910 A meeting was held to encourage British breeders to supply the British Army with British horses. They were woefully short of them: the number required in case of mobilisation was 129,000. The bus horse had been the most valuable immediate supply but these were now almost entirely extinct so the army hired horses during the 14 days annual training. An Imperial Horse

Society should be established, the Master of the Cambridgeshire Hounds told farmers. 10 01 28 & a

1910 The high ground near Cherry Hinton was the scene of some interesting military operations. For several hours the Gogs resounded with the crackle of rifle fire and the thunder of artillery as the tide of battle rolled slowly from Reservoir Hill past the Golf Links until arrested at Limepit Hill. The operations supposed that the Great Eastern Railway line was the frontier between two states which had mobilised their troops. A cavalry brigade at Newmarket was reinforced by some infantry and guns and Fulbourn was fortified. 10 02 25m & n

1910 OTC successful night attack 10 03 04j & k

1910 Henry James, a watercress seller from River Lane, was accused of searching for spent bullets in the soil at the Rifle Butts without having permission of the Commanding Officer of the Cambridgeshire Regiment. He'd got some girls to help to pick up about 6lbs of bullets that he'd sold to Mr Charles Carless, a marine store dealer of Broad Street. Two boys were also cautioned for picking up bullets. The Territorial Army said a good deal of damage had been done to the Rifle Butts by people picking up the bullets and they wanted to stop people buying them 10 07 15b

1910 A convoy, broken-down and captured by the enemy near Cantelupe Farm Haslingfield formed the objective of some interesting operations by the University Officer Training Corps and a small force of public school boys from the Leys School. The Cambridge garrison were very short of fuses and a convoy of wagons, disguised as manure carts had tried to reach them. But the horses became exhausted and they'd been obliged to halt for the night. The commander sent out column 500 strong to bring them in but encountered the opposing cavalry. The Maxim gun detachment did good service, firing from near the inn at Barton 10 11 11c & d

1910 The rising ground near Histon Station was the scene of operations by the C.U.O.T.C. It included an advance across country by the infantry battalion on a position near the windmill where a very strong gun emplacement had been constructed complete with communications trenches. The attackers crept cautiously to within 50 yards of the position without a sound being heard, then swarmed over the breastworks. A dummy gun was blown up with a thunderous boom which rolled away over the countryside. 10 11 18 & a.

1911 French inspects members of Cambridge University Officer Training Corps [1.6,1.18] – 11 03 17f

1911 Lord French, colonel, visits, 13 Mar - RC

1911 Red Cross Voluntary Aid Detachments formed to complete medical establishment required for Territorial Force in event of invasion [1.17]

1911 CUOTC field day, Gogs – 11 01 27a

1911 The ideas governing military manoeuvres are generally very practical and prosaic, if a trifle far-fetched. But those of the University Officers Training Corps are often diverting. General Stummakoffski had received a wound from the lance of one of his troops which prevented him sitting in the saddle and was forced to continue his flight in a litter, trying to reach Comberton. Firing was carried out at murderously short range and had ball cartridges been used they would have put enough bullets into the litter to have considerably alarmed 'The General' to say the least! 11 02 24c

1911 The camp of the Loyal Suffolk Hussars Regiment of Yeomanry has been pitched in Grantchester Meadows and already the greater part of the canvas village has been erected and presents a very picturesque appearance. There is a large marquee where men will take their meals and portable wooden buildings for the officers' mess. But it is a long walk into Cambridge and local motor-bus and taxi-cab proprietors and waggonette and cab proprietors might find it worth their while to run a service. There will be something like 500 men in camp and many who will gladly pay to be taken in to town for the evening. 11 05 12

1911 A public meeting was called to deal with objections over land that might be used during the forthcoming military manoeuvres. But no farmer or landowner attended. This was not due to apathy but to the methods adopted by the authorities for making the meeting known. No notice was inserted in Cambridge newspapers so the majority of the population remained ignorant.

There would be danger of abortions in breeding ewes and any stock should be removed. Civil compensation offices will adjudicate in any dispute. Engineers will report on all roads before and after the manoeuvres and meet local authorities with regard to any damage caused. 11 08 04g

1911 The proposed army manoeuvres have been abandoned due to the drought. This is a disappointment to local tradesmen. The tender of G.P. Hawkins had been accepted for the supply of bread to troops expected at Cambridge, Gt Wilbraham, Babraham, Fulbourn and elsewhere. Bicycles hired for the use of the advance party engaged in constructing telegraphs were returned to Robinson's bicycle showroom. The Royal Engineers encamped near Whittlesford station will take down the telegraph posts and wires already erected. Landlords of village inns have cause to regret the abandonment for the advance party of troops had evidenced a liking for a variation of camp fare. 11 08 25b

1911 Large crowds have witnessed successful flights during the week by the Army airmen encamped at Hardwick. Lieut. Cammell, flying his own Bleriot monoplane, was expected to arrive from Hendon shortly after dark on Friday night and petrol flares were lit on the camp ground which acted at once as beacons and as a guide to the most convenient place to land. But at Baldock he ran into a storm and was compelled to alight. He arrived early next morning. He later made another flight when the sight of the aerial monster combined with the noise it created terrified some farm horses. 11 09 01 (see also c. 26.1 for other accounts of flying in connection with the manoeuvres)

1911 The Intelligence Department of the War Office have been busy making a minute return of everything likely to be of use in case of war. The number of horses available, places suitable for camps, locality of wells, blacksmiths' shops and farms have all been noted. Cambridge would be a great medical base and a Red Cross hospital would receive medical and surgical cases from all the county hospitals in East Anglia. The headquarters of the surgical division would be at King's College and the medical wards in the Senate House. The nurses would be quartered in Downing College. 11 11 24c

1912 army manoeuvres held near Cambridge, the King stays at Trinity College whilst inspecting them; marred by 2 plane deaths & an airship accident [1.7,1.15,1.16]

1912 Military manoeuvres 1912, airships – feature – 82 09 24a

1912 Everyone should be able to live in safety in their own homes without fear of being murdered or having their property stolen, Prof Ridgeway told a packed meeting at Fen Ditton. The object of the National Service League was to make sure of the defensive powers of this country, so that if any force should land the forces of this nation should be able to repel them and destroy them, and keep the homes of the people in safety. The audience expressed their approval. 12 01 19e

1912 Members of the University Officers' Training Corp together with the Leys, Perse and County School O.T.C. took part in night operations with the Honorary Artillery Company from London. A brisk engagement in the vicinity of Arbury Camp culminated in the capture and blowing-up of a gun posted at the windmill near Histon station. The night was not favourable for a surprise attack, the moon was shining brightly and the defenders opened fire. Soon a brisk musketry duel was in progress. 12 03 08b

1912 A parade of past and present members of the Forces presented a very pretty spectacle. First came the Yeomanry in dark green uniforms with red and yellow facings, then came a blaze of scarlets – the 1st Cambridgeshires - followed by the Medicals in dark grey with maroon facings. Bringing up the rear the National Reserve with several veterans, including a Lancer, proudly wearing their uniforms, a fine body of men fit and ready to shoulder rifle again in

defence of hearth and home if need be. Overnight they were accommodated in the Corn Exchange, where they were provided with straw palliasses and blankets. 12 04 12c

1912 Newmarket was only 53 miles from the sea. If a hostile force landed on the Suffolk coast a stand might be made at Needham Market and a battle might take place at Bury St Edmunds resulting in 1,100 casualties. Where would they be taken, fed and nursed? Voluntary Aid Detachments trained men and women to give aid to the sick and wounded in the event of this country being invaded. Otherwise they would be neglected and left to look after themselves, Newmarket section of the British Red Cross Society was told 12 04 19 & a

1912 "Expect 40 wounded men 3 o'clock" read the telegram received by Croxton detachment of the British Red Cross Society. It appeared the army had been engaged with a force of the enemy near St Neots and as a result 40 men were wounded. By the time they arrived at Croxton Park the hospital camp had been pitched and everything was in readiness – stores, a kitchen and operating tent. The sufferers – members of the Croxton and Eltisley Boy Scouts - were treated by 80 men and women who had turned up. There was only one real casualty during the exercise – a child was bitten by a dog. 12 07 26b & c

1912 The Army Manoeuvres centred on Cambridge are the most important in the country for a considerable time. They will be a searching test of the scheme for the defence of London from an invading army landing on the East Coast. Some 80,000 troops will be engaged so people will see more soldiers and gain a better idea of modern warfare than ever before in their lives. All arms of the service will be involved with a large body of Territorials moving on bicycles to oppose the invaders, demonstrating their mobility and capacity for swift action. These wheelmen would bear the brunt of the earliest fighting and are capable of covering long distances. 12 07 26g & h

1912 Army manoeuvres; hostilities next week – 12 08 30i & j

1912 Manoeuvres begin – Stourbridge common, Linton – 12 09 06h & I; Fighting – detailed report – 12 09 13

1912 'Manoeuvritis' – reflections – 12 09 13g

1912 Manoeuvres – Dash on Grantchester, aircraft crashes, Trumpington street fighting, Newmarket operations – 12 09 13i & j & l training near Fen Ditton, Airship camp, John French visit, cavalry at Royston – 12 09 13h; photos arrival Liverpool Territorials at station, camp at Linton – 12 09 13m; air scouts, Col Cody biplane photo – 12 09 20

1912 His Majesty the King visited the Hardwick aero camp where he spoke to Colonel S.F. Cody, and inspected his famous biplane. He showed much interest in the position of the propeller, which is behind the pilot and not in front, as in the other biplanes at the camp. The King then commanded Col Cody to make a short exhibition flight. In a few seconds the plane was in the air, making several circuits, flying both high and low before pulling up gracefully within a few yards of the Royal party. The King then inspected the Naval biplanes before leaving. Shortly afterwards Mr de Havilland arrived in a biplane from the 'seat of war' – the manoeuvres around Linton 12 09 20e also 20d, photos 20f, g. Airmen's triumph, Mutlow Hill taken etc – 20h; fighting Horseheath – 20i, Castle Camps – 20j, airship 20k 20l 20n Swaffham Bulbeck see plane, troops based on the Green, Histon – 12 09 20o Swavesey has been little affected by the grand manoeuvres; a plane passed over and on three armed cyclists scouts rode through. But a village man driving a load of crates of empty beer bottles along the Huntingdon Road was captured by a detachment of soldiers. When first challenged he was not inclined to stop, but speedily did so when he had to look down the barrels of rifles. After the cart was overhauled he was allowed to proceed 12 09 20n

1912 A review of the recent army manoeuvres recognises the value of cyclists as a screen. The Welsh cyclists biked the whole distance from Cardiff in two days. One of the first cyclist corps was started in Cambridge under Major Rhodes. Those of the Cambridgeshire Territorial Battalion are now drawn from Ely but are only a few in number. There are probably more cyclists in Cambridgeshire than any other county and could easily furnish a whole battalion of wheelman.

The number of civilian cyclists noticed at the Manoeuvres was really remarkable and they seemed able to follow the troops anywhere and everywhere. 12 10 04e

1912 Sir – the Territorial cyclist has been used for the first time during the army manoeuvres. There is a battalion in Norfolk, Suffolk and Essex who would be distributed along the coast to repel any enemy landings or fight a delaying action until troops largely dependent upon the railway can arrive. Should there not be a cyclist battalion in Cambs who could proceed to any threatened place as reinforcements? Despite their shortcomings on open ground, the cyclist is the ideal mobile fighting man for home defence and should take his proper place in our military system – A Cyclist Sergeant 12 11 01f

1912 The Great Eastern Railway Company accomplished great work during the army manoeuvres running 200 trains to move troops, horses and guns. An engine in steam with an accident van and steam crane was made ready, carpenters prepared to perform any services and the edges of all platforms were whitened with lime. No less than 45 type-written special train notices had to be prepared involving the reproduction of many thousand copies by means of hand rotary machines. Blue paper was used for the inward travel and yellow for the outward. All this without interfering with ordinary passenger traffic 12 11 08

1912 Battle of Grantchester over swampy meadows – CUOTC night operations cross river by boat bridge – 12 11 22b & c

1913 Sir – Indirect conscription is one way to increase the efficiency of our forces. We suggest that no undergraduate should take the BA until he has trained as a Territorial. As well as learning to use weapons it would keep them healthy, nimble and strong. This would amount to 2,000 men in three years from Cambridge alone. The same principle should apply to candidates for the Civil Service, Police Force, municipal and railway workers. Employees of private firms do not have the same permanence of employment and could not be made liable. Signed Arthur Gray, A.E.

Shipley, W. Cunningham and other Cambridge Academics 13 01 10

1913 The moon and mud were the most momentous factors in the night military manoeuvres. The searchlight might have played an important part but could not be used at the last moment. But the bright moon meant it was possible to see men half-way across the field they had to cross before attacking the hills between Shelford station and Hills Road where wire entanglements had been prepared and two companies of infantry were waiting. Firing was fast and furious, the big guns and Maxim sounding above the splattering of rifles 13 01 24e

1913 Boer war veterans reunion – memories 13 02 21 p9 CIP

1913 The proposal of Cambridge dons that the BA Degree should be made conditional upon service in the Territorial Force has been met with a good deal of ridicule. Degrees and national development proposal met with ridicule 13 02 28 p8 CIP ; poem p6

1913 Military parade, open-air service Parker's Piece 13 06 20 p5 CIP

1913 Red Cross VAD detachments had a field day at Newton Hall Park. Shepreth send a complete detachment of both men and women. The village has a pensioned R.A.M.C., Mr A. Smith, who they made Quartermaster and threw himself heartily into the work. He improvised stretchers using ash poles but slings. These are necessary for it is quite impossible for bearers to carry wounded men long distances without them 13 08 01 p2 CIP

1913 College Servants formed a VAD so they could train to join the First Eastern Hospital. This was at a skeleton stage. Cambridge was an ideal place with all its colleges capable of holding a large number of people. It needed to be run on military lines 13 10 31 p10 CIP

1913 Following a battle on the Gog Magog Hills an enemy force have camped on Parker's Piece. They know the defeated English volunteers have hidden large supplies of ammunition near between Green End and Biggin Abbey and intend capturing it. But Cambridge Scouts will stop them. Assembling at Barnwell Railway footbridge with marksmen, matches, cycles and signal flags they will find the explosives first and blow it up rather than allow them to get it while Sea Scouts attack the enemy from the river. It should be an interesting field day. 13 12 05 p5 CIP

168.07

c.45.5: military history 1914-1919

During the Great War food was in short supply and Motor Agents were told to buy up mechanical implements. They managed to get some tractors and others arrived from America. Ladies, college tutors and errand boys came forward to drive and groups of engineers formed to attend them. At first they ploughed both day and night though farmers complained they turned up the sub-soil, making the land unusable. Now, once more at war, we must grow more food, Rotarians were told. 39 09 20e

1914 Jan

Territorial recruiting week has seen the Cambridgeshire Regiment up to full strength proving patriotic feeling remains strong and true. The wave of enthusiasm is spreading with recruits coming forward in gratifying numbers in Ely, March and Soham, proving Fenmen are determined not to be outdone in sturdy patriotism by the men of Cambridge. March is experiencing a wonderful revival of military fervour; the numbers had sunk very low but now there is every prospect the Company will be brought up to full strength. – pic Col Louis Tebbutt & Capt H. 1914 May

visit of Austro-Hungarian ambassador [455.5a.7]

Wimpole Park was the scene of a fight for an imaginary buried treasure between members of the C.U. and Leys School O.T.C.s and the 1st Battalion Cambridgeshire Regiment. All the troops travelled from Cambridge in motor cars and motor wagonettes or on motor cycles and bicycles on Saturday night. They carried out a lengthy programme of operations, had breakfast and were back by six next morning. But the exercise was marred by the lack of independent umpires. Nobody knew how things worked out. 14 05 22b & c

1914 Jun

The field day and inspection of the Red Cross Voluntary Aid Detachments was held at Linton. At the station railway wagons or carriages were prepared as for the reception of the wounded and the waiting room was fitted up with half a dozen beds with a field kitchen in the goods yard. The platform in the goods shed became a ward for less serious cases and in a siding stood the carriages used for the stretchers containing the wounded. 1914 06 12 p4

1914 Jul

Cambridgeshire Regiment 1st Battalion at full peace strength, 960 assembled for training – RC

1914 Cambridge Voluntary Aid Detachments and Red Cross held an exercise at Newnham College. It assumed severe fighting had been going on in Norfolk and a large number of casualties had been sent to the First Eastern General Hospital. When another train load of wounded arrived they received orders to convert Sidgwick Hall into a temporary hospital where eleven beds were provided and patients were treated for crushed hands and fractured tibia. Other nurses were prepared splints and bandages and a septic ward was set up 14 07 10

1914 Red Cross Field Day: a hostile force had landed at Cromer and much fighting was taking place, forcing the First Eastern General Hospital, normally stationed here to transfer to Bedford. Wounded from a make-believe battle near Duxford ... were taken by field ambulances to a field hospital at Whittlesford Station where the platform was used for refreshment and for re-bandaging the less serious wounded. Temporary wards were erected in the station yard to be filled with the 'wounded', represented by Perse School Boy Scouts who arrived in railway goods van. 14 07 10

Cambridgeshire Regiment Reserve Battalion authorised 31 Aug – 2/1st Battalion

The European Blaze,—The long anticipated crisis has come and Cambridge is in the grip of a patriotic war fever. Of panic there is none. A few scaremongers there may be, and the voice of the Little Englander is once more to be heard ... but their screeching and squealing are only to be faintly heard in the brief lulls which occur between the surging roar of the intensely loyal, patriotic, confident band of Britishers. Cambridgeshire men are in the front rank of the battle ... amazed at the number who have responded to the call for Reservists ... Throughout the first two or three days of the week Cambridge residents experienced the feeling of tension which has been typical of the country. Large crowds of townspeople have assembled outside newspaper offices during the week, in order to learn the latest war news and when the intelligence of war with Germany became known, the tension of the previous few days was partially relieved. Cambridge members of the Naval Reserve received notices calling upon them to report themselves. The calling up of the Army Reserve had an even wider operation, employees in colleges, railwaymen, policemen, postal officials, Vanmen, etc abandoning their civil occupations at the call of the State. The railway station presented an animated scene, hundreds of Reservists arriving from all parts of the town and district and proceeding to their regimental headquarters 14 08 07 CIPof
Cambridge Trade has suffered less than elsewhere: August and September are dead so far as business is concerned, so that with the advent of the troops many of our tradespeople boast of a larger turn-over than is usual at this time of the year. Now it is up to our young men to come forward and give further evidence of loyalty and patriotism 14 08 28 CIPof

The army reservists, including a dozen members of the police force, received orders to join the colours without delay. About 20 left Cambridge station that evening by the mail train. They received a hearty send off from a crowd of 250 which included a cornet player from the Salisbury Club. The train was a little late and the men had a long wait which was enlivened when the crowd sang patriotic songs. When the train steamed out the crowd sang 'Auld Lang Syne' and cheered till it was out of sight 14 08 07

The Cambridge squadron of the Royal Suffolk Yeomanry paraded and were sent to their billets at Ross Street school and the County Girls School. A number of others were quartered in the Corn Exchange. The streets presented a military appearance. Territorials in uniform carrying their kit bags and rifles were to be seen. Officers in motorcars or motor cycles and orderlies on bicycles were hurrying to and fro, sentries with fixed bayonets were posted at the Corn Exchange and vehicular traffic stopped by the police 14 08 07

Men of the First Eastern General Hospital were quartered in Corn Exchange Street. An elaborate scheme was drawn up for constituting Cambridge a great hospital centre and the various college buildings were mapped out for conversion into wards. But this scheme is intended in case of invasion and it is to be hoped will never be needed. At present the need is for accommodation at places where wounded men are likely to be landed 14 08 07

Cambridge scouts guard telephone exchange - 14 08 14 p2

Arrangements are in hand for the accommodation of a very large number of wounded in the event of Cambridge being established as a base hospital and completely equipped wards have been fitted up in many of the colleges. Nearly 100 Army Nursing Corps nurses have been quartered at Downing College and a large number of beds lent by various colleges. Scores of voluntary workers are making clothing. Accommodation for 500 wounded may be required when the Great Court of Trinity College would become a huge temporary hospital 14 08 14 p5

Shepreth VAD could have a hospital for 26 patients ready within 24 hours. 14 08 14 p5

There has been a splendid response to Lord Kitchener's appeal for men; each day large numbers have signed on at the Corn Exchange including Jack Child, the well-known boxer

Langley as despatch rider 14 08 14 p5

Cambridge Yeomanry marched from the stores in Panton Street to the railway station where they loaded their baggage into luggage vans. A number of horses were requisitioned in the station yard, including a cab horse which was taken out of the cab, unharnessed, then placed in a horse van. A butcher's horse was handed over. A country trap came into the yard to convey sad tidings to three of the men that their father had died. It was impossible for them to return home and they had to remain with their comrades. Finally a special train including vans loaded with machine guns and ammunition pulled out while the crowd sang 'Rule Britannia' 14 08 14 p6

Territorials paraded on Parker's Piece then marched at ease, their rifles slung over the slope as it pleased them off to the station 14 08 14 p6

Rumours of the presence of spies have been circulating during the last few days. At Warboys the telegraph wire which rings the signal bell at the station on the Somersham to Ramsey branch line was cut during the night and another partially severed. Two foreign gentlemen were seen by Mr W.J. Unwin acting in a suspicious manner at Histon. He followed them to Girton and at each of the three bridges they stopped and examined them. At Girton he phoned the police and a constable was sent out. The men were requested to go to the police station which they did without demure and after questioning were liberated at once. Meanwhile police have been issued with rifles 14 08 14 p7

Exchange and the Prince Albert, Ely. The troops encamped in Cambridge appreciate the way patriotic men and women have welcomed them and ministered to their comforts. Every camp has a tent where tea and coffee, bread and cakes can be obtained with another for reading or writing letters. A post box is cleared every two hours and a stall set up selling envelopes and pencils. It is one of the finest camping grounds they have ever been upon and the large well-kept open spaces are well suited to their new use. 14 08 21 p5

Cambridge people are adding to the comfort of the soldiers encamped here. A refreshment tent has been set up for the artillerymen on the Polo Ground at Trumpington with another on Mr Matthew's meadow, Cherry Hinton Road. The Church Institute allows soldiers the use of their billiard table. There is a reading room in the Newnham School for the camp on Lammas Ground and a games room at the Prospect Church in Eden Street with writing material and picture postcards. Many socks for soldiers are being taken to the small striped tent on Midsummer Common and shirts would also be appreciated 14 08 28 p4

Soldier from Stourbridge common camp drowns 14 08 28 p5

A novel concert was given for men encamped on Midsummer Common: the motor launch Viscountess Bury was moored beside the bank at Stourbridge Common and its top deck used by the Magpies Concert Party was a platform. The launch was a pretty sight, decorated with vari-coloured lights and hundreds of men, including officers, sat on the sloping bank. Each song was enthusiastically enjoyed. The vicar of Chesterton gave an address during the interval and invited the men to attend Holy Communion on Sunday morning 14 08 28 p7

A respectable Chesterton chimney sweep was charged with buying two pairs of woollen pants from soldiers camped on Midsummer Common. A constable on duty in plain clothes saw a soldier put something in a white pillowslip he was carrying; when challenged accused said it was food for his children. He found banana, meat and some mackerel, but there were also two pairs of pants with a regimental number – 6178, also W.D. and the broad arrow. The soldier said he was short of money and did not want them; they were hot, woollen things and not necessary at this time of year. Other men stole pants soldiers had washed and put on railings to dry 14 08 28 p7

Cambridge is one of the principal base hospitals to which the brave men wounded at Mons have been brought, 150 are now being cared for at King's College, to which the First Eastern General Hospital has been transferred from the Leys School. They include a Cambridge man, Leonard Cornwell of Gwydir Street, who was the very last to be placed in the train. So within a month of his departure he is back in his own town bearing marks of the terrible conflict. 14 09 04

Wounded Soldiers. — About 200 wounded soldiers arrived after a long and tiring journey by rail and sea from the front. There were comparatively few Cambridge people at the railway station when the special trains arrived, and with all possible speed under the circumstances the wounded men were conveyed to the East Anglian Divisional Hospital at Trinity College. 14 09 25 CIPof

Cambridge Men on Torpedoed Ships Aboukir, Hogue and Cressy (named) 14 09 25 CIPof

The train with wounded from the front was delayed. Rooms on the Great Northern platform were converted into wards for serious cases before being taken to hospital. Outside a fleet of motor cars and tradesmen's vans converted to ambulances were ready to take the men to the First Eastern Hospital now at Trinity College. It was not easy to lift the badly-wounded men out of the carriages but stretchers were placed on luggage trolleys and wheeled slowly along the platform. There were tears in the eyes of onlookers 14 09 04 p7

The presence of the military has greatly improved the trade prospects of Cambridge and there is no immediate fear of unemployment. The end of the Long Vacation is always a slack time but at the moment the town is busier than usual. It is not certain the town can rely on the continued presence of troops throughout the war and many firms are not sure how they can keep going. The

printing trade has been hit by the stoppage of trade circulars and advertisements, builders say contracts have been postponed putting plasterers & stonemasons out of work and the position of college servants and is being considered. The problems of lodging house keepers may be overcome by the billeting of officers and the presence of relatives of the men in the hospitals. But they may not get the rent usually paid by undergraduates. In laundry work the hospitals and military have gone to the larger laundries and demand from ordinary householders has decreased due to motives of economy. Tailors have sufficient work owing to the army orders but women's outfitting department report a shortage of custom. Several jobbing gardeners are out of work & owners of unused plots should consider putting them into cultivation to grow vegetables. 14 09 04 p

A complete military hospital to accommodate 520 patients is to be built on college playing fields, Burrell's Walk. The hospital has to be completed within a month – indeed a considerable part is required within a fortnight so that the present hospital at Trinity College may be vacated before term commences. It will comprise of five wards with 100 beds in each, a supply block, operating theatre, mortuary kitchens etc. This means working at top pressure, night and day. When complete it will be one of the largest of its kind 14 09 25

Nearly 200 wounded soldiers arrived at Cambridge in two specially-fitted ambulance trains. They had come straight off the hospital ship that had brought them from France; some had been travelling for four days. They lay on beds arranged in two tiers along the sides of long compartments and were carried on stretchers to the ambulance vans waiting outside the station. Quite a large crowd waited patiently for several hours to see them arrive and give them a cheer as they were brought out. 14 09 25

Mr & Mrs Kerry of Mill Road have received news of the death of their son, serving with the 16th Lancers. His sergeant wrote: 'Walter was shot about one o'clock and died three-and-a-half hours later. He was conscious up to the finish. He told me to tell you that his last thoughts were with you all and that he died like a man. Poor young Horlock, of Cambridge, was thrown from his horse and hurt at the same time, but he is not seriously injured' Hopwood experiences, Kitchener's army 14 09 25

Wounded Soldiers Return. About five weeks ago, thousands of British soldiers were under canvas at Cambridge in readiness for departure to the Front. Their destination was unknown, and it was naturally surmised by the men that they would be going to Belgium. Yesterday afternoon some of these soldiers returned to Cambridge, maimed in some cases and badly wounded in other cases. The ambulance train arrived at Cambridge about 5 p.m., and contained 130 wounded men from infantry, cavalry and artillery regiments. In 30 cases the soldiers were unable to walk, and were carried from the train on stretchers by the local members of the Voluntary Aid Detachments, and thence to Trinity College, the headquarters of the 1st Eastern General Hospital (T). Included in the wounded were men of the East and West Yorks. Regiments, Royal Fusiliers, R.H.A., Norfolks and Suffolks, and a large proportion of them were men of the Brigade which was encamped in Cambridge recently. 14 10 02 CIPof

The work of raising and training the new Cambridgeshire Battalions is proceeding very satisfactorily. Recruits are being treated well, comfortably housed, warmly clothed and well fed. Their physical improvement has been great and they have mastered the rudiments of drill and

learned fixing and unfixing bayonets. When rifles arrive they will be well fitted to bear them. 14 10 09

Troops are based at Melbourne Place school and the County Girls' School where classrooms make admirable barrack rooms. The men sleep on the floor in straw palliasses – canvas bags filled with straw – and a blanket apiece. The kitchens are well equipped and the catering in the hands of Mr G.P. Hawkins of the Dorothy Café. 14 10 09

At Melbourne Place school canteens have been installed adjoining the dining hall. Mr Dodds of the Abbey Stores, Abbey Road has one counter where soldiers can obtain all kinds of groceries, sardines, apples and walnuts together with writing materials, boot polish, braces and bachelors' buttons. Everything is sold at moderate prices. A penny will purchase almost anything in stock. At the wet canteens men can obtain beer or minerals and hot coffee is supplied night and morning. 'Reveille' is sounded at 6 a.m. and, after coffee, men have a spell of Swedish exercises before breakfast. Then there are lectures on musketry or guard-mounting by NCOs, all old soldiers, followed by drill. After dinner there is a short period for a smoke or a look at the papers. Afternoon parade and drill follows, then a lecture before the men go for a short route march during which they are allowed to smoke and exercise their vocal abilities in 'Tipperary'. After tea they are free until 9 pm. Uniform and boots for the soldiers based at Melbourne Place School are expected to arrive shortly. Meanwhile they are wearing their civilian attire but have been issued with shirts and socks. The men seem happy and well-pleased with their lot. One farm labourer from Wood Ditton says "I'm better off now than I ever was. My guv'nor's payi8ng me seven shillings a week and I'm getting seven bob here and board and lodgings and clothes". He was contemplating marriage before the call to arms came but he and his sweetheart have patriotically agreed to wait until the war is over. Let us hope their happiness may not long be deferred. 14 10 09

A soldier from the Gloucester Regiment, lying in Trinity College, writes "I am a wounded soldier who has lost his leg whilst fighting at the front. I had it taken off by Lieut.-Col. Deighton at Cambridge Hospital, which was a great relief to me and saved my life. I wish to thank all the visitors who came in to see us wounded soldiers and for the presents I have received. We get treated very well and the nurses and sisters are so kind and gentle. A choir comes to sing on two evenings. It is lovely and we enjoy it so much. I am proud to say that I lost my leg for King and country. Others including Sawston 14 10 09

Cambridge Civilian Drill and Sporting Club: It will certainly not reflect to the credit of the Borough of Cambridge unless we can secure a total enrolment of several thousands of civilians not eligible for the Regular Army, and who are willing to put themselves into training so that they may be of service to their country should the necessity arise. 14 10 16 CIPof

Another trainload of wounded Belgian soldiers arrived at the station and were taken to the Hospital at Trinity College. Now 100 Belgian refugees are expected who will be housed temporarily in the Corn Exchange before they are found homes. Not many households can take a whole family but streets might share them. Professors from the University of Louvain have arrived and a room at the Engineering Laboratory made available for lectures 14 10 16
Two military funerals took place from the First Eastern General Hospital at Trinity College. One body was sent in a coffin wrapped in a Union Jack to the station and put on a train to Durham. The railway expenses were generously defrayed by Nurse Keep. The funeral of other, Arthur Larkin of the Royal Scots, was held at Newmarket Road cemetery. He'd been wounded at Mons and the cause of death was tetanus. Bugler Royston sounded the 'Last Post' 14 10 16

When the war broke out a number of German women were in Cambridge for the University Extension Course. One of them has described her experiences in the 'Cologne Gazette' which is strictly anti-English. She says that they had been cut off from their families and were without money. They were taken into families who helped them, raised funds, took them to the station and arranged for their journey home. They were treated courteously in every respect. 14 10 23

A new barracks is to be erected on the flying ground on Cherry Hinton Road, recently used by Gustav Hamel. It will provide for 1,000 men, thirty to a hut. It needs to be completed in six weeks and jobs will be found for 400 men, working day and night. The builders are W. Sindall. It will include officers' mess, cookhouses, shower baths, horse shelters, stores and guard houses together with a comfortable institute with reading room and canteen. 14 10 23

After the Home Office ordered the arrest of all Germans of military age 14 were detained in Cambridge. The arrests were effected very quietly, the prisoners being conveyed in taxi-cabs to the Police Station where they slept on the floor of the recreation room. Two are undergraduates. Then were removed to the railway station in a motor bus and sent off to an internment camp under the charge of Det-Serg Marsh. Their destination is secret, but the train goes to Doncaster. One or two of their relatives were able to say good-bye to them. 14 10 23

Cambridge Women Suffragette Association has published a leaflet 'How to Help in Cambridge in time of war' listing organisations rendering public service. It includes the local branches of the National Relief Fund Committee and the Soldiers and Sailors' Families Association, relieving distress and supporting dependents of men serving. The Red Cross Society conveys wounded to the First Eastern Hospital and supplies blankets. Others are the Ladies' Recruiting Committee, the Sidgwick School of Needlework and the Charity Organisation Society 14 10 28

As motor ambulances are much needed Cambridge Red Cross have decided to hire a chassis from the Cambridge Automobile and Engineering Company and build an ambulance upon it. Other chassis have been lent by Mr Briscoe of Longstowe, Lady Inchcape and Mr Douglas Newton while Lady Waldstein has also converted one of her cars into an ambulance. These, together with those lend by Messrs King & Harper will convey wounded with increased comfort from the station to the First Eastern General Hospital 14 10 28

First Cambs. Officer to Fall. — Captain Francis Percy Campbell Pemberton, of the 2nd Life Guards, of Trumpington Hall, was killed in action near Roulers on Monday, October 19. Captain Pemberton, who was 29 years of age, was educated at Trinity College, Cambridge. He entered the Army in 1907, and received a captaincy in August last. In May, 1912. The news was received with, the deepest regret in Trumpington, where Capt. Pemberton was much beloved. 14 10 30 CIPof 14 10 28

More Wounded Arrive.—A Great Western Red Cross train arrived at Cambridge on Monday evening with a number of wounded soldiers from the front, including many men of the 6th Division, who were recently at Cambridge. There were 174 patients, including 33 cot cases, and 156 of the men were taken to the 1st Eastern General Hospital in Burrell's Walk, and the remainder to the Research Hospital, Hills Road. 14 10 30 CIPof

The new Territorial Forces headquarters in East Road are nearly completed and have been occupied by troops training in Cambridge. But the formal opening has been postponed. It stands on the site of the Technical Schools which have been adapted and added to and includes a spacious drill hall and miniature rifle range abutting on to Adam and Eve Row. The Quartermaster's stores include a wooden gallery for use as a saddlery store for the Yeomanry 14 11 06

The new hut barracks on Cherry Hinton Meadows are making remarkable progress: all the frames and roofs have been erected and it presents the appearance of a miniature town. The guard house is a long oblong building with offices for the Commanding Officer and clerks, a large detention room, guard-room and a number of cells lined with sheet steel. The regimental institute contains a games and reading room, supper room and canteen, nearby is a coal yard and shower baths. A parade ground and miniature rifle range are to follow 14 11 06

Wounded Soldiers Entertained. —at the Playhouse, Mill Road about a 100 wounded British soldiers, who were being entertained by the Directors, rose to a man and cheered lustily 50 Belgian comrades, who were also guests of the management. The Belgians returned the compliment by giving three hearty cheers for their British friends. Tea, chocolates and cigarettes were handed to the soldiers by a number of ladies, who volunteered their assistance. 14 11 13 CIPof Wounded arrive from the War - another train-load of wounded soldiers arrived at Cambridge. There were in all 173 wounded, and of these 25 were stretcher cases. Included in the party were members of the 6th Division which had laid at Cambridge in August last. 14 11 20 CIPof

Suspected Espionage in Cambs. — motion passed "That this Council makes urgent representations to the Home Office that powers be granted to local authorities to deal with the espionage suspected to exist in Cambridgeshire, and that such powers be more practical and stringent than those already possessed by the police with regard to aliens and recently naturalised persons." There was some opposition to the motion which was eventually carried by a majority of 26 to 15. 14 11 20 CIPof

The Germans had a great network of spies, County Councillors were told. The county should be purged of all spies or people of treasonable actions. The Emergency committees which were being formed should ensure people were not installing secret petrol stores for Zeppelins or watch for partisans with carrier pigeons or wireless apparatus. University Laboratories were doing much undisclosed research involving explosives and chemicals and employed a high proportion of aliens. A man who had watched army evolutions on Parker's Piece was pursued and arrested by two police constables after an old lady denounced him as a spy. A large number of naturalised German people lived locally but in the zeal to put down espionage an enormous amount of injustice had been done. 14 11 20

People in Shelford and Stapleford are worried about mysterious lights shining on the Gogs and are concerned that there are spies. But Dr Henry Bond says the light came from his house. There is concrete in the foundations and the removal of the house might provide a base from which a German gun could demolish King's College chapel. He admits he speaks German and has had holidays there. But he is not a spy and honest folk are quite safe. However given the present alarm nobody who has electric light in his house, a bottle of German wine in his cellar, or worse of all (like our Royal Family) German blood in his veins, will be safe. 14 11 20

There is no more potent cause of disease amongst soldiers than impure water. When Cambridge became a mobilisation centre and the Sixth Division was camped along the Cam from Jesus Lock to the Pike & Eel, Sims Woodhouse, the Prof of Pathology, took a bucketful of river water, from a spot where the soldiers were bathing and washing their clothes and by experiment turned it into perfectly pure and palatable drinking water. Even water polluted by corpses is made innocuous. It will be surprising if the whole army does not benefit by his research 14 11 20

University student numbers have almost halved as some 2,000 undergraduates have been commissioned into the army. This has led to nearly 1,500 empty lodgings, meaning difficulties for lodging-house keepers. They saw the grey uniforms of Universitymen about the town and

soon they would have another lot of undergraduates going away. All this affected tradesmen. It was time to rebuild the workhouse 14 11 20

Another trainload of wounded soldiers arrived at Cambridge station. Owing to the inclement weather and having to remain for hours at a stretch up to their waist in water in the trenches, many of the men had to be invalided home suffering from rheumatism. The new wards at the Military Hospital in Burrell's Walk are practically completed and at present there are about 900 wounded soldiers receiving treatment there. 14 11 20

The Hospitality Committee for Belgian refugees has equipped four houses in which 55 refugees have been accommodated. They are 'Scotsdale' on Grantchester Road where a Flemish priest has been lodged with nine members of his family and 'South House' Barton Road which houses 14 members of doctor's family. A young lace maker and a family of eight from Louvain lodges at No.4 West View Newnham while at No.11 Brookside there are 22 refugees from Malines and Ostend. In Regent Street a studio has been converted into a fair-sized reading room where Dutch, French and English papers are supplied. 14 11 27

The first VC of the war has been won by a Cambridge man, Sergt Papworth of 15th Hussars. His parents formerly lived at Chesterton and now live at Hayward's Heath. He was with a small troop of 10 men that suddenly came across a large force of 6-700 Germans. Undaunted by the fearful odds the Hussars retired in good order, inflicting severe losses on the enemy. The Hon. E.C. Hardinge was injured and Serg Parish remained behind and kept the Germans at bay while his officer reached a point of safety. Cambridge will be proud to learn that the gallantry of a local man 14 11 27

The Safety of Realm Act gives power to army to take possession of land and construct military works, including roads and bridges. They can take possession of any buildings for supply of gas electric and water, put buildings in a state of defence or remove them. They may order people to leave any area needed for military use and order the removal of vehicles and boats. No person may communicate information about disposition of forces, communicate with the enemy, spread false reports or prejudice recruiting, training or discipline; nor to sell drink to soldiers on duty 1914 12 04

The Cambridge Corps of Guides is composed of men with an intimate knowledge of their locality, its roads, bridges, blacksmith and wheelwright's shops, camping grounds and billeting accommodation. They will not bear arms or wear uniforms but have been supplied with button-hole badges. In event of invasion they will act as a guide to troops. They include F.W. Crain of Fen Ditton, Frank Muncey from Fordham and George Watson from Babraham 1914 12 04

With so many regular troops abroad any man trained to defend the homeland in as emergency will be invaluable, the Chief Scout says. We are driven to be on our defence lest we come under the heel of the Prussian bully and it is the duty of every patriot to take up arms in a good cause. If Scouts can supply a few thousand 16-year-old boys, trained to discipline and marksmanship will be worth a dozen men trained to nothing in particular. It will not be a permanent policy for the scout movement 1914 12 04

Stephen Marshall of Cambridge was one of the three survivors when HMS Bulwark was destroyed at Sheerness. He was drinking tea when he was blown 100 feet up into the air then found himself in the sea which was swirling tempestuously. There was no wreckage to which he could cling and he was obliged to start swimming until picked up by a boat. He is being treated in Chatham Hospital. His family, in Trinity Place, rejoice to hear of his lucky escape. But Joseph Ellis, a stoker on the ship, was killed. His father is a hairdresser almost opposite Burwell church 1914 12 04

Soldiers billeted at Melbourne Place School would move to the hutments on Cherryinton Road shortly but others have arrived and could take their place. The Drill Hall in East Road and the Girls' County School are already overcrowded. It would mean that East Road and King Street Schools would no longer be required. The military would pay £400, about one-tenth of the cost of

billeting. But billeting would relieve the hardship of lodging house keepers now fewer undergraduates were studying at university 1914 12 11

The term which has just ended has been described as perhaps the most wonderful on record. At the beginning some 1,800 men were up, of these about 500 joined the O.T.C. with some 400 training for commissions. But we may still expect between 1,200 and 1,500 men back after Christmas; then there are 183 Belgian students in residence & plenty more non-combatants may be expected 1914 12 11

Trade & employment in Cambridge have not been hit by the war. But with nearly 600 students missing, colleges that are hardest hit will be unable to keep on all their servants. Twenty per cent of builders are now out of work. Many women are employed in the jam factory at Histon and in the two knitting factories where War Office orders have provided more work than usual. Women have obtained posts vacated by men clerks who have gone to war but a large number of day girls are out of work owing to the plight of the lodging-house keepers. As these girls are in many cases the daughters of women who are themselves injured by the war, this state of affairs means a further depletion of an already scanty income. For good general servants there is a greater demand than supply, but there is very little demand for the services of any of the better class of servants and the number of between-maids out of employment is especially large. Hand laundresses have been very hard hit by the war. The great majority of these women are normally engaged in working for the colleges and, owing the stoppages of games, the amount of washing sent per man is much less this term. When the woman is the chief breadwinner of the family their position is extremely serious. The laundresses themselves are not in such a bad plight, for many have made considerable sums during the busy six months of the year and many of them have savings laid by. But only in very few cases have they got husbands in independent work. A large number of tailoresses are entirely unemployed and the remainder are working short time. Some have gone to Leeds to work making khaki uniforms and others will probably follow. The better class dressmakers seem more affected than the inferior ones Business is slack just now and is expected to be much worse after Christmas when business is usually slack. The dressmakers and milliners' hands employed in shops seem to be on short time. Here too the better class shops are worse hit than the cheapest establishments and several employees say they will be unable to keep their hands for a prolonged period without a considerable improvement. Shirt makers are busy at present but their usual work is almost entirely replaced by the making of shirts for officers' outfits and there is apprehension that at the end of this term this work will be to a large extent cease 1914 12 11

Emergency committees have been appointed to act in concert with the military authorities in case of invasion. That for the Isle of Ely is headed by Mr C. Bidwell and includes Mr Luddington of Littleport, F. Harlock of Ely, A.E. Wright of Haddenham & Owen Ambrose from Stuntney. Their powers include the removal of livestock, vehicles and foodstuffs from the scene of operations and facilitating the passage of troops through the area. Every man should take his part in the struggle. If he is not employed in permanent work he should enlist or join the nearest Volunteer Corps. He will be provided with a badge and counted as a combatant though no arms, ammunition or clothing will be supplied. Anyone who declines to enlist must not take part in the defence of his country and in case of invasion must surrender any arms he has in his possession. He will be liable to duties such as digging trenches or burying the dead. The public should not carry arms on any account. This applies to some local gentlemen who have threatened to use arms in case of invasion: such steps would provoke reprisals on inhabitants and the destruction of buildings 1914 12 11

1914 Dec

large number of troops arrive after slack time, solving problems of lodging house keepers [5.5,5a.27]

Scout Defence Corps formed [5a26]

Their Royal Highnesses Princess Christian and Princess Victoria visited Cambridge on Thursday afternoon and spent a considerable time at the 1st Eastern General Hospital, where they spoke to a large number of patients, both British and Belgian. 14 12 18 CIPof

Storm and Floods. responsible for considerable damage to telegraph and telephone wires. The heavy downpour of rain and the blinding snowstorm late at night found the weak spots in an enormous number of house roofs in Cambridge, and the exceptional downpour swelled the stream of the Cam until the water flowed over the banks. The greater part of Midsummer Common was covered with water and the paths were impassable. Boathouse and boathouse yards were flooded and military men who were billeted in the boathouses were seriously inconvenienced. In several instances they were compelled to seek billets elsewhere. Thousands of acres of land in and around Cambridge were flooded. 14 12 25 CIPof

Soldiers are to be supplied with liquor in Cambridge public houses only between 12 noon and 8.30 p.m. by order Headquarters of the visiting troops. The Mayor has addressed a letter to the licence holders in the town strongly recommending the order is strictly obeyed. 14 12 25 CIPof
The Mayor and Vice Chancellor had appealed to the War Office to send more troops. They could be billeted in lodging houses, two in the living room and two in the bedroom. As there would be no vacation they would be better off than they would be letting to University men. But troops would be billeted first on the outer parts of the town and work towards the centre to give some margin for emergency by having the central part to fall back on 14 12 18

Mr Stearn said that it was not troops that Cambridge required but something to take the place of gentlemen undergraduates. There were 'crack' regiments like the Honorable Artillery Company, sportsmen's brigades and gentlemen's brigades. But they could not put troops from mining districts in rooms fitted with electric lights and Smyrna carpets. But the Mayor said they could not dictate to the War Office what troops they got and no purpose would be served by debating their quality 14 12 18

Professor Sims Woodhead, said while members of the Sixth Division were based in Cambridge, before going to the front, one man was found dead in his tent. There were rumours he had succumbed to typhoid inoculation but a post-mortem showed he had not been given one. To get the best results from inoculation men should be rested and given light food. Then they would be well again after one or two days. But a man who would not rest and have his arm in a sling was four of six days in a very uncomfortable condition 14 12 18

Jane Pegg, wife of an Impington coal merchant, said she saw a man at Histon station wearing a blue overcoat similar to the greatcoats of the Belgian soldiers. He said he was from Hills Road Hospital and had been wounded at Liege where his father was killed by his side. Feeling sorry, she'd given him a meal and invited him to stay for the weekend. But really he was a butcher from St Ives. The lad said he'd return to his mother and promise to be a good boy. But he was sent to prison with hard labour 14 12 25

Billeting – where the military authorities take an empty room in a house, the amount paid is 3d per night per man. Where bed and attendance is provided this is 9d. The War Office will accept as a 'bed' a mattress on the floor, with bedclothes, so a householder can get the extra sixpence. For this he is expected to cook the men's rations – they can draw their meat ration twice a week and so get a decent joint. Corn Exchange requisitioned 14 12 25

Compared with their comrades in the trenches, the soldiers quartered in Cambridge had a fairly good time. The wounded in the First Eastern General Hospital spent as enjoyable a time as it was possible for injured men to do. Men at the new hut barracks at Cherryhinton Meadows also got on well, despite their muddy surroundings, albeit they had to depend entirely upon the generosity of their officers, supplemented by their own resources, for the seasonable fare they enjoyed. The Territorial troops billeted in private houses also had a good time but, it must be confessed, the rations issued were somewhat meagre and the men were dependent on the good nature of the townspeople on whom they were billeted. Some were provided with a Christmas dinner by their

officers and temporary reading rooms were opened in various parts of the town. Unfortunately the Territorials arrived such a short time before Christmas that there was not sufficient time to organise anything on a large scale to deal with so many troops. Householders did their best to make as pleasant a possible the Christmastide of the lads who had left their distant homes at the call of duty and most shared in the family's Christmas dinner. Some men billeted in empty houses spent rather and rough and ready Christmas. 15 01 01

The season of peace and goodwill has seen no cessation in the stream of stricken humanity from the battlefield and on Christmas Eve another trainload of 150 wounded men arrived at Cambridge station. A further batch of 100 arrived next morning; 99 of the 100 had such serious injuries they had to be removed on stretchers. This made a heavy demand upon the ambulance resources of the Red Cross Society but fortunately there were a number of field ambulances belonging to the Welsh Division and these were brought into use. On Christmas morning Princess Mary's gifts were distributed; this comprised a substantially-made and handsomely-embossed japanned box containing a packet of tobacco, a briar pipe, a packet of cigarettes and a dainty Christmas card. These together with Christmas cards from the King and Queen, Vice Chancellor and Mayor and gifts of chocolates, crackers etc from Mr Almeric Paget, MP. On Boxing Day the men received gifts from the Lady Waldstein's Fund comprising Japanese tin boxes, coloured light blue and bearing an excellent view of King's and Clare College from the Backs printed on the lid In the evening a Punch and Judy show toured the wards creating much amusement among the Belgian soldiers, some of whom had never seen them before. Christmas dinner was accompanied by mineral water supplied by Messrs Barker & Sons together with grape fruit and oranges from Jamaica. The wards presented a very seasonable appearance, being lavishly adorned with holly & mistletoe

Four companies (954 men) of the Cambs Battalion Suffolk Regiment spent Christmas at the new hut barracks at Cherryhinton Meadows. They also got on well, despite their muddy surroundings, albeit they had to depend entirely upon the generosity of their officers, supplemented by their own resources, for the seasonable fare they enjoyed. They decorated their huts and made them look as bright as possible with one or two Union Jacks, a few fathoms of coloured paper chains, an armful of evergreens and some streamers. We regret that practically no Christmas gifts were sent to the barracks from outside – except those they received from their relatives – and the whole of the expense of the festivities fell upon the officers and men themselves. Some of the companies had turkey or roast beef, and other luxuries

After dinner the men were free to do as they pleased and most amused themselves with impromptu entertainments in the huts which seemed to be sufficiently warmed by the slow-combustion stoves. The camp institute is well-lighted and comfortable room with various games and a canteen and when the curtains separating the games room from the canteen are drawn aside a large room is available for entertainments, assaults-at-arms etc. It had been arranged to hold athletic sports but the weather conditions were so bad this could not be carried out and a boxing tournament was hastily arranged together with exhibitions of bayonet fighting. The YMCA have kindly given a large hut which will be erected in the centre of the barracks and should be open in January 15 01 01

The Belgian soldiers at the Rest Home (1st Borough Red Cross Hospital in Hills Road) were given a good time; the rooms were cheerfully decorated and special Christmas fare provided. Each man received a gift

A short service to welcome the troops to Cambridge was preached in Kings College Chapel on Christmas morning. Most are likely to come back from active service but some will return no more. It may be you or it may be the man next to you. All ought to be prepared to die with a clear conscience. Do not leave a heritage of woe and shame to some poor weak member of the gentler sex, just because your own self-control failed you in the midst of temptations in this town

Field Ambulance Corps not in private billets were entertained at the quarters in the pavilion of the Gonville and Caius College Cricket Ground. Officers and men of one of the regiments enjoyed a dinner at the Skating Rink, Chesterton. 650 men sat down to a meal at the Corn Exchange supplied by Mr G. Lambert of Sussex Street. Men billeted in empty houses at Brookside were entertained to tea on Christmas Day in the large hall at the Leys school – not sufficient time to organise a dinner. Smoking Concert in the Guildhall, for greater part of the evening the large room was well filled with soldiers in spite of the event not being very well advertised and several regiments had their own functions. The Mayor (W. L. Raynes) opened the programme with an organ solo. He said no town was more acutely hit by the war than Cambridge. The soldiers had just come from a big manufacturing centre and they would appreciate that in Cambridge the University corresponded to a big industry. Cambridge had done splendidly in providing officers for the Army – and the heart of her industry had been taken away. 15 01 01

1915

Cambridge Instrument Company became “controlled factory” by Ministry of Munitions 1915 & only allowed to do work of national importance; number of employees increased till 200 women out of 488; made secret devices - pyrometer to monitor manufacture - previously made by Germans; worked on hydrogen level alarm system, sound ranging outfits, anti-sub devices, mine detectors, made at secret factory - Roller Skating Rink Magrath Ave 1917-18

The Military have occupied Melbourne-Place, Eden Street, Christ Church Institute and Milton Road infants' school. Now they have also taken that Richmond Road East Road Schools despite opposition from the Managers. This means 700-800 children had no educational home to go to. The kind of children was the sort who left as early as possible and it was a serious thing for them to lose any schooling. It is astonishing that in Cambridge with all its college buildings, most of them unoccupied at present, that there should be any places for soldiers. 15 01 15

Cambridgeshire has contributed 4,359 officers, NCOs and men to the military forces since the war broke out. Others have enlisted in towns outside the county and in addition a large number were already serving in the Navy & Regular Army. Premises were purchased on East Road which have been converted into a drill hall for the units trained in Cambridge and recruiting stations opened in Ely, Soham and Linton. All officers and men of the 1st Battalion Cambridgeshire Regiment have volunteered for foreign service though Lieut-Colonel L. Tebbutt resigned as he was not fit. He has been appointed to command the Reserve Battalion 15 01 15

German Aircraft Raid.—German aircraft made a raid on the East Coast on Tuesday evening and dropped bombs on Gt. Yarmouth. Sandringham, King's Lynn, Cromer and Sheringham. The accounts of the attacks vary in details, notably in regard to the number of people killed, but they

agree on the main facts. The first attack would seem to have been made on Yarmouth at about half-past eight o'clock. It was too dark to discern the hostile craft, but nine bombs appear to have been dropped on the town and two people killed. A soldier was also injured, and several of the townspeople sustained wounds from broken glass. The damage to buildings does not seem to have been extensive. Subsequent raids were made on Sandringham and King's Lynn, and on Cromer and Sheringham, where bombs were dropped. Two people were killed at Lynn. The accounts in this case speak definitely of a Zeppelin. Whether the raids were made by the same aircraft cannot be said but a telegram from Amsterdam speaks of four German airships passing over the Dutch islands earlier in the day 15 01 22 CIPof

Troops Inspected.—General Sir Ian Hamilton, on Wednesday inspected the troops quartered in Cambridge. Accompanied by General Bruce Hamilton and a number of staff officers, the Inspecting Officer took up a position in Gonville Place and the troops marched past the saluting base in column of route. Earlier in the day the men had marched by various routes, and on their return they concentrated in three columns on Hyde Park Corner and then marched down Gonville Place past General Sir Ian Hamilton. A large crowd assembled on Parker's Piece to witness the imposing military scene, and townspeople assembled in large numbers at other points of vantage. A great crowd gathered to watch General Hamilton inspect troops on Parker's Piece. After the mounted officers came the communications company – cyclists, field telegraphs and flag signallers on horseback. An armoured car and a squad of motor-cyclists came next, then the cavalry, infantry, Maxim guns, Howitzer batteries and ammunition train. One horse took fright at the music of the drums and bugles and dashed towards the Inspecting Officer. It seemed as if would be run down but he stood his ground and a staff officer dashed forward to seize the bridle and pull it up. However one trooper was thrown from his horse, his foot caught in the stirrups and he was dragged some distance 15 01 22 CIPof

Red Cross Society review of recent activities: 3,000 wounded received. Five subsidiary hospitals have been established. The first was the Belgian Rest Home with 50 beds followed by Linton Infirmary and The Firs Histon, for Belgians. Fulbourn Institute has 23 beds for British soldiers and Shepreth Village Hall opened on January 4th with 20 beds. They have all been doing very good work treating men from the First Eastern Hospital 15 01 22

Military Hospital Concert.—The New Theatre Company and the variety artistes who were appearing at the Theatre gave an enjoyable performance at the 1st Eastern General Hospital on Friday afternoon. The arrangements were made by Mr. P. H. Adams, the box office manager, and Mr. J. Lindsell .superintended the staging. The full orchestra, under the direction of Mr. Gilbey Briggs, was in attendance. The large company of wounded .soldiers, nurses, semi-convalescents, and members of the R.A.M.C. showed the greatest appreciation of the programme provided. 15 01 22 CIPof

Instructions have been issued in event of invasion by land or air. People in the street should take cover immediately. There is danger from bombs from aircraft and also fragments of shell and bullets from the guns used against raiders. The nearest basement would be the safest place. Any fragments of shells should be handed to the police. School teachers should continue lessons as far as possible in the normal way. Remove children from the neighbourhood of windows. Children should not be brought from upper floors to crowd ground floor classrooms. In the event of damage they should be marched out as in fire drill. 15 01 22

“peace piffle prominent in Cambridge” [6.11]

People in Mill Road on Sunday evening were surprised to see a civilian being escorted by a party of soldiers with fixed bayonets. Behind walked a large crowd of excited soldiers and townspeople and passers-by were informed that a stranger, who was supposed to be a German spy, had been arrested near Romsey Town Railway Bridge. The man, who could be heard protesting volubly, was marched into the guardroom at the County Girls School and the crowd was left to speculate about his fate. He was an assistant to a Cambridge doctor who had lost his way and had asked directions to the residence. He addressed a soldier and the foreigner spoke broken English. He was liberated after enquiries. This illustrates the vigilance of the authorities to protect the country from the enemy within our gates 15 02 05

King inspects Troops. The King visited Cambridge yesterday and inspected the Welsh Division which has been stationed in the town during the past few weeks. The Cambs Battalion of the Suffolk Regiment and members of B Company, Cambs. National Reserve paraded with the Welsh Division and were also inspected by His Majesty. The King was accompanied by General Sir Ian Hamilton, the Commander-in-Chief of the Home Forces, one of his equerries (Major Clive Wigram) and members of the staff of the 1st Army Corps and of the Welsh Division Staff. Having inspected the troops and taken the salute at the march past, the King paid a surprise visit to the 1st Eastern Hospital. 15 02 12 CIPof 15 02 12a

King visits to inspect troops quartered in Cambridge on Parker's Piece, visits FEGH. Khaki-clad soldiers drawn up on Parker's Piece received his majesty with the Royal Salute ... inspected signal section consisting of a couple of motor cars and a number of motor cycles and inspecting a wireless station ... Then visited EGH and motored to station ... no civic reception ... no public announcement so small crowds ... streets cleared of traffic ... fleet of cars seen coming from station ... Officers and staff on foot – no horses, cannon or vehicles as impossible to get all these on Piece Troops occupied four sides of Piece ... cavalry along Regent Terrace ... various artillery units ... King wore khaki military top coat, riding breeches ... flagstaff in middle ... Inspected cavalry, artillery, infantry, ASC, RAMC and National Reserves ... march past Inspected motor cars, motor cycles ... The YMCA is doing invaluable service to troops. Their headquarters in Alexandra Street is crowded with soldiers and ‘ping-pong’ or billiards is popular. In the basement a lady was giving a French lesson. Troops who prefer a book and cosy chair appreciate the reading room or write letters. Two centres are managed entirely by students while at the Cherryhinton Hut Barracks a large hut has been erected. This is currently open to soldiers only because of the illness prevalent at the camp. At Hartington Grove a house has been furnished with tables and chairs, Tracy Hall in Romsey Town is also popular and 80 men visit Emmanuel Church Hall nightly where concerts are promoted with soldiers as artistes. 1915 02 19

Home From Trenches to Wed, - A Wedding of exceptional interest was witnessed at Cambridge on Wednesday of last week, the bridegroom, Sergeant H. J. Mynott, having obtained special leave from the trenches in order to return home for the marriage. Previous to the war, Sgt. Mynott was on the reserve, and in August last he was called up to join his old regiment, the 15th (King's Own) Hussars, and with them went over with the first British Expeditionary Force. The bride was Miss Annie Ellen (Nellie) Maltby daughter of the late Mr. Augustus John Maltby and of Mrs. Maltby, of 27, South Street, Cambridge. The scene of the wedding was Little St. Mary's Church. A highly

interesting incident in connection with Sgt. Mynott's homecoming is the fact that he brought home with him the helmet of a German soldier (a sniper) whom he had shot. 15 02 19 CIPof V.C. Hero.—Among the wounded soldiers who arrived at Cambridge on Christmas day was Pte Henry H. Robson. of the 2nd Battn, Royal Scots (Lothian) Regt., as brave a hero as ever walked in two shoes. His gallant conduct in rescuing a comrade under heavy fire, and attempting a second rescue has met with a fitting reward, for the King has been graciously pleased to bestow upon him (he Victoria Cross, the most coveted of all honours. Pte Robson has been at 1st Eastern General Hospital, Cambridge, for about seven weeks recovering from wounds received while performing the particular brave deed for which he was awarded the V.C., but last week he was removed to the 1st Borough Red Cross Hospital, Hills Road, convalescent, and we are happy to state he is on the high road to recovery 15 02 26 CIPof

The 'Tipperary Rooms' have opened in Fitzroy Street as a club and social centre for the wives and mothers of soldiers and sailors. A boarded floor has been laid and slow-combustion stoves installed in the old building formerly used as the power-house for Mr Chivers' factory. Another room will be used as a nursery where mothers can leave their children when they are out. But plans to establish the Fitzroy House Domestic Training School and Social Centre for Women and Girls have been delayed owing to the requirements of the military 15 02 26 p5 & p7

The Universities of Oxford & Cambridge have been transformed by the war: at Oxford the examination schools have been turned into a military hospital, colleges house soldiers instead of students and the only undergraduates in academic dress are those disqualified from military service. But this means a serious loss of revenue and a Bill should be introduced to enable them to adjust their finances to meet the strain so they could provide for the men when they returned after the war, the Attorney General told Parliament. The Bill, backed by Mr Asquith, was read a first time, amid cheers. 15 02 26

Arrangements are being made to warn Cambridge of the approach of enemy aircraft. Buckets should be kept filled with water. But on no account should money be spent on powder extinguishers currently being hawked about. Chemical extinguishers should comply with the specification of the Metropolitan Police 15 02 26

1915 March

Cambridgeshire Regiment to Ypres, 17 Mar – 26 May 1915 RCp14

The 'B' Company of the Cambridgeshire National Reserve Local Guard paraded at the Corn Exchange, where they have been housed for several weeks. All the 115 men are old soldiers, 27 of whom have experience active service. They marched to the station in two platoons where relatives had assembled to give them a cheerful send-off before, armed with carbines and bayonets, they left to guard vulnerable points 15 03 05

The Welsh soldiers were granted a holiday on St David's Day and Cambridge was full of soldiers with great leeks stuck askew through the strap of their caps, the flags pluming back like a cavalier's feather and the root dangling in a tantalising fashion over the eye. A comic procession was headed by a band of minstrels on a large cart. They were dressed in sweaters and dark white trousers and had blackened their faces. They used a variety of instruments more fitted to noise than

harmony. They were followed by a squad marching four deep in perfect step, each wearing a leek or a daffodil. Celebrations concluded with a Welsh choral service at Gt St Mary's 15 03 05

Cambridge Red Cross Society has made arrangements to deal with injuries from air raids. There were eight assembly points equipped with telephones and it would be unfortunate if they could not discover exactly where bombs had fallen. If the telephone wires were cut information could be conveyed by cycle. Ambulances were in readiness, supplies ready packed and lanterns ready in case of darkness. Nurses would be sent out in groups of four and men would take field dressings and bandages so as to carry on until ambulances arrived. The hospital for Belgians at Cintra Terrace would close at the end of the week 15 03 05

We deeply regret to record the first casualties in the ranks of the 1st Batt. 1st Cambs Regiment at the front. Corpl. Noble Dewey was shot by a sniper and died in hospital. 'Nob' was one of several members of the Town and County Cycling Club serving at the front, was married and lived with his mother in Searle Street. Lieut-Col Copeman, the Officer Commanding wrote to say he died doing his duty gallantly and suffered little or no pain. He was most plucky and cheerful to the end. He was one of the most useful men in the Battalion and it was grievous that he should lose his life so soon. Pte James Northfield of Mill Road was also wounded. In a letter home to his mother, 'Nob' Dewey, the Cambridgeshire Regiment's first casualty, wrote: "We have changed our billets to another farm. We are in sound of the guns. I suppose we shall be there in a few days. It is still very cold but we have got plenty of straw so we sleep warm. I haven't come across the boys billeted in Searle Street yet. We are getting plenty of food of a sort. About the only thing I want is some soap as they charge too much out here". He was buried in a graveyard near a church and Corporal Skeels erected a cross over the grave 15 03 12

First Casualties.—Intimation has been received this week of the first casualties in the 1st Cambridgeshire Regiment, which went to the front three weeks ago and it is with regret that we record the death of Corporal Noble Dewey, of B Company. No. 5 Section, who was shot by a sniper on Wednesday week. Pte. James Nortfield was wounded in the arm. Certain companies of the 1st Cambs. Regiment have been sent up to the front in order to gain experience of the general conditions, and Corporal Dewey accompanied his company to the reserve trenches. While getting into the trench he was shot through the lungs by a sniper. It was evident to his companions that he was severely wounded, and Corporal Dewey was removed to hospital, where he expired a few hours afterwards. Dewey was known at sports meetings over a wide area as the trainer of Reg Player, the Cambridge racing cyclist. He was a member of the Town and County Cycling Club 15 03 12 CIPof

The order is issued by the Competent Military Authority for the district under the powers conferred upon him by Regulation 12 of the Defence of the Realm (Consolidation) Regulations, 1914. The order directs that all lights in the Borough other than lights not visible from the outside of any house, and such public street lamps as a Competent Military Authority, in writing, conditionally permit to be lighted, shall from the 10th inst. and until otherwise ordered, be kept extinguished or obscured between the hours of 7 p.m. and 6 a.m 15 03 12 CIPof

Alexis Aladin, the leader of the Labour Party in the first Russian Duma explained the sentiment and resolution of his country with regard to the war. They could put and keep a million and a half men in the firing line and if they lost half-a-million they could replace them within a fortnight. In Grand Duke Nicholas the Russians had the greatest General that had ever led victorious armies. But something must be done about the grievous effect of drink in the country. The Belgian Minster of State also spoke 15 03 12

A large number of wounded British soldiers who have participated in the successful fighting in the neighbourhood of Neuve Chapelle arrived in Cambridge on Sunday evening having been wounded on Friday. Many of them told of the fierceness of the fighting, the stubborn resistance of the enemy and the brilliance of the British victory. The task of transferring the 141 casualties to the First Eastern General Hospital was performed by the R.A.M.C. using ambulances from Newmarket. Last week 211 wounded were received including 80 cot cases 15 03 19

The Cambridgeshire Territorials received their baptism of fire in one of the fiercest engagements that has taken place on the Western Front and acquitted themselves well. Unfortunately the casualties were heavy. The Cambridgeshire did not disgrace themselves and showed themselves equal to the regulars. A vivid account of the fighting was given by Lance-Corporal Doggett in a letter to his mother: "The shells were falling thick around us and we could see the bricks falling off the houses and the branches off the trees. We ran up the road to the trenches, leaving our packs behind" 15 03 26

Cambridgeshire Regiment's First Knock.—A letter received from Lt Col. C. K. F. Copeman, commanding the 1st Battalion of the Cambridgeshire Regiment by Mr. C. Adeane, Chairman. Cambridgeshire and Isle of Ely Territorial Force Association, conveys the first authentic information, as to the exact loss sustained by the Regiment in recent fighting in France. It says: "Many thanks for your letter of the 9th. Since receiving it, the Regiment has received a very serious knock. We were in the thick of the great fighting last Sunday, and I am proud to tell you that the Regiment did very well, so the General told me. It was an unexpected attack, and we were hurled into it in the midst of terrific shell and rifle fire, which lasted from 4.30 on Sunday to about 5 on Monday morning. I thought it impossible that we could escape without most terrible losses; as it is, they are bad enough—two officers killed, two sergeants reported missing, but, I fear, six men killed, 20 wounded and three missing. Bad and sad enough indeed for a first start, but had you been there you would have wondered it was not ten times more. I don't want a similar experience just yet. Two men are temporarily deranged, but will doubtless recover at home. The Regiment is now resting for six days about five miles from the firing line 15 04 02 CIPof The Cambridgeshire's have been in the thick of a great fire. It was an unexpected attack, writes Lieut-Col Copeman. "I thought it impossible we could escape without most terrible losses, as it is they were bad enough: two officers killed, two sergeants reported missing, six men killed, 20 wounded and three missing". Thrilling personal experiences are contained in letters from local soldiers Hovey, Newman, Whybro, Cole, Twinn, Horlock, Harding, Stanley, Miller, Lilley, Nightingale, Osbourn & Seymour. All letters from soldiers have now to be submitted to Press Bureau in London before publication. This causes delays and relatives should send copies or extracts rather than the originals 15 04 02

Cambridge and the Military,— For a few days past (writes Free Lance) Cambridge has been practically denuded of troops and the "emptiness" of the town after their departure could not fail to strike us all. With no military and no undergraduates, the town bears a deserted appearance, indeed for Easter Term, and on all hands the hope is expressed for the speedy arrival of another batch of troops. It speaks well for the behaviour of the men that the residents generally should regret their going, and look forward to the reception of another division. Tradespeople have, of course, benefited considerably by their presence, and are trusting to see a number continuously in the town, in order to counteract the loss of trade which will be the outcome of the abandonment of the May races. 15 05 07 CIPof

Heavy Losses,—We understand that the Cambridgeshire Regiment has recently been in some heavy fighting in France and evidence of this is seen from the fact that of the officers who went out with the regiment, only two or three remain at the front, including Major Saint and Major G. L. Archer. The casualties among the rank and file has also been severe within the last few weeks, and we learn on good authority, which we are prepared to take as absolutely trustworthy, that in a recent engagement, out of three platoons, only 30 men returned unscathed. In a letter, a Wisbech private said: "I am sorry to say that the poor old Cambridgeshires are only now about 500 strong, instead of 1,000 when landing in France" 15 05 14 CIPof

Cambs. and the War. — Messages from the Front received during the last few days speak of the Cambridgeshires as being well in health and full of spirit, in spite of their hard gruelling of late. The casualties have, unfortunately been very heavy but the morale of those still serving with the regiment "somewhere in France" is magnificent. The men have cheerfully done their duty in the trenches and have won golden opinions for their splendid behaviour under fire. Cambridge people will be particularly pleased to hear that Major E. T. Saint, who is still with the troops, is safe and in good health. His letters home are full of praise for the magnificent conduct of his men. Major G. D. Archer, of Ely, is at present, in command of the regiment. News has been received by Mrs. Naylor of 102, Russell Street, Cambridge, that her youngest son, Pte. Leslie Naylor, has been killed in action. He was shot through the head 15 05 21 CIPof

Interference with Recruiting - Free Lance writes: The smart sentence (three months hard labour) passed upon a man at Cambridge this week for influencing young men not to join the Forces of the Crown will be pronounced by the general public as quite just. It should act as a warning to those ne'er-do-wells who, too indolent and unpatriotic to offer their services for their country, hang about street corners and endeavour to dissuade other willing loyalists from doing their duty. A more dastardly or cowardly action at the present time it is difficult to imagine and anyone indulging in such practices may be sure of but little leniency at the hands of the magistrates if brought to book 15 07 02 CIPof

Munitions Work. — The Ministry of Munitions has sanctioned the organisation of a small munitions factory in the Cambridge district. An opportunity is thus afforded Cambridge people to assist in the production of munitions of war, and it is a well-known fact that a large number of local men have recently expressed a desire to take part in this most important work. In many instances these men are already engaged in skilled and necessary work at Cambridge, and they feel that they cannot give their entire time to munitions work. The opportunity thus afforded them to give of their leisure time to the manufacture of war munitions in Cambridge has accordingly been warmly received 15 07 02 CIPof

Youthful Recipient of D.C.M. — Lance corporal Laurence A. Austin of "A" Company 1st Cambs Regiment has been awarded the D.C.M. for gallant conduct in the field. Lance-Corporal Austin was with many others of the Cambridgeshire Regiment attached to the Leinster Regiment when a certain position was heavily attacked by the Germans. Full details are lacking, all that is known is that he was recommended for the medal by the Colonel of the Leinster Regiment himself. Lance Corporal Austin, who is not yet 18 years of age, is probably the youngest recipient in the British Army of the coveted medal. His parents reside at 8 Rathmore Road, Cambridge. 15 07 02 CIPof

Regiment's Departure,—The 3/1st Cambridgeshire Regiment had an enthusiastic send-off on Wednesday morning, when they left Cambridge en route for a beautiful park situated "somewhere in England," where they are now encamped for field training. The Battalion, which is about 700 strong, has been practically raised and trained in Cambridge. The men have made rapid and almost wonderful progress, both in regard to their physical fitness and all their drills. In every sense of the word they are a credit to the town and county which have reared them. As they marched along on Wednesday morning with a fine swinging stride, upright and manly, they looked a picture of health and happiness. No wonder people cheered. The departure of the Battalion from Cambridge must, of course, mean a considerable financial loss to the town — a loss of probably over £1,000 a week which the town can ill-afford. The men have been billeted in the Borough, and their departure has left Cambridge with hardly any troops at all. 15 08 27 CIPof 15 08 27 p5— L & NW sidings as train steamed out – photo 15 08 27a Ch

When the war began Cambridge Scouts were anxious to help and a committee was formed. Requests came from every quarter. For the first fortnight Scout patrols, aided by members of the C.U.O.T.C., guarded by day and night the important telegraph wires on the Newmarket to London road. Some were sent to Ramsgate and Sandwich to do coastguard work until replaced by military authorities. Others assisted in the recreation and refreshment tents for the military camps on Midsummer Common, Coldham's Common, Coe Fen, Parker's Piece, Huntingdon Road and Stourbridge Common. They have provided a secretary and bugler for Major Comber at Pembroke College and at Corpus the Board of Military Studies has used them as messengers. They have collected large quantities of magazines and papers for the military hospitals at the Leys School and Trinity College. Now they are returning to school 14 09 11

Zeppelin Raid. — The Press Bureau on Wednesday issued the following report; Three Zeppelins visited the Eastern Counties last night and dropped bombs. Anti-aircraft guns were in action. Aeroplanes went up, but were unable to locate the airships. Fifteen small dwelling houses were demolished or seriously damaged and a large number of doors, windows, etc., were broken. Several fires were caused but were promptly extinguished. There was no other serious damage. The following casualties have been reported: Killed 10, seriously wounded 20, slightly wounded 23, missing (believed buried in debris) 3. Incendiary and explosive bombs were also dropped in London. Total casualties in all areas: Killed 20, seriously injured 14, slightly injured 72 15 09 10 CIPof

military tribunals start [7.5]

soldiers practice throwing hand grenades on Parkers Piece - using snowballs [7.17]

Soldiers in the Workhouse: three soldiers recently discharged, from the Army had been admitted to the casual ward within the previous fortnight. It is a lamentable thing that the Workhouse should become the abode of so many old soldiers towards the close of their lives. We shall be ingrates indeed if we let the men who have engaged in this great war for world liberty end their days as paupers, if any effort of the community can save them from that fate 16 92 16 CIPof

Protection against raids - protection against Zeppelin raids is being taken up much more seriously than was the case until quite recently. Cambridge has had its scare, and that has stimulated action. Our protest against supineness has been emphasised by our townsmen hearing the sounds of exploding bombs by night, and the increased stringency of the light restrictions, and the heavy fines imposed by transgressors by the Borough magistrates show that we have arrived at a realisation that we are not immune, or, at any rate, that it is wisest to lock the stable door betimes. A walk through Cambridge on an average evening reveals, however, that a good deal still remains to be done, and we believe the present temper of authority is such that it will see to the doing of it.. We believe also that Cambridge is about to follow the example of other East Anglian towns, and issue more particular instructions to persons as to what to do, and what to avoid doing, should we be so unfortunate as to find ourselves being bombed. Perhaps now we shall hear no more taunts of scare-mongering hurled at those who have felt it their duty to offer warnings 16 02 23 CIPof

Lord Kitchener Drowned. - telegram has been received from the Commander-in-Chief of the Grand Fleet: I have to announce with deep regret that His Majesty's ship Hampshire (Captain Herbert) with Lord Kitchener and his staff on board, was sunk last night about 8 p.m. to the west of the Orkneys, either by a mine or torpedo. Four boats were seen by observers on shore to leave the ship. I greatly fear there is little hope of there being any survivors. No report has yet been received from the search parties on shore. H.M.S. Hampshire was on her way to Russia. The news was received with greatest sorrow throughout the country, and in Cambridge there was evidence of profound grief. The Guildhall flag was flown at half-mast. On board ship, among others, were Sir H. F. Donaldson, brother of the late Master of Magdalene, Dr. S. A. Donaldson 16 06 07 CIPof

“all men were heroes” - terrible battle [455.7.21]

Field Marshal Viscount French, Commander-in-Chief of the Home Forces, visited Parker's Piece, where inspected the Cambridgeshire Territorials from the Administrative centre, Cambridge; the Cambridge University Training Corps and the 2nd and 5th Battalion Officer Cadet Corps. Many hundreds of inhabitants had assembled. He was received with the General Salute, and when he

inspected the Cambridgeshire Territorials, he told them they belonged to a regiment in which he took the utmost interest, as he had the honour of being their Colonel. He had watched the behaviour of the 1/1st Battalion in France, and had been proud. He congratulated the officers and instructors on the splendid appearance of the men on parade, and said that great credit was due to them for the men's appearance, steadiness and marching (the recruits had been at the Administrative Centre, Cambridgeshire Regiment Drill Hall, East Road, for periods varying between a few days and five weeks). The troops later formed in column and left Parker's Piece for the University Arms entrance, Lord French taking the salute. Later he addressed a meeting at the Guildhall. 16 07 05 CIPof French inspects OCC & Territorial recruits, Parkers Piece & Volunteers on Market Hill [1.15,7.7,7.20]

Adopted from Germany.—What has induced our working class women in Cambridge to dress their hair with the Gretchen braid plaited over their heads? This is entirely a German fashion, and one would have thought German fashions were out of favour, particularly with women. It has simplicity to recommend it, and it is becoming to a certain type of beauty, but it is a German style, and we do not wish to copy German ways of doing things. Surely our women can find some different manner of doing their hair. The adoption of the fashion at this moment is another illustration of the insinuating way in which German ideas are spread amongst the people of this country 16 09 13 CIPof

Zeppelin attacks. There is little doubt that we have been helped in our time of peril by the obscurity which has been carefully and wisely prepared, and instead of being censured or railed at, all the people who have been concerned in enforcing the lighting regulations ought to be regarded as public benefactors, and made much of. The little personal inconvenience which has resulted from these precautions is nothing compared with the strain and anxiety which would be passed through under an actual raid. Some Cambridge people have had this unpleasant experience, and will be able tell what a raid is really like, and warning of the probable consequences. The writer has seen at a number of places in East Anglia the results of Zeppelin bombing, when the raiders, by accident, have managed to hit a building, usually some humble cottage, and can assure readers that such results are no trifling matters, whilst the shock to nervous people is lamentable. So we hope that in place of grumblings at the powers that be we shall all do our best during the coming long dark nights loyally and wholeheartedly to second the efforts of those who are trying to protect Cambridge from aerial assault, and to safeguard the lives and limbs of their fellow townsmen. 16 09 20 CIPof

1916 Oct

Cambridgeshire Regiment Thiepval; Schwaben Redoubt 14-15th Oct, St Pierre-Divion 15 Oct-11 Nov 1916; 200 men killed – RC

Matriculation showed that the number of Freshmen who have entered this Term is 156. Three years ago we had become accustomed to count the new members of the University in four figures, but we must be grateful for small mercies. We badly miss the stream of vigorous youth, whose annual incursions rejuvenated Cambridge and kept us from remarking the advance of age or becoming fossilised in ways or opinions. The stream is running so small now that we hardly notice its presence, but it has not altogether stopped, and is helping the University to carry on the work of the intellectual mill. The “Cambridge Review” estimates that the number of undergraduates who will be in residence this Term - men of all years - will be 444. In the Michaelmas Term of 1913 there were 3,263 undergraduates in residence, and the total had remained around these figures for several years, so it would seem that the war has reduced the roll of students of this University to nearly seven-eighths below the normal, and we are afraid we have not yet touched bottom. In spite of the numerical and financial difficulties, the teaching staff are making heroic endeavours to maintain the standards, and the course of lectures which have been arranged are really wonderful under the circumstances 16 10 25 CIPof

German Aeroplane. - At the Engineering Laboratory (Cambridge) there is to be seen an aeroplane captured from the Germans exactly a year ago today It is in perfect condition, with the exception of the propeller, which was smashed, and a British one substituted for use in this country. The aeroplane is a two-seater Mercedes six-cylinder, 130 horsepower machine, and was used: for observation purposes only. The number is A374, and it weighs exactly a ton 16 10 11 CIPof

Cambridge Borough Tribunal and the Cambridge County Appeal Tribunal appear to be doing their work in a manner which should be an example to others. They realise that every interest has to be seconded to the imperative necessity of winning the war, and that if for the winning of the war practically every able-bodied man in the country has to be taken from his occupation it has to be done, no matter how great the personal or financial inconvenience, for if we lose the war we have lost ever thing. The last sittings of the two above-mentioned tribunals were remarkable for the few, the very few, exemptions allowed, and if every tribunal did its duty as conscientiously as these two are doing theirs, the scandals of which we have heard so much of late would soon be a thing of the past, equity would prevail, and the Army would get the men it wants, the young vigorous men, and not the inferior substitutes it now has to take 16 11 01 CIPof

Cambridge in 1916 has been an eventful, but also a most trying year, and few will mourn its departure, uncertain though the coming days may be. The shadow of the war had rested heavily upon Cambridge, and the depression. In our material condition has deepened. The University has almost ceased to exist. Our normal industries are at a standstill. Agriculture has been crippled, trade, has been upset and homes ravaged by the necessity of withdrawing men of serviceable age to supply the manpower needed for the fighting forces. Many families have been bereaved through the toll of human life taken by this awful war and anxiety has bitten more and more into

our hearts with the passage of months. Yet there has been no faltering of purpose ... no whining for an end to be put to the struggle. Cambridge has been more bitterly tried than at any period in its modern history and never have its people shown themselves more courageous. What we have lost in prosperity, we have gained in character and thus it may be that this gloomy year of 1916 has left a happier impress upon our future than at the moment seems apparent 16 12 27 CIPof

allotment committee set to work to increase production [455.8.1]

Combing Out, — We are glad to see that, the "combing out process" has reacted Cambridge, and that several snug retreats of comfort-loving young men are being put under inspection. Some adverse comments were; made by members at a late meeting of the Town Council and by ourselves concerning the presence of men of military age and fitness in one of its departments, and we find this week that they did not fall upon stony ground. The (military service)Tribune has reviewed one of these cases, and notwithstanding the pleas and protests of his chief, the young man has to go and do his duty, not only to his country, but to the other young men who have voluntarily gone before him. Town Councils and other public bodies should set an example, and it is really remarkable that after two and half years of war and the reiterated statements of Lord Derby and our generals as to needs of men, any corporation should be found retaining in its service a single person qualified for military service, unless that person can be shown in fact, and in the clearest possible manner to be indispensable in his position in the national interest 17 01 24 CIPof

Margarine. - Mr. J. West Knights Public Analyst, of The Laboratory, 57 Tenison Road, Cambridge, writes: The rule of a "g" before "a" is always hard. The word margarine is derived from a Greek word signifying a pearl in allusion to the pearl-like appearance of that particular fat before it is coloured in imitation of butter. It has the same derivation as the Christian name Margaret; which means a pearl among women. 17 01 31 CIPof

National Federation of Discharged and Demobilised Sailors and Soldiers meeting; thousands of finest lads in the world now back at home, shattered. Found their jobs held by foreigners. Now government says they will recall these sick and lame men. But the army wanted men, not cripples – 17 06 27b

Marriage of a V.C. Hero. - A large number of persons were present at St. Barnabas' Church, Mill Road, Cambridge, on Saturday, when Private J. J. Caffrey, V.C. of Nottingham, was married to Miss Florence Avey, daughter of Mr. and Mrs. Charles Avey. 69 Great Eastern Street, Cambridge. Like all heroes. Pte. Caffrey is very disinclined to say much about himself. It was on November 15th. 1915, when Pte. Caffrey (who is a stretcher bearer in the R.A.M.C. attached to the York and Lancaster Regiment) was sent with a corporal into "No man's land" in order to rescue a wounded comrade. After bandaging the man the corporal was shot in the head whilst endeavouring to put him on Pte. Caffrey's back. Our hero then placed the man down again, bandaged the corporal and brought the former into our own lines. He then returned for the corporal and also reached our lines with him. Pte. Caffrey is also the possessor of the Cross of St. George given by the Tsar of Russia on October 23, 1914 which he won by carrying a wounded Brigadier-General to the base, which was two miles away, and all the time exposed to heavy shell-fire 17 03 28 CIPof

Volunteer Inspection in a Blizzard. - The 1st (Cambridge) Battalion. Cambs. Volunteers were inspected by the County Commandant, Col. T. W. Harding on Jesus Close on Sunday morning. The weather was most trying, and for part of the time a regular blizzard was blowing. Under these adverse circumstances the proceedings were shorter than customary. There was a good muster, and the men stood the ordeal excellently 17 04 04 CIPof

Explosive Found on Gogs - On Thursday evening an accident occurred at Cherry Hinton in which a boy named Edwin Jennings, of 55 Hartington Grove, had three of his fingers on one hand blown off and the other hand injured. It appears that a brother had been to the "sham fight" (cadet manoeuvres) on the Gog Magog Hills in the afternoon and had brought borne a bag. Edwin opened it and inside was a small metal tube embedded in sand. Whilst examining it, it exploded. The boy's mother, who was standing near, was knocked down by the force of the explosion but escaped injury. Dr. Coombes was called in and he dressed the wounds and ordered the boy's removal to Addenbrooke's Hospital, where he is still lying. On inquiry, we were told he was fairly comfortable. As a result of what the injured boy's brother said that other boys had similar bags. Inquiries were at once set afoot by the police. It was found that boys had picked up various articles and cartridge cases. One boy, Onyett by name, had taken another of the (canvas) bags home, and with other boys, had actually been using it as a ball. On hearing of the accident, Mr. Archer, chemist, of Cherry Hinton Road, went to Mr. Onyett's house, and advised that the bag should be put into water, and this was done. The accident will probably serve as a warning to others. 17 04 18 CIPof

Lost In Mediterranean,—Among those on board the British transport Transylvania, which was torpedoed in the Mediterranean on Many 4 were two Cambridge men, one of whom survived and the other was drowned. The latter was Private Ernest William Taylor of Brookside Cottage, Burnside, Cambridge, and the survivor is Private Edward Brown, of 5 North Terrace, Cherry Hinton Road, Cambridge, Another victim of the Transylvania was Sgt W. H. Norman, of the R.A.M.C. (the Rev. W, H, Norman, formerly superintendent of the Castle End Mission). Mr. M, Norman entered the Ministry some years ago, and was superintendent of the Castle End Mission for a good period. Shortly before the outbreak of war he accepted a call to the pastorate of a Glasgow Congregational Church, but he obtained leave from his church and joined the R.A.M.C., feeling that it was his duty. In this regiment he rapidly gained promotion. He had served in Ireland and France, and was going out to Egypt when his ship was torpedoed 17 06 06 CIPof

Serbian Colony, — An interesting reception, at which 100 people were present, was hold in Westminster College, Cambridge, on Saturday evening to celebrate the closing of the temporary Serbian colony at the college. This colony has been running for the past three months under the care of the Serbian Relief Fund, to enable students to pass a matriculation examination at a standard set by the Serbians, and which the British Universities had agreed shall take the place of Responsions and Little-go. Thirty Serbian students had taken part in the exam. 17 10 03a CIPof
Black Saturday, - The last day of last week (says the writer of Town and Country Topics) was a Black Saturday for a good many housekeepers, who flitted vainly from shop to shop in an endeavour to obtain a supply of lea. The threatened shortage had become an actual one, and it is to be feared that in many households on Sunday all manner of makeshifts had to be adopted to provide a substitute for the comforting beverage the present generation of English people have come to regard as an indispensable and common accompaniment to the breakfast and the tea

table. It is by such homely crises that the fact that we are at war, and what war means, is being brought home to us even more effectually than by the terrible sacrifices of human life and physical powers we have been called upon to make in the great struggle for freedom. The experience of Saturday last was not peculiar to Cambridge. It was general throughout the country.

Lighting offences at time of the Zeppelin raid, 19th October – 17 10 31a

The Zeppelins, - Cambridge (says the writer of Town and Country Topics) was disturbed from its long immunity from air raid warnings on Friday, when Zeppelins “made an unwelcome reappearance in this part of the country.” It was gratifying to find that immunity had not rendered our people in any way intractable. The police instructions were carried out in most cases without any protests, even when those instructions went to the extreme length of directing men to extinguish their pipes or cigarettes. A few householders were a little difficult to manage with regard to lights, but that was probably due more to ignorance than from obstinacy, and now that those householders know that the danger was really near, and that carelessness on their part might have produced a calamity similar to the kind which befell two or three London areas, they will probably show more prudence in the future. The streets were extremely quiet as well as dark, and we congratulate both police and public upon the success of the measures adopted for our protection. 17 10 24 CIPof

Corp. H. Simpson of the 6th Division of the Royal Field Artillery who were in tents on Midsummer Common writes: When I was in Cambridge growling because we were kept in England I did not realise how terrible war was. I think that nearly a quarter of the men that were at Cambridge are either killed or wounded. Capt Scholey writes to Mr Dockrill of Marlowe Road: A great number of those where on the Meadows have been killed or wounded while Pte Layfield, writing to Miss Smart, asks for a bit of home-made cake 14 11 13

A double military funeral of soldiers who died at the 1st Eastern General Hospital took place at Newmarket Road cemetery. Both coffins were conveyed in one cortege. One was a Belgian soldier whose funeral service in the Catholic Church was attended by many Belgian wounded. The service for Ernest Thorne of the Coldstream Guards was held at Christ Church. He had been a fine strapping fellow standing over 6ft 3”. His leg was amputated in France. Despite the fierce rainstorm many assembled at the cemetery where the soldiers were accorded full military honours and interred in separate graves. Meanwhile 200 more wounded soldiers arrived at Cambridge station. Reading and refreshment rooms for soldiers have opened in Cintra Terrace. A gramophone has been donated but they would welcome presents of records 14 11 13

Mrs Hinson of Merton Street has received a photograph of her husband’s grave at Angers, France, together with a translation of the speech delivered over the graves of the English soldiers who lie buried there. They were sent by Major Stoney Archer’s wife who enclosed a very kind letter expressing deepest sympathy. The hospital in which he was treated is beautifully equipped and he received the best of care and nursing. It is such kindly actions which make our British officers beloved by their men and which cements the good feeling between all classes in this country 14 11 13

The County Council should be granted power to deal with the espionage suspected to exist in Cambridgeshire. We had German professors in the University who had laboratories and carried on experiments. We had traders who were born Germans and remained Germans on whom our troops were being billeted. We had sons of Prussian officers in the Officers’ Training Corps.

There were thousands of cases of people being naturalised and then going back to Germany to fight against us 14 11 13

Margarine Queues - The queues, which have been getting larger day by day in Petty Cury, assumed such alarming dimensions on Saturday that one person at least was injured and others fainted. Margarine was the chief commodity sought, a supply having been delayed the day before owing to the fog. The Borough Food Control Committee took commendable action to consider how best to relieve the situation. They suggested that traders should transfer their stocks of margarine to the Corn Exchange and sell it there, and the Committee would give them every facility; they also suggested the margarine should only be sold in 1lbs, or multiples of 1lb. Some was transferred and between 2 and 4 o'clock 1,000 transactions in margarine had taken place. The people were arranged in queues outside the hall. The margarine was put up in 1lb and 2 lb packages, the limit to each person being 2 lb. Everything went off without a hitch 17 12 26 CIPof [2.10,455.8.4,455.8.5], 17 12 26a

Men just back from the front on leave have a very strong feeling indeed about the mania for striking, which is running through this country at the present time There is no lack of sympathy with labour among the men out at the front, but these men are in touch with actualities and see for themselves that a crisis can be turned signally to our immediate advantage if we all put our backs into it, and that any contrary action will have the affect of prolonging the war. They are making enormous sacrifices and passing through horrifying experiences which, the imagination of the people at home cannot picture, and they are naturally indignant at the selfish action on the part of their fellows which is disturbing the comfort of the soldiers' families and tends to keep the soldier himself longer out in this awful hell 18 09 18 CIPof

End of the War.—Peace, peace at last! We can hardly realise the fact even yet, after 48 hours of rejoicing and thanksgiving. Throughout Sunday the world stood waiting and waiting, and at 10.30 on Monday the British Premier (Mr. Lloyd George) announced: "The Armistice was signed at five this morning, and hostilities are to cease on all fronts at 11 a.m. today". The news reached Cambridge at 11 o'clock and spread like wildfire. The first signal was given by the hoisting of the Union Jack on the Town Hall, and the churches and colleges quickly followed suit in setting joy-bunting floating. With feverish speed all Cambridge hung out bunting, and women and children bedecked themselves with miniature flags or trapping of red, white and blue. Utter strangers stopped and congratulated one another and soberly murmured "Thank God" and there was a tremendous rush upon the Post Office to dispatch telegrams to absent friends. Cambridge was deprived of the voice of its joy-bells by the 'raggers' breaking into the belfry of Great St. Mary's Church and putting the famous peal out of action by their amateur efforts to set them ringing 18 11 13 CIPof

Armistice Celebrated. — Cambridge "let itself go" with full vigour on November 11 on receipt of the news that the Germans had accepted and signed the drastic armistice terms of the Allies, and the rejoicings were kept up on every evening throughout the week. The effigy of the Kaiser was hoisted on the point of a bayonet and carried through the streets, to be consigned to the flames of a Market Hill bonfire one evening. A cadet, attired as a padre, attended to the "obsequies". Later processions of cadets met on the Market Hill engaged in a Big Push. Premises occupied by the "Cambridge Magazine" at the corner of St. John's Street were wrecked by a crowd. Two other shops in the same occupation were treated in similar fashion. 18 11 20 CIPof [4.4]

Returned prisoners of war; great demonstration - thousands assembled on Parker's Piece and lined streets to watch men pass. 850 paraded, most in uniform. Started in Guildhall. List of names – 19 01 22b; photo – 19 01 22c

Returned Prisoners Welcomed.- Cambridge gave an enthusiastic welcome home to the returned prisoners of war on Wednesday last, A ready response was made to the request that the Inhabitants should hang out flags and decorations and thousands of people assembled on Parker's Piece and lined the streets to watch the men pass. The proceedings commenced with a general muster on the Piece, which was fortunately favoured by fine weather. Invitations had been issued to some 900 men, and the parade, when assembled, showed a response of about 850. Most of the men were in khaki, and were members of the Cambridgeshire Regiment, the Cambs. Battalion of the Suffolk Regiment (Kitcheners) or the Suffolk Regiment. A few were in plain clothes or in naval uniform. The men paraded through the streets to the Guildhall, where the Lord Lieutenant gave a heart-to-heart address, saying "Welcome, home to England," and adding that the country was proud of them. He wished them, on behalf of the county, a happy return to their homes, great prosperity in the future, and forgetfulness of the horrors they had been through. 19 01 22 CIPof

Minister's Visit.—An interesting visit was paid to Cambridge by the Rt. Hon. H. A. L. Fisher, President of the Board of Education, on Saturday, when he inspected the School of Education recently established by the Educational Department of the War Office at Corpus Christi College for the purpose of preparing officers and, N.C.O.'s as instructors in connection with the educational work which is to be carried on In the Army ere demobilisation takes place—and afterwards delivered an address to members of the school 19 01 29 CIPof

Killed by Shell fuse.—A mystery, unsolved in spite a searching inquiry by the Cambridge Coroner and exhaustive inquiries by the Borough Police, attaches to the tragic death of Ernest Arthur Kitchener Ketch, a four-year-old child (whose parents reside at 6 Cheddars Lane, Cambridge) who died as the result of the explosion of a shell fuse on the Newmarket Road on Saturday morning. The child was seen playing with the fuse; where it obtained this deadly plaything remains a mystery. The fuse is described as "the most dangerous kind known," being of very high explosive and particularly sensitive. Four persons, in addition to the deceased child, were admitted to Addenbrooke's Hospital on Saturday morning, suffering from injuries caused by the explosion. 19 04 14 CIPof

Gallant Cambridgeshire Men, — In presenting their fifth War Report, Cambridgeshire and Isle of Ely Territorial Force Association place on record their great pride in the gallant and distinguished services again rendered in France and Belgium last year by those units which were raised in the County, viz, 1st Cambs, 11th Suffolks (Cambs Battalion), 203rd Field Co, R.E., (Cambs Company) and the Suffolk Yeomanry. The Cambridgeshire Regt has again added to the

great name it has made for itself on the battlefield of France, and the long list of honours awarded to the regiment is striking testimony to the great gallantry of the officers, non-commissioned officers and men. The Association had to mourn the loss of one of its members, Lt-Col E. -T. Saint, D.S.O., Officer commanding 1/1st Battalion, the Cambridgeshire Regt, who died of wounds received in August last. Col. Saint was a distinguished officer, and his death was a great loss to the Regt. Col Saint was succeeded in the Command by Major M. C. Clayton, D.S.Q. 19 04 23 CIPof

Peace Day Festival—The Peace Day Festival in Cambridge may be written down as a decided success. In the main event of the day—a huge dinner on Parker's Piece to the discharged and demobilised men of the Borough—there was not a hitch of any kind. The arrangements were as near perfect as could be secured and the men seemed thoroughly to enjoy themselves. The town presented a gay appearance, all the principal thoroughfares being decorated with flags, streamers, etc. Nearly every side-street, too, had its decorations - there were flags and bunting everywhere. Immediately under the Guildhall clock was a large laurel wreath in the centre of which were the words "Their name liveth for evermore." At intervals during the day peals were rung on church bells. Several of the business premises in the town were illuminated with coloured lights during the evening 19 07 23 CIPof 19 07 09a

1919 August

Soldiers on strike.—At a meeting of the Cambridge War Pensions Committee, the story was told of a strike of discharged soldiers undergoing treatment, at the Papworth Tuberculosis Colony. Dr Aldren Wright told the committee that on July 2 something not quite satisfactory occurred with regard to the food. There had been a little dissatisfaction before, and on this occasion they asked the Superintendent. (Dr. Varrier-Jones) to receive a deputation. Mr Varrier-Jones said he would quite willing to listen to the individual complaints but would not interview them collectively. Three representatives however went in to see him and discussed with him the food situation and some words took place with the result that two of the men were dismissed, and this incident was followed by the whole of the discharged soldiers in the building, with one or two exceptions leaving the same day 19 08 06 CIPof

1919 October

Valuable Pigeons Shot,—Homing pigeons, which had done useful work as message carriers in the naval and military pigeon services during the war, had recently been wantonly shot, and a strong protest was made by the local owners at the annual general meeting of the Cambridge and District Flying Society on Saturday evening. The National Homing Union have had the matter of this destruction of the birds under consideration for some time, and the co-operation of the public is sought in connection with their protection. It is pointed out that the shooting of the pigeons constitutes an offence under the Defence of the Realm Regulations 19 10 15 CIPof

Munitions Ministry robbed, — Wholesale thefts of Government property were described at the Shire Hall, Cambridge, on Saturday morning, when four prisoners were charged with stealing bedding, bedsteads, and various other articles the property of the Ministry of Munitions. In the corridors outside the County Divisional Police Court were heaps of blankets, sheets, pillows, bed ticks and iron bedsteads, and inside the court was another miscellaneous collection of articles, which were exhibits in the case. The bulk of the property was stolen from the Coprolite Works at Trumpington, but a number of the articles had been removed from, the munitions works at Gretna Green, and conveyed by the prisoners to Trumpington. The thefts were admitted and three of the prisoners were sent to gaol. The fourth offender—a lad of 15—was bound over. 19 10 29 CIPof 19 10 29a

1922 Something more than a talking-to ought to be administered to the boys who have committed so much wilful damage to the remains of the Barnwell Military Hospital adjoining the Newmarket-road just beyond the Cambridge Borough boundary. For some reason the boiler house and one complete section of the wooden hutments have been left, apparently totally uncared for, and are rapidly going to wreck and ruin. The site of the hospital, overgrown with weeds and littered with debris, forms a happy hunting ground for children who are able to get through the gap where the gates used to be. The bolder and most mischievous of the boys have found the remaining buildings a tempting target for stones, and scarcely a pane of glass remains undamaged c22 07 22

1924 When the list of Cambridgeshire men who fell in the war was being compiled for the Memorial Chapel in Ely Cathedral there were many expressions of regret that the Borough itself had no official record of names. Most of the parishes have their own lists but there is no complete list of Cambridge names other than the sheet published at a popular price by the C.D.N. some two or three years ago, and now to be seen in the Free Library. Now there is a proposal for the provision of a roll of names in the Guildhall c24 07 29

1924 The deepest regret will be felt at the death of Mrs A.C. Steward, wife of the Master of Downing college. From its foundation in the dark days of 1915 she was the life and soul of the Cambridge Tipperary Club which did much to help and cheer the sorrow-stricken women of Cambridge during the anxious years of war-time, ever-ready to advise and console. When peace came they continued the club to be a centre of social enjoyment and of mutual improvement for all women without distinction of class, creed or political opinion c24 11 17

1926 A deeply moved audience cheered and sang when some forty local heroes of the Great Retreat, some in uniform and all wearing their medals, lined the stage at the conclusion of the first performance of "Mons", the great war film, at the Central Cinema, Cambridge. It was a memorable scene and showed very clearly how much Cambridge admired the part they played in the immortal episode. By special invitation 100 men of the Cambridgeshire Regiment also witnessed the performance. Some of the Cinema staff saw war service and were displaying their medals. "Buttons" sold his chocolates and cigarettes wearing two medals won by his father, who was killed in the war c26 11 14

1933 First Eastern General Hospital reunion – 33 03 04d

1935 Sir Alfred James Ewing of Herschel Road, Cambridge, was the brains behind the famous 'Room 40'. When the Great War began he was asked to undertake the task of collecting and deciphering enemy messages. Numerous listening stations were set up on the East coast at which enemy fleet signals and other wireless messages were received. From December 1914 the German Fleet made no movement which was not known in advance. The work was probably the best-kept secret of the war and the full story has never been told for he was refused permission to deal with it in his reminiscences 35 01 07a

1935 One of the most remarkable re-unions on record has been enacted in a tiny cottage at Home End, Fulbourn when a man who had been reported 'missing' after the Armistice came face to face with his wife who had long thought him dead. They were married at Burrough Green in 1900 and he enlisted in the Army Ordnance Corps before being posted to India. Still suffering from loss of memory, he is unable to give an account of his movements since the war. It was a great shock for his wife when he stood on the doorstep as she had believed him dead for about 17 years. Now she has notified the Post Office regarding the widow's pension she has been receiving. 35 02 11

1937 Sir - What we have come to know as the Cambridge War Memorial was part of a three-fold memorial scheme which embraced a substantial grant to Addenbrooke's Hospital for extension work, a complete record in Ely Cathedral of the names of local men killed in the war or who died from wounds and the monument at the junction of Station Road. This was to commemorate all Cambridgeshire infantry and should be 'To Victory'. It was not to be a memorial to the dead but to the *living*. It is for this reason that we who pass the memorial do not lift our hats as we do at the Cenotaph in London – E.W.R. 37 05 20

1922 Hills Road war memorial unveiled by Duke of York; was not bronze statue but plaster cast painted bronze; pouring rain threatened melt plaster; (new site on island 27.1.50, moved by 3.85) [455.13.2]

1922 boys damage remains of Barnwell military hospital where boiler house & one complete section of wooden hutment left, site overgrown [4.16]

1922 "No more war" demonstration held [2.6]

1922 A service of commemoration for the members of the college who fell in the war was held in the Chapel of Jesus College. Immediately after the service the memorial tablet was dedicated by the Lord Bishop of Ely. After a short service, the Master, amid a silence so intense that it could almost be felt, read the names inscribed on the memorial. It was an impressive scene - the clergy and choir in their surplices, row after row of gowned undergraduates, many of whom had also served, and a sprinkling of visitors from the outside world, all paying silent tribute to the 148 names read by the Master CDN c 28.4.1922

1922 His Royal Highness the Duke of York unveiled the War memorial which has been erected in Cambridge. The ceremony was attended by thousands of people and was of a deeply impressive nature. It was raining heavily as the Prince mounted the platform for the unveiling ceremony. The band played the opening bar of the hymn "O God, our help in ages past" to the accompaniment of rain drumming on hundreds of umbrellas. A few minutes later the rain ceased and the rest of the ceremony was carried though amid brilliant sunshine. The Prince pulled a rope which released the drapery revealing the bronze figure of an infantryman c22 07 04

1922 The model of the soldier on the Cambridge War Memorial which, owing to an unavoidable delay, had to be used for the unveiling ceremony last week, has to-day been replaced by the actual bronze, so that the figure now in position is as it will be seen for all time. The bronze was brought from the foundry at Thames Ditton by motor lorry at four o'clock this morning. Mr Kett and ten men were in waiting and so expeditiously was the work carried out that by 8 o'clock the model figure had been taken down and the other set up and fixed in its proper position. A couple of hours later the scaffolding was removed c22 07 11

1922 The "No More War" demonstration held on Parker's Piece, Cambridge, was attended by a gratifying measure of success. The procession extended more than half the length of Gonville-place, and the crowd at the meetings held on the Piece afterwards was so large that the two platforms provided were not sufficient, and a motor-car had to be requisitioned for the purposes of a third meeting. In addition to the banners of the various societies there were numerous bearing inscriptions such as "For Peace and Freedom" (Women's International League), "Patriotism is not enough", "Cambridge Sisterhood says No More War". In addition there were scores of bannerettes bearing the words "No More War". Mrs Nevinson referred to the number of deaths from influenza in 1918 which was really a war plague. They kept the memory of the dead alive but did they remember the maimed, the blind, shell-shocked and the mad?. No one was worrying about those men c22 08 04

1923 The annual Inter-Varsity military tournament was held on the University Rifle Range, Grange Road when Cambridge beat Oxford by six events to 4. Perhaps the most popular event was the tent pegging, which reached an extremely high standard. One rarely sees it done better at Olympia. The artillery drive, too, was extremely well done. Some regular artillery officers in the audience, the hardest critics of all, seemed somewhat sceptical about it when the team drove into the arena, but after the first-time round their criticism changed to praise. The events won by Cambridge were the R.F.A. Alarm race, the individual jumping, the half section jumping, tent pegging, wrestling on horseback, and the cavalry dummy thrusting but they were beaten by Oxford in the cable laying competition. Oxford's other successes were the bayonet fighting, the artillery driving, and the tug of war c23 06 12

1923 Cambridge men and women of all shades of political opinion, and a number of children, associated themselves with the world-wide demonstrations that were held to express the determination that there shall be no more war. The Cambridge demonstration took place on Parker's Piece on Sunday afternoon. Prior to this a procession marched to the war memorial. It was headed by the Salvation Army band. The Cambridge town branch of the League of Nations Union was the first of the representative bodies, with three large appropriate banners bearing the words "No more war." The Cherry Hinton band also took part, and in the rear of the procession came a pathetic little band of "hunger marchers" from Sheffield with their own banner c23 07 30

1924 The 203rd Field Company (Cambs) Royal Engineers celebrated their fifth reunion and dinner. In January 1915 the War Office had asked whether an engineering company could be raised in Cambridge. Great efforts were made but many of the youth had already joined other units. However a start in recruiting was begun and they were able to get a few men together. Their headquarters were in East road but when numbers began to increase they had moved to Ely, March, Whittlesey and afterwards Wisbech. They had no regular Engineer officer to take command of the unit but that grand old volunteer, Colonel Harding, although he was then nearly 70 years of age, undertook the job c24 01 28

1925 About 120 members of the 1st Cambridgeshire Regiment are spending the Easter weekend under canvas at Madingley. The Cambridge-St Neot's road acted as part of the front line of a British force which was endeavouring to repel an invader marching on London. The Norfolk Brigade was ordered to take up position from Oakington to Comberton. The work was carried out under service conditions & proved exceptionally difficult on account of the wooded nature of the country in front c25 04 13

1925 "We the undersigned, convinced that all disputes between nations are capable of settlement by diplomatic negotiation, hereby solemnly declare that we shall refuse to support or render war service to any Government which resorts to arms". The declaration having been signed by members of the University they called a public meeting. The hall was nearly filled with undergraduates but a section of the audience showed their displeasure by continual interruption. Mr G.L. Trevelyan spoke of the horrors to be met in the next war, and was greeted with the remark: "No they will kill us nice and cleanly in the next war" c25 11 15

1926 peacemakers pilgrimage to Cambridge - "love, not war", met by Mayor, Mrs Hartree [1.9,1.19]

1926 OTC range Grange Road closed due to danger to Coton, moves to Coldham's Common [1.10]

1926 A meeting of the Women's Peacemakers' Pilgrimage was attended by a large audience at Cambridge Guildhall. In the next war they would have aeroplanes dropping poisonous bombs that would destroy civilians who had never been near the firing line. They must create such an atmosphere of repugnance that the nations dare not go to war. There were hundreds of people in

Newmarket who were not yet converted to the idea of the League of Nations and it was their duty to make converts of all who had not yet joined them c26 06 22

1926 The Officers' Training Corps range on Grange Road, Cambridge, has been closed down, having been condemned by a Military Board on account of the danger to Cotton. The Cambridge University Rifle Association will for a time carry on shooting at the Territorial range on Coldham's Common. But there is a likelihood of this range being closed down too in the near future because the new road in course of erection will come up behind the butts. A united effort will be made to secure a sufficiently large area of land for the erection of a new, full-sized range c26 10 30

1927 anti-war demonstration Parkers Piece [456.2.7]

1927 Gloucester Street workshop for disabled soldiers in Cambridge, opened by Princess Mary last year, is represented at an exhibition at the Imperial Institute. Their stall contains all kinds of basketwork, knitting and other things made at the workshops. At present there are eight men working there. All are of over 60 per cent disability through the war, and one is of over 90 per cent. The workshop can never be a paying concern but good work is being done in enabling the men to earn sufficient money to keep them "off the dole". Colonel Willis, the secretary or Miss Brearley, manageress and instructress, would be pleased to see anyone interested. c27 11 13 [4.10]

1927 Two of the proudest men in Cambridge are Mr H.A. Hagger and Mr F.C. Fuller who were in charge of the stall of the Disabled Men's Workshop, Gloucester Street, at the Imperial Institute. It was the only stall attended by the actual men who made the goods and the contents were completely disposed of by mid-way through the week. The Queen bought a pair of heather-mixture socks and a waste paper basket. The Duchess of York bought a fancy rush stool remarking "It will do for Princess Elizabeth for the nursery". By the time the Prince of Wales visited they had nothing left to sell him. c27 11 14

1928 annual peace demonstration on Parkers Piece [1.11]

1928 There are now 12 men on the books of the Cambridge Disabled Soldiers Workshop in Gloucester Street. Three have had the right arm amputated, seven the leg and of the remaining two one suffered from the effects of gassing and injuries to the head and the other from severe injuries to the abdomen. Half were employed up to the 48-hour week and the maximum wage was 36s a week to the foreman. In addition to the basket and rush work and wool knitting they were developing the knitting of silk stockings, jumpers and ties, the re-upholstering of chairs and the making and renovating of mattresses c28 06 17

1928 Sir – I happen to live opposite the field-gun in Tenison Road. It is not a relic of the Great War but a captured trophy from the Boer War. To me it represents history and the enormous sacrifices made by the pick of our population. Our war memorials tell our children of a great deliverance. Had we been defeated no doubt we should have had more hideous monuments, probably statues of the Kaiser and the boastful Hindenburg, at which some of the pro-Germans could kneel. Let these small tokens that speak of victory over injustice be preserved for all time – C.J. Challess c28 06 20

1930 The annual 'No More War' meeting of the Cambridge Peace Council was held indoors instead of on Parker's Piece because of heavy rain. But accompanied by the Boys' Brigade Band they proceeded with drenched banners through the rain-swept streets. They met to ensure the catastrophe of 1914 did not occur again. One must remember the menace from the air. It was possible to turn civil aircraft into war craft and chemical factories into works for the manufacture of poison gases and lethal rays. 30 07 21g

1930 The air exercises have begun and squadrons of fighting planes took off to engage in bitter combat. Until the very last minute of peace 250 aeroplanes were being secretly moved to

vulnerable points and the men in command have been planning their attacks. Five night bomber squadrons, nine day bomber squadrons and 11 fighter squadrons will be engaged. Some are fitted with robot controls which can relieve the pilot for extended periods on long flights. 30 08 12
1930 The Cambridge Disabled Soldiers Workshop in Gloucester Street has made a trading profit for the first time since it opened four years ago. Four of the nine men had returned to their villages for better pay after receiving training in repairs to cane and rush work. They made good quality baskets for laundry and bottles as well as remaking mattresses. Manufactured goods were sold at local fetes and the Exhibition at the Imperial Institute when £300 worth of sales was realised. But the net loss on the running of the institution was £141. 30 09 27b

1931 first British Legion rally, Parkers Piece [1.20]

1931 Members of the Territorial Army Nursing Service and nurses of Addenbrooke's Hospital receiving instruction in anti-gas drill – photo – 36 04 21

1932 YMCA ban Russian educational exhibition [1.23]

1932 Of all the memorable gatherings which have been held in the Drill Hall, East Road, none has ever come up to the vast assembly which gathered when the Cambridgeshire Regiment Old Comrades' Association held its first reunion dinner. When they arrived at Southampton 17 years ago one NCO said: "It's taken three trains to get us here, a carriage will be enough to get us back". That prediction came true! A silent toast was drunk to the 900 officers and men who fell in the Great War. 32 02 15

1932 The chatter of Lewis guns and the rattle of rifle fire echoed almost continuously over the countryside around the peaceful villages of Bottisham and Quy for almost four hours as members of the Perse, Leys and County School Officers' Training Corps took part in a field day. The first thing inhabitants knew of impending hostilities came when several motor buses disgorged their occupants ready for the fray. Our reporter was fighting his own battle on his bicycle with the wind in an endeavour to get to the battle front before the attack materialised. But the wind won. 32 03 02 & 02a

1932 Nearly 200 troops arrived at Ely for the voluntary camp of the Cambridgeshire Territorials. On Tuesday they marched to a field on the Littleport Road where the men engaged in machine gun work while trained machine-gunners were taking ranges from the water tower. The men have been accommodated in the old Barracks while the officers' mess has been at the Lamb Hotel where in accordance with the old Militia tradition the band has played outside in the evenings. All the catering has been done with local tradesmen, which has been much appreciated. 32 08 05a

1933 call for abolition of bombing from air [1.6]

1933 Hitlerism debate at London cancelled, (Foot was to have spoken) [1.12]

1933 anti-war demo Parkers Piece, students anti-war council, Mar; another Nov [456.2.8,]

1933 A band of sixty undergraduates marching through Cambridge carrying placards reading 'No More War', 'Scholarships, not Battleships' and 'We want peace'. They raised such re-echoing pacifist shouts that even horses seemed slightly perturbed while people turned round and stared. It was a protest organised by the Students' Anti-War Council. They marched to Parker's Piece where some fine pieces of oratory were heard, but the crowd was not particularly enthusiastic. 33 03 11a

1933 Willingham peace ballot – 33 03 21

1933 Community and Labour opinions were so divided at a conference in Burleigh Street that a proposal to form a Cambridge Anti-War Council had to be adjourned after three hours. The University Anti-War Council said workers in Cambridge laboratories had been organised against war. Mrs Foster of the Women's Cop-operative Guild wondered who were being prepared as the next enemy of Britain. It used to be the French, then the defenceless Boers and last of all the

Germans. She appealed to women to play their part against the wickedness of war before the catastrophe arrived. 33 06 16 & b

1933 This area will be scene of aerial activity during night exercises by the RAF. Operations will begin between a raiding force of 108 bombers and 152 fighters, some based at Duxford, who will endeavour to intercept and destroy them. They should be off the ground in two minutes, reach an altitude of 1,600 feet in about ten minutes and travel 30 miles. Cambridge itself is off the map as far as actual fighting is concerned as it is supposed to be covered by mountains. 33 07 17

1933 A meeting of the Cambridge Anti-War Council debated whether to affiliate to the national body. There was a danger that war might appear soon and the workers would be caught as they were in 1914 unless some centralised organisation was set up. But the British Anti-War Movement had been started by Communists with the idea of boring from the inside and they should not join. 33 07 26

1933 The film 'Our Fighting Navy' has been withdrawn from the Tivoli Cinema following lively scenes. Fifty members of the Students' Anti-War went to make a protest but a rival party, numbering about a thousand undergraduates, marched to the cinema with two bands playing war-time songs and carrying Union Jacks. Several tried to push their way in until the arrival of four policemen who, with drawn truncheons, managed to keep the crowd at bay whilst a dozen more raced to the scene in motor vehicles. Cries of 'Down with Hitler' and 'Hail Hitler' were heard above the general uproar and a stink bomb let off in the vestibule 33 11 10 [1.7, 1.13]

1933 Memories and reminders of the horror of war are provided by the Cambridge Anti-War Council's exhibition opened. It consists of diagrams, photographs and cartoons and if anybody wants war after seeing them, they can have no feeling. Some of the photos of the dead were forbidden by the Censors and it is easy to see why. Part has been prepared by members of the Bio-chemical Board, Cavendish Laboratories and shows the effects of gas 33 11 14

1934 anti-war exhibition [1.4]

1934 anti-war exhibition returns to Cambridge [NL.3.23]

1934 British Legion rally - 3 mile procession [1.2]

1934 "War is madness and we are being driven to it by madmen" a peace meeting at Soham was told. Some scientists were now saying there was no serious danger from gas warfare and people would be safe if they went and sat quietly in the bath. But soldiers who had been trained to combat mustard gas had become casualties without knowing they were affected until it was too late. They were being driven into this madness by men who were so stupid that they were virtually insane and they needed missionaries against war to defeat them. To believe anything these days involved a belief in miracles. 34 03 29

1934 Herr Gerhart Seger, who recently escaped from a German concentration camp told of his experiences. Under Hitler's 'Protection Arrest' men could be taken to prison with no reason. The Storm-Troopers, sadistic and brutalised men, could do what they would with inmates. Prisoners were beaten mercilessly, slept crowded together in damp ice-cold cellars and listened to men being tortured by the Nazis. Of 42 men imprisoned with him, two were beaten to death within a fortnight. After he'd come to England his wife and baby had been taken to a concentration camp as hostages, not to be released until he returned. 34 04 12

1934 Sir – we scientific workers and teachers of the University wish to affirm out fundamental opposition to the use of scientific research in war and the preparation of war. A situation may soon arise when scientists will be pressured to engage in research directed to the purpose of war Signed: Joseph Needham (Biochemist), E.O. Whetham (Agriculture), Marjory Stephenson

(Biochemistry), M.L. Oliphant , C.P. Snow, B.M. Crowther and Alex Wood (Physics) and others
34 05 26

1934 Several hundred people joined in a peace meeting on Parker's Piece organised by the Cambridge Anti-War Council and the University Anti-War Movement before marching in a torchlight procession to the War Memorial. The procession, some 300 strong began their march along Mill Road, increasing in size as it went along. But they missed the turning into Tenison Road and crossed Mill Road Bridge before winding its way round the back streets to the War Memorial. They laid a wreath 'To those of all countries who fell in the last war from those who are pledged to prevent another' 34 11 12c

1934 Sensational revelations concerning Germany's war plans were made at a meeting in Cambridge Guildhall. Speaking to the University League of Nations Union, Mr Wickham Steed, a former editor of The Times, said they had imported enough arsenic ore to make poison gas sufficient to swamp Europe twice over. The next war is likely to come without warning and many be commenced by an overwhelming night attack. General Goering, at the Nazi Air Ministry has built 85 underground aerodromes this year and had at least 2,000 aeroplanes, he claimed. 34 11 17 & a

1934 Lord Rutherford presided at the first meeting of Cambridge University Democratic Movement. There is a great fear of the power of military aeroplanes making a sudden and devastating attack on defenceless cities involving the destruction of combatant and civilian alike. Air warfare of any kind should be abolished, he urged. Vyvian Adams praised his work at the Cavendish Laboratory. None could hope to isolate himself from the surrounding dangers. The question was did we want human development or human destruction by scientific means. 34 12 04

1934 Wesley Church memorial Cambridge Brotherhood WWI 34 11 12d

1935 Peace-Week torchlight procession [1.2]

1935 The Cambridge Scientists' Anti-War Group heard an address on aspects of the Nazi movement. Many of the true facts were to be found in reports circulated secretly by the Ruhr industrialists who were providing the Nazis with immense financial support. German science was being devoted almost exclusively to war preparations. At the end the Group protested against increased expenditure on armaments by the British Government and urged the money to be spent on the social services instead. Peace cannot be maintained by building greater armed forces. 35 03 07d

1935 There is no doubt the Peace Ballot has made Cambridge people face the vital questions. Results show nearly all wanted Britain to remain a member of the League of Nations and an all-round reduction of armaments by international agreement. The manufacture and sale of armaments for private profit should also be prohibited. If a nation insisted on attacking another the others should compel it to stop by economic measures or, if necessary, by force under the auspices of the League and preferably by an International Police Force. 35 04 04 [1.1]

1935 Residents need not be alarmed by the appearance of heavy bomber aeroplanes during the next few nights. A tactical exercise will involve bombers flying a series of 'co-ordinated attacks' on selected military targets to introduce new crews to the role of the night bomber. It will provide actual practice in extended navigation and the technique of bombing by night, the co-ordination of raids and the employment of the signals organisation. But there will be no 'bombing' in this neighbourhood and no explosive bombs will be dropped anywhere. It is essential these exercises should be carried out during the hours of darkness and the Air Ministry is to restrict night flying to the minimum possible. 35 04 08

1935 Sir – this country has not produced a mask to safeguard us against an attack of modern gas. For two years I have worked in the anti-war movement I founded in a room in Cambridge to protest against war-like manoeuvres and to organise against war. It is the workers who are called

upon to fight, to make munitions and pay for it afterwards and trade unionists should take the lead in opposing it. – W.G. Doel, Hope Street, Cambridge – 35 04 23

1935 Dr Wooster of the Scientists' Anti-War Committee said the proposed air-raid drills would be compulsory, getting civilians under war discipline and squashing anti-war activities. It was impossible to protect the population at large against air attack: we might conceivably protect the inhabitants of Haverhill by building shelters but not the whole of London. The Government would not supply gas masks, you must buy them for yourselves; they would cost about £20 and it was obvious that poor people could not afford it, he told a meeting in the Labour Hall, Norfolk Street. 35 05 28

1935 Controversy surrounded the offer of £10,000 from Sir John Davenport Siddeley for developing aeronautical research in the University. Some dons felt it would subsidise research of a military character of pecuniary value to armament manufacturers. But others say the ultimate influence of the aeroplane upon civilisation will be pacific rather than warlike. It was abhorrent that the University should become a centre of specifically military research but this money would be used for work of a fundamental and non-military character 35 10 18b

1935 A 'Fascism and War' exhibition organised by the Cambridge Anti-War Council discloses methods by which the illegal opposition movements in Germany and Italy distribute their literature disguised as items of a non-political nature. There is also propaganda printed on paper of tissue thinness and a method of photographing illegal printed matter and transposing it on paper which instantly goes black on exposure to light if opened by the police. The recipient knows to treat the paper chemically to counteract the effect. Also on display is also one of the Anti-Nazi leaflets spilled from the roof garden of a Berlin restaurant on to the streets below and a collection of abusive correspondence, including one from Ezra Pound, sent from Italy to a Fellow of King's College after he contributed certain views in an English paper 35 11 05 & a

1935 Cambridge Disabled Soldiers' Workshop had been through a difficult period. They had to change their address three times which involved considerable expense. The largest number of men in the workshop was 12 and at present there were only seven, none of which were complete in their bodies. One had lost his leg in the South African War. The shop in Trumpington Street was not in so good a situation as at Peas Hill and they did not get the streams of passing undergraduates. We should never forget the men who had served, suffered and saved our country through its years of dire peril. 35 11 26

1935 Dr William Wooster told the court he was a member of the Scientists' Anti-War Group and had been standing outside Duxford Aerodrome selling pamphlets entitled 'Air Display Special'. It carried a headnote to say it was not to be sold to members of H.M. Forces but they were seized by police under the Incitement to Disaffection Act. Surely people could be reminded of the sheer horrors of the Great War 35 12 12 & a

1935 The judge agreed that police had been wrong to seize copies of a pamphlet from a member of the Cambridge Scientist's Anti-War Group at Duxford aerodrome during the Royal Review. They'd been worried following an earlier incident at Mildenhall when a misguided female threw a paper at the King's car. 'The Anti-War Special' was crude, inartistic and in some respects childish. It had been sold by Dr Wooster supported by a bevy of satellites, mainly ladies, wearing badges of a reddish hue. Various ex-servicemen had expressed themselves in vituperative terms and its distribution might have lead to a breach of the peace 35 12 20 & a

1936 Cambridge Peace Week, 14 organisations unite [1.15]

1936? letter appealing medical aid for Spain published CDN Sept, Medical Aid -committee public meeting 11 Oct, John Cornford killed, Basque children's home established - orphans of socialist families, Leah Manning organised Pampisford (Jan 38 moved Cambridge) [454.1.19]

1936 Territorial soldiers with machine guns at anti-aircraft exercises on Coldham's common – 36 04 27d

1936 Cambridgeshire Regiment, Major Digby takes command, is University correspondent of CDN specialising in sport and drama – 36 05 15c & d

1936 The Fellowship of Reconciliation, a peace movement born in Cambridge during the dark days of 1914 was founded by people united in the conviction that the way of war could not be the way of Christ for righting wrongs and had now spread to many countries. Some 250 people from Germany, France, Italy, Bulgaria and Belgium together with the USA, Japan and the Argentine are attending a conference at Selwyn College on 'Christ: the Peace of the World'. 36 07 29b

1936 Over £120 was collected for the Spanish Medical Aid Committee at a meeting in the Guildhall. If they went to Spain today they would find village after village barricaded. Many people were being killed because they have nothing but their bare bodies to put against the latest legal death which modern science has given to the rebels, the Fascist International, to destroy decency in life in Spain today, Mr J. Langdon-Davies claimed. 36 10 12

1936 Precautions to be taken in preparation for air raids were outlined to a meeting of architects, officials, school managers and owners of shops at Cambridge Guildhall. They hoped the dangers would never come to pass but must provide for contingencies. The three main weapons would be the incendiary, gas and high-explosive bombs. The first was the greatest danger. It would burn for seven minutes and could not be put out by water or any known chemical. Food exposed to gas vapour should be thrown away. Respirators would be issued to everyone except tiny children 36 10 13

1936 A.J. Winship told Rotarians he had visited Germany. The Germans had no more idea of attacking this country than the man in the moon. The attitude to Hitler seemed uniform all over the country. They worshipped him. He was the first real ruler who was absolutely unselfish and sought nothing for himself. He had taken power but was not a dictator. He held a position almost the same as the King did here. But Rotarian Franklin disagreed: Hitler was a dictator who had assumed power by force and murder and the treatment being given to the Jews was diabolical. 36 10 21

1936 The Territorial Army recruiting campaign at the Drill Hall attracted a large number of people including employers of labour, members of the University O.T.C. and boys from the Perse and County schools. The progress of aircraft means that the channel is now a mere ditch over which planes can fly in a few minutes and a defence force must be efficient. This should be voluntary and employers must make some sacrifices and encourage their men to join the Territorial Army, giving them leave and pay when on service. 36 11 27

1936 Air raid precautions were discussed by South Cambs RDC. The roads and bridges about to be built in the county should have bomb-proof surfaces. Substantial material was to be used and it would not be at all impossible to make them bombproof. Most of the roads were to be constructed above the present ground level and could have shelters under them 36 12 03a

1937 Basque refugees arrive in Cambridge [1.22]

1937 Fifty year ago, as the Spanish Civil War raged about her, a Basque mother who had already lost her husband in the bitter fighting, put five children on a ship leaving for England. Today her two sons still live in Cambridge. Tony and Joe Gallego were amongst 29 children housed at Pampisford Vicarage, which was turned into a hostel. Later they moved to Salisbury Villas. Their sisters were scattered, going to join families in different parts of the country. It was to be ten years before their mother saw any of them again. 87 04 02a Spanish refugees left 1937 to Pampisford left beginning 1938 to 1 Salisbury Villas, Station Rd [33.9.3]

1937 Cambridge Scientists' Anti-War Group, a technical and advisory body to Peace Movements, has issued a booklet entitled 'The Protection of the Public from Aerial Attack. It is a critical examination of the recommendations put forward by the Home Office Air Raids Precautions Department. They constructed 'gas proof' rooms according to Government plans and measured its resistance to the entry of air from outside. Much of the information is technical with a separate chapter devoted to the protection of children 37 02 13a [1.21]

1937 Red Cross members will be trained in air raid precautions and encouraged to volunteer for ARP services. They could be assured that people wearing masks would be unaffected by gas, despite a recent study by Cambridge Scientists. Diffusion of elementary knowledge would prevent many casualties caused by panic. They had held six 'gas courses' attracting 350 people. But these numbers would be hopelessly inadequate to deal with a large-scale air raid. 37 04 17

1937 Basque town wiped out, hundreds killed – 37 04 27

1937 model warship, HMS Repulse, visits [1.24]

1937 Boots display model anti-gas room [2.1]

1937 The death of John Cornford while fighting for the Spanish Government is a grievous loss. He had a brilliant academic career and was preparing for research work in history when the Spanish rebellion broke out. As soon as it was known that Italian war planes were being delivered to the Spanish rebels he went out as a volunteer, joining the British section of the International Brigade and fighting alongside G.C. Maclaurin of Cambridge who was killed in Madrid. He saw continual fighting for five weeks and was commander of the British section on the Cordova front when he was killed reconnoitring in advance of the lines. 37 02 03

1937 John Cornford memorial meeting attended by Communists, socialist, labour, liberals and Bevan – 32 07 23b & c

1937 Cambridge Scientists have challenged Government claims that the majority of London houses could construct a gas-proof room. They say it would need to be lined with sheet tin and the joints overlapped with Vaseline. Even so tear gas could get in. Mustard gas could be spread in liquid form from aeroplanes as had been done in Abyssinia. It gave off a vapour so toxic it was lethal if breathed for six minutes. Government-issue gas masks would cost two-and-sixpence each but would not stop cigarette smoke that could make people cough and be sick. 37 03 23a & b

1937 Cambridge Union Society emulated the Oxford refusal to fight for king and country by carrying a motion in favour of complete national disarmament and individual refusal to bear arms. If re-armament were abandoned in the pursuit of peace our economic system would collapse and we would be faced with a military revolution of the property classes on the lines of General Franco. It might involve us in civil war – unless passive resistance was practiced as it had been by Gandhi, opponents warned. 37 04 28 & a

1937 Within the next few weeks about thirty Basque children brought to England following the terrible air raids at Bilbao and Gernika will be arriving in Cambridge. They will be taken to Pampisford Vicarage where the children will remain for at least six months being looked after by volunteers from the University. As they are destitute provisions must be made for their welfare and beds, boots and clothes are required. 37 05 29

1937 About 2,000 people gathered on Grange Road Rifle Range to see a display of first aid by the British Red Cross Society under air raid conditions. Three bombers from Duxford took part in the raid, exactly as though on active service. As they dived at speeds of 240 mph there were realistic bangs and clouds of smoke. People in the area rushed about screaming and collapsed wounded or from the effects of the gas. When the raid was over the rescue parties, clad in gas masks and decontamination suits commenced work. A musketry party fired on the 'planes during the raid 37 05 31

1937 Sir - What we have come to know as the Cambridge War Memorial was part of a three-fold memorial scheme which embraced a substantial grant to Addenbrooke's Hospital for extension work, a complete record in Ely Cathedral of the names of local men killed in the war or who died from wounds and the monument at the junction of Station Road. This was to commemorate all Cambridgeshire infantry and should be 'To Victory'. It was not to be a memorial to the dead but to the *living*. It is for this reason that we who pass the memorial do not lift our hats as we do at the Cenotaph in London – E.W.R. 37 05 20

1937 A meeting at Cambridge Guildhall to raise funds for the Basque children's hostel at Pampisford brought several promises of 'adopting' children by guaranteeing fifteen shillings a week. There will be 29 young refugees at Pampisford Vicarage and volunteers were needed to do

cleaning, carpentry and plumbing. Leah Manning described the terrible tragedy of Guernica and the conditions in Bilbao where everyone from the President to the poorest refugee had only black bread, coarse cabbage and a little rice to eat. 37 06 09a & b 37 06 12a

1937 Sir - The 29 Basque refugee children are now settled in the Vicarage at Pampisford after their ordeal in Spain. There have been heavy initial expenses in creating a home in an unfurnished house not designed for the purpose and insufficiently provided with sanitation. Several firms have supplied goods free or at cost prices and individuals have given their labour in repairing, paintings and cleaning the Vicarage. We hope to employ a cook-housekeeper and charwoman as well as a part-time gardener to grow vegetables for the winter – F.M. Cornford. 37 06 23

1937 The Nazi salute was given as German ex-prisoners of war honoured Cambridge's war dead. Members of the Reichsvereinigung Ehem from Kriegsgefangener marched to the memorial where the ranks of local British Legion standard bearers were joined by the German standard-bearer, carrying the Nazi flag. While standards were dipped, one of the visitors placed a laurel wreath on the memorial as members of the German party gave the Nazi salute. They then left for a civic reception at the Guildhall. 37 06 30 & a & b

1937 An 18-foot long scale model of H.M.S. Repulse was exhibited on Cambridge Market Square to stimulate recruiting and advertise Navy Week. It is fitted with electric search-lights and Morse lamps and illuminated by powerful lamps from the Vauxhall lorry that tows it. Extensive alterations have been made to the upper deck of the ship since the model was first made and these have been effected on the model which was originally constructed at Portsmouth docks for instructional purposes. 37 07 16a

1937 An air "attack" is being made on London by 176 light and medium heavy bombers. All through the night they will concentrate their efforts to 'destroy' the capital and opposed to them will be 19 fighter squadrons with a total strength of 222 machines. The 'attack' will continue two more nights unless affected by bad weather. The main object of the exercise is to provide tactical training for the RAF in conjunction with the Anti-Aircraft Division of the Territorial Army and Observer Corps. 'Casualties' will not be assessed

1937 Sir – London newspapers, suffering from a scarcity of news, have reported unruly behaviour by 18 of the 3,826 Basque refugees in England. Picture 4,000 children from English towns, their nerves wrecked by months of war and air raids, many of them having lost their parents, transported to a strange climate, strange customs and an unknown tongue. Would they all be angels? The refugees at Pampisford have been happy and untroubled. But now we have been asked to take another 30. The great difficulty is to find an empty house large enough. Can readers help? - F.L. Lucas. King's College 37 08 20a

1937 An attempt by an insurgent force to cut the railway at Bartlow Station saw rifle battalions attack on a wide front. A small British machine gun battalion took up a position on the west bank of the River Stour while soldiers demolished bridges to prevent the attackers occupying the high ground at Shudy Camps and Horseheath. Villagers had a fine time watching the ponderous tanks pass by and comparing them with the guns and beautiful horses of the 1912 manoeuvres. It was part of the military exercise simulating that in Egypt before the latest Anglo-Egyptian treaty. 37 08 25

1937 Tanks prepare for manoeuvre, Linton - photo – 37 08 24

1937 Tanks featured in the opening attack on Haverhill under cover of a smoke screen. An assault via the Bumpsteads was held up and the advance swung westwards past Shudy Camps towards the Bartlow railway. Late in the afternoon an enveloping movement was successful. Street fighting and sniping was expected and the infantry was served out with an extra supply of hand grenades. The inhabitants thronged the centre of Haverhill eager to see the activity of the military manoeuvres 37 08 27a

1937 The premise behind the military manoeuvres was that production of a new lethal gas was about to start in two underground factories at Yole and Barsey Farm near Balsham and Shudy Camps. Different essentials of the gas were to be made at each factory so destruction of either

would prevent production. There was a large influx of visitors to the church parade at Shudy Camps Park where 400 men from various regiments had assembled for the training exercise. Afterwards a band concert was greatly enjoyed. 37 08 31

1937 The Army manoeuvres now taking place locally should have a beneficial effect on recruiting. The introduction of the motor into all branches of the service has rendered the soldier's task much less toilsome and robbed the march of its old-time discomforts. The present-day Tommy is better provided for and looked after, better fed and more comfortably clothed. Recruits for the three battalions of the 5th Infantry Brigade now in camp at Shudy Camps Park are coming in steadily. It is expected that a further 100 will soon be ready at Aldershot and will probably also be sent there 37 09 04b

1937 Basque children at Pampisford rectory visited by Dr L. Cobbett – 37 09 07

1937 War will be declared at midnight on Saturday – at any rate for the purpose of manoeuvres – and Ely will be in the war zone. 450 men from Liverpool, Manchester and London arrived in the city and went into camp at Barton Fields, arousing the curiosity of residents who have visited in large numbers and showed considerable interest in the military activities. It is the largest exercise of its kind since 1918 but the only troops are members of the Royal Signals Supplementary Reserve; most are Post Office employees who give up their spare time so they could assist the Regular Army in the event of conflict 37 09 16

1937 The 1st Battalion of the Cambridgeshire Regiment lined up on Parker's Piece for their first inspection since they were reformed after the war. Behind them hundreds of Old Comrades also paraded. It is a Volunteer Army undertaking onerous duties and alone stands between us and conscription. With no prospect of war for some years the Government has taken very little interest in either the Regular or Territorial Army but times have changed as a result of the combined efforts of Hitler, Mussolini and now the Japs, they were told. Men, women and children are regarded as suitable subjects for attack by shell and bomb and we must defend ourselves, they were told. 37 10 03b & c

1937 Basque arts and crafts - photo – 37 10 12

1937 Sir – since the beginning of the Spanish Civil War four Cambridge men have laid down their lives fighting against the Fascist Insurgents. They are John Cornford (Trinity), G.C. Maclaurin (St John's), G. Lorimer Birch (Caius) and Julian Bell (King's). The first three were in the International Column, the fourth as an ambulance driver. Now a branch of the Voluntary Industrial Aid Organisation has been established to recondition motor vehicles as ambulances for Spain. Side-car ambulances are needed that can go up the hills through narrow passes; at present wounded have to be transported by mules. Donations should be sent to me – Joseph Needham, Caius College 37 10 13

1937 Cambridge University Officers Training Corps gave a demonstration at the Grange Road rifle range. It opened with a display by the Vickers machine gun section followed by mortars laying a smoke screen. Cavalry were in action reconnoitring and dummy-thrusting with swords while communication by wireless and cable was also shown. A spectacular display of demolishing a bridge was followed by a battery action by two 18-pounder field guns. Visitors could inspect the equipment and try out an army gas mask in the gas chamber. 37 10 18

1937 Major-General Ernst Udet, ace pilot during the war, was amongst top German airmen who inspected two squadrons of giant Heyford bombers and the latest Battle Bristol-Blenheims, Harrow, Wellesey and Whitley aircraft at R.A.F. Mildenhall. They went into the body of the Harrow plane and three sat in the cockpit of one of the others before watching the engines starting. The visitors, some carrying small dress daggers, also toured the station buildings including the mobile wireless transmitting, photographic and automatic control sections. 37 10 19 & a

1937 The Mayor opened a model anti-gas room at Boot's shop in Petty Cury. With the disturbed state of international politics the company was anxious to help people to retain a sense of proportion concerning air raids. Any room could be made gasproof at a trifling cost. It had

been tested under the most severe conditions with war gas. The Home Office Air Raids Precautions Department welcomed the initiative. If people took the simple precautions suggested they would be able to deal with the emergency quite successfully. 37 10 19b

1937 Great deal of war talk - Cartoon – 37 10 23c

1937 A new novel deals with the Cambridge of the future. “Thirty Million Gas Masks” by Sarah Campion imagines ‘Something like ten thousand Cantabrigians were wiped out (as every schoolboy knows) in the Air Raid of 1939. There are memorials to the Cambridge dead all over the rest of Great Britain. The enemy cared not two buttons about Cambridge but were aiming at London’. In the book a technical mishap on one of the bombing planes releases a new gas which results in the area being evacuated only to be visited by people in gas masks sent by the Government to test the poison-laden country. 37 10 23 c d e

1937 Cambridge Labour Party women’s section heard that the Government was preparing for war and was not going to spend money on decent houses for its citizens to live in. Gas masks for ‘essential’ people were available at £1 and ten-and-six each, but for the masses at two shillings and nine pence. They should press for equality for rich and poor alike; gas masks should be efficient and not merely ‘eye-wash’ to prevent a panic. To capitalist interest war meant vast profits and hard cash. 37 11 11d

1937 Cambridge Peace Week ends with march from Parkers Piece to War Memorial – 37 11 15a & b

1938 Eastern Counties conference on Spain early 1938, Cambridge centre vigorous food ship campaign [454.1.20]

1938 ARP trenches dug in Ditton Lane - demonstrations of various types [2.4]

1938 undergraduates not up due to fear of war [2.3]

1938 St Luke’s school closed Sept so teachers assemble & distribute gas masks [446.12.2]

1938 Basque refugees alarmed by military aeroplanes flying over their camp nr Southampton – 37 05 24

1938 Mr W. King showed three of his films. One showing the inspection of the Cambridgeshire Regiment by General Kirke caught the spectacle admirably: the marching of the Territorials was transferred to the screen in colour and many town and county notabilities were seen.. 38 01 11a

1938 The hostel for Basque children have had to leave Pampisford and experienced great difficulty in finding a suitable house large enough to take all the children. Now they have moved to Salisbury Villas, Station Road 30 01 20c

1938 Lieut-Col C.R. Bennett retired after 20 years with the Territorial Army. After service in the First World War he was given command of the 250th Field Company and established its headquarters in Cambridge in 1934. This was the first year of partial mechanisation leading to the loss of all horses and the extra work they made. Parades were less spectacular but were less dangerous to unwary recruits and allowed more training of a strictly engineering nature. His popularity with the troops even survived the task of judging the inter-company tug-of-war which looms very large in importance to the units 38 01 28

1938 Red Cross to plan demonstration of Air Raids Precautions work; in event of war a war hospital was to be established near Cambridge – 38 03 10

1938 Cambridge Spanish refugee relief organisation had transformed Pampisford Vicarage, which had been practically derelict. Twenty-nine Basque children had arrived on 19th June 1937, the youngest aged seven, all fresh from their tragic experiences. The Hostel had moved in January to No.1 Salisbury Villas. The children had all lost one parent and to send them back would be cruelty; they did not know where some of their guardians were and one lad would face the firing squad if he returned. But if donations were not forthcoming, they would soon run out of funds. 38 03 19e

1938 Miss D.I. Macdonald, who lives in Sherlock Road, has recently returned from Spain where she was caught in air raids. "There is nothing you can do except sit still and I was frightened because I felt completely trapped". The universities were picked out specifically as targets by the attackers who feared the people in them. Government suggestions that covered-in trenches should be constructed in the gardens of houses here are very sensible; the great thing is to have covered protection against splinters and machine gun bullets. In Spain they were not unsightly as flower beds have been planted on top of them. . 38 04 08

1938 The First Eastern General Hospital is to be revived as part of a War Office plan. The site has not been officially approved but will not be far from Cambridge. It would have 600 beds on mobilisation, possibly expanding to 1,200. There will be a permanent staff of three officers and 24 other ranks with 19 medical officers, a matron and 49 nursing sisters. On mobilisation the staff will be increased by other ranks largely composed of V.A.D. men and women. They hoped it would never be called into action, but they must be prepared, ex-servicemen were told. 38 04 11a & b

1938 Parliament has decided that local authorities must prepare schemes for safeguarding the population against attack from the air. This does not mean war is imminent, but the risk cannot be ignored. Large numbers of volunteers are needed; men as air raid wardens, demolition workers, auxiliary firemen and messengers, women for first-aid, gas contamination and ambulance duties. The Mayor (Coun. Peck) appealed for people to come forward and say what they can do 38 04 02

1938 Cambridge is to be the subject of an 'air raid' on July 14th. It is actually an ARP demonstration which will take place on Midsummer Common which is to be laid-out in the form of a street and made as realistic as possible. The scenario is that several squadrons of enemy aircraft fly over en route to Birmingham but are turned back and unload their bombs over Cambridge after they are attacked by aeroplanes from Duxford. The whole of the enemy machines are destroyed. Meanwhile the Mayor of St Ives, Mr D. Bryant, has built an air-raid shelter in his garden with the help of his sons. The first in the town, he is giving his townspeople a lead. 38 04 21 38 04 22a

1938 Air Raid Precaution plans contemplate the division of Cambridge into three main areas each of which could be operated separately in the event of communication being destroyed in an air raid on one or more of the river or railway bridges.. The total personnel required should be not less than 3,300 with street wardens dealing with about 500 people. The existing staff of the Corporation, Water, Gas and Electricity companies will form a strong nucleus of the personnel required and are being trained in anti-gas measures. There will have to be co-operation between the Borough and County to give mutual assistance in case of need 38 04 30b

1938 Cambridge's air raid precautions are taking shape with council workers and college staff being trained in anti-gas measures and first aid. But volunteers were needed for decontamination, rescue and demolition work and 100 messengers, ambulance drivers and despatch riders were wanted. Cherry Hinton Hall would be an important centre for training and, if necessary, for a first-aid station. The greatest danger in air raids came from high explosive bombs but nothing was included about underground shelters. The Government said there is no precaution against bombing; it was the council's duty to look after the injured and see damaged buildings were taken down properly. 38 05 03 & a

1938 In Cambridgeshire villages 700 air raid wardens had been appointed and 251 trained in simple elementary gas precautions. Each resident would be measured for respirators of which there were three sizes. There would be five or six centres with mobile apparatus and men trained to render first-aid, repair bridges and do decontamination work. The rural area was regarded as one of the least vulnerable but Cambridge was one of the most attractive spots for airmen in the world 38 05 07

1938 During an air raid the children attending infants' and junior schools should disperse to their homes, the Air Raid Precautions Committee was told. The responsibility of keeping children at school was great. Mothers would certainly come for them. 38 06 08c

1938 A report on A.R.P. progress in Cambridgeshire says 1,100 air raid wardens have been appointed with 235 trained in anti-gas precautions. Respirators will be stored but not assembled and distributed to each village until the emergency arises. A number of buildings have been inspected as first air posts to be manned by volunteers trained in decontamination and dealing with gas affected cases. There will be mobile parties able to rescue people from damaged buildings. 38 06 11

1938 The new Cambridge Guildhall basement could be regarded as splinter-proof and it would not be difficult to render it gas-resisting, the Air Raid Precautions Committee heard. If not done they could be criticised for allowing a public building without adequate protection and could not ask other stores or factories to comply with such regulations. But it would need to have 25 feet of concrete, with earth on top, to make it bomb-proof. It was absolutely and entirely impossible. 38 06 24a & b

1938 In Germany practically every civilian had been trained so that in the event of an air raid they knew what to do. Cambridge would be divided into 10 minor centres which would act as headquarters for the mobile first-aid parties and there would be five main first-aid posts. At least 1,000 volunteers were needed but at present only 200 had come forward, mainly women. They could not be expected to carry stretchers and do heavy lifting work. Cherry Hinton needed 30 air raid wardens, each looking after 120 houses. 38 07 07

1938 The Spanish people were fighting our battle & the British Government should take strong measures, a Conference on Spain in the Cambridge Masonic Hall was told. If Franco were to win as the pawn of Mussolini and Hitler another European war would be much closer. Meanwhile a service of prayer on behalf of religious persecution in Germany was held at the Synagogue in Thompson's Lane. Cambridge Refugee Committee exists to help all German and Austrian refugees and would be pleased to receive gifts of money 38 07 18 & a. Cambridge lorry for Spain – 38 07 16c

1938 Each village should have a utility squad of men or women with knowledge of first aid, buildings and fire-fighting who could help in an emergency. Parish councils should establish a first-aid point with hot water where a casualty could wash. There might be five distribution stores for about 80,000 respirators that would be assembled and sent out in cartons to air raid wardens for personal distribution, the Home Office suggests 38 07 19a & b

1938 The Air Raid Precautions Committee has constructed several types of household trenches at Ditton Lane for demonstration purposes. Two are about six feet below ground level and are roofed in, whilst the third is merely an open trench with an embankment around it. Shelters of this type can be constructed of any suitable material in the average garden and are strongly recommended as give the best practical protection to a man and his family. The duties of Air Raid Wardens were outlined: they should be sensible and able to keep their wits in times of stress. 38 07 23 c-e

1938 People in an area from Yorkshire to Buckingham, including Cambridgeshire and Norfolk, should extinguish out-door lights on their premises, draw blinds and curtains and take all other measures to prevent illumination from being visible during the air defence exercises. Those compelled to travel by road during the period must bear in mind that streetlights will be extinguished. If weather conditions are such that large numbers of bombers can operate without due risk, intensive raids may be anticipated. Fighter patrols will probably be kept away 38 08 06

1938 Some 900 aircraft are taking part in an exercise testing the air defence of Great Britain. The attacking force will have 36 bomber squadrons (some from Bassingbourn and Wyton) while the defenders will consist of 23 fighter stations and 14 bomber squadrons, including planes from Duxford, Debden, Feltwell, Mildenhall and Stradishall. Anti-aircraft and searchlight batteries will be spread across the Eastern Counties. Bombers will fly without navigation lights unless other

aircraft approach and fighters are forbidden from attacking below 1,000 ft 38 08 05a plane crashes at Melbourn – 38 08 08. Mayor made tour of town, all in darkness apart from one or two lighted windows – 38 08 08b

1938 It has been a momentous week. Those of us involved with the daily production of a newspaper have spent a harassing time. Some say that today we know too much of the happenings in the world and know it much too quickly. The tension became painfully apparent at the weekend when the world waited for Hitler's pronouncement. Was it to be war...? But then a bolt from the blue. 'The Premier is to fly to see Hitler tomorrow to endeavour to find a peaceful solution to the crisis'. Our fervent hope is that international chaos has been averted 38 09 17a

1938 The Cambridge Scientists' Anti-War Group, whose book 'The Protection of the Public from Aerial Attack' was criticised in the House of Commons, has been championed by Prof J.B.S. Haldane. He says they should carry out experiments into the effect of gas with the assistance of the Chemical Defence Research Department. They have also worked out a scheme for evacuating many of the population of Cambridge into surrounding villages 38 09 14a

1938 In the event of air attack schools would be closed for a month as men would not be able to prevent their wives from going out to fetch their children. Many homes had no room in which to build shelters so two types had been constructed in Ditton Lane; one was open and about six-feet deep but there was nothing to prevent a corrugated iron roofing to be placed over the top. The other was covered and had seating. They afforded a greater degree of protection than cellars where there was a great danger of being buried by masonry, a meeting was told 38 09 21c.

1938 Mayor's air raid shelter – pic – 38 09 26

1938 The Mayor, E. Saville Peck, writes: "I realise that at this time we are all anxious about the present international crisis. I wish to assure the public that so far as practicable the necessary steps in regard to A.R.P. are being taken to provide protection against both gas and high explosive. Sufficient gas respirators are already in Cambridge and instructions will be issued as to where they can be obtained. First aid posts are being organised and equipped. Householders should consider making small trenches in their gardens for protection of their families in the case of emergency". 38 09 26a

1938 Sketch for a garden ARP trench – 38 09 27

1938 Ladies lead the war – women with respirators picture – 38 09 28

1938 Leys school dig ARP trenches – 38 09 28a

1938 Cambridge colleges have sent out notices to undergraduates ordering them not to come into residence until further instruction. However examinations will take place as usual and candidates will be allowed to come up for them. Meanwhile preparations continue for the reception of 10-11,000 London children it is planned to evacuate. Church halls and schools will be suitable for temporary accommodation. Women helpers, blankets and rugs are still needed 38 09 29a

1938 Calmly and without fuss, Cambridge people have started to collect their gas masks in readiness for 'come what may'. A steady stream of callers arrived at all distribution centres. Schoolmistress and volunteers showed each caller the simple method of fitting the masks on. Tragic was the contrast at Milton Road School where during playtime small children shouted 'We want peace' while adults waited outside to be fitted with their masks. It drove home Mr Chamberlain's words "How horrible that we should be digging trenches and trying on gas masks because of a quarrel in a far-away country between people of whom we know nothing" 38 09 29aa

1938 Air-raid trench in garden, Coleridge Road – 38 09 29aaa

1938 The Mayor said he'd received a telegram that plans to evacuate London children had been cancelled. Later he got another saying they were on their way. They arrived in three motor coaches, the children's ages ranging from six weeks to four years. Accommodation was found at Homerton and Newnham College. Their mothers left the children, aged from six weeks to four

years, to the tender mercies of students and returned to London. Today the babies have rejoined their mothers, which is a very happy solution. 38 10 01

1938 William Coad of Cavendish Avenue has come up with an answer to the need for underground A.R.P. shelters. His scheme is to construct a sub-way car park underneath Cambridge Market Square with inlet and outlet ramps, which, in the event of an emergency, could be converted into an effective shelter accommodating several thousand people. A nominal car-parking fee would eventually pay for the initial outlay and alleviate the need for suitable garaging for business men coming into the town. 38 10 07

1938 Cambridge council and ARP plans; some colleges offer accommodate refugees from London – 38 10 01

1938 What to do with gas mask now crisis over – Ronald Searle cartoon - 38 10 08a

1938 Anti-aircraft battalion placed searchlights around Cambridge – thanks – 38 10 11a

1938 Cambridgeshire Regiment to be raised to war establishment but First Eastern General Hospital will not remain and recruiting will cease – 38 10 17 & a

1938 Detailed statement of County Air Raid Precautions shows 30 tons of gas masks had been transported to Shire Hall where they were assembled by clerical staff and outside helpers. But they were still over 5,000 respirators short and telegrams had been sent to the Home Office. Parish Councils will establish a first-aid point in each centre of population but there will be no public shelters as it was safer for people to disperse rather than congregate. They would provide services to meet needs of casualties caused by the chance dropping of bombs 38 10 31a

1938 The President of the Cambridge Union Society is amongst signatories of a letter to the German Ambassador in London protesting strongly against the barbarous violence and cruel legislation inflicted without mercy or justification on the Jews of Germany. “We record our horror and revulsion at these acts of collective punishment, deprivation and arbitrary arrest and are appalled at the terrible suffering imposed on thousands of men, women and children for no other reason than their race”, it reads. The University branch of the League of Nations also passed a resolution in protest 38 11 17

1938 A pacifist convention held in Labour Hall, Norfolk Street under the chairmanship of Dr Alex Wood called for every citizen to renounce all participation in and preparation for war. It was a crime against humanity and a sin against God. You cannot destroy German militarism through killing German soldiers. The colossal expenditure on death should be stopped and our country should take the lead by disarming 38 11 28 & a

1938 Cambridgeshire Regiment dinner addressed by Commanding Officer, R.N. Drake Digby. The responsibilities resting on the Territorial Army were tremendous. They had got their new Bren guns and anti-tank rifles and every man had to learn to use them to be ready to defend Newmarket 38 12 19 & a

TUESDAY'S RAID IN CAMBRIDGESHIRE

The wreckage of part of the eight Cambridgeshire houses.

Casualties in One Locality

There was no sign whatsoever of any panic. A.R.P. services went into operation smoothly and efficiently. The A.F.S. speedily dealt with small outbreaks of fire and rescue and demolition parties removed many of the injured in a very short time.

in a semi-conscious condition. A tunnel was made beneath the rubbish and a soldier crawled into it and held the chair while workers made frantic efforts to fasten a rope around it. He was there for three hours before they were successful, and Mrs. Langley was rescued hardly injured.

(Press & Chronicle)

Raid on Vicarage Terrace, 1940

70.30

c.45.7 – 1939-1945

NB see my CD-Rom of 100 Cambridge wartime headlines- not all included in this summary

1939-45 -

during WWII hutments erected Brooklands Avenue for use American Red Cross as hostel American forces [446.9.8]

Chesterton House requisitioned by Civil Defence [446.10.6]

60 Grange Rd - Silbury - was convalescent home run British Red Cross 1941, next door US convalescent home [446.12.5]

Hallen's requisitioned for military production, Air Ministry contract for repairing motor cycles in east Anglia; by end of war had 100 employees [446.13.3]

Lycee Francaise, London, evacuated to Cambridge [446.13.5]

anthrax horses buried after wartime experiments [446.15.1]

Marshall's trained RAF pilots WWII [446.15.3]

Pye Ltd changed 210 ft aerial mast put up at start war to help develop defence systems[446.17.1] during war Cyril Ridgeons work connected with order s for packing cases & crates [446.17.3]

During the early years of the war, when the Government was encouraging people to spend their holidays at home the Cambridge Entertainments Committee organised August Bank Holiday athletic sports meeting, swimming sports, baby shows and other attractions. They obtained permission to open the Corn Exchange as a canteen for troops stationed in the area; later alterations were made, music and games provided and it became a social centre for thousands of

Servicemen and women, a very useful contribution in the dark days of war. It could still, in the hands of an imaginative architect, become the much-needed concert hall Cambridge needed CDN 21.4.54

During the War British scientists worked on a secret project for destroying the enemy crops by means of chemicals dropped from aircraft. The method was never used but the discoveries made by the research workers at a “hush hush” plot in East Anglia have since made possible one of the selective weed-killers which destroy the weeds and leave the crops unharmed. In Cambridge dinitro compounds were used to kill some weeds and out of a very nasty idea meant for our enemies came another project – plant hormones, the director of Pest Control told Cambridge businessmen. c53 09 04

Waterbeach airfield to receive standard, history 56 squadron 56 03 29

Wartime correspondence between the Home Office and the man who would have run Cambridge in the event of a major disaster has been unearthed in the Public Record Office. Mr F.R. Scott would have assumed total control of the eastern counties and his letters give details of damage to Cherry Hinton Hall and private houses, including a small fire caused by an oil incendiary bomb falling on a house in Tenison Avenue. They were sent from St Regis, Montague Road, which served as the region’s civil defence headquarters until 1945. Later Cambridge was again chosen as a regional seat of government in 1959 to cope with the aftermath of a nuclear attack 81 05 14b

Secret wartime experiments involving the production of deadly anthrax serum were conducted at the Institute of Animal Pathology on Milton Road. Now doubts remain about the safety of a piece of land where the carcasses of 12 horses were buried. Details have emerged as the university has applied for planning permission for housing on land close to the Dunn Nutritional Laboratory. The risk of infection is minimal and they plan to cover the immediate area with a concrete slab. 82 01 05 & 05a

A second burial site thought to contain anthrax-infected carcasses is a stone’s throw away from a school for severely-handicapped children says a man who worked at the Milton Road Institute of Animal Pathology during the war. He remembers tight securing precautions after heifers from Newmarket were found to have the disease and buried by council workmen 82 02 06

crashed aircraft in Cambridge WWII – Bowyer – 58 01 25 & a

Jeanty Raven, the wife of Professor Raven of Christ’s College, could tell the most horrifying tales of the war. She was then the wife of a prosperous Brussels barrister who was imprisoned by the Germans when an escaped British pilot was found hiding in their house. The penalty for this was death but under German law no man could be condemned if his wife was insane. So she assumed the character of a simple-minded girl of twelve and lived in a house along with anything up to a hundred insane people. As a result her husband was sentenced to life imprisonment, only to be murdered along with hundreds of fellow prisoners just before the war ended. 59 03 20

The No.1 First Eastern General Hospital was formed from local people just before war was declared in 1939. The commanding officer was a Cambridge doctor who became Col C.H. Budd, the matron was Miss A.M. Woolerton. Their headquarters was a large house on Parkside, the parade ground was Parkers Piece and their first posting was Kimbolton Castle. 84 04 27 p25
Former members of the RAF Motor Transport Unit travelled to Cambridge to dine at the Lion Hotel and talk of their wartime Cambridge billet – King’s College. They specialised in large-scale Service “removals”, such as shifting an entire service from one place to another. Early one morning a fleet of 32-seater coaches left the Backs in the company of a self-contained mobile feeding lorry and sped to a smouldering Coventry where emergency meals were prepared and served to the homeless. Thereafter the coaches helped provide a public transport service for them c52 10 08

The Ministry of Fuel and Power which administered fuel rationing during the war has moved its regional headquarters from Brooklands Avenue to London (in 1958). At first there were two offices: the petroleum office in Chaucer Road and a general office which started at Corpus

Christi college and late removed to Trinity dealing with coal, gas and electricity. At its peak 300 people were employed but now a very small staff will remain to ensure that gas and electricity meters are working efficiently 58 11 08c

Cambridge Instrument Co became controlled establishment & made some items wartime use such as degaussing system on ships [7.2]

Dunn Nutritional Labs worked on standardisation of wholemeal bread with vitamins B1, vitamins A & D to prevent night blindness & rickets made available in form cod-liver oil; margarine was compulsorily vitaminised, concern loss of vitamins through cooking [369.43.4] There are a quarter of an acre of tunnels under Peas Hill which were used as air raid shelters during the War. They were wired for electricity, lavatories were installed and wooden seats fitted in the tunnel recesses. Oil lamps were kept close at hand in case of emergency. Quite a number of people used the shelter during day-time raids and some slept down there when there was night bombing. 'Roadsters' used them every night to sleep. They were terribly damp when first used but after a few days became quite comfortable. 59 12 17

Constant Babington Smith analysed aerial photos during WWII - 60 04 27

Eric Curwain broadcast news of German invasion of Poland – 85 95 21a

Cambridge radio amateurs worked as wartime spies monitoring enemy messages – 85 06 01

An air raid shelter erected at the beginning of the war in the garden of 44 Chalmers Road, Cambridge, was never used because it was thought to be too shaky. Mr P.C. Grimwood, who constructed it, used a wonderful variety of iron work to strengthen it including a fender, a quantity of large keys, a sewing machine, part of a bedstead and wire netting. After the war it was left because the cost of demolition was prohibitive. Now it has finally been removed after three days hard drilling with two pneumatic drills, leaving 20 tons of rubble. Workmen say it was well-built and only a direct hit in the doorway would have destroyed it. 60 06 04

Amateur radio operators listened for enemy messages during the war – 85 06 28a

RAF Newmarket & Snailwell – history 85 10 16 & a

From the hall of the Y.M.C.A. at Alexandra Street, Cambridge a distinguished company launched an appeal for funds. The speaker said that the lonely searchlight batteries during the war were visited by the Y.M.C.A. vans three times a week. They brought the little things the soldiers liked, tea, buns, cigarettes and papers. And the ladies of the 'Y.M.' took back letters for the troops and even wrote them for soldiers who were illiterate. The Cambridge building was completed in 1871 and had a moral affect on the thousands of young people who have been through the rooms and shared the facilities c51 11 02

Milton Road, Hills Road and St Andrews Streets were designed to take heavy military vehicles; farmland was requisitioned in Milton Road and used to prepare vehicles and tanks for the D-Day landings. 2012 12 31 p9

1939

1939 air raid shelters in Peas Hill cellars, Sept [457.8.4]

1939 Spanish Relief Committee meeting attended by members of International Brigade [1.16]

1939 Regional Commissioner representing Central Government established [4.23]

1939 Eastern Regional Food Office opens at Corpus Christi College [4.7]

1939 censorship started : based on idea that contents of every journal would be known in Germany in 24 hours; banned references to Royal Family, bombing - may not mention places, no report of air crashes unless civilian property or people involved & no mention of weather - could not mention wet roads or fog which may have led to crashes [9.1]

1939 Air Training Corps formed [Misc.4.2]

1939 January

1939 evacuation scheme - Mayor sends letter to each home [1.15]

1939 ARP on agenda [1.16]

1939 Ely RCD discussed the Government's scheme for the evacuation of civil population. Children would have priority; the acceptance of children will be voluntary but those who refuse must accommodate other persons. Schools will be required for the education of the children transferred; there would be one teacher or helper for ten children. There will be payment of 10s 6d per week where one child is taken, and eight and six each for more. Those under school age will be accompanied by their mothers or some other person and in these cases householders will only provide lodgings, not board., at the rate of five shillings a week for each adult and three shillings for a child. 39 01 11

1939 February

1939 Men and women members of the International Brigade, who have seen service in Spain fighting for the Government, spoke at the Guildhall which was almost filled to capacity. The meeting was called by the Cambridge Co-ordinating Committee for Spanish Relief. In Spain rickets was becoming rife, hunger dropsy was beginning to appear and anaemia was present. Between 300 and 400 people were dying from actual starvation in Madrid every day. For the first time in history in America surplus food was not being destroyed but was being sent to Spain. 39 02 07

1939 The Auxiliary Fire Service wound up their training at Cherry Hinton Hall with a demonstration using specially made incendiary bombs. Two were used to set fire to a house of boxes kindly donated by local tradesmen which was tackled using an ordinary hand-pump with a spray jet. Many important lessons were learned. The bombs give off intense heat and coloured glasses must be worn by the fireman to protect his eyes. The application of water increases the ferocity of the flames. 39 02 07a

1939 March

1939 rush to beat petrol rationing [1.22]

1939 trenches dug Midsummer Common [7.6]

1939 Cambridge is to raise a 600 bed Military Hospital (Territorial) with an establishment of 23 officers, 50 nursing sisters and 145 other ranks. Steps are being taken to provide temporary accommodation for officers and social purposes pending the erection of permanent buildings. This new unit replaces the original 1st Eastern General raised in Cambridge and the Isle of Ely in 1908. After the war, the hospital was disbanded, but in 1938 it was reconstituted under the command of Lt.-Col. C. H. Budd. M.C. T.D. 39 03 03 CIPof

1939 The Basque Children's Hostel is still in need of support. The children came over in 1937 and moved to the present hostel in 1938. The conquest of the greater part of Spain by Franco and his Fascist friends meant their parents were scattered and it was dangerous for them to return. Several businesses had given valuable support including Chivers and Pordage. It was a very happy home. There had been no bullying or dishonesty. Three of the boys were at garages being trained as motor mechanics, one girl was a dressmaker, another a laboratory assistant 39 03 22a

1939 Cambridge members of the Women's Voluntary Services for Civil Defence are being trained as ambulance and car drivers. A feature of the classes is tuition in driving in the dark in gas masks and without lights and in changing wheels, fuses etc under the same conditions. This instruction is being given by Mr North of Messrs Marshall's, Jesus Lane. Women wishing to enrol for this important National Service should apply to the W.V.S., Old Post Office, St Andrew's Street - 39 03 28

1939 Defence Cadet Corps Squadron formed - 39 03 29 & a

1939 The A.R.P. First Aid post at Auckland Road will be staffed by a doctor and trained nurse and give more extensive first-aid. Two practices have already taken place. A sham air raid was enacted last night with casualties brought in by ambulance and unloaded by stretcher bearers. Nurses and orderlies under the direction of Dr Walker, dealt with them. Realism was added by squibs which were let off and red paint was used to give the impression of real wounds. 39 03 30 & a

1939 April

1939 Sir Will Spens, Master of Corpus Christi College, has been appointed Commissioner for the Eastern Region under the Civil Defence Scheme, with Lord Eltisley as his deputy to direct Civil Defence on behalf of the Government in war-time from 12 cities and towns throughout Great Britain for three years as from April 1. 39 04 21 CIPof 39 04 19

1939 The old First Eastern General Hospital had been born again last year, but it had a short life and died in the September crisis. Then the Cabinet decided to form eight Territorial General Hospitals and it was revived as the "2nd (1st Eastern) General Hospital". There are 23 officers and 145 other ranks, a matron and nurses and it will have the same number of beds, about 600. Old Comrades can assist training recruits in the initial stages, they were told at their annual dinner 39 04 17

1939 St Regis luxury flats, Chesterton Road. A unique feature is the provision of a large air raid shelter built under the garages. It has a concrete roof and will be perfectly safe against all but a direct hit by a heavy bomb. Provision has been made for gas-proofing it in case of emergency. 39 04 06a

1939 British Portland Cement has constructed an emergency headquarters at the disused Saxon Cement Works in Coldham's Lane. Built by William Sindall it includes a complete set of offices with bombproof shelters and all A.R.P. necessities. There are two decontamination rooms with gas proof windows and splinter-proof steel shutters. Seven bomb-proof dugouts covered with eight inches of reinforced ferro-concrete and two feet of earth can each accommodate 30 people. It has an air-filtration plant, central heating and electricity supplied from an accumulator driven by a crude oil engine 39 04 19b & c

1939 National service and ARP: the young man's job: prepare today. How you can help yourself – articles explaining situation – 39 04 19d & f

1939 Lavender & Bateman for air raid shelters of all kinds – advertisement – 39 04 19e

1939 Air raid precautions. Every house should have a refuge room. A cellar or basement is the best. The stronger the walls, floor or ceiling the better. If possible the room should be without windows. If this is impossible steps can be taken to lessen the danger of the windows being blown in by blast and so perhaps allow the entry of gas-laden air. Sandbags or boxes filled with earth should be placed outside them. Otherwise trenches can be dug seven foot deep with at least two entrances and covered with corrugated iron topped with two feet of earth. Keep these pages for future reference – 39 04 19 e,f, g, h

1939 An appeal was made for townspeople to join the army of National Service. Cambridge requires 540 air wardens, 189 special constables and 90 men for the auxiliary fire service. Women could join the Land Army, nursing or first-aid services or help with the evacuation of children. The world is in the hands of certain irresponsible and uncontrolled men. Vast multitudes had lined the streets of Berlin to cheer their leader, the man who had massacred the liberties of two neighbouring people. We need to be ready 39 04 22 In the event of war there would be several hundred thousand casualties in the first few weeks. Cambridge was tolerably safe from air raids but patients would be transferred to Addenbrooke's Hospital from other areas. But there was a shortage of nurses. A nurse could do a great deal for a casualty with no hospital, but a hospital could do nothing for a casualty without a doctor and a nurse – 39 04 29 & a

1939 May

1939 2,500 Undergraduates packed Churchill Meeting in Corn Exchange, voted to gladly accepts the measure of conscription involved in the Military Training Bill. Churchill was occasionally interrupted by cheers, ironic laughter, and cries but generally speaking, the meeting passed off quietly. What violence there was occurred outside. Long before the meeting was due to start a queue formed up outside, and some of those unable to get in attempted to force an entrance. A rush was made on the west door and in the course of the melee, a policeman lost his helmet. Other officers repelled attempts to enter by the main door. A crowd of undergraduates several hundred strong remained in Corn Exchange Street until a proctor ordered them to disperse. 39 05 26 CIPof [7.7] 39 05 24a

1939 defence measures - trenches, ambulances etc [1.17]

1939 committee discuss ARP trenches - "might waste -£50,000 [1.18]

1939 Cambridgeshire Regiment raised a second battalion. From now onwards, those applying will be placed on a waiting list. 39 05 26 CIPof

1939 It is unlikely that the Water Company's source of supply, the Fleam Dyke pumping station, would be chosen as a target by enemy bombers or that a direct could put both duplicate sets of machinery out of action. However the disused Fulbourn pumping station has been completely reconditioned as a precaution. But if Cambridge was raided it is almost inevitable that water mains would sustain considerable damage the Manager said. The Company supplied water to 81,000 people but this may well be increased to over 110,000 by evacuations from London, 39 05 01 & a

1939 If war came some kind of press censorship would be inevitable, the Home Secretary told the Newspaper Society dinner. Retiring President, Captain A.C. Taylor, Managing Director of the CDN, said the provincial newspaper editor was very discrete and trustworthy but must make a true and faithful record of events as they take place. Only a free Press, unfettered by Government interference, can be looked upon as a true Press, and a faithful record of everyday affairs 39 05 03b

1939 The Ely and Chatteris area would receive about 9,000 evacuees in three days, the W.V.S. was told. Accommodation offered for the children far exceeded the number that would be billeted, but there was not sufficient accommodation for adults. The first batch of evacuees would arrive at Ely at 1.05pm, bringing 1,000 and the second train at 5.35. The receiving stations in Ely would be Silver Street and Broad Street schools and the W.V.S. could escort them to their billets. Food would be provided but the authorities did not have the means to prepare or serve it 39 05 08 & a,

1939 Air raid trenches would not protect people in event of air raid. Seven minutes would elapse after the warning before the planes were here. During that time head wardens had to get their wardens out of bed and they, in turn, had to get people out of their beds into the trenches. Under this scheme 30,000 people would be turned out into the darkened streets where there might be a lot of transport. Instead steel shelters should be provided, councillors were told. Cambridge was a safe place and trenches were practically no defence against aerial bombing. And they were narrow: young men will be touching knees with girls (Laughter) 39 05 05 & a, 39 05 11 & a

to the Forces. They are expected to be conscripted in Cambridge 39 06 03

1939 June

1939 Under the Military Training Act, 1939, the names of some 1,200 undergraduates and 800 other men aged 21 are being registered at the Senate House and the Central School. Medical examinations will begin next week and men allocated into four grades, one being unfit for any degree of service. The others will then be interviewed by the War Office to determine their most appropriate allocation

1939 Emergency plans envisage that as London will probably be attacked before Cambridge the County Infirmary should be provided for 250 casualties from Central London. The Ministry

would provide bedding and equipment but mattresses and pillows would be supplied as cases only, to be filled as required. It would be up-graded with an operating theatre and X-ray rooms, emergency lighting and better sanitary conveniences. But in the event of local casualties the London cases would be transferred to other hospitals 39 06 29

1939 July

1939 blackout exercise - "fires", "casualties", kerbs whitened to assist in blackout [1.19,7.3]

1939 During the forthcoming 'Black Out' test there will be something like a thousand people taking part. There will be no general alarm but air raid signals will be transmitted by telephone to the various centres. You will be relieved to know that no houses are to be set on fire (!) but a red lamp and smoking candle will indicate than an outbreak of fire has occurred and wardens finding them will call the brigade. There will also be casualties of various kinds in the streets with labels on them to signify they are 'injured'. Streets lights will be extinguished and motorists asked to drive with sidelights. 39 07 08

1939 Perse School Scout Troop demonstrated the way they can assist in an emergency. Into the arena strolled a group of passers-by, then came the wail of a siren leading to a mad rush for an ARP shelter. Exploding rockets gave a hint of realism to the scene. Scouts ran to various 'casualties' and treated their 'wounds'. Afterwards the wounded were carried on emergency stretchers made of Scouts' staves placed through the arms of overcoats and mackintoshes. The wounded took great care to make themselves comfortable on this rather uncomfortable mode of transport. 39 07 10

1939 An exercise demonstrated war-time black-out conditions in Cambridge. Streets lamps were turned out, speed limit signs extinguished and red hurricane lamps were placed on traffic islands. The external lights on police boxes were also put out and the bulbs removed as an additional precaution. Most vehicles drove slowly with only side and rear lights and cars using head-lights were stopped. Lights at the railway station were left on but carriage blinds on the 11.55 from London were drawn at Bishop's Stortford 39 07 14

1939 The A.R.P. exercise envisaged that an incendiary bomb had fallen on the Tivoli Cinema and no water was available from the hydrant. Within a few minutes a van-drawn Scammel pump pulled up outside. Firemen transported the pump to the riverside from which a hose was laid to a portable canvas dam near the burning building. There were four casualties – presumably usherettes, two suffering serious burns. Eighteen lorries were used as ambulances with an illuminated red cross on the front. 37 07 14a

1939 Although a considerable number of Militiamen from Cambridge travelled to their depots the scene at Cambridge railway station was little different from a normal Saturday. I expected to see goodbye and good luck messages being given to the first of the young men who are to give the next six months to the service of their country. But there were no martial strains to cheer them on their way. The explanation is that the men were free to travel as they wished and by travelling in small parties they avoided any publicity – and any reporters 39 07 15a

1939 British Legion veterans & Territorials took part in the huge rally on Jesus Green. Line upon line they stood in front of the platform from which the service, which formed part of the rally, was conducted, medals gleaming on every breast To one side of the serried ranks was a space reserved for the standards. Twenty thousand spectators were in attendance A far wider audience heard the service, for it was broadcast. A ceremonial march that preceded the service provided an impressive spectacle. An address was given by Admiral of the Fleet the Rt Hon. Lord Chatfield, Minister for the Co-ordination of Defence. 39 07 21 CIPof

1939 Waterbeach Aerodrome - proposed acquiring by the Air Ministry of County Council land at Winfield Farm, Waterbeach, as an aerodrome. The Council had 20 tenants there. Two of them won cups for the best smallholdings this year; both lost legs in the war. The Committee wrote to MP and made a strong protest to the Air Ministry. They said there was nowhere else they could possibly go. 39 07 28 CIPof

1939 Big Black-Out Test.—Cambridgeshire part of a gigantic black-out test. Twenty-five counties, in which the County and City of London will be included, will be in complete darkness—or as near to it as possible—on the night of August 9-10. More than half of England (from the Isle of Wight up to Lincolnshire, Staffordshire and Derbyshire) will be included in the biggest black-out test ever attempted. In all places, except the London region, the test will start at midnight. Request that there shall not be any light to interfere what is aimed at—a 100 per cent, black-out. R.A.F. observers will be flying to report on the results of the great darkness, which is to approach as near to war conditions as possible. 39 08 04 CIPof

1939 Complete confidence in Cambridge preparations against air attack was experienced by Aid. W. L. Briggs (Chairman of the Cambridge A.R.P. Committee): "I feel that we shall be able, in case of emergency, to put up a thorough working skeleton organisation which we shall make every endeavour to enlarge as the necessity arises. With the volunteers that we have got we have worked persistently to put into operation all the necessary measures. But it must be realised that from the first we have been, from the Government point of view, a non-vulnerable area, and this has restricted us very much in making the preparations which we think are necessary, but every section has persistently and thoroughly worked out the details of their duties. First aid is trained and equipped as far as possible." With regard to the evacuation scheme", Aid. Briggs added: "Everything has been worked out to the fullest detail, both with regard to reception, billeting, feeding and medical attention" 39 08 25 CIPof

1939 Should lighting regulations be brought into force motor car side and rear lamps must have electric light bulbs not exceeding seven watts, acetylene lamp burners must not consume more than 14 litres per hour and in oil lamps only one burner must be used. Light may be emitted only through a single aperture facing to the front or rear of the car of not more than two inch diameter. Front glasses must be obscured with white tissue paper or paint. Head lamps may be used provided the whole of the reflector is blackened. 39 08 24, a

1939 Shoppers at Cambridge's Woolworth stores were suddenly shepherded outside as part of an A.R.P. test. The staff had been warned but customers were quite in the dark when whistles blew just before the usual Thursday closing time. Four of the girls behind the counters approached the 250 customers on both floors and asked them to leave as a test was in progress. Others opened all the tills and put the money into bags, then made for the 'safety room' at the back of the store. Within two minutes fifteen seconds all money was placed in a fire-proof safe, the lights were out, the doors locks and the store's fire-fighting squad had their equipment ready for action. 39 08 24b

1939 In view of the crisis all police leave has been cancelled and special constables have been called up. The Fitzwilliam Museum is packing valuable items so they can be removed should the situation worsen and cinemas warned they will be closed in the event of war. Kerbs at street corners have been painted white in readiness for any black-out. There was a constant stream of people collecting gas-masks and a steady demand for black paper and curtains. Prayers for peace will be said at churches and it is hoped that Hitler will see it is suicidal to attempt to make war 39 08 25a

1939 There are to be two anti-aircraft batteries and one anti-aircraft signalling unit based in Cambridge. Recruiting for the batteries opens at 45 Parkside and Salisbury Villas for the signalling unit. Cambridge has already responded to the call for National Service. The Cambridgeshire Regiment is over establishment, the Royal Engineers unit, 2nd General Hospital and the Cambridge National Defence Company are complete. A second Auxiliary Territorial

1939 Service (clerical) company for women will also be raised. 39 08 28

1939 Poland invokes treat with Britain, gas masks, evacuees – 38 09 01
1939 The first children who have been separated from their London families by the dark threat of war arrived at Cambridge station. The train contained 800 boys and girls, all had a label bearing their name and address, a few carried a football, several had oranges. They were handed bags containing their rations and helped on to the waiting buses 39 09 01a
1939 An experimental gas mask drill was held for Ramsden Square children. Over 100 assembled and were instructed in the proper use of the gas masks by the senior warden, Mr E. Winkworth. They were told a whistle would sound in the event of an air raid, that the sound of a rattle would indicate a gas attack and a bell would sound when it was safe for them to come from their shelters. Aeroplanes roared overhead as the children were instructed 39 09 01b
1939 trenches constructed Milton Road school, followed by County High School [7.11,7.12]
1939 Blow Falls. — Well, (writes Watchman), the blow has fallen at last. When I wrote this feature last week, there was still hope that hostilities would not break out, but Hitler has decided otherwise, and now the whole country and Empire is rallying with France to fight for a great principle . . . We enter the conflict regretfully, but resolutely, and fully confident that we shall win through . . . The new lighting restrictions have made progress difficult and strange during the last few days, but we are gradually becoming used to the new conditions . . . One day this week the Minister of Agriculture and Fisheries broadcast an important message to farmers and the rural community generally. He said that the farmer's main job is to increase, in an orderly fashion, our home production of essential foodstuffs—a task just as vital to the nation as that which has to be carried out by our armed forces. As far as the immediate after-harvest plans are concerned, the majority of farmers must think in terms of ploughing up more land, both for supply of human food and animal feeding stuffs. The immediate task is to plough up as much land as possible for next year's harvest. 39 09 08 CIPof
1939 War Measures at Cambridge. Banks, buses and libraries are among the services affected by the situation. Mr. A. Cousin, the Eastern Counties Company District Traffic Supt., said that after-dark bus services had had to be curtailed, owing to lighting restrictions "and of course, the cinema buses are not running at the moment, as there are no cinemas open." Both lending departments and reading rooms of the public libraries in the borough are closing by sunset, in view of the lighting regulations. Banking hours have also been altered. They are now from 1.0 to 2 from Monday to Friday and 10 to 1 on Saturdays. This week the stained glass in the east

window of King's College Chapel was removed. It was being packed and taken to a place of safety. 39 09 08 CIPof

1939 Evacuees at Cambridge. - first of the children arrived at Cambridge from London on Friday. During the weekend many others arrived and were dealt with. On Friday, numerous helpers gathered at the station. Among them were a number of Rangers who came on duty at six o'clock in the morning to fill the "ration bags" ready for distribution among the evacuees destined for the county on their arrival. 39 09 08 CIPof [1.11, 7.9]

1939 Compulsory powers of billeting are now in force in Cambridge. Enough voluntary offers have been received to take in all the children who are coming in school parties. But expectant mothers and those with young children are also expected and householders will be required to house them. The payment is five shillings a week for each adult and three shilling for each child for lodging only. The adults will be responsible for their food. The third class comprise voluntary helpers from the evacuated areas working full time in Cambridge. The payment for them will be twenty-one shillings for board and lodging which will be paid by the Government. 39 09 01c

1939 Cambridge had its first air raid warning in the early hours of the morning and hundreds of householders left their beds and adjourned to lower rooms. Others, however, slept through the noise of the sirens. One householder, doubtful about the efficiency of their black-out wrapped a woollen scarf round the electric light. Shortly afterwards they donned their gas masks after noticing a very pungent smell. Later they noticed it came from the scarf which had been charred through. The alarm was caused by the passing of unidentified aircraft over the Eastern Counties. Fighter aircraft went up to investigate 39 09 04

1939 War-time Farming Push.—The war has come at a time of the year that gives farming the best possible opportunity to prepare for the great effort it must now make in the defence of our country (writes Watchman). Harvest is nearly finished, and has turned out better than at one time seemed possible. Given reasonable weather, farmers will be able to push on with their normal early cultivations and supplement them with ploughing up even more land, for another 1½ million acres of land must be brought under the plough this coming year. It is an ambitious programme, for we are attempting in one, year what we only achieved in four years in the last war

Cambridgeshire and Huntingdonshire are expected to have little difficulty in supplying and probably exceeding, their allotted contributions towards the 1,500,000 acres of land which the Minister of Agriculture proposes to bring under the plough this autumn. 39 09 15 CIPof

1939 The majority of basements in Cambridge are useless as public air raid shelters since they need to be capable of holding between 50 and 100 people. But those at Herbert Robinson's Garage in Regent Street, Zion Baptist Church, Mr Wheatley's in Sturton Street and Potts' Mineral Water Works in Castle Street are suitable. However these are not enough and shelters should be constructed in various areas. They will be of brick and concrete and accommodate 50 people. Shelters in schools should be available for the public during the night and at week-ends. 39 10 09a

1939 Air Raid precautions committee have ensured that petrol supplies will be available for special services and several garages have reserved tanks and pumps for them. There are decontaminating centres at Mill Road store yard, Cherry Hinton Hall and Victoria Road. First aid depots have been set up at Shirley and other Schools with first aid parties and two ambulances. Electrically controlled sirens have been installed which together with the steam sirens should be adequate to give necessary warnings 39 10 11

1939 ARP shelter under construction at Christ's Pieces – photo – 39 10 12

1939 Happy evacuees from the poorer parts of London enjoyed a birthday party for 'Little Joan'. She had told her new 'mummy' that she had never had a birthday party before and it added to her happiness to share it with chums from Fulham. Joan enjoys her 'holiday' home and only wants to go back 'now and again'. She would like her mother to come and see her in Cambridge. But mum cannot afford the trip. Other children are saving their money to pay their own mummy's fare. 39 10 13a

1939 Call-up - between 600 and 800 students and townsmen will be affected by the first proclamation under the National Service (Armed Forces) Act, 1939. The smallness of the number is accounted for by the fact that many men in this age group have already joined the Forces. On Saturday, October 21, - the anniversary of Trafalgar - all men who on October 21 were between the age of 20 years and 22 years, are required to register at the Senate House, King's Parade 39 10 20 CIPof

1939 Hitler's bombs will have no effect on the air raid shelter in the basement of Herbert Robinson's garage in Regent Street which is not only the largest in Cambridge but impregnable even from a direct hit. It has three steel reinforced floors above the actual basement which comprise the shelter. Experts say that even if the first or second floors were damaged by a direct hit from a bomb, people sheltered would still be immune. It comprises 6,000 square feet and has accommodation for over 700 people 39 10 27a

1939 The Food Officer in Cambridge (Mr C.H. Kemp) and his stall of about 100 have been busy preparing ration books for the time when the Government brings the scheme into operation within the next three weeks. Workers, some volunteers, others recruited from the Ministry of Labour, have prepared 500 cards a day. Now all is ready. Rationed foods will be meat, bacon,

ham, butter, margarine, cooking fats (including lard and dripping) and sugar. There will be an ordinary ration book, another for children under six, one for travellers and a supplemental book for boys aged 13-18 who are considered to need more meat than the average adult. 39 10 28

1939 Cambridge is a much more cheerful place in the black-out today than it was when the war started. Then cyclists and pedestrians were few and it felt like a dead city. Now with theatres and cinemas going strong there is plenty of life and the whole atmosphere has changed. But with more traffic comes more danger. Some motorists and cyclists go too fast in the darkened streets. But the worst offenders are pedestrians dawdling in the roadway without any thought for the poor people awheel who with dim lights have to thread their way through the streets. 39 11 04

1939 Cambridge Fire Boat trial – photo – 39 11 08

1939 The Conscientious Objectors Tribunal under Judge W. Lawson Campbell heard its first cases. A teacher from St Faith's School thought war was incompatible with the teaching of Jesus Christ, a clerk at the Cambridge Electrical Supply Company was a member of the Peace Pledge Union & believed military training led to the decadence of the human race while an undergraduate said he felt war degraded humanity but would do medical work. 38 11 13 & a; also 39 11 14, 39 11 15, 39 11 16a & b

1939 A letter from the Rev 'Tubby' Clayton was read when Cambridge Toc H Club opened above no.13 Corn Exchange Street, a place which three weeks ago was a home for pigeons. With the town labouring under the restrictions of black-out it was in need of a place where Service men can read, write and play games. On Sundays they can bring their lady friends. Above the entrance are these words: "All rank abandon ye who enter here". 39 11 16c

1939 Air Raid Precautions. Testing of air raid warning sirens. In accordance with instructions from the Ministry of Home Security, all air raid warning sirens in Cambridge will be tested at 1pm on the first day of each month. If an air raid warning is received on a day when tests are to be held the signal will be reinforced by a free use of whistles by wardens and police. Any siren which has been sounded for real during an alert will not be tested the following month – C.H. Kemp. Town Clerk 39 11 28

1939 Some classrooms in Trumpington and St Paul's schools were 'dark pits' because of first-aid depots being placed in schools. There was a great danger of sandbags making the rooms damp and as classrooms were being used for people to sleep in all night it was difficult to get them aired, councillors were told. It was also alarming to see enormous laundry vans standing in narrow playgrounds which have to be manoeuvred when the children were about. But at Cherry Hinton there was nowhere else they could go. However three halls there were being used by children now. If they were not fit for first-aid posts, they were not fit to teach children in, Mrs Rackham said. 39 11 29c

1939 December

1939 Communist Party pamphlet on Cambridge in war described as "sheer effrontery" [1.25]

1939 more shelters being erected [7.14]

1939 Christmas, 1939, has meant more solemn thoughts than usual for many. In countless homes, the traditional joy and gaiety has been tempered by absence of one or more members of the family. And yet, in spite of gaps at the dinner table, and because the advice to carry on as usual is so obviously sound, there has been little outward change in the character of the Christmas festival. In Cambridge, as elsewhere, people remembered their absent ones, but through the inspiring co-operation of the radio, were able to satisfy themselves that the men in the Services were not forgotten. At home, it was the usual day of gifts—the children's day—and for many the delight lay in entertaining little evacuees whose parents were unable to do the job themselves.

The change in the times was reflected, perhaps, in the opening of some cinemas on Christmas day, but found themselves comparatively few patrons; it was still a home festival for most. The Town club had their usual football fixture in the morning, but this had to be scratched. On Boxing Day their fixture with Rushden resulted in a decisive win for Cambridge. Another regular feature was the appearance of the Christmas Day bathers, who found not thick ice, but a deep fog to greet them. 39 12 29 CIPof

1939 Black-out Deaths - two women have died in accidents which occurred in the black-out. In one case, where the woman was killed almost instantly, the accident occurred in the Trumpington road, near the Evelyn Nursing Home. Miss Mabel Timms was struck by a lorry owned by Dickerson. The other was at the junction of Histon Road and Gilbert Road. Maria Elizabeth Smith was knocked down by a bus 39 12 15 CIPof

1939 A Clare College undergraduate told the Conscientious Objectors' Tribunal that he hoped to do psychological work. The idea had come into his head while working in a Basque children's camp when he noticed that many of them had a kind of fit at the sound of an aeroplane. He was registered on condition he continued his studies. A shop assistant from Hinton Avenue, who was a lay reader in the Methodist Church, was registered on condition he undertook agricultural work. A man from Fulbrooke Road objected on religious grounds; he was a research physicist at the Cavendish Laboratory while a King's College graduate appealed on moral grounds. He was prepared and anxious to perform non-combatant service. 39 23 01d & e

1939 A *News* reporter inspected all types of shelter and was impressed with the comparative comfort of the interiors. The person who looks for armchairs will be disappointed, but in some of the larger basements there is plenty of space to walk about and in some there is even central heating. Most shelters have been constructed to withstand any likely fall of masonry and air locks to keep out gas have been installed. They have been arranged within a short distance of areas such as the centre of town where there are usually considerable congregations of people. They are primarily intended for the protection of people caught in the streets in an emergency. Nine are now ready with the cellars under Peas Hill holding 400 people 39 12 08b

1939 Police are dragging the river for two local cyclists who disappeared during the black-out after they had set out to cycle to their homes. Following a report that what appeared to be two cycles had been seen lying on the bed of the river near Dant's Bridge police commenced dragging and recovered a lady's machine. Later a man's cycle was brought to the surface. They have been identified as belonging to the missing couple. The man could swim but had a disabled leg due to a football injury. The girl is the daughter of a stone mason and worked at a local factory. 39 12 18 & an

1939 Petrol rationing is focussing attention on town gas as an alternative fuel for motor vehicles. One of the Cambridge University and Town Gas Light Company's coke lorries has just been fitted with a gas container to enable it to run without petrol. The lorry carries enough gas for 11 or 12 miles, which is adequate for deliveries of coke in the district. The range could be extended by putting a second bag on the trailer 39 12 22

1939 For two years a small community of Basque children have been our guests. Cambridge has become familiar with the little black-eyed, black-haired boys and girls and has enjoyed watching them dance and sing. They arrived under tragic circumstances, racked and nervous; the peace and quiet of the country village of Pampisford, redeemed and restored them. Now they have been adopted into English homes until they can return in safety to their own beloved land of Spain. Now a booklet has been published about their experiences 39 12 23

1939 Cambridge public air raid shelters are nearing completion and the public is urged to visit specimen shelters. When complete there will be 60 new public shelters accommodating 6,700 people. They include the basement at Scroope House and the Union Society - detailed survey 39 12 28a

1939 War could not 'black-out' the Christmas Eve Festival of nine lessons and carols at King's. From the crowded chapel the message of peace and goodwill travelled by wireless across

Europe to France, Italy and Switzerland. The candles flickered even after black-out for a test showed no dangerous amount of light could be seen from outside. But there were dark, blank spaces among the rich glory of the stained windows which told of the removal of some of the glass for safety's sake. 39 12 27a

1940 January

The Lord Mayor of London visited evacuated children in Cambridge. At St Paul's school he saw classes from St Martin's Parochial School, St Philip's School has scholars from St Martin-in-the-Field while that at Cherry Hinton is attended by children from Brompton-Road School. Later he visited St Matthew's School where other London children welcomed him before going to a Pulteney School Manager's party in the Co-operative Hall. The children were very happy and well-placed and it would be foolish for them to return to the danger area 40 01 03,04

Adult evacuee's impression of Cambridge – 40 01 12b

Cambridge University has adopted special measures to meet the difficulty of interrupted studies. Many men cannot be expected to reside for more than two years in wartime so modification have been made in certain important courses, particularly engineering and law to enable them to make the best use of the time available. Colleges will admit scholars in December so they may begin their University studies nine months earlier than normal. – 40 01 13a

A tribunal heard from a manager at Laurie & McConnal's whose family had been pacifists for generations. If the firm started supplying the army he would have nothing to do with it. An assistant at the Fitzwilliam Museum said he had been attending meetings of the Society of Friends and he could better serve by continuing to help the cultural life of the community. A Saffron Walden art student believed the German people were being misled by leaders who had overstepped all reason. He objected to all forms of military service, even designing camouflage for aeroplane hangars. All were registered as conscientious objectors

Conscientious objectors panel – 40 01 19a

1940 February

1940 March

Civil Servants evacuated to Cambridge opened their club at the Masonic Hall in Corn Exchange Street with a dance to the music of Dan Maskell's band. It is estimated that altogether there are a thousand of them in Cambridge and they are likely to remain for the duration of the war. The club is equipped with table tennis tables, darts boards and a game of skittles. There is a comfortable lounge, reading room and bar as well as a sewing machine and a small iron for the ladies. It is hoped to provide a snack bar at lunch time– 40 03 13c

Seaman Trevor Surkitt, the young Cambridge man who fought in H.M.S. Exeter at the battle of the River Plate was honoured at the Guildhall for the heroic part he played in the fighting. The presentation took the form of a statuette of a sailor holding a telescope and a silver cup. Seaman Surkitt, of Coldham's Lane, was the youngest seaman on board and was on duty through the battle in the one turret of the ship which was able to continue firing. But he declined to say anything about the action. 40 03 27a

road signs taken down [7.19]

A large number of male enemy aliens who come within the scope of the provisions of a new Home Office order were rounded up members of the Borough Police in plain clothes. The procedure adopted was for the police to go in cars to the homes of the men affected and ask them to go to the police station. From there they were taken to the Guildhall. Before being conveyed by bus to internment camps, they were allowed to go home, accompanied by the police, to collect clothes and other personal belongings. A number of University men, including Fellows of colleges, were among those dealt with. Four brothers and a man, who will be 60 in a fortnight, were other cases. In several instances, aliens who were out when police called, went voluntarily to the police station 40 05 17 CIPof

Italians Detained. — Cambridge Borough Police began a round-up of Italian subjects in the town immediately after news of Italy's entry into the war and altogether about a dozen were detained. About half are members of the University and the remainder shop assistants. They have left Cambridge for an internment camp. It is understood that there are none in the county 40 06 13 CIPof

Dunkirk Experiences - Pte. Ernest Marshall, of Comberton was about five miles from Dunkirk when orders were received to make for the coast, and to take to the boats as they became available. Reaching the coast at daybreak, they waded in the water up to their armpits in a vain attempt to board a boat, but every boat was already filled to its utmost capacity. Still undismayed, although shells were bursting continuously around them, they decided to return to the shore, and make their way along the coast in the direction of Dunkirk. That five-mile journey was one of living torture. Numerous bombers were hovering overhead, dropping their deadly bombs around them, and heavy shellfire added to their discomfort. By lying flat on the ground and snatching every effort to proceed during a brief lull in the attack, he and his comrades, after seven long hours, eventually reached Dunkirk, where they boarded a boat, which, in spite of heavy enemy attack, landed them safely in England 40 06 14 CIPof

Nine die in raid. — Nine people were killed when bombs hit a row of cottages in a working class district of a town in Cambridgeshire during Tuesday night's air raid over East Anglia. [Vicarage Terrace, Cambridge] A baby girl aged five months was killed in her cradle. The mother and father were rescued from the wreckage. A mother, father and baby boy of two were killed in another of the cottages. A boy of six died in hospital. The list of casualties as reported in the CDN June 19, 1940: killed: Heather Dear, aged 5 months; William Langley and 'Sam' Langley; Gladys Clarke, 11; Mr & Mrs Beresford and their son Michael, aged two years; Molly Palmer, 9 and Leonard Palmer, 6. Injured: Mrs Daisy Kate Clarke, 42, shock; Charles F. Clarke, 53, fracture of the leg; Peggy Clarke, 15, multiple abrasions; Mrs Kathleen Dear, 22, shock; Sidney . Palmer, 54, cut head; Mrs Emma Palmer, 51, multiple injuries; Lily Itzcovitch, 11, an ecacuee, cut head and arm; Mrs Mabel Watts, multiple injuries; Mrs Doris Palmer, 34, injuries to the feet; Mrs Lily Langley, 47 shock;

1940 Aug 26

Around 02:20 a second Heinkel 111 dropped at least four 50 kgs over a wide area. Firstly, a bomb exploded in a meadow at Manor Farm, Arbury Road, Cambridge, killing one of Alice Cardinal's cows and damaging a stable and ten house exteriors. A UXHE rested in a field farmed by Bill Downham, and two bombs damaged eight houses in Leys Avenue. A second set of bombs from a third He 111 crossed the railway installations on the south side of Hills Road Bridge, Cambridge, the first exploding in Pemberton Terrace, the next on Foster's Farm in Shaftesbury Avenue, one on Purbeck Road playing fields and two in Homerton College grounds. Damage was slight. (Bowyer p75) [5.2, 7.23]

1940 08 28

Every day, at dawn and dusk, two Lysanders left Cambridge Airport, their crews scanning the East Anglian coast for signs of an enemy's landing. These 'Lyssies', dispersed on the corner of the airfield nearest to Cherry Hinton and by Teversham Lane, showed signs of a battering in France. They were tempting targets and, at 23:50 on 28 August, they came under attack. Over 100 incendiaries were scattered across Cherry Hinton by a Ju 88 and three 50 kg HEs cratered a Coldham's Lane field near 16 Squadron's Lysanders. Four more HEs did little damage to the Norman Cement Works, and another bomb exploded at Shelford Bottom. (Bowyer p79)

A man was killed when a barrage balloon drifted over Cambridge. Daniel Dunston was near the railway between Mill Road and Coldham's Lane bridge when he was caught by a steel cable trailing from the balloon. He was carried for a distance of over 30 yards and then dropped, sustaining fatal injuries. Before the accident the balloon had passed over the town at a considerable height. In the Mill Road area it came lower, and the cable threw a wireless pole through the roof of a house in Mill Road. The interior of the house was not damaged and no-body was injured in this incident. The balloon then gained height and drifted in the direction of Teversham. At Teversham Hall an old chimney stack on a scullery was struck by the cable. A piece of the cable was snapped off and the balloon at once shot up into the air and continued in an easterly direction. Telephone wires were damaged and the electricity supply for a village was affected for a time 40 09 13 CIPof [1.8] 40 09 13a inquest 40 09 17a

Cars and Invasion. Eastern Regional Commissioner (Sir Will Spens) says "Owners of motor vehicles should understand the necessity for immediate compliance with any order which may be given for the immobilisation of motor vehicles, if invasion is taking place. In the event of any failure by the owner, the police or military will inevitably have to use rough-and-ready methods of immobilisation, involving serious damage to cars. The same will apply in the case of any attempt to use vehicles in areas where such use has been prohibited." 40 09 20 CIPof

Fewer Students. — Full term at Cambridge at the start of the second year under war conditions saw the number of students up still further reduced from last year's figures. Instead of the normal peace time total of 5,000, it is estimated that the number of men coming up will be only 2,500. Graduates, as well as undergraduates, have left on national service of one form or another. Third year men of course, represent only a small fraction of the total coming up, while the number of freshmen is only a little over half that usually to be found second year men are in the majority by far, and the number is estimated to be only 20 below normal 40 10 11 CIPof

1940 09 17/18

An air raid alert sounded in Cambridge at 03:40, and within a quarter of an hour two oil bombs had fired crops next to Cherry Hinton Hall, fairly close to the aerodrome. All then quietened on this very clear night, and well I recall my mother and I helping older residents living near us, and who regularly took shelter, back to their homes when, without any warning, there came a tremendous explosion. A high-flying Ju 88 which had approached Cambridge from the south was now scampering away. Obviously its target was Cambridge railway installations, and again the bombs had fallen wide. The first made a crater 8 ft across by 4 ft deep just inside Fenner's Cricket Ground and demolished a wall by Mortimer Road. The blast effect was incredible, and mainly caused, I reckoned at the time, by a second bomb on the University Tennis Courts 20 yds from Gresham Road and a third which exploded in the garden of No 49, Hills Road, close to the line dividing it from Lyndewode Road. Despite their brown sticky paper protection, thousands of windows were smashed and slates in profusion shaken or blown from roofs over an amazingly wide area particularly from houses in Mortimer Road, Willis Road, Mill Road, Gresham Road, Glisson Road, Mawson Road, Regent Street, Harvey Road, St Paul's Road, Lyndewode Road and Tenison Road where, at No 27, an oil bomb landed appropriately in a coal place, starting a fire which was rapidly extinguished. Two further bombs had fallen at Cherry Hinton Hall, causing blast damage to greenhouses. The hall was private property, and it was some time before the

craters were located. Their size caused astonishment for one was 50 ft across and 8 ft deep, in the centre of which, to the amazement of its discoverers, was a most splendid crop of mushrooms enjoying new-found fertility. (Bowyer p93) – photo – 40 09 27

1940 10

Church hit by bomb. — Bombs were again dropped on various parts of East Anglia, but the most serious damage appears to have been to a village church. In the area four high explosive bombs were dropped, but no casualties have so far been reported. At the church, the bomb fell on the tower and continued into the churchyard. Chancel, choir stalls, organ and pulpit were all undamaged, and all the stained glass, which was covered with thick brown paper, was unbroken. The church holds about 250 people and a service had been held there in the evening. Recently £200 was spent on renovation to the fabric and the bells. Another village a few miles away also received several bombs, but no information has been received of serious damage or casualties and some of the bombs are known to have fallen in open fields 40 10 18 CIPof

Nazis Surrender to Woman. — When a Junkers 88 bomber was shot down: at Stuntney two occupants, aged about 18 to 20, threw down their revolvers and gave themselves up to a woman, who was the first person on the scene. The two other members of the crew, who had baled out by parachute, were captured in Soham Fen and taken to Newmarket. The machine had been badly damaged by R.A.F. fighters and was finished off by another fighter. The Nazi pilot crashed on Mr. Owen Ambrose's farm at Quanea Fen. Mr. Ambrose told a reporter "The plane touched down in a ploughed field, jumped a ditch and came to rest in a beet field. The first person on the scene was Mrs. Ashman, who lives at the farm. As she approached the two men, they emptied their revolvers and threw them away. Other men from the farm came up and the Germans were driven away in a lorry by Mr. Brooks." The two who baled out were uninjured 40 11 01 CIPof

Compulsory billeting powers have been used in Chesterton rural district, and one billeting officer at least has resigned rather than countenance their use. In 12 cases compulsion had been used. The success of compulsory billeting had "far exceeded our hopes." "In selecting what the war

communiqués refer to as targets, we have decided that compulsion should be used more against those larger houses where strangers can be accommodated with less interference of the occupier's domestic arrangements than a smaller house." They had fought hard against resorting to compulsory billeting but there never had been a voluntary system, but always a compulsory one. 40 11 01 CIPof

It was at 03:55 on the 16th that a very low flier, by sound definitely a Ju 88 and thus almost certainly of I/KG30, placed a container of incendiaries over the Hyde Park Corner area of Cambridge. About 250 bombs rained down, several slithering across the southern part of the

Catholic church roof, slightly damaging it. Others clattered on to Flinders store, which was soon engulfed by a major fire. Most of the bombs, though, burst on the Perse Boys' School Hall, an imposing chapel-like structure containing many wooden beams and trimmings which burnt fiercely, the whole impossible to save. As the fire brigade arrived the Ju 88 made a second, north-south strafing run, its gunners firing into both blazing buildings.

The Perse School Hall was still burning furiously at 08:30. Despite the devastation, and the multitude of hoses necessary because, due to the icy conditions, water had to be widely tapped, buses were still passing close to the huge fire. Sitting atop a double-decker I watched as much of the hall roof, or its remains, suddenly collapsed into remnants of the familiar form and erupted into a tremendous burst of flame, the blaze showering sparks widely. The conductor leaned across and said 'I think we've had enough excitement for one day'. We all agreed, especially as fragments rained onto the roof during as exciting a bus ride as one could expect, and survive! Presumably the target had been Cambridge station (Bowyer p134) 41 01 16a,b,c

Both KG3 and K.G2 were operating during the afternoon phase, aircraft of the latter including U5+AM. 'BM, 'CM, 'DM, 'HM, 'IM, 'LM, 'NM, 'PM, 'BJ\ 'GN, 'HN and 'DS, one of which nearly destroyed Cambridge railway engine sheds. Creeping in from Ely at low level during the dull, dreary Thursday afternoon, it dropped nine 50 kg HEs at 15:57 straddling Mill Road Bridge. Bombs burst in the Corporation store yard, and No 130 Mill Road and the next house were shattered by a direct hit. Other bombs exploded in the rail yard. Although the undershoot meant that the locomotive maintenance area escape destruction, two civilians were killed and ten injured, for the bridge was being used by many pedestrians and cyclists at the time. (Bowyer p137) [6.2, 8.1, 8.7]

Feb 15th A pair of large semi-detached houses, Nos 341/343 Cherry Hinton Road, Cambridge. Presumably it was a Dornier which, just before 23:00 made a fast run towards the south-east over

Cambridge, perhaps attempting to bomb the airport or the distinctive Eastern Tank Trap. Almost along the latter it released an unusually assorted bomb load. First to explode was an H E, immediately in front of the two houses whose frontal sections it tore away. Eight occupants escaped without injury and, even more strangely, hardly anyone heard the explosion. Sensing something unusual was going on, Dr Hanton — whose surgery was just across the road — went to investigate and was amazed at what he saw. Also living close was Alan Wright, author of Ian Allan's popular Civil Aircraft Markings series who, unusually for such occasions, slept throughout the event! Another 'silent bomb' crater was soon discovered on waste ground by Perne Road, while more evident had been incendiaries burning on fields stretching between Queen Edith's Way and Lime Kiln Road. More investigation revealed a burnt-out oil bomb, six complete containers of unignited incendiaries and parts of three other containers along with 58 unignited bombs. Since no enemy aircraft was known to have been in the area at the time, no warning had been sounded to accompany Cambridge's quietest raid of the war. (Bowyer p144)

Ten people, including two young babies, had a remarkable escape from injury in an East Anglian town on Saturday night, when a high explosive bomb fell only a few feet from the front wall of the house in which they were staying. The whole of the front of the building was affected, but Mr. and Mrs. Coles, who were in the front bedroom, were unhurt. The other occupants of the houses, which are semi-detached, were Mr. and Mrs. Lewis and their two-year-old baby, Mrs. Mapey, Mrs. Andrews and Mr. and Mrs. Honeywell and their two-year-old baby 41 02 21 CIPof

Ten people are known to have been killed and a number of others injured when a fairly concentrated attack was made on an East Anglian town (Cambridge) on Monday night. Six of the dead are women and four men. Three of the injured are stated to be in a serious condition. The fatal casualties included an elderly air raid warden, Mrs. Charles Gent and several other fire watchers who were standing in the road outside a hotel. Sapper Day and Mr. Brittain were among the other victims. Hundreds of incendiary bombs and a considerable number of high explosives were dropped by the raiders, which flew over very low at intervals. Many flares could be seen in the sky around the out-lying parts of the town and British fighters were heard overhead. The main brunt of the damage was borne by business and commercial premises in one street, where for some distance along both sides of the road (Hills Road) shops were demolished or damaged. Hardly a pane of glass intact in this district and several houses in side streets nearby suffered broken windows. It was in this area that two of the other fatal casualties, Mr. A. Negus and Mrs. Robertson, occurred. An eye-witness said next morning that during the raid a German plane appeared to fly over the road dropping incendiaries and was followed a few minutes later by another machine, which dropped high explosives. It was these which caused a large number of casualties. In another district a single high explosive bomb landed directly on a house, killing the Misses Barker, who were in the building at the time. Neighbours were also injured, but not seriously. The three others to lose their lives were Miss Thaxter, Mrs. Woodcock and Mr. Ashman 41 02 28 CIPof, 41 02 25 a,b,c

Extensive damage was done by a fire which broke out in the north wing of Pembroke College in the early hours of Saturday. The fire is believed to have started in one of the bedrooms of an upper storey, and the flames quickly spread along the whole length of the block under the roof. A fire-watcher raised the alarm, and regular and auxiliary firemen were soon on the scene with several trailer pumps, in addition to the three regular engines. Fire squads from the laboratories across the road and the college fire squad also assisted in fighting the flames. They had secured such a hold, however, that it was two hours before they could be brought under control. Most of the damage due to the flames was in the roof and upper part of the block, but the thousands of gallons of water poured on the fire soaked through to the lower rooms. Many of the occupants of the block were roused from their beds when the seriousness of the outbreak was discovered, and some of them assisted in removing furniture to the court. The treasurer of the college (Mr. J. T. Spittle) said: "It is impossible yet to estimate the damage, as we cannot get into some of the rooms. The damage, however, is extensive 41 03 28 CIPof

London Comes to Cheveley.—"The Rectory in the village of Cheveley must be among the handsomest property now used by Friends." So states a note (says Watchman) in a recent "News" sheet issue by the Society of Friends' War Victims' Relief Committee, which announces that towards the close of last month this rectory was occupied by mothers and children from Stepney and Limehouse. These folk were selected from East End shelters in which the Friends work. Most of the women had been to the country before — they returned because they could not stand living in other people's houses and the separation from their London friends. And they have come to Cheveley because they had been allowed to take some of their own essential furniture with them and live in a community of their London neighbours. To help them to make up their minds about coming, a film of Cheveley was made and shown in the shelters—which strikes me as being extremely accommodating, to say the least. "The scheme," says the 'News' note "would never have come into operation without the advice, help and encouragement of a Cheveley resident. Mrs Morriss, whose horse won the Derby a few years ago." There is, I believe, a similar 'Friends' centre at Wood Ditton for bombed-out people 41 04 18 CIPof

Heinkels were responsible for dropping incendiaries and four HEs in Railway Street and Coldham's Lane, Cherry Hinton, at 00:45 on the 9th; and at 01:50 delivered a very sharp incendiaries-only attack over much of southern Cambridge. Two targets there presented themselves, the rail complex and more fleetingly a large array of Army vehicles which were for some weeks parked along the sides of most of the streets between Hills Road and Mowbray Road. Troops of the 27th Lancers attending them were billeted with families in many of the houses alongside, an uncommon feature. Presumably the Army presence attracted the Heinkels, which carried out a very accurate attack using exclusively 1 kg incendiaries. Showered over the Coleridge Ward-Hills Road area roughly in the triangle between Hills Road Bridge-Mowbray Road-Worts Causeway, with spillovers on to Brooklands Avenue and Newton Road, the bombs started fires in fifty houses, but most were quickly subdued although not without bringing residents uneasy moments.

Mrs Pickford was in bed at 58 Marshall Road. Being deaf, aged and resilient, she like many more took a chance and slept on during the 'alert' in her upstairs bed. The proximity of the railway meant that many living in this section of Cambridge were supplied with Morrison Shelters, but they were not necessarily occupied whenever the siren sounded! And so it was at 58 Marshall Road. Fire bombs were generally delivered in oblong containers, commonly called 'Molotov breadbaskets', designed to burst open shortly after release allowing the incendiaries to spread with slightly forward trajectory. Realization of their falling came from a widespread clatter as they smashed tiles and slates. Often they penetrated ceilings, and usually burst in the first upstairs room. Unfortunately for those staying in bed, the incendiary could land on the eiderdown with a thump and burst into life showering brilliant sparks, spewing masses of greyish smoke and creating a foul smell. That almost happened at No 58. Mrs Pickford not surprisingly left her bedroom somewhat hastily when she found an incendiary bomb which had bounced off a mirror and landed on her bed, although fortunately it did not ignite.

At No 26 Marshall Road another incendiary landed on a wardrobe top, and again was promptly tackled. What amazed the residents of the street, where quite a number of bombs were burning, was that, as they were tackled in the broad moonlight, a warden was shouting to his fellow citizens to 'put that light out!'. Bombs were burning brilliantly on Mowbray Road, on the pavements and in the houses. From No 20 Mrs Rayner, her husband away in London's Fire Service, was advised to leave with her young daughter. That meant a dash through the bombs burning, converting the street into a frightening spectacle. Despite their quantity, most of the incendiaries were soon extinguished. Holes in the roofs of houses in Blinco Grove marked entry points. Others had fallen in the grounds of the large house now known as 100 Blinco Grove, and which in recent years has served as a school annexe offering an idyllic learning environment. Others burnt themselves out in Morley Memorial School playground, but at Nos 8 and 10 Cavendish Avenue, and 224 and 226 Hills Road, fires were serious enough to warrant visits by the fire service even though damage was limited. The worst was at Homerton College where a number of bombs in the high roof of the main hall quickly set fire to many timbers after the manner of the Perse School blaze. By the time the NFS arrived much of the roof was burning, and had later to be rebuilt. No other Cambridge residents had that problem, but instead they had to cope with clouds of grey ash produced by burnt thermite. Everything in affected rooms, often beyond, looked as if a volcanic eruption had taken place. But cleaning the house after the

incendiaries was a wartime chore — often repeated because the annoying little blighters did strike twice! (Bowyer p180)

1941 08 03

At 18:05 Cambridge sirens sounded and moments later, a Heinkel He 111 emerged from the mist over Chesterton. It promptly banked towards the north, opening fire on the Arbury Road searchlight site which answered with LMG fire. (Bowyer p246)

1941 Aug 7

At 00:50 on 7 August, a precision attack on the Unicam Works, a small factory in Arbury Road (over which that Heinkel had recently been) which specialized in optical equipment for guns and submarines. The raid opened with the launch of single-candle flares, then came Dorniers from the north-west dropping at 01:05 about 360 incendiaries, initially very close to the target, over Leys Road, Orchard Avenue, Arbury Road and College land adjacent, then more in Histon where a timber yard was set ablaze. They returned, bombing nearer the target, another incendiary load igniting within the area between Shirley School-Scotland Road and Kendal Way. From my usual vantage point at Brunswick School's shelters I watched the marker flares drifting easterly, and bombing to the south-east followed after the crump of three 250 kg HEs which fell at the sewage farm and one in a cornfield. A third shoal of incendiaries ignited in Chesterton Road where, in the gutter outside G.P. Hawkins' shop next day, an ABB500 container lay occasioning much public interest. Four 50 kg HEs exploded in the Stourbridge Common/Garlic Row area injuring an ARP warden, before the final incendiary shower guided by the markers was scattered just to the east of Barnwell Bridge, on Newmarket Road, Ditton Walk and Ditton Fields. Among this load were a few explosive incendiaries. When the raid ended at 01:55 a count showed 114 Cambridge properties with fire or blast damage, but only two houses untenable. Eight ABB500 containers were found. (Bowyer p246) [6.21,1.7, 6.5]

Aug 29 Argyle St, Sturton street chapel bombed (replaced 1954), A bomb dropped within a few feet of the west wall, removing the greater part of the roof slating, opening a large hole in the external vaulting and causing severe damage to the fabric. The whole of the roof lifted and many of the roof timbers were fractured. The building was of no use for public worship which had to take place in the Assembly Hall c53 11 18

Among the few air-raids Cambridge suffered was the one a night in August 1941 which besides damaging a number of houses in Romsey town, completely demolished an old building which was used as a primary Sunday school by Mill Road Baptists. A handsome hall is now being built and is expected to be opened in the autumn c49 05 20 [2.1, 2.2]

An old lady and a four-year-old boy lost then-lives when high explosive and incendiary bombs were dropped on an East Anglian town last week. A Sunday School was destroyed and a chapel and private houses were considerably damaged. The dead are Mrs. Louisa Rowell, aged 82, and John Gilbert Bowles, aged four, both of whom were sleeping in the same house. Mr. and Mrs. W. E. Bowles, parents of John Bowles, were injured and have been detained in hospital. A high explosive bomb which fell outside the chapel caused damage to the interior, but incendiaries which were dropped were promptly tackled by A.R.P. personnel and neighbours and overcome before they could gain a hold. 41 09 05 CIPof

Missing in Malaya.—Many Cambridgeshire families have received this week official intimation concerning husbands and sons who were serving in Malaya up to the fall of Singapore. In all cases the notification has stated that there is at present no news of the man concerned, and for the time it is necessary to post him as "missing." Most of the official notices concern men serving with the Royal Engineers, and amongst these are two brothers, Sergeant William Turkentine and Sapper Allan Turkentine, sons of Mr. and Mrs. A. C. Turkentine of 34 Albert Street, Cambridge 42 03 27 CIPof

1942 April

Daring Rescue, — The British Empire Medal (civil division) \ has been conferred on Mr Frederick Bertram Pearson farmer, of Westwick Hall Farm, Oakington, for the courage and determination he showed in saving the lives of two airmen when their machine crashed and caught fire. The plane, which was "bombed up", narrowly missed Mr Pearson's house, crashed through his garden and landed in an adjoining field, where it burst into flames. Rushing to the spot Mr. Pearson found one man trying to pull another more seriously injured from the burning wreck. With great coolness, Mr. Pearson cut of the harness of the badly injured man and carried him clear of the flames on his back, giving a hand to the other man at the same time. While he was doing this the heat was discharging bullets and the bombs were liable to explode. Two horticultural workers from Oakington, Wilfrid Josiah Brickwood and Edward Jabez Smith, have also received commendations for their share in the rescue. 42 04 03 CIPof

"Invasion" Test.—Cambridge is to be the centre of an important "invasion" exercise this weekend. The public, however, unlike the recent exercise at Plymouth—are not to take a direct part in the exercise, which will last from 8.30p.m. on Saturday to 11 a.m. on Sunday. The "picture" of the exercise is that invasion by the enemy is presumed to have started and that enemy forces are approaching Cambridge. Such an attack would carry heavy air raids on Cambridge itself. Military and Home Guards are taking part in attack and defence, and members of the Civil Defence Services in Cambridge and Cambridgeshire will be actively participating. The public are warned that in the course of the night there will probably be "unusual sounds," with "bombing," and planes may be used. 42 05 15 CIPof

Home Guard Parade, — Thousands of Cambridge people thronged the edge of Parker's Piece on Sunday to give testimony to the already recognised belief that there is nothing that draws the Englishman's attention like a military parade. The occasion proved not only the greatest event of its type we have seen in the town since the outbreak of war but, in addition, constituted — and not altogether unexpectedly — an achievement on the part of the local Home Guard that all may be proud of. Home Guardsmen, numbering 3,500, came from all over the county to take part, and to be inspected by Lieutenant-General K. A. N. Anderson. The military arrangements of the parade and march past were carried out by the Commander, Cambridge Sub-Area, and staff. 42 07 03 CIPof

1942 Jul 27

Flying incredibly low, a Ju 88A-5, possibly of K.Gr.106, arrived from the east in moonlight. The aircraft had astonishingly to rise to clear elms by the River Cam, and as it did so the LAA mobile Bofors Troop on Midsummer Common fired two rounds, to which the '88's crew hopefully responded with a Very light. A power surge carried the climbing aircraft into a very steep turn which resolved itself into a dive. Hurrying south, it released twelve bombs along the east side of Bridge Street. Against the red and yellow explosions masonry could be seen hurled high. Quickly following more muted 'cracks', bright fires burnt too. I was held transfixed, this was a once in a lifetime experience for rarely was it possible to see such an event so clearly unfold. Rapidly the sky reflected a fierce fire, and next morning's discoveries were equally memorable.

Gone first had been the 'Blue Barn' Restaurant, an aged two-storey building in Ram Yard removed by a 250 kg HE, another of which scored a direct hit on the repair shop of Allins' Garage at 5 Jordan's Yard, causing the collapse of adjoining houses. At the Bridge Street/ Jesus Lane junction a 50kg H E smashed its way through a 21/2-in concrete step to explode in a cellar and damage the nearby 4-in gas main. The next HE hit a parapet on No 3 Jesus Lane, ricocheting on to the opposite wall before exploding in the basement of No 4 Jesus Lane. Scars caused by fragmentation from these incidents may still be found on the wall of Trinity College opposite. Most unfortunate was the effect of a 50 kg HE which penetrated a flanking wall of the Union Debating Society's first floor writing room, causing much damage. Nearby, the British Restaurant had a narrow escape for a bomb there did not explode, whereas two other 50 kg HEs in gardens burst, one behind No 22 Portugal Place and the other demolishing a shed in the Union Debating Society's garden. No 4 St Clements Garden received another which, upon exploding on the ground floor, caused partial collapse of a partition wall.

Fortunately, apart from the Union building, the precious College buildings had very narrowly escaped for, had the bomb line been a mere 50 ft further west, there would have been loss of

famous places. Luckiest of all must have been the irreplaceable Round Church, close to which the bombs had fallen. Its escape was a relief.

The fire bombs ignited to a curious cracking sound, and soon after the raid, with the top of No 4 Jesus Lane burning, likewise the Union Society building, it was apparent that unconventional explosive incendiaries had been used and their precise nature was soon discovered. Into 13 Portugal Place, eight feet up, had come an unusual bomb akin in shape to a 50 kg HE weapon. After bouncing on to the front hearth, and leaving appropriate skid marks, it had penetrated into the basement's party wall and failed to burst. A policeman investigating by torchlight cautiously entered the room into which the bomb was poking through the wall.

Another of these unusual weapons rested unexploded within outbuildings in The Mitre's' yard. Disarming them revealed that within the casing was an explosive head charge behind which were three conical shaped bombs. In a third, aft compartment was a package of 67 small incendiaries. The explosive device should have scattered them all over quite a wide area with considerable penetrative force. Suspicion at the time that these were new explosive incendiaries, IBSEN type, was ill founded. What had arrived, possibly for the first time in East Anglia, were Sprengband C.50s, the first 'Firepots'. They were being confirmed as such for the first time, although some may well have been previously used even though the very distinctive bursting sound had not apparently been previously noted. Raid casualties totalled three killed and eighteen injured, six seriously. Three houses and seven other buildings were badly hit, 127 more variously damaged, (Bowyer p241) [6.7,8.10] 85 05 24b

Lone raider's bombs – three killed, others injured, damage to business and houses – 42 07 28, 28a, b

German raiders were active but no bombs dropped; considerable opposition from ground defences, hundreds in streets saw lively exchange of fire, tracer bullets could be seen in both directions. Later another single machine, flying at roof-top height was men with fire from ground – 42 07 30

Recent raid damage at Cambridge: bombs on Union Society; debating hall escapes; flying at less than a hundred feet and in full view of many people a German raider dropped HE and incendiary bombs. Main damage was done to the library, writing room, committee room and the lounge. Masonry which was flung about by the explosion burst through the roofs and all the windows at the front of the premises and overlooking Round Church Street were blown out. The debating hall was only very slightly damaged and that mostly by water. The end of the library received a direct hit from a small high explosive bomb and several fire bombs but the steel stacks in which the books were housed saved them from the effect of the blast. The collection of music books were lost. One stained glass window of the Round Church was blown in, otherwise the church escaped – 42 08 01, 42 08 01a [raid was July 23rd]

1942 August

End of a raider – picture of German raider that fell in field – 42 08 03

Sharp attack on East Anglian town, few casualties; fire guards prove their worth; the most intensive raid, only four people slightly hurt. A few HE landed on open ground where they did not damage except to one cow that had to be destroyed. Many houses sustained direct hits from incendiaries but fire parties had the flames under control and NFS pumps were soon in action. Mr Story said he had just taken his young child from its cot when an incendiary crashed through the rafters and on to the empty cot. In another outlying part a 'bread-basket' of incendiaries fell in the road and damage by blast was caused to shop premises. Incendiaries were also scattered over

other streets and little piles of sand testify to the efforts of the fireguards. Here and there a hole could be seen in the rafters of houses where bombs had scored direct hits. Charred window frames and little piles of scorched furniture outside were further evidence. One air raid warden returned home to find the house adjacent to his had been almost completely destroyed by fire. The new phosphorous bombs were also dropped. [700 incendiaries dropped Chesterton, Unicam factory, Stourbridge Common Newmarket Road, Ditton Fields] – 42 08 07

Drumhead Service. — A striking example of the volunteer spirit of the citizens of Britain was provided on Parker's Piece on Sunday afternoon, when members of Cambridge's many voluntary services paraded for a drumhead service. Volunteers all were assembled from the contingent of the Old Contemptibles, who kept the British flag flying in the early days of the last war, to the youths of the A.T.C, who will keep Britain's planes flying in the later days of this. A further venture of the Cambridge Borough Entertainments Committee the proof of its overwhelming success, was provided by the huge and enthralled crowd which thronged the Piece. It is estimated that parade and spectators numbered somewhere between 4,000 and 5,000. After the service there was a march-past by all the units on parade, the salute being taken by the County Member (Capt. R. G. Briscoe, M.C.). 42 08 21 CIPof

Home Guard Parade. — The General Officer, Commanding-in-Chief, Eastern Command; Lt.-Genl. J. A. H. Gemmell, C.B., D.S.O., M.C., took the salute at Cambridge on Sunday at one of the biggest military parades the town has ever witnessed. The parade, which had counterparts all over the country, was in celebration of the third anniversary of the founding of the Home Guard, and over 4,000 Home Guard from Cambridge and district were present. The scale of the proceedings can be judged by the fact that the march past the saluting base alone took more than 40 minutes. To use the official wording, the occasion "was designed to show the Home Guard to the people." Genl. Gemmell said, after an inspection: "I would like to . . . congratulate the battalions and other detachments on the parade. The turn-out has been good, arms drill quite creditable and everyone has stood firm and steady, which is a credit to you all." 43 05 21 CIPof

1944

A Cambridge man who as a war-time brigadier helped in the planning of D-Day told some of the “inside story” to Cambridge Rotarians. Mr T.R. Henn of St Catharine's college said his own part was “of the very humblest”. He took part in the planning of two invasions. The first was a completely paper one in 1942 when the Powers-that-be got together a small party of some eight majors and a brigadier and told them: “Look here, chaps, we're going back on the Continent some time or other. Assume you have the men, guns, ships and aircraft and tell us what you want”. Eight months later they became part of the real invasion planning staff in London. After the ‘Overlord’ plan had been sent off to Washington he came up to Cambridge and walked into Bowes and Bowes bookshop. He picked up a new book which contained two maps showing zones they planned to use, but by then things had gone too far. CDN c 16.1.1952

1944 February

Feb 23-34

Sirens sounded in Cambridge at 22:30 and, 'two red flares south-south-west, red shell bursts, three large explosions, many incendiary loads south before siren'. Just before the 'All Clear' there came an incredibly quiet, low flying "Lancaster" going north-east over town'. The sound disappeared in the Chesterton direction. I noted it and gave it no more thought. Identification of most aircraft by sound was still possible, although some of the new German aircraft were not so easy to identify since one did not have the chance to link sight and sound in daylight.

By dawn the news had spread throughout the town, a Dornier had come down last night on allotments close to St George's Church, Chesterton. It had by inches missed the roof of Chesterton Institution to belly land in the extreme north-east corner of the open ground. Only the second Luftwaffe aircraft to visit Britain in such style, it had arrived almost completely unharmed carrying plentiful petrol and its full bomb load. How, just how, did it come to make an almost perfect belly landing? If that was never to be explained one thing was obvious. Here was a splendid item to view.

Many had similar thoughts and throughout the day crowds swarmed to the area, only to be held well back from the allotments by the Law in all its splendour — well, the Dornier had delivered itself on official land. But, what of the private gardens into which it had almost poked its unusual nose? Ah, the value of private enterprise showed itself, as householders with an eye to business and a thought for war charities offered for sixpence a most splendid look at the Dornier at the bottom of the garden. Just imagine that moment when surely someone cried 'Dad, we've got a Dornier poking through our fence', then Dad's disbelief! For my part I was somewhat disappointed because my father owned a moderate piece of land in Green End Road where I (but certainly not he) would have readily accommodated the visitor! (Bowyer p303)

Madingley cemetery dedication, famous service chiefs present – 44 05 25a, 44 05 30a, 44 05 31a

1944 June

U.S. Military cemetery dedicated. — Memorial Day — the day when Americans pay special honour to their dead— was marked in Cambridgeshire on Tuesday, with a service at the U.S. Military Cemetery (at Madingley). High ranking officers of the American and British Armies, as well as the R.A.F. were present together with leading civic representatives of the Eastern Region and the Town, University and County of Cambridge. A detachment of the British Legion, with their colours, members of the St. John Ambulance Brigade and the British Red Cross Society, and members of the W.V.S., who have undertaken to provide flowers for the chapel, were also among the large gathering. Centrepiece of the service was a small grass mound, rising from which flew the Stars and Stripes. The Bishop of Ely (Edward Wynn) walked to the mound from the little chapel, followed by the senior officers carrying wreaths. The ceremony opened with an invocation, followed by a scripture reading and a prayer for the fallen. An Order of the Day was read from the Allied commander-in-chief (Gen Eisenhower). During the service either by accident or design three Fortresses flew low over the company. Official and private wreaths were laid and the proceedings came to a close with the National Anthems of America and Britain, the Benediction by the Bishop of Ely and finally "Taps" by two buglers 44 06 02 CIPof [1.1]

The areas affected were Bourn, Toft, Gransden, Linton, Foxton, Wrestlingworth and Comberton. In some villages watch was kept by the N.F.S. to prevent the fires from spreading 45 05 25 CIPof

Local P.O.W, Gunner E. C. Prevett, R.A., son of Mr. and Mrs. E. W. Prevett, of 182 Newmarket Road, has returned home after three years in captivity. He was captured Tobruk in July 1942, and was in an Italian P.O.W. camp until Italy capitulated when he was transferred to Stalag 4C, whence he was liberated. Another Cambridge man has this week returned home from a German P.O.W. camp. He is Brd. J. Andrews, of 59 Ross Street, and has been a prisoner for nearly three years, being liberated from Stalag 18A. Previous to the outbreak of war he was in business with his uncle, Mr. W. Bell, butcher, of Ross Street. H.A.V. Clark, of 8a George IV Street, Cambridge, has returned home from Stalag XXB. He was taken prisoner on May 23 1940 at Boulogne. He is known as Nobby the Cook. News has been received by Mr. A and Mrs. Gurner, of 19 Willow Place, Cambridge, that their son, Sapper B. Gurner has arrived in England, and will be shortly at home. He was in Stalag 344 and was a prisoner five years 45 05 25 CIPof

Charles Circuit, Holbroke Road tells of life in Italian and German prison camps – CDN 1945 05 25

Farewell party of No.4 Regional Column of the Civil Defence Reserve at Newton Hall; established two years ago has 15,000 Civil Defence workers, attended 400 incidents; undertook rescue work and tackled flying bombs and rockets, help with ambulance trains and returned prisoners of war. IN 12 months 570 groups of Civil Defence personnel had gone from the Regional camps and of these 386 groups, representing 12,000 men had gone to air raid damage in the region. Thousands of pounds have been recovered and in one town £3,000 found at one house was handed over. Much valuable property salvaged. Regional Commissioner to resign soon – CDN 1945 05 26a

Madingley Road factories – was essential that Sebros should be built at the most convenient point for the surrounding aerodromes. The building, working and running of the factory meant a great deal of energy and terrific amount of worry; when built was one of a chain of shadow factories; repaired bombers; was built in wrong place from workers' point of view – should have been built near backs and then Trinity could have been used as a hostel, saving long journeys to work. That part of Madingley Road is hardly a beauty spot – letters – CDN 1945 05 30b

Cambridge and the balloon barrage: war work at the Gas Works – were 2,400 balloons. In 1940 supply of hydrogen became difficult and Cambridge approached as to facilities available such as

blue water gas and steam or existing plant such as purifiers and gasholders. Was one of 19 sites selected and production hydrogen started early 1942, producing enough for 8,000 balloons. They brought down enemy aircraft over an East Anglian city. Output increased due large number balloons required for the flying bombs. Loads of long round steel cylinders on long trailers carried them. Ascents from Midsummer Common before the last war needed gas supplied from the Newmarket Road works by a main specially laid for the purpose. Recently have made nitrogen of very high degree of purity for Air Ministry – CDN 1945 06 27

Released. — What is believed to be first news of one of the Cambridgeshires released from captivity in the Far East reached us last night as we were going to press. The following

cabelgram, addressed to "Unwin, Seedsman, Histon." was received earlier in the evening; Philip, fit and well, Bangkok. Reply c/o Swiss Consulate. The cable was handed in at Bangkok on Monday, August 27th. Capt. W. P. Unwin, of the 2nd Batt, Cambridgeshire Regt., is the son of Mr. and Mrs. Charles Unwin, of Orchard House, Impington. He is married and has a little son of 34, whom he has never seen. "We are exceedingly lucky to hear so soon," said Mr. Unwin in response to a phone call last night. "I believe we were among the first to hear that Philip was a prisoner after the fall of Singapore. We have had three, cards in all from him. The last, received about Christmas time, was dated May, 1944." . 45 08 31

Montgomery and Eisenhower awarded degrees; visit in March 1944 had been secret; in spring the Union Society buildings stood closed and empty. Armed entries stood at the doors; vehicles stole through streets and halted at threshold; mysterious packages were carried within. They were putting final touches to plans – 46 10 11, 11a

If an aircraft brought to Marshalls and found to be unusable it was certified to be broken up; certain parts had to be salvaged if in order, if not a hammer put through them and put on salvage dump; one workman had taken clock from Dakota; during war he had won B.E.M. for putting out fire in main hangar – 46 10 19

1947 A series of questions on the demolition of air raid shelters was answered by the Town Clerk at the Cambridge Borough Council meeting. He said the number of underground and surface air raid shelters remaining to be demolished was 42. The number of shelters already demolished was 175 12-person units and 44 20-person units and 44 50-person units and a single trench for 300 people. The work on the shelters should be completed in about eight weeks. Other Civil Defence structures waiting demolition were 18 wardens posts, 23 50-person school surface shelters, 95 48-person underground school shelters and 26 static water tanks c47 05 05

1947 As an emergency measure the Public Health Committee of Cambridgeshire County Council has agreed that the Infectious Diseases Hospital be made available for any initial cases for which observation in hospital might be necessary, until the smallpox hospital at Oakington could be opened. Following further negotiations the National Fire Service is now prepared to allow the Council to retain the static water tank on the Romsey Recreation Ground (it has been proposed that it shall be used as a children's paddling pool), and to pay the Council £107.8s.10d, the revised estimate of the cost of demolition and reinstatement of the site c47 06 12

1947 One of the good things which had come out of the war, was the way in which Mr Leslie Symonds (Borough M.P.) described the Falcon Club when he was opening their annual fete on Saturday. The Club was now open to any man or woman over the age of 18 who was making some contribution to the welfare of this country. It was started during the war particularly for the benefit of transferred war workers, but since then the whole basis of the organisation had been

extended and now is very definitely a club for everyone - perhaps not everyone, because it is obvious that spivs are not eligible for membership c47 09 12

1947 Arranged by the Board of Extra Mural Studies the first of a series of lectures was given by the Mayor in the Guildhall. In a new venture organised to give German prisoners of war a wide, varied and accurate picture of English community life in Cambridge. Twentyfive representative English speaking PoWs from Trumpington camp attended the meeting. The lectures will include talks on the working conditions of a factory and on the administration of the Post Office 47 12 17

1948 The last production of what is known as the German Youth Stage at Trumpington P.O.W. camp before they go home in June will be given at the Houghton Hall. It will be a performance of the classical comedy "Der Zerbrochene Krug". Not only will it be acted outside the camp, but amongst the cast of 12 will be four British girls. The play will be acted in German but an introduction in English is provided. The performance will be open, without charge, to anyone who may be interested c48 04 10

1948 Sir - Last week the last German Prisoners of War left this district on their journey home. During their stay in local camps they have received many kindnesses from corporate bodies, religious groups and men and women in this town. This has been deeply appreciated by the men, and as a former welfare visitor to the camps. I should like to help those who have helped in any way both before and after the fraternisation restrictions were lifted eighteen months ago - Mervyn Parry, Society of Friends, Jesus Lane c48 07 13

1950 Vivid impressions of life in a Japanese prison of war camp are to be seen in a remarkable series of pictures to be seen on view at Mitcham's store, Cambridge. The work of Charles Thrale, the pictures were painted on the spot with human hair, jungle roots, clay, crushed pencils, blood, boiled book covers & brass polish on tissue paper, wrapping paper and Jap field cards c50 04 14

1950 Judgement was given for the Great Ouse Catchment Board on claims against occupiers for maintenance work on drains done under war-time legislation. A Leighton Buzzard woman said the board had dug some ditches on her land using Italian POW labour. They took much longer than English labour would have taken. Another said he saw a number of Italians rabbiting and never saw any of them working. George Stevens of Wing said ten or a dozen Italian prisoners came to do the work on his land. Asked if they cut any rushes, he replied, "the only things they cut were my trees to make baskets" c50 06 16

1950 The wife of a farm labourer left her husband and three children to live - "in primitive conditions" in a field with a German Prisoner of War, Bottisham magistrates were told. The woman was said to be pregnant by the PoW who was working for a Cambridgeshire farmer. The magistrates made an order committing the children to the care of the County Council, as they did not want to go back to their home because of village gossip c50 06 22

1951 A journey, in many ways reminiscent of those made during the war, was repeated by members of the Romas Concert Party. This time it was not through the black-out to some remote RAF site or searchlight emplacement, but to the Cutter Inn, Ely, where they celebrated their reunion dinner. Over 500 shows had been presented for the forces between 1940 and D-Day. They had overcome transport difficulties by commandeering a meat van with a pheasant on the side c51 03 13

1955 A roll of honour compiled in memory of the citizens of Cambridge who lost their lives in the last war will be unveiled in the Guildhall. It is written on two skins of vellum with raised gold lettering and also commemorates the Women's Forces and all the civilian casualties. It was executed by Miss G. Horsley, a designer at the Technical College and School and is a poignant reminder of how modern wars have involved the very homes of the people. The first name is a woman's and the names of children killed in one of the air raids also appear. 55 11 02c

1956 The names of Cambridgeshire civilian casualties from the last war are included in a roll of honour which was handed over for safe-keeping in Westminster Abbey. It has been placed in a memorial case within a few paces of the Unknown Warrior's Grave and a page will be turned daily. It includes the names of T.R. Samsen who was killed near Oakington, Pamela Turner, an evacuee of Old Bank Prickwillow, Fred Stanley of the Home Guard who was killed at Pampisford and Albert Stones of March. 56 02 21a & b

1956 Cambridgeshire regiment history and future – 56 02 14 & a

1956 Cambridgeshire regiment history – Japs – 56 02 28 & a

1959 Not many people know that on the wall of St Paul's Church, Stockingford, near Nuneaton, there is a memorial to members of the Cambridgeshire Regiment who died in the Far East in the Second World War. But the Regiment's Old Comrades Association never lets Armistice Sunday pass without remembering former comrades who were based there before embarking for overseas. The plaque is in proud memory of the 343 officers and men of the 1st Battalion who gave their lives in Singapore. The Battalion was stationed in Arbury Park from May to August 1941 and worshipped in the church 59 11 10

1965 Yasume club for Japanese prisoners of war opened in 1949 – feature – 65 04 19a

1987 Bottisham commemorate 361st fighter group – 87 06 08b

1987 Former airman, James Chainey, has unlocked the secrets of a 'signed' ceiling in the historic Eagle pub, Bene't Street on which American and British airmen wrote their names and squadron numbers in candle smoke. The ceiling is covered in nicotine and many of the numbers are almost illegible because of overwriting. Some relate to aspects of the war. 'Pressure Boys' refer to extreme weather conditions at the US base Seething, 'Wild Hares' were the B24 Liberator crews and 'Aphrodite' was a pilotless American aircraft loaded with explosives. 87 08 21

1947 Dec new window in round Church replacing one bombed [3.2]

1947 Next Thursday will see the opening of recruiting for the new Territorial Army. For a great many years our local voluntary commitments were more or less confined to the Cambridgeshire Regiment. The future however, holds out something much greater in scope and more varied. The total numbers to be recruited will be three times as many as in pre-war days. It is idle to suppose we do not regret the passing of our own Infantry regiment but the name and the traditions of the "Cambridgeshires" will live on in the 629 L.A.A. Regiment R.A. So will the spirit of our two war-time Sapper Companies live on in the 121 Field Engineer Regiment, while the General Hospital will have added a second Unit in the form of a Field Ambulance. 1947 04 26

1947 Many of the German p.o.w. recently in the camp at Cambridge have been sent to other parts of the country, and I was shown this week a copy of the final issue of the 1025 camp newspaper. This starts with a farewell message by the C.O. (Major A.J. Ferris) who writes "I had hoped to retain the Company as such until repatriation thinned us right down but Higher Authority has ruled differently and now 1025 has to disband – you to work in agriculture and I go to civil life. The year of this Company's existence will I hope not be the worst of your time in captivity. I wish you all the best of luck when you eventually get back to your own country, and I hope that your return will not be long delayed" - Table Talk c47 01 05

1947 Men and women from all parts of Cambridgeshire attended the British Legion County Rally on Parker's Piece, Cambridge, on Sunday afternoon. In the course of an address the Rev J.N. Duckworth mentioned the presence of German prisoners of war amongst the crowd of onlookers and, welcoming them, said : "There is no enmity here". "We are", he went on, "living in very, very dangerous days. We are threatened with losing all those things for which we have fought and struggled, and for which we have endured. The friendship and comradeship of those several long years of war seem to be melting away. In their place there was fear and the seeds of distrust were being sown as never before. The word had reached a state where people, in modern parlance 'just couldn't care less' c47 07 07

1947 May I explain why St Matthew's Piece has not yet been restored to its former state. It was requisitioned by the War Department for a vehicle car-park. The surface and foundations were not suitable for such purposes and the military authorities were told that their vehicles would cause extensive damage to the playing area and would involve them in a heavy claim for compensation. When the War Department released the site the Corporation lodged a substantial claim for reinstatement. The claim has now been referred to higher authority for arbitration. My committee sincerely regret that the ratepayers of St Matthew's ward and their children in particular, have been deprived of the use of this ground for so long – letter from G.F.Nobbs, Chairman Cambridge commons and cemetery committee c47 07 09

1947 Seven members of the Cambridge National Fire Service were at Addenbrooke's Hospital this morning suffering from slight burns from mustard gas sustained in dealing with a fire involving a truck-load of 60 112lb American gas bombs on the railway line between Six Mile Bottom and Fulbourn late last night. The main line between Cambridge and Ipswich was closed to traffic as a result of contamination over 100 yards . Later the damaged wagon was tipped off the rails to the side of the line. The truck was one of a train of 30 to 40 carrying mustard gas bombs from Warren Wood, near Thetford, to Barry in Wales, for dumping in the sea. As it passed through Six Mile Bottom the stationmaster saw that the truck was ablaze. The burning wagon, the third from the engine, was uncoupled, and the engine restarted to pull it away from there. An eye witness said to a "Cambridge Daily News" reporter : "It was a spectacular sight. About fifty per cent of the bombs exploded with a "whoosh" and a burst of flame which shot fifty feet into the air. Poisonous fumes spread over a range of fifty or sixty yards. The police afterwards sealed off an area around the blaze to await decontamination" c47 07 25

1947 The mustard gas bomb train fire at Six Mile Bottom last July had a sequel on Thursday when two L.N.E.R. drivers, Frederick Smart and William Thorburn, and two firemen, Joseph

Westland and Alfred Chandler, all of Cambridge, were presented with the L.N.E.R. Medal. A special goods train included 40 open wagons of mustard gas bombs. When passing Six-Mile-Bottom driver Smart observed a fire in the third wagon. Fireman Chandler jumped down immediately and uncoupled the burning wagon from the rear part of the train. The engine then proceeded forward for 50 yards. The engineers tried to subdue the fire with buckets of water, fully aware of the dangerous nature of the contents of the wagon. 47 12 20

1948 mounting block returned Queens Road; had been damaged by RAF mechanics using it as anvil & moved Kings Fellows gardens for safe keeping cTT 16.2.1945, CDN 26.8.1950

1948 At seven o'clock this morning, in very dense fog, a lorry containing 11 German P.O.Ws. crashed broadside into a railway engine and brake van at an accommodation level crossing at Conington, Hunts. Three of the Germans were killed outright - and all the other injured. The injured were placed in another motor vehicle for transport to Peterborough Hospital but when only a few hundred yards down the road this vehicle crashed into a bus. Two more of the Germans have since died and some of the remaining nine are seriously ill. One of the dead is the German doctor who was tending the prisoners injured in the train crash c48 03 02

1948 Several hundred people gathered round the flagstaff at the Cambridge American Military Cemetery for a simple service of benediction. The reason for the service was emphasised by the long rows of empty, tarpaulin -covered caskets bear the scene of the service - the caskets in which will be returned to the United States the remains of those American service men and women buried at the cemetery whose relatives wish their last resting-place to be at home. For this reason the cemetery is to be closed for a period, and for the purpose too of reburying the bodies of those interred in the now-to-be -closed Brookwood and Lisnabrenny (Northern Ireland) American Military Cemeteries whose relatives wish them to rest in England c48 03 04

1948 The watching eyes of Britain's air defence went into action on Sunday in the biggest-scale Royal Observer Corps activity in the district since the war. Observer posts were manned at Cherry Hinton, Linton, Caxton, St Ives, Abbots Ripton, Littleport and elsewhere following the movements of jet fighters, Spitfires, Lancaster and Lincoln bombers and other types of aircraft numbering over 100 aircraft put up by the RAF. At Linton I found the observers proud of their post, built at their own expense by their own labours during the war c48 05 13

1948 Concern at the possibility of parts of Cambridgeshire countryside being taken over by the R.A.F. for practice bombing ranges was voiced at a meeting in Trinity College. They propose to set up practice bombing ranges at Babraham (near Duxford aerodrome), East Hatley (near Bassingbourn and Bourn) and North of Whittlesey. These ranges, it said, are used from time to time for dropping marker bombs only and when the red flag is flying and the footpaths across are blocked. At Babraham the range is crossed by two footpaths but the footbridge across the river is broken down c48 06 08

1948 A rider that all P.O.W.s should be given regular instructions on the rules of the road in this country was given by a jury returning a verdict of "Accidental death" on Hryhorij Wolanskj, an Ukrainian POW of 85 POW Satellite camp, Barton Fields, Ely. John Ada of St Mary's street, Ely, said he saw the Ukrainian completely ignore the "Halt" sign in Downham Road and came straight across the road without looking, crashing in to a red motor van. Victim had been in the Ely camp since January 1948. The Camp Commandant stated that his records showed Wolanskj had received instruction in road safety at his previous base at Braintree. He must have known the meaning of the "Halt" sign as there was a large one just outside the camp c48 06 19

1948 A squadron of the Royal Corps of Signals, Territorial Army, is to be raised in Cambridge. Its headquarters will be at the Saxon Works. It will be a direct successor to the Signals unit raised

here in 1939, established in Station Road in August 1939. Major C. Loveday was the company commander and the Company served an important defence area during the war and soon acquired a first-class reputation for efficiency and reliability.. Men from this Company served in all theatres of war with considerable credit c48 06 22

1948 The wartime defences in the eastern side of Cambridge are to go. The Cambridge Town surveyor reported that the Ministry was now prepared to reimburse the reasonable cost of the removal of the defence works and anti-tank ditch. The demolition of certain pillboxes was being carried out by Messrs J. Stevens & co, who were engaged in the removal of civil defence works in Cambridge c48 07 21

1948 Six residents of Ditton Fields appeared before Cambridge magistrates charged with stealing varying amounts of timber from 89 Maintenance Camp (Squatter's Camp), Newmarket Road, the property of H.M. Government. Mr Harry Crowe, a civil engineer, said the sides of a number of timber huts had been stripped of all timber. One of the defendants said, "I have seen other people going up to the site, taking away timber, and not getting into trouble for it, so I thought it would be all right". Another said he was walking across the site of the Newmarket Road camp when two Irishmen working there stopped him and asked if he wanted to buy some timber. After he had paid £3 the man in charge took the timber from the huts which he understood had to be pulled down c48 08 06

1948 In October 1947 the British Portland Cement Manufacturers returned to their headquarters in London from their war-time offices at their Saxon Works, Coldham's Lane, Cambridge, which were placed on the market for sale. The considerable possibilities of the property for use by the Territorial Army as a drill hall and training ground were readily apparent and after some negotiation, with the approval of the War Office, the T.A. Association acquired the freehold of the 25-acre site, together with the extensive buildings thereon at a price in excess of £35,000. The buildings include a large hall at present occupied by the Regional Petroleum Office c48 09 01

1949 Civil Defence regulations impose duty for recruiting & training own division of CD corps [3.1]

1949 clothes rationing ends, Mar [3.8]

1949 At 15 group operations room of the Royal Observer Corps in Newmarket road, Cambridge, 20 or 30 blue-dashed uniformed men and women took part in a big Observer Corps exercise. Everywhere the sharp-eyed observers at their remote posts reported aircraft in a formula giving the type, number and height. Meteors, Hornets, Messengers, Ansons, Skymasters and Lincolns were some of the aircraft spotted and plotted – the RAF boys doing their best to fox the spotters by hedge-hopping and 500 miles an hour c49 05 05 [1.10]

1949 huts on Donkey Common now occupied by Women's Royal Army Corps Unit & small detachment of Pioneers, comprising 3 officers & 76 other ranks; were built for 3 officers & 224 other ranks, try for use as emergency housing, Jun [3.10,3.12]

1949 US Army Camp, Milton Rd unoccupied, built for 850 on war-time scale, 700 in peace, now holds 100, Jun [3.12]

1949 Smuts unveils Perse war memorial, Jun [3.11]

1949 large numbers of bombers during "Operation Bulldog", Sept [1.12]

1949 The Secretary of State for War, Mr Shinwell, states that there are 43 huts on the camp site at Donkey common, Cambridge. They were originally intended to accommodate three officers and 224 other ranks. There is now one Women's Royal Army Corps unit and a small detachment of Pioneers, comprising three officers and 76 other ranks in all c9 06 02

1949 Many of the 200 Free Poles who paraded at Cambridge war memorial for a wreath-laying ceremony to commemorate the outbreak of the last war, were in the Police forces which took the initial impact of the Nazi invasion of their country. The parade was representative of ex-army,

navy and air force personnel who are now living and working in the Cambridge district. After mass at the Roman Catholic church, they marched to the memorial where Mr B.C. De Broekere – a cavalryman at the outbreak of war – laid a wreath c49 09 13

1949 Cambridge town council considered the proposed resiting of the war memorial. A scheme for a traffic roundabout at the Station Road junction means that if it were left in its present position it would be marred by the number of “Keep left” bollards and other traffic signs which would be necessary for the direction of traffic. An alternative position involved the acquisition of certain land fronting the Botanic Garden which would provide a restful haven away from traffic. None of the Servicemen’s organisations was in favour of the removal of the War memorial from its present position c49 10 12

1950 Because he disapproved of his daughter’s association with a German prisoner-of-war a Gt Eversden man took out his 12-bore shotgun to try and scare the suitor off. His intervention was not a success. The police took away his gun and gave it to his son for safe custody until “the trouble blew over”. The German married his daughter and is now accepted as a son-in-law. This story was told in the court when father sued son for the return of the gun c50 02 22

1950 Civil Defence recruiting week in Cambridge opened with a bang when thunderflashes were fired on the roof of the University Arms Hotel and volunteers and county firemen went into action to put out the “fire” caused by the “enemy’s” bombs and rescue those trapped inside. A crowd of several hundred gathered on Parker’s Piece to watch the exhibition c50 04 24

1950 Riverside, Cambridge, was the scene of an occasion that was described as “a memorable little ceremony in the naval history of Cambridge”. The training ship “Ganges” (brick built and on dry land) the new headquarters of the Cambridge Sea Cadet Corps was opened by Admiral Sir Wilfred Patterson and christened in traditional naval fashion with a bottle of champagne. During the inspection a number of cadets overcome by the effect of marching and the hot sun had to leave the parade. Two or three fainted and others were helped into the shade by fellow cadets c50 06 06

1951 Cambridge Scientists anti-war group describe US atomic bases in East Anglia as “a disaster- make us a target”, Feb [1.21]

1951 “1939-45” added to War Memorial, April [4.2]

1951 US Cemetery salutes dead; originally 15 American cemeteries but after the War all bodies of men who not taken back home to America were removed to Madingley Hill, May [4.3]

1951 Honorary Freedom of Cambridge to US 8th Army Air Force, July [4.4]

1951 stone of remembrance in honour of airmen unveiled in Newmarket Road cemetery, August [4.5]

1951 “If Cambridge is bombed” - Civil Defence plans, Dec [1.22]

1951 In common with other towns situated near American servicemen’s camps, Cambridge is rapidly becoming one of the leading Black Market centres for disposal of duty-free tobacco purchased at U.S. canteens by G.I.s and subsequently sold at a handsome profit in small back-street shops and hotels, with no questions asked. This trafficking is difficult to stop and is now a well-established through unofficial “Big Business”. Despite checks by security officers at Lakenheath and Mildenhall aerodromes car loads of cigarettes by the thousand are coming into the City c51 09 05

1951 Air Ministry proposals to use the Stella Maris nursing home to accommodate members of an Inter-Services course learning Russian at the University was described as a “scandal”. It was admirably equipped for use as a hospital, has accommodation for 40 patients, two completely equipped operating theatres and could relieve the 2,000-strong waiting list at Addenbrooke’s Hospital. A proposal by the Ministry to acquire the Heritage guest house in Silver Street and 9, Newnham Terrace, Cambridge, had not gone through after college freeholders had ‘dug their heels in’ c51 11 01

1951 Details of Cambridge's civil defence plan – a scheme in which there is a place now for “every man who can use a spade and every woman who can make a cup of tea” - were disclosed by the city's Civil Defence Officer at the weekly luncheon of the Rotary Club in the Dorothy Café. The most likely attack was by bombers carrying high explosive and incendiaries – an attack by no means rendered obsolete by the Atom bomb. If areas of the continental coast were occupied we would also be within rocket range. Chemical and biological warfare had to be considered including the use of a nerve gas absorbed by the skin. A network of wardens' posts would be established. “We think that by dispersal of our forces we can have some intact when they are most wanted and can bring aid to any stricken area with the least possible delay”, he said c51 12 10

1952 full scale Civil Defence exercise, Oct [2.1]

1952 Peace Week climaxes in speeches at Guildhall, Oct [2.2]

1952 Cadets full scale Church Parade, St Catharine's College, Dec [2.3]

1952 The secretary of the Cambridge Scientist's Anti-War Group told what would happen if an atom bomb were dropped on the city. It could be assumed that 50,000 people would be killed and the same number injured by one bomb three times as powerful as that dropped on Nagasaki. It would mean that 85 percent of the people in Cambridge would be disposed of. Addenbrooke's Hospital would disappear and every building would probably be set seriously on fire. If shelters were provided the fatal casualties could be cut down to 14,000 and perhaps only 10,000 would be injured – but how could these be dealt with by the medical facilities? CDN c14.1.1952

1952 The County Council considered the development of Swann's Lime Pits, Cherry Hinton, as an armament testing range and research establishment. Coun Rackham deplored the possibility of explosions taking place at the back of the adjoining school. As well as the noise the blast runs along the ground and shakes doors and windows. People have had to replace ceilings that have been shaken down. It was suggested the company use their explosives on the huts up Madingley Road where they would soon clear the ground and everything would be lovely. CDN 26.1.1952

1952 Following a visit to Swann's Lime Pit, Cherry Hinton, city councillors raise no objection to its continued use as a small-calibre range for armour-piercing projectiles, providing that any additional buildings are erected in the deeply-excavated position and that nothing larger than a six-pounder gun is used – so long as it is fired only in the morning & preceded by a warning. CDN 12.3.1952

1952 The booming of a six-pounder gun in a Cherry Hinton lime pit found its echo inside the City Council chamber when some members protested against the use of Swann's pit as a Ministry of Supply small calibre range for testing armour-piercing projectiles in the middle of a built-up area. But Alderman Doggett said he had stood within three or four feet of the weapon and was not ‘disturbed’ – “although it was true we had our fingers in our ears. There is really very little we can do and it wouldn't be of much use objecting”, he said. CDN 14.3.1952

1952 Two large huts have been erected on a piece of waste land at the top of Castle Street, Cambridge. They are to be an Anglo-American and Allied Services Club which is being started at the request of the American Service authorities to provide servicemen of other countries with somewhere pleasant to go when they are in Cambridge. There are two very big rooms which have been tastefully and brightly decorated and provided with old furniture renovated by the W.V.S. One will serve for games of various kinds and the other for dancing. There is to be a snack bar and that “must” for Americans, a juke box. CDN c26.4.1952

1952 Miss Lillian Bourn will be remembered for her work during the war with the American Red Cross. She was Supervisor of Hospitality at their Bull Hotel club and coped with the countless American soldiers visiting Cambridge. In fact she married one of them. The romance began when her husband, who sings, went into the Bull and asked her if she could find someone to accompany him. “I was able to do so and that's how it started”, she said. Her home is now in the university town of Evanston, Illinois. CDN c 30.4.1952

1952 The Foreign Secretary, Mr Anthony Eden opened the Anglo-U.S.A. and Allied services Club on Castle Hill, Cambridge. A year ago the city council was approached by the Women's Voluntary Service with the object of providing the site for the club. Since then much work had been done by the W.V.S. together with valuable assistance of the U.S. Air Force and the Air Ministry. The club will be open every evening during the week and, Mr Eden said, will lure out American Service men from the attractions of their camps so they could learn "what extraordinary animals the English are" CDN c2.5.1952

1952 Mr Lloyd Stokes, owner of land at Trinity Hall Farm, Milton, said there were 140 armoured vehicles on the land waiting to be shipped. He wanted an access from Green Park because he had a number of tanks coming through the back and wished to enlarge the front entrance on to Milton Road. It was dangerous and an agricultural machine such as a 12-foot combine could not get through. The County council suggested the city should buy this piece of land and put there light industry, not likely to cause any nuisance. c52 06 25

1953 Ely Cathedral Memorial dedicated, October [4.8]

1953 Eastern Regional Food Office closes, November [4.7]

1953 On May 2nd the W.V.S. Anglo-American Service Club on Castle Hill, Cambridge, will be one year old. Activities include two dances a week; there are now 125 lady members who serve as dance hostesses and a waiting list has been opened for further applicants. Tours are arranged for all the American bases and there is a monthly party for convalescent patients from Wimpole Park Hospital and occasional teas for parties from Ely R.A.F. Hospital. c53 04 29

1953 "I think it is a lot of hooey", said Coun Cox when the Cherry Hinton firing range was discussed. He thought complaints of the amount of vibration from a six-pounder gun – not much larger than an anti-tank rifle – which was fired at the range, were "stupid and fantastic". But Coun Finbow said that recently the whole of the ceiling in one of his bedrooms collapsed because of the vibration. One neighbourhood should not be subject to range firing morning, noon and night. The council approved the use of the site by the Ministry of Supply for a period of three years 53 05 01

1953 Sir –Some of the explosions from the six-pounder gun at Cherry Hinton firing range did crack walls, move brickwork, bring down plaster, crack windows and scare children, adults and animals. Now two schools are to be built almost on the doorstep and if we have similar explosions there will be damage done. When doors rattle, knockers chatter, cracks appear and are repaired, only for the plaster to be shaken out again we are at liberty to be concerned. – J.S. Read 53 05 07

1953 A House of Commons committee considered the question of allowances for naval students at Cambridge University. Officers go to Dartmouth for two terms and then go to sea before being sent to Cambridge where they read the Mechanical Sciences Tripos for three years. During the long vacation they are put to work in industries around the countryside. On the completion of their Cambridge course with a degree they enter the electrical school at Farnham. The Chairman asked how their pay was affected when at Cambridge and did they receive an allowance in addition, so they did not become 'broke'. They must have something in the way of an allowance. c53 06 13

1953 Many people know something of the good work done by the 'Food Flying Squads' known as the 'Queen's Messengers' during the last war. But these convoys must be ready to go anywhere where an emergency has arisen and W.V.S. members must be trained. Thus providing the mid-day meal for youngsters at Cherry Hinton Day Nursery provided practical experience for the crew of the convoy maintained at Cambridge. They provided minced meat, potatoes and cabbage, followed by rhubarb pastry and custard for the 60 under-fives which was cooked on Soyer-boilers. c53 07 04

1953 If a vital target in Cambridge, such as the gasworks, received a direct hit during an enemy air attack, the Civil Defence Experimental Mobile Rescue Columns would swing into action. It

has its own kitchen and communications system, including wireless and telephones and is equipped to deal with any emergency. It consists of 150 men split into 15 rescue parties, each having an up-to-date rescue vehicle. Their visit was only an overnight halt but many members of the public were attracted to the scene and it was obvious they had not expected to see such up-to-date equipment and quiet efficiency. c53 07 11

1953 This is Home Guard recruiting week with the object of increasing the size of this vital branch of our reserve army. When the Government decided it was necessary to resuscitate the Home Guard it was appreciated that the task was a difficult one. The appeal was directed towards middle-aged men who had previously seen service. The exceptional commitment of the Regular Army abroad made it imperative that there should be an organised body trained and ready to cope with emergencies in the event of war. It must contain people who know the local geography of their area intimately, in every parish and hamlet. c53 10 22

1953 Cambridge citizens were shaken to hear rifle fire in the city and see groups of khaki-clad men dashing about on Jesus Green and Parker's Piece. Members of the Cambridge Home Guard were carrying out exercises, culminating in an attack on Hobbs Pavilion where the 'enemy' was wiped out. The exercise served the purpose of bringing the Home Guard to the notice of the public. c53 10 29

1954 Cambridge councillors discussed the impact of any explosion of a hydrogen bomb on the city. There would be an area of total destruction three miles immediately below the bomb burst with a radius of ten miles of lesser destruction. Civil Defence was a misnomer: they would not seek to construct a deep shelter to provide protection for the people of Cambridge in the event of war; it was not 'protection' but 'rescue and aftercare'. It was obvious that local telephone communication between the Controller – if he still existed – and the locality would be useless. The only way Cambridge would be helped was by a rescue column arriving from another part of the country. Cdn 30.7.1954

1954 Imagine a Hydrogen bomb has been dropped on Cambridge. In a five-mile radius from Great Shelford to Histon everything is just rubble. In a 12-mile radius, including Saffron Walden, Newmarket and Huntingdon, there is severe damage and for 20 miles, as far as Bishop's Stortford, there is minor damage. Blast and heat flash from the bomb could also cause severe burns to people exposed in the open and if the bomb exploded on the ground or in water mud thrown up would be very radio-active and would be carried for many, many miles. But if an 'ordinary' atom bomb was dropped the centre of destruction would be only a half-mile radius. CDN 22.10.1954 [2.4]

1954 Trumpington Industrial Hospital to close, opened 1947-48 for Poles, Dec [4.10.2.5]

1954 A new Civil Defence rescue training centre was opened in Newmarket Road, Cambridge. There are two tumble-down structures – a façade and a rescue set – and volunteers set to work showing rescue attempts in an Atomic-bomb war. Major-Gen Bruce said: "In view of the present threat, where we needed one volunteer before we now want 100. It is un-British to have the attitude of mind that we are going to be frightened and blackmailed into putting up with might". Heavy explosives and incendiaries are likely to go out of business, but not in the first two years of another war, because our enemy has a tremendous amount of aircraft and bombs that he will want to use. CDN 20.9.1954

1954 A man was killed when two 1,000-lb bombs exploded at RAF Marham. The bombs were being moved in preparation for an exercise when they fell from a trailer he was towing with a tractor. Five other airmen were injured and nine Canberra twin-jet bombers and one Anson aircraft were damaged. Eight of the Canberras can be repaired on the station. CDN 21.9.1954

1954 Over 1,000 Civil Defence volunteers took part in Exercise Challenge on Midsummer Common, Cambridge. The Home Secretary, Sir David Fyfe told them that if a hydrogen bomb should fall there would be a great deal to do in the perimeter zone and the country beyond. People

who lost their homes must be fed, housed and catered for. But outside the common a dozen members of the Cambridge Peace Front held banners saying: 'There is no defence against the H-bomb' CDN 27.9.1954

1954 British military officers and civilian personnel from the Lakenheath air base witnessed a 'Skysweeper' firing demonstration at Weybourne range, Norfolk. This is the U.S. army's largest calibre automatic anti-aircraft artillery weapon – an artillery machine gun. It is the first weapon with radar, computer and gun on one carriage with fully integrated gun and fire control. The units are designed to spot and track with radar and aim and fire the gun semi-automatically at enemy aircraft flying near-sonic speeds at low and medium altitudes. CDN 9.11.1954

1955 Nearly 50 strangely-clad figures could be seen in gas masks and yellow capes at the University Laboratories in Pembroke Street. All were highly qualified chemists and scientists, members of the Civil Defence Corps receiving instruction in a mobile gas chamber where paralysing nerve gas was sprayed on them and they made various tests, fully protected by special protective clothing. Unprotected persons would be sick and the gas would cause blindness. They also received instruction in atomic warfare and chemistry. CDN 6.1.1955

1955 air raid sirens tested, Jul [2.7]

1955 Civil Defence exercise & recruiting campaign, Sept [2.8,1.7]

1955 Guildhall Roll of Honour unveiled, Nov [4.11]

1955 Mustard gas exploded at Lord's Bridge RAF station after fire broke out in a hangar. The gas, left over from the last war, was being used for experimental purposes. It was being disposed of gradually with the last 125 tons stored in a sunken concrete container. An area was cordoned off and fire tenders were quickly in attendance. It is anticipated that the fire would have destroyed any effects of the gas but medical authorities warned local civilians that if they suffered any reddening of the skin they could obtain immediate medical attention from the RAF. CDN 11.1.1955

1955 No. 7963 is the number which Mrs Claudette Kennedy of Eltisley Avenue, Cambridge will always bear as a reminder of four terrible years spent in the concentration camp of Auschwitz-Birkenau. At this camp alone four million people died. She survived because of her knowledge of biology and was put to work in a large synthetic rubber factory, extracting rubber from dandelions. She escaped after guards took fright at the advancing allied armies and made her way to Paris where she was reunited with her small son. After the war she came to Cambridge for an International conference on biochemistry where she met her husband 55 04 29a & b

1955 Cambridge University Officers Training Corps is to have a wing of the Women's Royal Army Corps with most of the recruits coming from Girton, Newnham and New Hall. All work would come after the prior claims of their courses and no decisive steps would be taken until after they have graduated. The main object would be to produce good officers but driving, vehicle maintenance, radio and photographic interpretation may also be available. However large the numbers it will have to face a considerable drain on the 'marriage market'

55 05 03a

1955 Officers of Cambridge Home Guard were told that the county had a good chance of surviving the dropping of a hydrogen bomb as it did not present a target worth the expense of such a bomb. But it would undoubtedly be cut off from the rest of the country so it was important they have Civil Defence in addition to small arms training 55 06 28

1955 Operation 'Air raid siren' went off without a hitch in Cambridge. In the underground control room at the Guildhall the Civil Defence controller threw the switch which started the well-known high-pitch whine of the 'All Clear' from ten sirens across the district. All schoolchildren, hospitals and public bodies had been warned but one or two people looked skyward and said it was 'Just like old times'. Home Office rulings prevent the testing of the wail of the warning for fear of upsetting people. 55 07 07a

1955 Men of the 629 Airborne Light Regiment R.A.T.A., formerly known as the “Cambridgeshires”, have completed their first parachute training course. In just two weeks the men who come from all walks of life have been transformed into fully-fledged parachutists and 140 of the volunteers will receive their wings. They include Captain L.S. Brown who as headmaster of the Chesterton School had decided to set the boys an example. But he landed awkwardly and became a visitor to the therapy centre for treatment. 55 08 04a

1955 Wings Day gave a memorable send-off to the 629 (Cambridgeshire) Parachute Light Regiment R.A. (T.A.) regiment in its new role. The first presentation was to its Commanding Officer, Lt.-Col. J.G.A. Beckett whilst Major J.H. Sanders, at the age of 52, completed the course along with his younger colleagues. Thirty of the new parachutists will stage a mock attack at Duxford on Battle of Britain Sunday. 55 08 30 & a

1955 One glance at Midsummer Common, Cambridge was enough to dispel any suggestion of public apathy about Civil Defence. Hundreds of blue-uniformed figures took part in the finals of ‘Exercise Challenge’. It tested their skill and knowledge and rescue teams had the difficult task of retrieving a severely-injured casualty on a stretcher while a stream of ‘distressed’ people were treated at a rest centre. 55 09 26a

1955 In 1955 140 Cambridge army reservists in the 629 Light Ack-Ack Royal Artillery (TA) Regiment volunteered to jump out of an aeroplane. They became the 629 Parachute Light Regiment (TA), one of the best squads in the country. Amongst their ranks was Col Peter Storey-Pugh who’d escaped from Colditz and Col John Beckett who’d been captured by the Japanese in Singapore. But 18 months later the MOD reviewed its strategy and the men returned to infantry duties. There were no deaths during the regiment’s brief history and only a few injuries. Now the Cambridge Parachute Regimental Association is seeking more members. 87 06 12e

1956 Home Guard farewell dinner, Jan [2.10]

1956 US cemetery chapel dedicated, messages from Queen & President 17.7.1956]

1956 An American newspaper, the ‘Omaha World-Herald’ has reported that after a B-47 bomber crashed at Lakenheath RAF station in 1956 flaming fuel pouring from the ruptured tanks engulfed a building containing three nuclear bombs. If they had exploded radioactive material would have been showered over a large area. But a major accident was averted when the base Fire Chief ignored the burning bomber and its four-man crew and concentrated on dousing the flames surrounding the nuclear storage building. The incident was kept secret, as the British people had not been told that nuclear bombs were being kept in the U.K. CDN 5.11.1979

1956 A practice bomb, inadvertently released from an American B47 bomber, fell in a ploughed field near Newport and buried itself in a crater 15 feet deep and 20 feet wide. It caused hundreds of pounds worth of damage to Biggs’ nurseries; one man was wounded when sheets of glass were blown out and five other men ran clear. The crater was surrounded by large sheets of metal which was burned and twisted and scattered over a wide area. A lorry-load of RAF men wearing bow ties and white gloves with Wellington boots collected the fragments and men with picks and shovels removed a large container from the bottom of the crater. 56 01 05

1956 The last assembly of the Cambridgeshire Home Guard Battalion in uniform was a farewell dinner. They were not being disbanded but were going into reserve as tension had slackened. Should an emergency arise they were the right men to form a nucleus of a strong body which would spring into being. The battalion flag was handed into the custody of the Commanding Officer, Lieut.-Col. E.C. Parker to be guarded faithfully until once again it flew over their headquarters. 56 01 30

1956 Cambridgeshire regiment history and future – 56 02 14 & a

1956 A captive balloon will be used for parachute jumping at Trumpington. Although intended primarily for members of the University Parachute Club, 50 ‘chutes have been allotted to the Cambridgeshire Regiment Parachute Light Regiment. All men now have a reserve parachute strapped to his middle as a second line of defence 56 03 06e

1956 Civil Defence welfare teams staged a Food Flying Squad Emergency Feeding demonstration. Each squad is a self-contained mobile motorised unit capable of turning out 4,000 meals at one cooking. The Cambridge unit set up an emergency kitchen to feed visitors. It was well worth queuing for: a hot and sustaining stew of meat, vegetables and potatoes followed by steamed suet pudding. 56 03 20b & c

1956 Waterbeach airfield to receive standard, history 56 squadron 56 03 29

1956 The Duchess of Kent visited RAF Waterbeach to present it with its Standard, the greatest honour to be bestowed on 56 Fighter Squadron in its lengthy history. It is awarded only to squadrons of 25 years' standing or with a history of special outstanding operations. Afterwards she had difficulty signing the visitors' book because of cold fingers; the signature looks a little indistinct and shaky 56 04 28a

1956 Britain is on the brink of war. Enemy forces are massed against us and it appears only a matter of hours that the first attack of World War Three will come. Although the man in the street is unaware of it the Army and Civil Defence are taking part in the biggest defence exercise the world has yet seen. It envisages evacuation of 800,000 people from London and authorities have joined together in the war room at Brooklands Avenue to assess the situation

56 05 05a

1956 Through winding country lanes, townspeople and rural folk went to Ely for the opening of the first two-day county show for 50 years. As they travelled they passed fields of growing crops urgently in need of rain. The show has a reputation for being one of the finest in the agricultural calendar but had become so vast that visitors have found it difficult to take in all aspects. Now they have much more time and over 20,000 visitors attended the second day

56 05 25b, 56 05 28a, 56 05 28b – Territorial army

1956 The National Hospital Service Reserve competition for mobile first-aid units was held on the City Football Ground. It trains men and women to deal with the emergencies of everyday life and in wartime provide an immediate medical service in the field for walking casualties, relieving pressure on the hospitals. It has over 43,000 members 56 06 26

1956 Distinguished statesmen gathered at the Madingley American Cemetery for the dedication of the outstandingly beautiful chapel. There were messages from the Queen and President Eisenhower whose wife was amongst the guests. Air Chief Marshal 'Bomber' Harris said it marked the centre of the area from which American bombing planes operated during the war. Nearly 90,000 American Servicemen who lost their lives had been commemorated by the chapel. 56 07 17 & a

1956 When the Suez crisis threw the country into turmoil it meant there were no Regular Army personnel to assist the Cambridgeshire Army Cadet Force. Their annual camp was cancelled but instead 200 boys moved into the Coldham's Lane Territorial Training Centre. They had to beg, borrow or steal all sort of equipment but a full programme of training was carried out with shooting on the Barton Road range and trips around the colleges 56 08 21

1956 The Cambridgeshires had their first test as an infantry battalion; now no longer airborne gunners they joined other units of the 54th East Anglian Division in an exercise on the Stanford battle area. They practised the carriage of weapons, camouflage of vehicles, messing arrangements and sleeping in the open – though most were in action continuously. Sergeant Roff experienced field cooking for the first time but provided three excellent meals. 56 10 23d

1956 The 162nd Field Ambulance is one of the oldest in the British Army and served with distinction in both World Wars. At one time it was the only medical unit in this part of East Anglia and in the future it would be of the greatest importance in Civil Defence at time of disaster. It has now been adopted by the City of Cambridge and the Mayor presented a plaque to commemorate the occasion. 56 10 30a

1956 The County Council intend to clear all the hutments, service camps, Nissen huts and disused storage depots – relics of the late war – "as soon as possible". They hope that the time will come when the scene will relate to its pre-war standard. Fifteen service airfields and

numerous military depots were established; some had already been dismantled and others taken over to alleviate the housing shortage with 247 huts currently occupied as dwellings.

56 12 15

1957 US jeep heading high explosives convoy crashes with ambulance, Mar [2.11]

1957 Cambridge Civil Defence ambulance section carried out a successful exercise in rendering first aid to the injured. It was assumed a serious railway accident had taken place near the Eastern Gas Board sidings in Coldham's Lane. Casualties were evacuated to Swann's Yard Civil Defence Rescue Site where the Hospital Nursing Mobile First Aid Unit, under Dr C. Attwood, set up a Receiving Centre. 57 01 26

1957 When the Singapore Memorial was unveiled in the Kranji War Cemetery a wreath was laid in memory of over 370 former members of the Cambridgeshire Regiment who perished during the Malayan campaign or in subsequent captivity. After the formal ceremony, when the Guard of Honour had marched away, the relatives laid their personal wreaths and found the names which they had made their pilgrimage to see. 57 03 05a [4.12]

1957 Bandmaster A.E. Tucker took the post on joining the Cambridgeshire Regiment in 1922, serving to the outbreak of War. He was taken prisoner in Singapore where he maintained the regimental records and was able to bring home a complete list of the casualties. Discharged in 1946 he assisted in the band and was re-appointed bandmaster in 1954. It is a record of which he must be justly proud. His successor is Mr G.R. Ball, Music Master at Ely King's School. 57 04 02

1957 United States servicemen contributed £3,500 to the University Department of Pathology in thanks for the specialised laboratory services provided to their military medical authorities. The American hospital at Wimpole Park, which re-opened in 1952, had only limited facilities but Sir Lionel Whitby had offered what professional help they required until his death last year. It was a voluntary contribution from all branches of their personnel and not an attempt to 'pay an account' 57 06 26

1957 The Cambridge Dunkirk Veteran's Association held their inaugural meeting at the 'Hopbine' in Fair Street. The evacuation bought out the best in all three services in adversity but they should remember those who died on the beachheads. Close on 40 members are expected to join and it is hoped their name will soon command the same respect as that enjoyed by the Old Contemptibles who are now very old. 57 09 04a

1957 Hundreds of Civil Defence workers moved in on a devastated Cambridge which had been the target of an atomic guided missile. The southern part of the city was devastated as far as the River Cam. The streets were a blazing inferno, heavy dust and smoke swirled everywhere; thousands were rendered homeless with injured victims lifted from the ruins and ferried across the river to safety. Thankfully it was only an exercise. 57 09 30 c & d [2.12]

1958 About 30 Cambridge people were at Aldermaston on Easter Monday for the rally protesting against the use of nuclear weapons. Seven car loads joined the final stage of the march to the Atomic Weapons Research Establishment. Amongst them was Robert Davies, the Labour Party prospective Parliamentary candidate and city councillors Reilly, Warren and Ash 58 04 08b

1958 Territorial army 50th years – 58 07 07a

1958 Nearly 300 people took part in a six mile march from Ely to a rocket base at Mepal. Young or old, MP, clerk or labourer, all had one purpose - to denounce the Government's decision to establish rocket sites. Labour candidate Robert Davies said it was absurd to make a secret of where the bases are. Rocket hide-outs are open secrets. You may not be able to mention them but you can go and see where they are. But MP Major Harry Legge-Bourke said it was

running very close to official secrets and nobody knows what Mepal might be used for 58 08 22b, 58 08 25 & a [2.14,2.20,2.21]

1958 A portable short-range guided missile intended to be used against armoured vehicles has been produced by Pye Limited. It incorporates rocket motors with a new jet steering system and is guided to its target by thin wires which carry signals from a controller's "joystick". It can be fitted with periscopic binoculars which switch from low to high-powered magnification as the missile travels away from the launcher. Many successful test firings have taken place and it can go into production on receipt of orders. 58 08 22c

1958 Attendance was very poor indeed at a meeting called to hear how women could take measures in their own households to protect families in the event of nuclear war. The WVS had invited 130 women, but only nine turned up. However the three speakers explained how to shelter from the atom bomb's heat flash and how the thick whitewashing of windows could stop penetration of radio-active dust. 58 09 12

1958 There were cries of 'shame' when Peter Cadogan of Cambridge told the Labour Party Conference that since a march from Ely to the rocket base near Mepal, Americans alarmed by the demonstration had 'given certain English employees to understand that if they want to hold their jobs they cannot be members of the Labour Party'. It was apparent that the marchers had the company of the American F.B.I.: English people demonstrating on English soil were under the hostile surveillance of the secret service of a foreign power. One man, the organiser of the march, had already resigned. 58 10 03

1959 Cambridgeshire Regiment Roll of Honour dedicated, Ely Cathedral, June [4.14]

1959 Nuclear Disarmament Week - J.B. Priestly attends, Sept [2.24]

1959 H-Bomb rally, Jun, Sep [3.2]

1959 Trumpington industrial hostel is one of the few remaining hostels opened in 1947 to accommodate Poles from the Polish Resettlement Corps on the transfer to civilian status. It has continued as an industrial hostel with Polish residents numbering more than half the total. The 130 residents are employed locally but it is a costly business and it will shortly be closed. Many of those displaced will probably find lodgings with other Polish workers who have homes in the neighbourhood. CDN 15.12.1954

1959 Territorial Army training, Coldham's Lane – 59 04 21 & a

1959 CND exhibition – 59 01 13

1959 The United States Air Force hospital located at Wimpole Hall will move to RAF stations at Mildenhall and Lakenheath later this year. The move will affect 300 US military personnel and 95 UK civilians. The facilities are on private land and this has to be handed back to the owner by the end of 1959. They were constructed by the British Ministry of Works in 1943 and operated by the US Army until 1945. In 1951 the 7510th USAF Hospital was stationed there. 59 02 12

1959 Looking like a gigantic cigar, a tarpaulin-covered 'Thor' rocket – minus its warhead of course – passed through Ely en route to the Mepal rocket base. The 90-foot transporter with pilot drivers at the rear to ensure negotiation of the highway, was escorted by the R.A.F. police. Preceding it, to clear the streets of all other traffic, were civil police. The 'Thor', produced in America, has a range of at least 1,500 miles 59 04 16a

1959 Currently undergoing training at the Thor Intermediate Range Guided Missile School operated by the USAF in Tucson, Arizona, is Chief Technician Robert Fennell, whose wife lives in Tenison Avenue. He is one of a number of RAF personnel being trained in all phases of maintenance of the 1,500-mile range missiles to be based at Thor launching sites such as the one at Mepal. 59 06 05

1959 A procession 300 yards long wound its way through the crowded shopping streets of Cambridge to see Sir Hamilton Kerr MP and request that Britain should stop testing the H-bomb. The Cambridge Campaign for Nuclear Disarmament, which has nearly 500 members (not including undergraduates), toured the streets with posters summoning people to a rally on

Midsummer Common. It was one of the biggest open-air demonstrations in recent times. There was only one interruption when Mr Colin Bell was greeted with a perfunctory and disintegrating orange as he stepped to the microphone. It was thrown by an undergraduate. 59 06 08

1959 Arthur Tucker, Secretary of the Cambridgeshire Regiment Old Comrades Association, carried the Cambridgeshire's roll of honour up the nave of Ely Cathedral at the dedication ceremony. Through his years of internment at Changhi Prison in Singapore he had kept a little book under the floorboards containing the names of all the men in the 2nd Battalion and any casualties. Had it been found it would have meant his instant death. He used it to correct the list compiled by the War Office – half the chaps they had named were very much alive. 59 07 23b

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 air-raid shelter Chalmers Rd demolished [457.8.13]

1960 new Civil Defence headquarters, Warkworth Lodge, Feb [2.26]

1960 parade to mark centenary of Cambridgeshire Regiment, (merges with Suffolk regiment in 1961) [2.28,5.1,5.2]

1960 The RAF strategic Thor missile is now operational at Feltwell, one of four bases capable of launching rockets with nuclear warheads. There are three Thor missiles housed horizontally in special shelters with 12 more in 'satellite' emplacements nearby and three more complexes in the eastern part of England which the authorities are reluctant to name. It takes an hour to attach a warhead after which it can be erected, fuelled and launched in 15 minutes. The rocket would take 15 minutes to reach a target in Russia. 60 02 12a & b

1960 Civil Defence HQ opens Warkworth Terrace – 60 02 02

1960 MP Major Legge-Bourke spoke of the rocket base at Mepal. It had a higher proportion of NCOs as against other ranks. There were plenty of first class warrant officers but practically no ordinary aircraft men. There was only one on the base when he visited. He felt very sorry for the fellow surrounded by so many stripes. The Under-Secretary of State agreed: he had never seen so many sergeants in one place in his whole life. If all bases were as cold and constituencies as cold as the Isle of Ely then he was sorry for the young chaps who have to stay there day and night looking after the installations. But morale was extremely high. 60 03 11a

1960 In April 1939 a Cambridge squadron of the Air Defence Cadet Corps was formed. It soon had three flights of 25 cadets with more on the waiting list. They all bought their own uniforms and paid three pence a week towards the upkeep of the Squadron. In 1941 it became the Air Training Corps. It now has nearly 100 cadets commanded by Flt/Lt Donald Snazle who joined on its formation and served as a bomb aimer during the war 60 04 06b

1960 Some 1,800 military and civilian personnel are working at the US base at Mildenhall and there are ample facilities for them. It is unusual not to see at least one game of baseball in progress with volley-ball and horseshoes also popular. The religious life is catered for in a 'universal' chapel and they are also encouraged to worship in British churches and chapels. There is a dance almost every weekend and a weekly floor show in which British and American stars appear. Most of the American children go to a school on the USAF base at Lakenheath and the wives have their own social clubs. 60 05 27a

1960 A hundred years of volunteer soldiering in Cambridgeshire was marked by a stirring parade and drum head service on Parker's Piece. The First Battalion of the Cambridgeshire Regiment was joined by two other organisations also celebrating their centenary - the Army Cadet Force and the Combined Cadet Force. The Colours were ceremonially paraded and the Regimental band accompanied the hymns. Afterwards the Commanding Officer (Lieut-Col P.D. Storie-Pugh) led his men to their headquarters in East Road as people demonstrated their pride in the Cambridgeshires 60 06 20

1960 Just a year ago the USAF base at RAF Alconbury became the headquarters of the 10th Tactical Reconnaissance Wing and nearly 7,000 Americans moved in. The station has its own bank and post office, a barber and beauty parlour, a laundry and motor maintenance department as well as a dispensary, food stores and clothes shop. There is a bowling alley, soccer and baseball pitches. A cinema, hobby shop and community centre provide off-duty means of entertainment, there is a well-stocked library and a base chapel. Houses include all the latest amenities with refrigerators, washing and drying machines, sink units and electric cookers. 60 09 09d e f

1960 Five incendiary and three practice bombs were recently unearthed during digging operations at Mepal airfield, a few hundred yards from the main entrance to one of East Anglia's Thor rocket bases. It brings the total find during the three weeks in which an RAF Feltwell bomb disposal squad has been at work up to 18 bombs or Mills markers. In addition about 200 other miscellaneous items of an explosive nature have been discovered, mostly bullets. The rocket base was not in danger at any time: the biggest threat would have been death to any person in the immediate vicinity should the bombs have exploded 60 12 09b

1961 60 supporters of Bertram Russell stage sit-down at Trinity College [5.6]

1961 Boys of two Army Cadet Battalion learned their drills the hard way when their machine guns jammed right in the middle of an enemy attack. Later a tremendous assault was launched upon a tree-filled quarry defended by resolute Bren gunners from Whittlesey. Smoke hit the attackers from their objective as they struggled through the bushes and undergrowth while the air was filled with the noise of loud explosions and the clatter and crack of rifle fire. Afterwards everyone returned to the Barrington Training Centre for lunch- 61 02 22b

1961 Nearly 200 people from Cambridge people set out on the Wethersfield to London Ban-the-Bomb march. They joined eighteen hundred marchers who had stayed overnight near Finchingfield where the two-mile long column assembled on the tiny village green. Amongst them was 85 year old Clara Rackham who was on her fourth march and hoped to walk to Braintree. Her only luggage was a straw bag containing a flask and sandwiches. The well-known marchers, the Baker family from Harston took six of their seven children, leaving their four-year-old daughter at home. Mr Robert Davies, who contested the Cambridgeshire by-election recently, was also on the march. He intends to walk all the way 61 04 01a

1961 The Food Flying Squad Convoys of the Ministry of Agriculture were started during the war under the name of the Queen's Messenger Convoys. They were reformed when the need for Civil Defence became more acute and consist of four canteen vans, two stores vans, a water carrier and a staff van. They are manned by the W.V.S. and are capable of providing 3-4,000 light meals of soup and stew. They can respond to a call following an enemy attack or civil disaster and did much useful working during the East Coast floods. 61 04 07a

1961 Members of the Women's Royal Army Corps Territorial Association are examining aerial photographs at the new Air Photo Interpretation Centre at the Drill Hall in East Road. Until April they were a Motor Transport Company and when reorganised were divided into two sections with the other studying signals at Coldham's Lane. The women have to sign on for two years and receive full army pay with an annual bounty of ten guineas. Uniforms are given and they train each Monday evening. But it is difficult if there are small children for in wartime the T.A. are the first to be called up. 61 09 08b

1961 Lord Bertrand Russell, leader of the Committee of 100, began a seven-day prison sentence after a civil disobedience campaign. Overnight Cambridge supporters of the Campaign for Nuclear Disarmament went out with paint pots and daubed slogans saying 'Free Russell' on the wall of Emmanuel College and on footpaths in front of Sidney Sussex and Trinity. Councillor Robert Davies, a member of CND, said they did not support the defacing of buildings but it was an indication of the depth of feeling against the imprisonment of an aged and respected philosopher 61 09 13

1961 The Army Emergency Reserve has not enjoyed the limelight of other Territorial Army units. Its training obligations are not so onerous and the bounty much higher, at £75. But volunteers are liable to immediate recall for service in any part of the world, as happened during the Suez crisis. The local unit, 215 Port Workshop, is drawn from the Cambridge, Newmarket, Norwich and Ipswich area under its Commanding Officer, Captain C. Wilson of Harston. All the personnel are tradesmen; in action they would follow the assault infantry in to keep the beaches clear and traffic moving 61 09 13a

1962 G.J. Rogers record of unbroken 34 years service in Corps of Royal Engineers – 62 01 03

1962 East Anglian CND Committee of 100 break off march from Parkers Piece to Brooklands Avenue, distribute leaflets, Apr [2.31]

1962 A crowd of 5,000 people, mainly students, swarmed through Cambridge after police and Proctors stopped a political protest rally about the American-Cuban crisis on the Market Square. Carrying placards declaring 'Hands Off Cuba' they made their way to Parker's Piece where the meeting got under way with speakers both supporting and opposing President Kennedy's moves. One warned 'We are on the verge of a nuclear war'. Later police prevented another rally outside the Guildhall where demonstrators hammered on the side of passing buses. 62 10 24 [2.32,5.7]

1962 Unexploded bombs have been found in Cambridge for the second time within a week. Two were discovered by Mr Norman Summers when he was digging over a piece of waste ground at the rear of his council house in Peverel Close. Bomb disposal experts think they may date back to the beginning of the First World War. They were destroyed on the beach at Mundesley. It was the first time the land had been dug: previously it was just waste ground where children played occasionally. Last week gardeners at Grange Court found an unexploded 12lb practice bomb in the bottom of the hedge. 62 03 05

1962 The Isle of Ely has been classified as a 'neutral area' in the Government's scheme for the dispersal of the public in the event of a national emergency. This means one out of which no planned movement was to be considered. 62 04 11a

1962 CND column of vehicles tour bases to Mepal etc – 62 04 21

1962 The Campaign for Nuclear Disarmament's mock funeral march through the centre of Cambridge caused traffic congestion, provoked an anti-CND march and met with a noisy reception from undergraduates in the Market Square. The 'funeral cortege' stretched for 300 yards behind a child's coffin carried by two pall bearers. Altogether 400 'mourners' took part in the march including Mr Gabor Cossa, the antique dealer. A Committee of 100 contingent joined in a demonstration at the Government buildings in Brooklands Avenue 62 04 30a

1962 Abberley House, Gt Shelford is the HQ of the county Civil Defence Corps. In a nuclear war Wardens would give advice, Communications and Intelligence sections control operations and Scientists go out after an attack to collect technical information. First aiders would supplement the ambulance service, Rescue workers free trapped survivors while Welfare staff would provide food, shelter and clothing. Members of the C.D. are only asked to give as much time as they can spare and more volunteers are needed. 62 07 05c

1962 More than 200 people joined in the 'No War over Cuba' march around Cambridge led by Robert Davies, the Prospective Labour Party Candidate. They were mostly students but included 87-year-old Mrs Clara Rackham, 87. Four undergraduates carrying placards saying 'Hands off Cuba' distributed leaflets to the thousands of spectators streaming into the City Football ground on Milton Road. Members of the Amalgamated Society of Woodworkers, who were meeting to discuss safety in the building industry, petitioned Mr Gaitskell and the TUC over the moves made by President Kennedy 62 10 29

1962 The Thor missile base at Ely is to be closed and the war-time airfield will be disposed of. The Air Ministry says there are no civilians working on the base, which is a satellite station for Feltwell missile base, and had three Thor rockets which cost £1 million each. There have been

two protest marches in the last four years. The first in 1958 was organised by Cambridge City Labour Party, the second during an East Anglian CND campaign 62 12 11

1962 An all-night vigil by CND members at the USAF airbase at Wethersfield near Saffron Walden was partly cancelled due to rain squalls and cold conditions. A mobile canteen which had been arranged to supply refreshments to the demonstrators did arrive but stood unused. However next day a public meeting was held on Wethersfield village green which was addressed by a member of the Committee of 100 before protestors marched to the base which is home to the 29th Tactical Fighter Wing flying Super Sabre fighter bombers 62 12 10

1963 Freedom of City granted to Suffolk & Cambridgeshire Regiment TA – 63 02 26 [5.3]

1963 Mepal Thor base closes [2.30]

1963 The 5,000 m.p.h. rocket missiles which once stood on remote sites such as Mepal airfield are being returned to the United States. Some have already gone back stripped of their war-heads and fuel propellants, chained inside the cavernous interiors of the giant C-133 transport aircraft. The rockets are to be used for space research and training programmes. They caused a political uproar when they arrived in this country ready for erection on their launching sites. 63 09 20c

1963 East Anglian CND Conference, Jan [2.33]

1963 “Spies for Peace” pamphlets describe ‘Regional centre of Government’ at Brooklands Avenue [5.8]

1963 Cambridge University Campaign for Nuclear Disarmament will keep the public informed of the progress of their ‘Fallex 63’ exercise by posting large newspapers at three points in the city centre. They will include details of how a supposed ‘nuclear war’ is raging across Europe with maps of nuclear fall-out. The railway station will be picketed where it will be assumed that all main services have been immobilised. Most activities will take place in the city centre and around the housing estates where short public meetings will be held. 63 11 14 [369.21.15]

1963 Corpus Christi cellars could be used as fall-out shelter in times of emergency – 63 05 08

1963 Technical equipment from Britain’s obsolete rocket bases is on view at some of the ex-Thor missile sites. One of the largest was at Mepal airfield which was closed down as an operational station during the summer and is now manned by maintenance staff. The stores and plant will be sold by auction but items such as the count-down and launch control caravans have been ‘demilitarised’ to ensure they cannot be used by an enemy. Practically all that is missing are the giant Thor rockets themselves which have gone back to America for space research 63 11 25, pic 63 11 27a

1964 The new HQ of Cambridge A.T.C. Squadron is the former Royal Observer Corps base on Newmarket Road. When the Squadron was first formed as a unit of the Air Defence Cadet Corps its members attended lectures at the University Engineering Laboratories before moving early in the war to Leighton House in Trumpington Road. But most of its time has been spent at “Rock Mill” in Rathmore Road. 64 03 20 [Misc.4.2]

1964 Recruits for Cambridge City Civil Defence are drawn from a wide and diverse field. Amongst the 575 on strength at the Warkworth Lodge headquarters there is a 55-year-old University professor and a 20-year-old farm labourer. Other volunteers include an optician, compositor, school teacher, window cleaner, scientist and housewife. The Mayor and Mayoress, Mr & Mrs J.B. Collins both hold the civil defence medal for long service. “Somebody has got to be available to pick up the pieces and start again. In the event of nuclear warfare we would try and care for survivors”, one said. 64 02 10

1964 The United States Air Force 10th Tactical Wing based at Alconbury, is ready 24 hours a day to fly to targets in Europe. But their RB-66B aircraft carry cameras, not bombs, and targets are only strafed with fire canisters to illuminate the ground many thousands of feet below providing pictorial evidence of military build up or bridges. The planes are packed with electronic

aids, important to penetrate strongly defended areas. On returning the nine-inch wide film is developed in seven minutes and examined while still wet. 64 05 13

1964 RAF Alconbury – feature on the USAF base – 64 05 23

1964 Cambridgeshire's 19 wartime airfields are falling into disuse or being reclaimed as farm land. Weed-choked runways, derelict barracks and tumbledown conning towers are all that is left. At Duxford the concrete baffles have been demolished and its runways are disappearing with the rubble being used for housing and road building. Waterbeach had a succession of Vikings and Vampires aircraft but now it is mainly trainers that take off. At Bottisham many of the buildings are used for storing grain. But Mepal, which recently had a Thor missile base, is now in the hands of the Americans – 64 09 25c

1964 Fen Drayton had to be evacuated following a nuclear explosion near Wisbech. There was no damage from the blast but because of radiation fall-out more than 200 people were moved to Civil Defence Headquarters at Gt Shelford. The last person to leave each house put a white towel in the window to indicate the house had been cleared. Police patrolled the village to prevent looting. But shopkeepers were worried about the loss of trade and some farmers were too busy to go. It was only an exercise to test plans in case of the real thing. 64 10 01a, 05a

1964 Following the explosion of a nuclear bomb Cambridgeshire Civil Defence workers quickly evacuated men, women and children threatened by radiation from Fen Drayton. And then the 'accident' happened. A car with six occupants crashed into a ditch as part of a dummy accident to supplement their exercise. An ambulance was immediately despatched but it was involved in a real crash with a bus. As a result the 'victims' in their theatrical make-up had to wait for 40 minutes. Even then they could not be moved as the first-aid team failed to arrive. 64 10 05a

1968 Vietnam marchers [3.8]

1972 Just in case The Bomb should ever drop, eight powerful new air raid warning sirens are to be installed in Cambridgeshire. Although few people ever see or hear them, the Home Office has about 22,000 warning points in the United Kingdom equipped with electric or hand sirens for air attack warnings and maroons for fall-out warnings. Now they are to be replaced by powerful compressed-air sirens which are much more efficient and much louder. The eight which are to be installed in Cambridgeshire will be at Brooklands Avenue, Cambridge, Waterbeach Barracks, Oakington airfield, Great Wilbraham, the old Duxford airfield, Bassingbourn Barracks Lt Eversden & Linton c72 09 11

1973 Hundreds of tons of high explosives are driven through Cambridge every week on open-backed unmarked lorries. This was revealed yesterday after one of the lorries burst a tyre on Huntingdon Road, a mile from the spot where 48 hours earlier a drum of deadly poison fell off a lorry and burst. The high explosives come through Cambridge en route from Felixstowe docks to an ammunition manufacturer at Grantham. Dozens of unmarked lorries pass through Cambridge

every week to 10 days carrying the explosives. Many then return to Felixstowe carrying the finished product, various types of ammunition for export abroad c73 07 08

1974 A convoy of lorries carrying 50 one-ton bombs to an American air base were diverted on to the half-built Newmarket by-pass last night when some of the loads were found to have shifted dangerously. Explosive experts examined the bombs for damage before they were reloaded by a crane brought from USAF Lakenheath. The scare lasted for five hours and involved dozens of firemen, police and American military personnel. An atmosphere of secrecy surrounded the incident from its beginning near the railway crossing on the A11 at Six Mile Bottom. Military explosive shipments are on Cambridgeshire roads every day without police escort, and without information being given to the fire service c74 08 25

1974 Tourists at Cambridge colleges found themselves caught up in one of the largest security operations mounted in the University in recent years. It followed a message passed on by the Metropolitan police that there could be a bomb explosion at a college within 48 hours. As a result tourists carrying parcels were stopped by porters. Many central colleges locked their chapels and halls altogether. Last week bombs exploded in a London club and at Harrow school c74 10 27

1975 Old Contemptibles Association Cambridge branch wound up [455.9.2]

1976 Cambridge's last links with serving members of the Royal Navy will be officially severed next week when the Royal Naval Unit in Porson Road closes. It has been involved in providing 'guinea-pigs' for psychological tests at the Medical Research Council Applied Psychology Unit in Chaucer Road. Sailors from many parts of Britain have come to Cambridge to take part in the tests. The Cambridge unit first opened in 1945 at Parkside and moved to Porson Road in 1951. Research centred on the effects of hot and humid atmospheric conditions – heat stress – upon work c76 02 28

1976 The Royal Observer Corps posts, about one every 15 miles, are concrete bunkers buried deep in the ground. They are proof against radiation and a moderate amount of blast. If the radiation levels are intense the observers must be prepared to stay at their post for long periods, in total isolation. Should the very worst occur and the post find itself totally cut off with radiation reaching dangerous levels they could warn those residents above ground by operating their portable siren c76 06 06

1979 Freedom of City granted to Royal Anglian regiment (successors to Cambridgeshire Regiment) [5.4]

1979 Cambridge Council Against Missile Bases formed to protest about Cruise [5.9]

1979 At the back of the Shire Hall and behind the Sir Isaac Newton pub in Cambridge sits a small, portable office. It houses four dedicated workers who are preparing for nuclear war and other major disasters such as flooding, hurricanes and air crashes. Total nuclear war is a frightening prospect and the Government has taken steps to plan for such a holocaust. Now parish councillors are to be trained as the latest part of the contingency plans; they would act as 'community advisors', helping to bring life back to normal in highly disrupted areas. CEN 22.8.1979

1980 CEN issues East Anglian briefing supplement [5.12]

1980 Joseph Needham plants tree in memory Hiroshima [5.15]

1980 More than 2,000 people marched through Cambridge on Saturday to protest at plans to site Cruise missiles in East Anglia. Shoppers watched the protestors, who included political and religious groups such as Quakers and Japanese Buddhist monks. They carried models of a missile and a nuclear submarine. It was the biggest demonstration for years and was followed by a debate between Defence Secretary Francis Pym and prominent peace campaigner Lord Soper. 80 03 17

1980 John Major, MP, says he regrets the Government's decision to base Cruise missiles at Molesworth, a disused RAF base used by the USAF. It has enough spare land to accommodate the buildings to store the missiles and is close to RAF Alconbury which can house the extra US servicemen. Cruise missiles are mobile weapons designed to be driven away from their bases in time of conflict. The closeness of the improved A604 and A1 was another decisive factor. 80 06 18a

1980 Molesworth villagers have reacted to the news that Cruise missiles may be stationed at the RAF base. Seven years ago they won a battle to prevent the building of a nuclear power station there and feel they have been picked on because they are a rural area with a scattered population. The landlady of the Cross Keys said it could bring a lot of much-needed business but was annoying for private individuals who had moved there for peace and quiet. 80 06 18c

1980 Nearly 2,000 people staged a big anti-missile rally at the disused airfield at Molesworth. It had been originally planned for Lakenheath USAF base but was switched following the announcement that Cruise missiles were to be based there. The news came as a shock to villagers who had fought for years to have the airfield returned to farming use. One is to write to President Carter asking for a £2,000 donation to the village hall fund by way of compensation. 80 06 30c [5.11, 5.14]

1980 More than 400 people held a peace picnic on Jesus Green organised by Cambridgeshire Council Against Missile Bases. It was opened by the leader of Cambridge City Council who said: It is ironic that there are cuts, left right and centre while we are spending money to kill people. It provided an opportunity to express opposition through peaceful means and included performances by singer Jancis Harvey and a troupe of Chilean refugee dancers. 80 07 07a

1980 Cambridge's Labour councillors want to take the city out of the Government's national civil defence organisation and ban all council officers from any wartime emergency planning. They say that Cambridge is in danger of becoming a nuclear dustbin & attack the plans to site Cruise missiles at Molesworth. But Conservatives say they are duty-bound to make arrangements to safeguard citizens in the event of a nuclear attack. 80 07 08e

1980 Villagers worried over the siting of Cruise missiles at Molesworth packed a meeting to fire questions at John Major M.P. He emphasised his support for the missiles and said they were definitely coming unless all countries agreed on disarmament. There would be 64 missiles housed in 16 separate bunkers which would be partly beneath ground. The mounds would be earth covered and grassed over. During exercises convoys of 20 vehicles would take to the road with the mobile missiles and remain away over-night. He doubted whether house prices would be affected. 80 07 08f

1980 The parishioners of Molesworth were too respectful to ask their M.P., John Major, rude questions about the siting of Cruise missiles. They asked about the by-pass, drainage, sewage and tenders for the bunkers. And one man, after asking about the rateable value of his house said he would like to go back to his children and the milking. Two who dared ask about the visual impact were told the missiles would be grassed over. Perhaps they may be thatched as well? 80 07 10

1980 Bomb disposal experts were called in when a bag containing five shells was found in the Cam at Jesus Green lock. They were taken to the Army's headquarters at Colchester where one of them – a five-inch-long bullet shaped object – was discovered to be a highly-explosive anti-tank shell. The others were solid-shot shells used in the last war from an anti-tank gun. Lock-keeper Allan Brett had spotted a plastic bag in the water, hooked it in and found the shells inside. 80 10 01e

1980 There was an undignified scramble for seats on the coaches booked by Cambridge Against Missile Bases to take them to the massive CND rally at Hyde Park. A further 150 students left on the Cambridge Peace Action coaches. The decision to base cruise missiles at Molesworth had seen a resurgence of interest in nuclear arms control and several people from Needingworth marched under a 'Hunts Against the Missiles' banner. "It is unlikely to have much influence on the present government", said a member of Cambridge Peace Action, "but the

Labour Party has adopted a disarmament policy and may do something when they're in power"
80 10 27

1981 The Government has given the go-ahead for USAF TR1 spy planes to be stationed at RAF Alconbury by 1983 together with thousands of extra American airmen and their families. Their deployment will involve additional construction work estimated at £40 million and be the biggest boost for the Huntingdonshire economy for many years. This makes Alconbury – the future Command base for Cruise missiles at Molesworth – a vital part of NATO's defence strategy 81 04 01

1981 Diggers are ripping up Molesworth airfield and soon there will be rows of grassy mounds like unmarked graves – resting-places for Cruise Missiles. Close to the spot is the road sign to Little Gidding and on it appears two lines from the T.S. Eliot poem of the same name: 'Dust in the air suspended Marks the place where a story ended'. In the unhappy event of East Anglia being reduced to so much dust the Regional Health Authority has drawn up a war-plan policy. It includes advice on herbal remedies and wearing plastic bags on your head against fall-out. 81 05 15b

1981 Cambridge was declared a nuclear-free zone by Labour councillors who asked officers to oppose and restrict the deployment of nuclear weapons and the transportation of radioactive material within the city boundaries. Work going on in university departments is beyond the scope of the new policy but any future planning applications for research facilities connected with nuclear weapons would be rejected 81 06 05a

1981 Simplex agricultural engineers of Sawston have developed a brilliant new nuclear war shelter with potentially great commercial future. It is based on the firm's silo technology and meets Home Office specifications with space for up to seven people. A basic shelter could sell for £1,500. There are only minor teething problems to sort out, but owing to financial difficulties the firm is closing down. 81 08 14

1981 A nuclear shelter is being installed in its designer's home at Ashwell. It provides emergency accommodation for up to seven people and will protect against nuclear blast, radiation, heat, chemical and biological attack with a decontamination chamber, lavatory and space for cooking. You could seal yourself in, live there for the duration and come out when the going is good again. It costs £9,658 but an air filter is extra.

81 09 16c

1981 The cellar of a rambling Victorian building in Newmarket, used to provide shelter for homeless families, has been converted into an emergency centre to cope with nuclear attack where a team of officials will direct survival operations if war breaks out. But spending cuts mean it has no sophisticated air filtration and drainage systems and is only lined with plasterboard. It was chosen because the council officers were too close to USAF bases at Mildenhall and Lakenheath 81 10 15

1982 In the basement of Shire Hall is an 'emergency planning room' packed with maps, telephones and radio sets. It has windows, thickish walls and a large conference table but would offer virtually no protection from a direct nuclear hit. It is designed to act as a communications network liaising with the emergency services, the water authority, railways and so on during any emergency from floods in Wisbech to the sudden cutting of the county's gas supplies. 82 10 15 & a

1983 Labour Party issue leaflet 'Cambridge & nuclear weapons' on effect of bombs [5.17]

1983 Plans to move the Cambridge War Memorial from the Hills Road – Station Road junction have been scrapped. Instead of making way for a new system of computer-controlled traffic lights, the memorial will remain as an island. Originally the County Council wanted to relocate it

to a small shady spot under the trees in the Botanic Garden, but the City refused to co-operate. 83 02 12a

1983 American TR1 spyplane for Alconbury – 83 02 14

1983 The traitor Donald Maclean continued to do some of his shopping in Cambridge long after he defected to Moscow 32 years ago. Maclean, who died in Moscow last week, regularly bought books from Bowes and Bowes, the Cambridge bookseller. Another former Cambridge student and fellow traitor, Kim Philby, also bought many books from the same source. Frank Reeve, the former manager said he hesitated over the first order and checked with the Foreign Office to see whether it was permissible to trade with a traitor 83 03 19 p1 & 9

1984 The USAF base at Alconbury is to become a Cruise missile assembly site. The missiles will be flown to Alconbury for assembly and transferred to four permanent bunkers at Molesworth. RAF Waterbeach, RAF Feltwell and RAF Upwood are to house 500-bed nuclear war hospital centres. They will renovate existing buildings then mothball them until needed for military casualties of war in Europe 84 01 16 p1

1985 Cambridge soldier killed in Northern Island, buried with full military honours [4.4]

1985 A peace garden dedicated to the Japanese people who died in the atomic bomb blasts at Hiroshima and Nagasaki was officially opened on Christ's Pieces. But the joint council-CND ceremony, set up as part of a week of peace programme to commemorate the 40th anniversary of the nuclear raids, was interrupted by protestors and boycotted by Conservative city councillors 85 08 06 [5.18]

1985 The Molesworth peace camp was smashed in a massive combined military and police operation masterminded by Defence Secretary Michael Heseltine. They swooped in the dead of night catching almost 200 anti-Cruise missile protesters by surprise while 1,500 soldiers set about erecting a seven-and-a-half-mile fence around the base. Amongst those living at 'Rainbow Fields' were about 25 babies and a woman about to give birth. Police provided fuel to allow some of their vehicles to leave and emergency arrangements were made to provide shelter for women and children who needed it. 85 02 06

1985 The war-time mustard gas dump at Lord's Bridge is to be investigated by MoD officials for contamination as part of a national investigation of possible hazards on chemical weapons sites. It was one of six sites used as mustard gas dumps and was a forward filling depot for Risely Airfield in Bedfordshire. Two 250 tonne underground tanks containing lethal mustard gas were sunk on the site in 1944. They were emptied in the 1950s, their contents either burned or dumped at sea, and filled with decontaminant. It is now part of the University's Mullard radio telescope observatory and fenced off. 85 05 11

1985 A triple gun salute and the haunting notes of the soldier's requiem 'The Last Post' sounded out across a sunlit Cambridge cemetery after the coffin carrying the body of an 18-year-old private was laid in the ground. Martin Patten had been gunned down by the IRA only three months after starting active service with his beloved Royal Anglian Regiment. Amongst dozens of mourners were soldiers from all three of the Regiment's battalions and members of the Burma Star Association 85 10 01a

1985 Military convoys allegedly carrying nuclear weapons regularly travel through or close to Cambridge according to 'Polariswatch', a branch of CDN. They say an 11-vehicle convoy travelled along the northern bypass on its way from Scotland to RAF Honington in Norfolk. This is certain to annoy Labour and Liberal city councillors who have fought a long anti-nuclear campaign. They may call together all local peace groups to seek their views on nation-wide moves by local councils to seek a ban on the transportation of radioactive materials 85 12 16

1986 foundation stone new Territorial Army centre, Cherry Hinton [4.5]

1986 Territorial Army medic unit formed – 86 05 08a

1986 An 'exodus' plan has been evolved to save thousands of Cambridge families from the horrors of a nuclear disaster. The aim is to evacuate the entire city if a Chernobyl-style accident happens at the Sizewell reactor complex on the Suffolk coast. Meanwhile health chiefs have been warned they are 'sitting on a time bomb' over the ambulance service crisis. Cuts of up to 20 per cent aim at correcting a budget deficit made worse by a Government blunder. 86 07 29

1987 Cruise missile launchers and their control vehicles were unveiled at Molesworth airfield. On display behind the eight-and-a-half miles of razor wire were 16 vehicles and two of the men who will 'push the buttons' if there is another war. The missiles are due to arrive next year and will be housed in four bunkers which will be grassed over as part of a landscaping programme that has won a design award. When complete it will be Britain's most secure base. While the base opened its doors to the Press it remained closed for the handful of peace campaigners who maintain a lonely vigil in tents and caravans outside. 87 07 15a

1987 The Territorial Army has been given a major boost with the building of new headquarters units for the signals and medical units in Cherry Hinton Road. It includes facilities for vehicle maintenance, lecture theatres and a full indoor firing range. Both units have a Nato role, being trained for operational activities with the British Army on the Rhine, and are still recruiting. There is also new accommodation for other sections on the TA site in Coldham's Lane where the previous premises are being demolished. 87 07 21a

1987 If there was a disaster then a team of 600 community advisers would play their part in civil protection schemes. They are trained to deal with a crisis and help people pull together. They know about local radio hams, residents with expert knowledge and facilities such as wells, buildings which could be adapted into central feeding areas, make-shift accommodation or hospitals. The advisers, who include doctors, vicars, parish councillors and housewives backed up by 900 volunteers, are part of a civil protection initiative by the County Council. Now a series of 13 evening classes have been set up to train more 87 10 01b

1987 Staff at the County Council's emergency centre in the grounds of Shire Hall learned a few lessons last week during the hurricane. The bunker has a television but no radio to receive local or national reports. However during the gales the television stations were off the air, so a radio is now to be brought in. The Home Office refused to pay for a fridge, freezer or microwave but these will now be purchased. A generator can provide power for 30 days and water is stored for the same period. The list of those who would use it is secret but would include top council officials, civic leaders and representatives of police, fire and ambulance. 87 10 22

1988 CUOTC HQ opens, £3M TA centre, Coldham's Lane £CEN 10.6.88

1988 The Territorial Army staged a massive exercise as 300 soldiers firing blank ammunition brought war to the Cambridge area. Enemy forces were advancing from Haverhill, blowing up bridges on the A45 and imaginary infantrymen were sent to engage them. Countless 'casualties' were ferried by helicopter to the main dressing station at Oakington Barracks where they were treated by volunteers and doctors from Mid Anglia health services. One specialist unit was kept busy appeasing local residents' complaints about disturbances. 88 02 22

1988 Cruise missiles destined for the nuclear scrapheap are being returned to America as part of the superpowers INF Treaty. They are the first of 18 missiles from Molesworth to leave. British Defence Secretary George Younger acknowledged the great deal of inconvenience suffered by local people. Residents are relieved to see them go – and even happier that peace protestors who have campaigned at the base are going too. 88 09 08 88 09 09

1988 The last cruise missile has left the Molesworth American air base. News that the weapons had gone came as a Soviet military team arrived to make a snap inspection; they found only empty hangars. Removing of the 18 missiles, under the INF treaty, has been completed two months ahead of schedule. The last left Molesworth en route for destruction in America on

Thursday. It has taken the US less than two months to remove the missiles which were deployed under a year ago 88 11 01b

1989 Molesworth Cruise Missile base was deactivated in an historic ceremony, the first to be disbanded under the Superpowers' Intermediate Nuclear Forces Treaty. The 18 nuclear-tipped missiles were all removed last year. Now the storage buildings, which resemble large garages with 70-ton steel and concrete doors may be used as accommodation or storage centres. The Royal Marines band played the ceremony out with the 'Monty Python' theme. – 89 01 30 & 31

1990 Kim Philby film alleges Charles Broad, Prof of Moral Philosophy at Trinity was the 'Fifth Man' in Cambridge spy ring – 90 05 21a

1990 John Cairncross named as fifth man in Cambridge spy ring – 90 10 15a

1991 Plans for expensive civil control centre scrapped; is less threat of nuclear attack and is highly unlikely that any emergency centre, however well protected, would be able to survive in Cambridge – 91 01 18a

1991 CND protest march against Gulf war – 91 02 27

c.46.45 : tourism

headlines

1906 About 500 day trippers from Manchester poured into Cambridge, attracting much attention. Most were obviously north-country lads and lasses, the lads in tweed clothes and caps, the lasses in more daring colours than usually seen, and all with an accent broad enough to span the Cam. “ ‘Aw, lad, but this is bonny little toon”, said one to another. The Cam was prettier than their Ship Canal. It proved a greater attraction than the colleges and the visitors took practically sole possession of it. 06 05 19a

1909 The proprietors of the University Arms Hotel, Robert Sayle and the Cambridge Automobile and Engineering Company all claimed that they had only agreed to advertise in the ‘Corporation Guide to Cambridge’ as they had been told this would be an official guide, distributed through the Town Clerk’s department. The firm said they had written to the Town Clerk suggesting he might become a journalist for the guide in a private capacity, but he had

declined. They had distributed 1,000 copies to the Railway companies, 250 to Galloway and Porter and 950 to advertisers. 09 03 19

1910 "niggardliness of American visitors proverbial... so mean that it is absolutely unprofitable to have anything to do with them" [1.10]

1911 'Charles Darwin lived here in 1828' is the inscription in red lettering on a stone tablet recently placed over Arthur Rutter's office in Sidney Street. This is the first tablet of its kind in Cambridge but another one has been put up over 22 Fitzwilliam Street recording that he also lived there. The idea is an excellent one and it is hoped that the example which has been set by the Master of Christ's and members of the Darwin family, will be followed by others 11 11 17

1912 railwaymen suggest advertising Cambridge like a seaside town to encourage visitors during Long Vacation [1.11]

1913 suffragette damage forces colleges to shut their gates during Long Vacation [1.12]

1920 "A Guide to Cambridge University Life," by "Two of 'Em" (Cambridge: Deighton, Bell and Co., 1s. 3d. net) — The preface gives the *raison d'être* of the guide in the following words: "For some it has been impressed on our notice that a small book of the type which we have produced here would meet a great demand and would be of use of members of the University, and also to visitors of the town. We have so often heard the question asked "Where is the — College ground?" or "Where is the----Laboratory" and in most cases it has gone unanswered because the answer was not known. This "Guide to Cambridge University Life" (we claim) will dispense with all trouble of this sort, and will enable its owner to find his way about by himself without any assistance. We have collected the information which seems to us to be that which everybody wants to know; and we have tried to furnish particulars dealing with both work and sport.-" A careful reading leads us to say that it would be practically impossible to compress more admirably the mass of information contained in this small volume. Whoever "Two of 'Em" may be, they have given to the public, and University men in particular, details which are of immense value, and set out in a most attractive manner. The plan of Cambridge is by far the clearest and fullest we have seen of its kind, practically every place of interest to the undergraduate being set out, whilst the plan and key of laboratories and museums meets a long-felt want. Its size is no criterion of its contents and importance, and we commend it very warmly to all those for whose benefit it has been written and compiled 20 02 18 CIPof

1920 Suggestion to organise small corps of official guides to show visitors round town; would afford employment for a few reliable discharged soldiers - CDN 20 07 24

1922 Royal Show impact motors - people go home not stay night [228.1.4]

1923 campaign to attract visitors [1.8]

1926 Sir – there is a need in Cambridge for duly authorised and well-informed guides in order that numerous visitors may be properly conducted over the colleges. The qualified guides should be supplied with a badge and a fixed charge made for their services. They would be allowed in college buildings and other places where at present visitors are not admitted. Intelligent disabled soldiers might be available for such a job – A. Macintosh c26 02 21

1926 Dear Sir – Do you think you could use your influence to get August and September kept free from holidaymakers and visitors to Cambridge. Landladies and most traders could do with the rest & business premises require internal cleaning and lime-washing which cannot be done while going full speed. The students hang on so long now during vacations, and the position is

not as it used to be – *A Trader*. No one would be more pleased than journalists if conferences came a little less thickly, but the presence of hundreds of delegates presumably means benefit to some people and a big effort has been made in recent years to advertise Cambridge as a holiday resort to help tradesmen in the “lean time” c26 08 23

1927 American tourists “pretty leisurely - contrary to usual idea”, misinformed by guide [1.7]

1928 Cambridge “should develop as a holiday town” [1.9]

1928 A great cosmopolitan army has invaded and captured Cambridge. It is no new thing this descent by the legions from overseas but probably never before have they been drawn from so many nations or corners of the world. The ‘Backs’ heard such a murmuring of strange tongues as would have puzzled the most expert linguist. One reason was the International Geographical Congress attended by members of fifty nations, but ever since the ‘Long Vac’ started foreign visitors have poured into Cambridge, nearly all armed with cameras and a determination not to miss anything. They saw the river girl – and her flannelled companion – brought out by the heat wave; she was there at the punt pole with her light bright frock, so cool, so self-possessed and efficient, and even in this heat – no shiny noses. c28 07 30

1929 Advertising Cambridge – Chamber of Commerce – pictorial posters issued, illustrated guides; more conferences wanted – CDN 3.4.29

1934 The LNER will shortly be releasing a new crop of posters calling attention to holiday resorts and other places of interest on their lines. Cambridge is to be represented by a picture of St John’s college gate which shows the artist, Fred Taylor, at his best. The poster advertising York shows Dick Turpin on his famous ‘Black Bess’ with the Minster in the distance. 34 04 14

1937 complaints about “nudity” on Backs - too casual dress of visitors [1.6]

1938 The L.N.E.R. have just issued a new lantern lecture on Cambridge that may be borrowed free of charge by societies through the country. The 70 slides, which depict the colleges and other places of interest, should be of real value, because they will awaken interest in our town and University and may be the means of bringing us many visitors in days to come. Suitable reading matter has been prepared by Mr P.C. Fitzgerald beginning at the Round Church and describing a walk around the centre. This is one of 276 sets of lantern slides available from the Railway Company at King’s Cross Station. 38 01 01

1943 “When you arrive in Cambridge” guide for American servicemen – 43 07 03b

1946 J.W. Clark’s Concise Guide 12th edition is first to appear since the ban on such publications was lifted; printed on good paper with illustrations by Hanslip Fletcher and updated – 46 06 08

1949 Sir - As a University town we possess many treasures and I would like the see the authorities take an interest in visitors by carrying out the following suggestions. Erect an information bureau at the railway station and another in the town centre (convert part of the Guildhall into a shop front). At each provide maps, and have information available on subjects the visitor may need. Have guides available to conduct tours according to the time available. There appears to be no reason why organised tours should not last up to a week and be advertised in conjunction with the various transport organisations. In adopting these suggestions it would bring many more visitors to the town and in consequence more trade – “Optimist” c49 09 09

- 1950 US Travel Agency heads visit Cambridge - "vast potentiality" [1.2]
1950 Ruth Mellanby publishes Cambridge in brief (started showing visitors round c1924) [3.14]
1950 My attention was attracted the other day by a new notice board outside Cambridge police station. It displays a large map of Cambridge. Main roads are clearly marked in colour and a footnote states that further information may be obtained from the police station inquiry office. This is to my knowledge the only public 'guide' in the town at the moment and it will be particularly useful to visitors c50 10 05
- 1951 2 undergraduates start University tours 3 times per day, 100 people a week pay 2/- (10p) each [1.4]
1951 Mellanby guide service dates from 1951 (Festival of Britain) first recruits Cambridge Guide Service φCEN 17.12.87
1951 Two Cambridge ex-undergraduates have hit on a novel line in Long Vacation jobs. They have formed themselves into "University Tours" and take parties of visitors sight-seeing around Cambridge three times a day. An average of about 100 people a week pay 2s. (10p) a time to be shown around. About half are British, 20 per cent American and ten per cent Australian; the rest are from other countries abroad, mainly European c51 08 22
- 1954 college tours given in aid of Gt St Andrews Church [1.5]
- 1956 county show best ever 20,000 visit [228.1.3]
- 1956 Sir - Outside the 'university' area, Cambridge is as ugly and undistinguished a muddle of streets and buildings as can be found anywhere in England. In large areas you could think yourself in either a mining town (smoke and all) or the suburbs of East London. Shopping is universally dreaded especially at weekends when the entire population within a radius of 25 miles converges on half a dozen shabby little streets and the tourist invasions on Sundays turn the place into a sort of Southend, though without its amenities or gaieties – Guardian 56 07 14a & b
- 1959 Tourist poster of Bridge of Sighs – 59 11 13
1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*
- 1960 Foreign visitors see Cambridge in different ways. Some American have great culture, have read up beforehand and ask obscure questions. Others want to 'do everything' and take as many snapshots as they can. Germans are very thorough and really want to know everything, European youths frequently want to 'come up' to the University but are puzzled to learn colleges are not co-educational. Undergraduate bicycles never fail to interest: the almost seatless, rusty and battered machines with wheels held together with string give them the impression that students are desperately poor. It is impossible to explain that the poorest-looking bike is probably owned by the richest young man! 60 02 13
- 1961 An advertisement in a student newspaper offering the job of guiding tourists round Cambridge for a payment of £8 a day has attracted a wide response. They would use their own cars to bring small parties of Americans from London and smart girls would take American women shopping. But Mrs Ruth Mellanby of the well-established Cambridge guide service views the idea with trepidation. Her guides are carefully trained and charge 10/6 (52p) an hour for a party of eight. 61 02 03

- 1969 Kings close 2 gates on tourists to control visitors [3.5]
- 1970 hits tourism peak - 80 - 90,000 through Kings college chapel each season; lacks organised tourist scene, ‘official unfriendliness’ [3.6]
- 1970 tourism is ‘City’s major industry’ [3.8]
- 1971 ‘Women are People’ group protest about restrictions on taking pushchairs into colleges – 71 03 02
- 1971 Colleges may shut out tourists if numbers continue to increase at Trinity & St John’s – 71 04 23a [3.7]
- 1971 “clamp-down on tourist parties as pedestrian jams hit colleges” [3.10]
- 1971 Premier Travel enrol women graduates for walking tours [3.9]
- 1972 The setting up of a full-time Cambridge tourist department is likely to be recommended to the city council. Tourism is at present looked after by the library committee. During the nationwide local government reorganisation in 1974 responsibilities for running library services will go to the new county council. But the new District Council will obviously want to run Cambridge tourist facilities. The Library committee's Labour chairman, Coun Roger Thornely said the tourist work of the City's Libraries department was increasingly rapidly and taking up more of the department's time and added: "I believe that at times the Librarian does not see a book for about four or five days at a time" c72 08 21
- 1972 A full-time tourist officer should be appointed for Cambridge, a special meeting on tourism decided yesterday. They also agreed that a disused car park attendant's hut on the Market Square should be commissioned as a tourist information centre. The Mayor, Coun. Peter Wright suggested that voluntary workers could staff a tourist information kiosk in Market Square. The City Librarian, Mr Eric Cave, suggested that if the kiosk plan went ahead it could remain open on Sundays so that the present Sunday skeleton service at the Information bureau could be closed down c72 09 12
- 1972 The Mayor of Cambridge, Coun Peter Wright, last night gave an assurance that the City Council had no intention of promoting tourism at the expense of attempts to expand light industry in the city. In fact, he told the council's Library Committee, the council must encourage light industry if they were to boost tourism. "The more industry we have here the more will be the council's rates income. The council can then spend more on providing facilities for tourists, as well as their own citizens", the Mayor said. Ald Elliot Ridgeon warned that there was the danger that more tourists than ever would come to Cambridge as the result of appointing a tourist officer c72 09 23
- 1973 1,200,000 visitors 1972, fifth-biggest tourist attraction in country [3.12]
- 1973 first tourist officer appointed, turns it down, Honor Ridout starts [3.13]
- 1974 tourism “worth £10M to city [3.16]

1974 It was 50 years ago that Mrs Ruth Mellanby began to guide people round the colleges when she was asked by a newly-opened travel agency in Guildhall St, Cambridge to take two elderly American tourists round. This was the beginning of a life-long and distinguished career as a guide. In 1950 she wrote her little book, "Cambridge in brief" as a thumbnail sketch of the colleges. Then 20 years ago she started the Cambridge Guide Service, training a group of around 20 guides. The Guild of Guide Lecturers ultimately drove the street touts who at one time operated their own dubious type of tours, out of business c74 07 01

1974 Tourists at Cambridge colleges found themselves caught up in one of the largest security operations mounted in the University in recent years. It followed a message passed on by the Metropolitan police that there could be a bomb explosion at a college within 48 hours. As a result tourists carrying parcels were stopped by porters. Many central colleges locked their chapels and halls altogether. Last week bombs exploded in a London club and at Harrow school c74 10 27

1975 unprecedented boom in city tourism [3.16]

1976 "spend £18M pa in Cambridge" [4.1]

1976 "now a £25M business"

1977 pass system to curb tourism - parties must pay [4.3]

1977 TIC moves from Bene't St back to Wheeler St [4.4]

1978 "should city cash in on tourists" [4.5]

1979 Queens restrict access - tourists to pay 20p, individuals only in afternoon, guided parties morning, due to disturbance to college life [8.15]

1980 Visitors to Cambridge will be confused if they use the latest Ordnance Survey map of the city. The Lion Yard shopping centre, completed more than five years ago, is not shown but marked as a collection of tiny streets. Christ's Lane, closed for the past 15 years and not even visible, is still shown as leading from Drummer Street to St Andrew's Street whilst the University Centre is an empty space. Even the Tourist Information Centre is shown as at the front of the Guildhall, rather than the back. The O.S. said it did not seem very satisfactory
80 09 03b

1981 more colleges clamp down on summer visitors [4.6]

1981 Kings restrict access visitors [7.16]

1982 colleges bar tourists who disturbing students, St Johns, Trinity Hall; parts of Kings & Trinity already shut [369.16.9]

1984 Cambridge, considered one of the most beautiful cities in England, gets a hammering in 'Holiday Which'. It is criticised for poor restaurants, exasperating parking difficulties and shortage of good accommodation. There are several tea shops but those which aren't sleazy or overpriced tend to get hopelessly overcrowded at peak times. It is a relaxed place to visit and punting is the best way to see the scenery but take away the colleges and there is nothing left, it says 84 08 31

1984 There is not much of John Mellanby yet you could never lose him in a crowd. With his black stockings, knee breeches and a leather bag slung round his neck he is the most senior of Cambridge's tourist guides. He enjoys scandal: the Guildhall had gas lighting installed in 1830 and the Mayor at that time was a dealer in fish with a shop on the other side of the street. In 1930 they discovered the fish shop had been getting gas free for 100 years by a special pipe laid from the Guildhall, he tells visitors 84 09 12

1985 colleges to fight plans for more punts [4.7]
1985 annual invasion “be prepared the tourists are coming ... gloom descends as the prospect of yet another 3 million or so visitors looms [4.8]
1985 “3.8 M tourists break records” [4.9]
1985 courtesy couriers introduced [4.10]

1986 Cambridge’s colleges have always been a prime tourist attraction but this year, for the first time, parties will only be allowed in if they are accompanied by a Blue Badge Guide. There are 150 men and women who have passed exams and will lead about 4,000 tours in the coming season. They include the News managing director, Tony Durham who read history at Magdalene College and has lived in Cambridge for 25 years. “We have to provide a service for visitors and also serve the colleges who are under very great pressure from tourist traffic”, he said. 86 04 01 [2.4.4.11]

1986 Terrorism is set to cost Cambridge more than half a million pounds this summer as American visitors steer clear of Europe in the wake of continued violence. The loss from cancellations at the Garden House Hotel alone is around £250,000 as they have lost half of their business. Fears started with the murder of a tourist aboard the hi-jacked cruiser ‘Achille Lauro’ and were intensified by the bombing of a TWA aircraft near Athens, the Berlin night-club bomb and the aftermath of the American air attack on Libya 86 04 23 [4.14]

1987 “4 M” figures exaggerated - multiply TIC visitors by 13 [4.12]

1987 “fears as tourists flock to city”, “saturation point” [4.13]

1987 ‘drama tours’ started [NS.1.10]

1987 A new official booklet aimed at promoting tourism in Cambridge features a picture on the cover of a traffic warden booking a coach driver for parking outside King’s College. It also shows groups of tourists standing under umbrellas in the rain. The drawings by a council artist appear in the Travel Trade Manual issued by the city’s tourism department as part of a campaign to encourage visitors throughout the year. Councillors are amazed that they are telling millions of tourists to come to Cambridge and get booked for parking. 87 01 21

1988 Cambridge’s controversial open-top bus service got off to an inauspicious start. Steady drizzle ensured the buses were largely empty for the first half of the day – 88 05 10 open-top tourist buses introduced Bank Holiday Monday €CEN 4.5.88

1988 When Margaret Badcock set up the new Cambridge tourist desk at the back of the library in 1971 there were three people who ran private guiding services. Now there are 150 official blue badge guides who have passed difficult examinations and are fluent in a second language. Then the University Arms was asking less than £6 for a double room with breakfast – it is now £57 - while the Sorrento Hotel in Cherry Hinton Road charges about £40 and the Belle Vue Guest House in Chesterton Road between £19 and £22, the average for a double room in a private house. 88 04 21b

1988 Guide Friday open top buses have been used by thousands of visitors since they started four weeks ago. Fears that they would increase traffic congestion have been unfounded and now the company plan to increase their frequency. They travel down narrow city centre streets where other double-deckers are banned. But some students complain that instead of admiring the city’s fine heritage, tourists peer into their rooms and that the commentaries disrupt their studies. Colleges may now have to put up curtains in the windows. – 88 06 04, 88 06 06

1989 Cambridge is the fourth most popular tourist destination in the country, just beaten by Oxford. The four million visitors generate a massive income but the burden is a heavy load for the city to carry. They cause noise nuisance, pedestrian congestion, wear and tear on structures, buildings, turf and amenities such as public toilets. They are being encouraged to extend their

stay but if they do this will compound the housing crisis. Already the majority of workers in the tourism industry – shop assistants and waitresses – are low paid and have difficulty finding accommodation in expensive Cambridge. Tourists contributed £165 million to Cambridge's economy last year, supporting between 8 and 10,000 people in the service industry. Each spends about £47. But just £157,000 was spent on welcoming them – less than 5p a head. The council cash went on running the tourism office in Wheeler Street which has 12 full-time staff and another dozen workers in the summer. The colleges are a major attraction but university life would be seriously disrupted if they were allowed to roam uncontrolled. Most colleges close during exams but are anxious not to close their gates unnecessarily. 89 05 01 01a, 02

1989 Cambridge Heritage Forum is seeking to establish a heritage centre that is not simply a tourist office but a place from which to promote local historical sites, based at St Andrew the Great – 89 05 11a

1989 city planners suggest tourist be kept away during peak months ¢CEN 23.6.89

c.46.5 : River Cam

Jesus Lock was designed by William Chadwell Mylne who advised the Cam Conservators in 1829 that the river to Clayhithe should be deepened and the number of locks reduced from four to two. The University feared that moving the lock from its old site at the Fort St George would not prevent flooding, so the famous engineer Thomas Telford was called in for advice. There has been concern that it might be replaced but now John Taylor of Coldham's Lane has helped obtain a preservation order to ensure its survival 89 08 24

1887 Summerhouse and walled garden, known as Hodson's Garden were built in 1887 by wealthy local resident John Hodson so that he could keep a watchful eye on his daughters bathing in the river and oversee a fish hatchery he had constructed nearby. The land it was on was common land which he had annexed and the borough council tried to remove him but failed. – CEN 20.8.2005; photo 71156/55

1895 main sewage scheme in full flow involving deep sewers & new pumping station at Cheddar's Lane, streets choked by work, much grumbling [1.2,1.19]

1897 discover new sewage scheme inadequate & needs vertical shafts at great additional expense (ratepayers protest at costs and throw out proposals to rebuild Guildhall) [1.3]

1897 A resident in Cambridge has suggested that a new feature in the water carnival which is to be part of the celebration of her Majesty's Great Jubilee in Cambridge, a grand naval

engagement should be fought on the river Cam. The engagement might include the explosion of mines, the firing of guns from ironclads and torpedo boats, and at dusk the illumination of the whole fleet and the use of search lights. Such an affair would undoubtedly attract many sightseers and the illumination of the fleet should prove very effective April 22nd 1897

1897 Sir, - On Wednesday morning my attention was called to the state of the River Cam near Baitsbite Sluice. The water was covered with an oily matter and the stench arising therefrom was beastly. The whole atmosphere was apparently impregnated with some vapour. The havoc amongst the fish was appalling. Thousands upon thousands - I might say tons - of pike, eels, roach and dace were dead and dying, struggling to liberate themselves from their putrid, poisonous liquid. I never witness such a lamentable sight before - Thomas Banyard 27th October 1897

1898 Sir - As a visitor to Cambridge I was induced last weekend to take a trip on the Cam. I shall not soon forget it. My adviser took particular care to impress me with the fact that Cambridge had been granted a new method of sewage disposal, and on that account I should not inhale such odours as at one time were the characteristic feature of the river trip. But to my disgust, I found another evil had arisen. The river was strewn with dead dogs and cats. Between Walnut Tree Lane and Baitsbite I counted no less than a dozen of such corpses, not always by the bank side, but floating in the middle of the river – Tourist CDN 1898 07 11

1899 Huntingdon County Council sought a declaration that the River Ouse from above St Neots to below St Ives and thence to the sea, was a public navigable river and a common highway. Leonard Simpson claimed that it was his private property. He had the exclusive passage of vessels laden with merchandise and no one else should navigate any part of the river without a licence from him. The judge said the public were entitled to use it - 1899 11 22

1901 Last September the people of Cambridge held a gala day for the lifeboat's sake. There was a picturesque procession through the streets, the launching of a lifeboat in the River Cam, with fireworks and music in the evening. Now we read of the incident at Caister, when men went out into the raging sea, not only to risk, but actually to give up their lives in an effort to save others. "Caister men never turn back", said the old lifeboat man who gave evidence at the inquest & Cambridge will rally to the assistance of the women and children whose husbands and fathers have sealed with their lives their devotion to the lifeboat cause. 16th November 1901

1903 Tom Barton, the world's champion log roller provided entertainment for several thousands on the banks of the Cam. He made a journey from the University boathouse, through Jesus Lock to Strange's boathouse on a cylinder composed of Bovril tins soldered together, nine feet long and one foot in diameter, without so much as wetting his feet. A chair was passed to him, then a light table and placed thereon a large bottle supposed to contain Bovril. It looked so easy that the challenge to any person to stand on the cylinder for two minutes and win £5 was irresistible. A man assayed the feat but did not remain for two seconds and was precipitated into the water. c03 04 28

1903 There was another heavy downpour of rain; the Cam has but in a few places overflowed its banks and the ferries between Cambridge and Chesterton are still working. The Granta has not behaved so well and the water is already over the banks; there is a vast expanse of water with the tops of the hedges and the trees only showing. At Grantchester mill the road is knee deep. The basement of houses in Newmarket High Street are flooded as are some of the low-lying streets at Saffron Walden and the railway line at Chesterford is threatened with being submerged. c03 10 21

1903 An aquatic entertainment of a unique kind was given on the Cam by Leonard F. Durell. It consisted of a genuine exhibition of log rolling. The log, not very large, was painted red, white

and blue. He jumped lightly on it, spun it into mid stream, then sat down and, using a long pole, commenced his journey. Along the Backs of the Colleges he performed various revolutions and arrived at his destination without mishap. There his feats were little short of marvellous; he stood on his head on a chair resting on the log and was heartily applauded. c03 10 28

1903 The unprecedented rainfall has taxed waterways beyond their capacity and floods are the natural consequence. In Cambridge boathouses have been invaded by the flood and the ferries have stopped plying. The flood has taken possession of Sheep's Green and part of Coe Fen while the Upper Granta has inundated many acres of pasture. In the fen country the dykes are full to overflowing and the land clogged with water, while in St Ives there are floods to a considerable depth covering hundreds of acres. c03 12 03

1906 A fatality occurred at the portion of the river known as Paradise; two nurses from Addenbrooke's Hospital hired a Canadian canoe but it overturned and they were precipitated into the water. One clung to the boat and with the aid of a pair of horse reins was brought to the bank. A man pluckily jumped into the river after the other nurse but the depth of the water – about 15 feet – made it impossible for him to reach her. Eventually the clothing of the unfortunate lady was hooked but she had obviously succumbed. 06 04 09d

1906 An extraordinary sight, which ought never to occur again, is to be witnessed at Baitsbite Lock. For a hundred yards the surface of the water is literally covered with dead and dying fish – pike, roach, bream, dace and a host of smaller fry. Fishermen would never have dreamed there were as many fish in the waters. They have been slaughtered by the introduction of some noxious substance into the river. 06 10 04 & a

1906 The Conservators of the River Cam say steam and motor boats travelling at considerable speed draw after them a large quantity of water which render the shallower parts of the river bare with the result that boats were grounded. The swell could also capsize small craft or throw them up high and dry. A new byelaw was needed. 06 10 19a

1908 At the bottom of Mill Lane there was a kind of wharf with steps to allow people to get down to the river. Recently Mr Scudamore had fastened a sort of wooden punt as a mooring for pleasure boats, now nobody in a boat could get to the steps without trespassing on it. But no loading of boats had been carried on for nine years, the water was only a foot deep and there had been no complaints. Anybody in a punt could use it, Scudamore claimed. However as the river was a navigable highway, this was an obstruction magistrates decided and fined him five shillings CWN 08 06 12 p2

1909 River Cam dredging most beneficial [2.1]

1909 A petrol-driven motor boat owned by Mr John Scudamore, boat-builder of Mill Lane, and occupied by a party of five undergraduates caught fire when at the back of King's College and was burnt down to the water's edge. They had experienced difficulties with the 3½ horse-power engine and Mr Scudamore went to their assistance. He was examining it when it burst into flame. The cause is a mystery: nobody was smoking, the engine-bearings were not overheated and there was no escape of petrol. CWN 09 08 13

1911 river Cam fish poisoned possible by sewerage [4.2]

1913 public bathing station in river, what hope for public baths, plan shows how Kings Mill might be converted for open air swimming bath [3.5]

1913 Granta belongs Canon Pemberton, Squire of Trumpington; court case 50 years ago, & annually puts chain across river; banks on his side used for picnicking [1.2]

1913 Cambridge University Boat Club discussed Captain Gibbon's scheme for the improvement of the river Cam. It suggests the river be made 75 feet all over, that banks be protected with concrete sheeting and the depth increased to seven feet in the centre. . The total costs, including improvement to Grassy Corner is £25,000 Improvement Scheme – widen and deepen 13 01 24 p6&p10 CIP

1913 Cambridge Corporation should take full control of the river and its landing stages and wharfs. But some people did not care twopence about the Corporation and would stick to what they'd got. One house boat was drawn up beside the steps and filled with men sent there by the boat proprietor to defend his position if necessary. This was a humiliating position for the council. It meant that the biggest bully won, the man of most bodily strength would oust his neighbours. 13 03 28 p9

1913 Cam Conservators consider new Act, motor boats, not to load vessels more than 3ft 9in and have white load-line drawn 13 05 09 p04 CIP

1913 River Cam Sailing Club – improvements needed re sewage, weeds, as vehicle of traffic 13 11 07 p5 CIP

1913 River Cam dredged from Jesus Sluice to above Railway Bridge; to continue to Long Reach; 13 11 21 p7 CIP

1914 Cam Conservators investments reviewed – 14 01 16b

1914 Lighters owned by West Norfolk Manure and Chemical Co had touched the lower sill at Baits Bite Lock. They were carrying about 42 tons but if this was reduced it would not be economical and they would abandon the river and take the materials by rail. The sills could not be lowered without putting in new doors. The uprights are practically decayed and the two ploughs are never used except in emergency. The keeper was fearful of opening the doors and if there were a flood the whole might go. Urgent repairs were needed, the Conservators heard – 14 02 13d

1914 The Conservators had written to the West Norfolk Chemical Company concerning damage done to the sills at the locks by their barges, owing to their bumping when heavy laden. The Company replied that if they lightened their barges to such an extent that they no longer bumped, it would become cheaper for them to transfer the residuals from the gasworks by rail, which would ruin the traffic on the Cam. They could not lighten the tugs, which were heavier than the barges. The barge Charles, which has been running on the Cam for more than 50 years, drew two inches more water than the present barges 14 05 08, b c

1914 State of Baitsbite lock – 14 05 08c

1915 Cambridge Floods. A heavy downpour of rain experienced last week caused the River Cam to overflow its banks, and the low lands adjoining the river were extensively flooded. At Grantchester the road from the mill to Trumpington was submerged for a distance of about 400 yards on Friday and Saturday, the road being impassable except in a vehicle. The water rose very rapidly on Friday, Sheep's Green, Newnham and Coe Fen became impassable, whilst Chesterton Meadows became inundated the water encroaching halfway across the roadway at Water Street, Old Chesterton. The ferries below Victoria Bridge were unable to be worked during the weekend, but were able to resume on Monday. Although the commons were not flooded to anything like the extent they were following the blizzard towards the end of last month, large pools of water existed at places. At Jesus Sluice there was only a difference of about a foot between the levels of the water above and below the locks The river has now gone down, and is almost at its normal level 15 01 29 CIPof

1916 half sewage passed into river untreated, resignations from committee; due lack of care when laid pipes crack & water gets in from soil, but has transformed Cambridge from damp place

to dry & healthy - few years ago impossible to dig down 7 feet without hitting water, now 20 feet, mists stopped [2.2]

1916 flooded state sewage farm due to experiments to see what possibilities; daily flow 3 million gallons, can dispose of only 2 [2.3]

1920 Waters of Cam drawn to allow repairs Baitsbite Locks, temporary bridge at Horse Grind ferry – two ferries across river – Ch 20 10 06b

1921 Conservators know that condition of Jesus Lock was danger, if gave way would empty river ; decide to repair even though this will exhaust their funds – 21 06 08b

1921 River Cam Conservancy – application for new Act of Parliament – 21 11 16b

1923 steam dredger on Cam [1.3]

1925 The 100ft high chimney stack which has stood for close on 300 years on the site of the old disused flour mill at the corner of Mill Lane and Granta Place, Cambridge, was pulled down. A platform was erected at the base of the stack which rises from the now dry river bed, and fuel in the form of straw, wood and corn was placed thereon. The whole was then soaked with paraffin oil, a match applied and the work of destruction begun. But the old giant took a deal of shifting and it was not until the flames had licked about his feet for over a quarter of an hour did he sway and crash to the ground amid a deafening crescendo of falling masonry c25 11 21

1926 The clerk of the Conservators of the River Cam read a letter from the bank with regard to their debt. The overdraft was £3,842, in addition to which there was a loan of £4,000. The value of the Conservators securities appeared to be about £1,500. It may be better to ask the Corporation to lend them the money 26 02 06

1927 Cambridge councillors debated whether part of the King's and Bishop's Mill site should be sold to the University to erect new lecture rooms. The Corporation should not sell its property in this way; it should do so on the public market. They might get a higher offer from a firm who would like to put up a Woolworth building but they wanted an appropriate end to the Backs & such improvements would give an almost Venetian effect to the whole of the Backs river. To consider turning the site into a recreation ground with railings and white paint would be most regrettable. They should pull down the remains of the mill so that everyone could see what the site looked like when the fag-end of the foundations was up. It would expose some quite ugly buildings which would not be hidden by any plans before them CDN c 9.4.1927

1927 The Conservators of the River Cam considered a scheme to make the river navigable for cargo boats up to the Quayside near Magdalene Bridge. Mr Banham had recently bought a vessel for conveying cargo and at present it can only come as far as Jesus Lock. There had been no traffic for years and the state of the river was very bad. There was a possibility that the river could be dredged but the Commons Committee had taken a lot of trouble to make Jesus Green a beauty spot and would not sanction the deposit being placed on the Common. July 10th 1927

1928 Cambridge councillors recommended Robinson Crusoe Island should be cleared of dilapidated buildings and overgrown trees. Two rustic footbridges should be thrown across the stream and the island let for use either as a tea garden or for boatsheds. The place was in a deplorable condition and if something were not done there would be no Island to discuss. The surface was low and if the river were at the ordinary level it would be under water. It should be turned into a beauty spot rather than the dirt spot it was at the moment. c28 07 25

1928 Members of the Cambridge Drawing Society made a strong plea for the preservation of the character of the King's Mill site, protesting against the Council's scheme for the demolition of the old Mill-race and the erection of a weir. They are thankful that proposals for a tea garden and rustic bridge were not passed but feel its unique character will be utterly destroyed. The two King's and Bishop's Mills were amongst the oldest things in Cambridge, and a monument of romance. A cascade was all very well for Bedford or Tooting but was out of keeping with the spirit of Cambridge. c28 07 31

1928 Sir – the north end of Robinson Crusoe's island, Coe Fen, is occupied as a boatyard, the oldest centre for boating for the Freshers' river and a very charming spot. The southern end is occupied by the old ferryman's cottage and his garden, now derelict, but there are still standing upon it a large dilapidated greenhouse, a poultry yard, now deserted, and a neglected summer-house with a privet hedge. There are a dozen fruit trees, now dying because their feet are in the water, and a number of rose bushes. The neglect of the garden is due to a subsidence which allowed the river to flood it and turn it into a marsh. The cottage, before the iron bridge was built, was a licensed house and those who liked to refresh themselves with a glass of beer were ferried across the river free of charge – C.F. Clay c28 08 04

1929 A young Cambridge lady in attempting to make a short cut across Midsummer Common to the towing path became embedded in the half-frozen silt and mud thrown up by the dredger. Another lady went to her assistance and suffered a similar fate. Their frantic signals soon attracted the attention of passers-by; two or three young men waded out to them while others formed a human chain. The would-be rescuer was extricated with little difficulty but the first lady became more deeply embedded. Eventually a ladder was procured and a rescue effected. Fortunately no bones were broken but she was so badly shaken up by her ordeal that she had to be removed on a hastily-improvised stretcher CDN c 27.1.1929

1929 For the first time since 1895 there was skating on the River Cam. A thick sheet of ice powered with white snow, stretched unbroken from Silver Street to the electric light works. It was too inviting to be resisted and several skating parties took advantage of it. Many undergraduates took to the ice in front of King's College and at Quayside a man was seen cycling on the slippery surface. However the ice bore and he neither came off nor went in. At Silver Street it was possible to cross to the mill on the ice but below Jesus Lock, where the dredges is at work, the ice was broken up by the flow and black pools and crevices had appeared in the thin surface. 28th January 1929

1929 Sir – I have watched the progress of H.M.S. Dredger at present operating off the footbridge, Chesterton Road, Cambridge. Some months ago they dredged one half of the lower river in the vicinity of Jesus Locks and deposited the sludge on the Chesterton side in the river; later the dredged the river above the locks and deposited the sludge in the actual place previously dredged - 'One of the financing party' CDN c 9.3.1929

1929 Cambridge council agreed that the site of Grantchester Mill should be purchased by the corporation, they will offer £1,000. The house was formerly tenanted by Mr Nutter and carried with it the water rights and control of the river right through. This was of extreme importance to the town but what would they do with the meadow and the banks of the river? The bridge was built by Merton College for the use of the mill and might be a liability as it had never been taken over by Chesterton RDC or the County Council. CDN 13.12.1929

1930 new sluice gates Mill Pool [2.7]

1930 Cambridge councillors rejected plans for the erection of a bungalow on Robinson Crusoe Island & decided the existing old cottage and shed should be demolished and that the Surveyor should report on the erection of suitable sheds for boating purposes. They also considered land at Town Close, Old Chesterton which is occupied by numerous caravans; their appearance is most objectionable and they should be moved 30 07 22c

1930 The railway came to Cambridge in 1845 and was carried onwards to Ely by a trestle bridge; this was replaced by a low girder bridge until April 1930 when crowds descended to witness its replacement by a much larger and stronger bridge. The operation was a spectacular one, commencing at midnight engineers worked in the light of white acetylene flames to cut the steelwork in the centre of the old bridge and remove the track at either end. It was then raised on hydraulic jacks before being removed. Then the new bridge which had already been erected alongside was carefully moved into place, the lines reconnected and all was ready for trains to run again. 30 04 28 [2.1]

1933 River Cam dredging lower river complete, since July 1923, enough silt removed to cover Parkers Piece to depth 6'10", 30 years till next clearance necessary [2.2]

1933 The Cam Conservators heard that dredging operations had been carried out from Clayhithe to Baitsbite. There were still 700 lineal yards to complete, which meant about 20 weeks work but then they would not have to do any more dredging for up to 20 years. They ought to advertise the sale of the dredger so it could be seen at work. The men working the machine appealed for an increase in wages but this hardly opportune as it would only be used for a few more months. 33 01 11

1933 The Cam Conservators have recently completed the dredging of the lower river. Since the dredger commenced operations in July 1923, enough silt has been removed to cover Parker's Piece to a depth of six feet 10 inches. It will probably be 30 years before another clearance of this nature will be necessary 33 07 15

1933 Since the dredger commenced work on the Cam from Clayhithe Bridge to Baitsbite Lock it had removed enough mud to cover Parker's Piece to the depth of six feet ten inches. Now it has been sold. Weeds had also been cut and removed. Conservators agreed to continue with the full staff of men until they had got the banks into reasonable condition, and their wages increased to 38 shilling (£1.90) a week. 33 10 05

1934 dredging the Cam – 34 05 07

1936 Sir – May I appeal to persons not to throw into the river metal containers, such as petrol cans, which float about. The cans do not much matter to sail or power boats but might upset a skiff or even a pair. To cast dead dogs and cats into the Cam is a filthy and barbarous practice. I cannot think all the dead animals – five counted yesterday – died by 'misadventure'. Surely unwanted or sick pets would be better disposed of by use of the places where these things are attended to – Navigator 36 05 26

1938 'Desperate measures' are needed to save part of Queens' College where the river wall of the Essex block is in a severe state. It is absolutely necessary to deposit a bank against the wall to avert a disaster and when made temporarily safe the foundations will have to be underpinned, the Cam Conservators heard. There was concern that Silver Street Bridge might also be slightly under-mined and it should be rebuilt when money was available. 38 04 20a

1938 Queens' College have commenced a Chancery Court action against Cambridge Corporation seeking to prevent them from diverting the Cam at the sluice near the former King's and Bishop's mill so as to undermine the college buildings in Silver Street and seeking £5.150 damages for damage already caused. The Town Clerk has been instructed to protect the Corporation's interest and take any action advised by their counsel 38 12 10

1939 Baitsbite Lock in very bad state, to repair in reinforced concrete 14 11 13

1946 Baits Bite Lock plan for Nissen hut tea-garden rejected – 46 12 13

1947 suggestion that Byron's Pool be given to Borough by Pemberton [1.1]

1947 Cambridge has been hit today by some of the worst flooding for 30 years. The rapidly rising and flowing river has invaded riverside homes, Midsummer Common and other open spaces are flooded, there have been fears for the safety of Silver Street bridge, and there is no sign of any diminution of the abnormal flow. There is an unconfirmed report that the Byron's Pool sluice has broken, and Grantchester Meadows and the "Backs" are completely under water. Silver Street was closed to all traffic during the morning. There were fears that the rush of water would seriously affect the foundations of the bridge. Street lighting was switched on in Linton when residents of houses in Meadow Lane and Chapel Terrace made a hurried evacuation of their waterlogged homes. The water rose to well over knee-deep but was subsiding this morning. At Sawston the sub-power station was marooned and electricity was cut off this morning. The Great North Road beyond Brampton is under water and the A.A. scout at Brampton cross roads was "up to his knees" at his post this morning c47 03 14

1948 The River Cam Conservators considered a request from the Eastern Electricity Board to run cables under the river from Magdalene college to Thompson's Lane. The Board propose to cover the cables with bags of cement in order to protect them from punt poles. Mr Burrows informed the meeting that dredging of the river was proceeding most satisfactorily. Following the meeting the Conservators set off for Bottisham Locks on board the "Viscountess Bury", but had barely left Jesus Lock when it became stuck in a sandbank 15th July 1948

1948 Pollution of the river Cam above Baitsbite Lock which resulted in thousands of fish dying was described at a meeting of the Federation of Anglers as "appalling and dreadful". Mr C. Baxter stated that on Wednesday evening the lock was "absolutely clogged" with fish of every conceivable type, not dead, but on top of the water, gasping. 2nd November 1948

1949 River widening has been carried out by dredging operations by Silver street bridge, Cambridge. The dredging, which attracted much interest whilst in progress, was undertaken so that flood water coming through the sluice gates from the upper river can pass around the loop of the river at a reduced velocity and so lessen the possibility of damaging the buildings situated on the river bank. Further alterations are to be made to the sluice gates during the year to assist in de-energising the water passing through them c49 02 02 [2.3]

1949 Cambridgeshire federation of anglers were told there were thousands of fish in distress in the River Cam near Jesus Green footbridge on July 15th. The lock keeper opened the locks to let them through. Unfortunately a lot of the fish were dead, but there was no doubt that thousands were saved. Many big fish were taken in nets by men and placed in water downstream. Many dead fish had since been seen further downstream and Major Gordon Fowler said there were dead fish "as far as the eye can see" 28th July 1949

1949 People passing over Magdalene Bridge this morning were surprised to see the usual colour of the River Cam had changed to a bright green. The discoloration extended from the bridge along the Backs of the colleges and beyond. It will be recalled that following a discoloration of the Cam last year – not then green – a public meeting of protest was called by the Federation of Anglers. 22nd November 1949

1950 bank collapse Riverside near Gas Works; previously collapsed 30 years ago; wall Strange's boat house to Stourbridge common built in those years, all had piles [2.4]

1950 River Cam polluted by discharge from firm at Bourn, tons of dead fish float downstream [1.9,1.10,1.11,1.12,1.14]

1953 High water levels on the River Cam have now dropped considerably at all points except at Bottisham Locks and all precautions for dealing with any emergency during the period of the Spring tides have been completed. A tide warning system will be put into operation; the number

of patrols will be increased and emergency gangs, transport and materials made available at short notice. Coastal weather and tidal conditions are received by teleprinter at the Great Ouse River Board's Ely headquarters and police are ready to issue any necessary warnings 14 Feb 1953

1954 tunnelling Coldham's Lane railway embankment for flood relief scheme [2.5]

1954 Parts of the river Cam were frozen over this morning after a night of extremely cold conditions. The maximum temperature yesterday was 31 degrees F. but last night it dropped to 18 degrees. The severe weather had caused all previous output records to be broken at the Cambridge Gas Works. 28th October 1954

1955 Complaints of flooding in the Hauxton Mill to Shelford area have been investigated and the River Cam will be dredged to eliminate the risk of summer flooding. No such scheme for improvement has previously ever been undertaken by the Great Ouse Catchment Board. The proposed by-pass at Barton Mills would involve a dual-carriageway bridge directly over the lock gate and reduce the length of the lock by 25 feet. But there was no active navigation on this part of the River Lark and a combined bridge and sluice structure could be built. 17th February 1955

1955 The annual punting race between the Oxford University Charon Club and Cambridge Damper Club is a relay with the lady member of the team acting as baton and hastily jumping from punt to punt at the end of each 'leg'. For the eight gentlemen on each side it was a perspiring afternoon; both wind, water and pole were playful and both of the 'batons' nearly suffered a ducking. Gradually it developed into a cross between a water-polo match and a life-saving exhibition. 55 05 09a

1956 sewage pumping works extension [1.15]

1956 further pollution to Cam from Duxford chemical works [1.16]

1956 Samples of water taken from the River Ouse at Huntingdon after many fish were killed on the Newton stretch of the river contained traces of cyanide. It came from the normal effluent discharge from Huntingdon Council's septic tank at Hartford. No other sources of pollution were found and the only chemical spraying was using a non-toxic weed killer. It was important that the district pollution prevention officer should be on the telephone, but the Post Office did not have the necessary equipment. 56 07 20b

1957 A new shelter has appeared on the towpath near the Pike and Eel. From the beautifully executed Latin inscription it is clear it has been built in memory of the late Roy Meldrum who devoted his considerable rowing knowledge and coaching skill to Lady Margaret and the Cambridge University Boat Club. This simple, dignified tribute will do a service to all who love the river, especially those who coach on the exposed banks of the Cam 57 02 21

1959 Flood patrols are out as part of Walnut Tree Avenue is still under water, Banham's boathouses are surrounded and Pye's Bridge difficult to get to owing to the swirling water at the base. Many parts of the bathing sheds on Sheep's Green have so much water in them that it rushed out of the doors leading to the Common taking with it bottles, waste paper basked and broken wood from the fences. The men working on the new Silver Street Bridge are still carrying on though the pedestrian footbridge is now closed as the water is up to the footboards and is considered dangerous. 59 01 08

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1959 Hawthorn Way flood relief scheme – 59 11 26

1960 consider warning bathers re pollution of Cam [3.1]

1960 £1.3M sewage improvement scheme approved, 4© miles new pipes Fen Causeway - Halingway; new sewage pumping station combat threats foul flooding & many residents in constant fear of flooding in storms, take up carpets & pile furniture when go on holiday; basis present sewers 1890s [3.10,3.11,3.12]

1961 "a very slight risk" [3.2]

1962 Gas Board to pay cost of decontaminating River Cam after oil from the Gas works polluted the river – 62 01 25 concern pollution effluent gas works [3.4]

1962 Robinson Crusoe Island, the strip of grassland in the River Cam between Fen Causeway Bridge and the Mill Pool, is to be developed as a beauty spot. Scudamore's boat building company will plant flower beds and lay lawns; old tree stumps will be uprooted and an old boat store pulled down. It will probably be used as a stopping-off point for people punting or rowing to Grantchester. Extensive works are also being carried out to the river bank along the frontage of the Garden House Hotel as part of a gardens improvement scheme 62 03 27a [3.5]

1962 Sir – one of the loveliest spots on the River Granta is being destroyed. I refer to the woods on the upper river aptly called 'Paradise' During the war the hedge that gave shelter from the wind all the way to Grantchester was taken away along with a number of fine young walnut trees. Byron's Pool has lost all its former beauty and is an eyesore, filled up with tree branches and mud so that swimming is dangerous. Up to 1945 the water was crystal clear and drinkable. Now it has become a dirty, muddy stream, polluted and unfit for bathing – B.G. Cash. 62 02 21

1963 River Cam freezes [3.3]

1964 River Cam memories from the 1920s – feature – 64 06 19b

1965 water & sewage floods as clouds burst over city [3.13]

1965 River Ouse & Cam locks & lock-keepers, Bottisham & Brownhill – 65 09 02

1966 Great Ouse River Authority open new HQ at Gt Ouse House, Clarendon Road; will be shortage of water; formed in 1920 to take over work Bedford Level Corporation – 66 09 23a

1968 Riverside pumping station opened [29.8.2.5]

1971 pollution outside Cambridge caused by low oxygen levels [3.6]

1972 cost £500,000 bring effluent up to GORA standards [3.16]

1973 discharge of raw sewage from pumping station kills fish [3.8]

1973 Waterbeach may get a £150,000 by-pass instead of just a new minor road into the village - because of Cambridge's traffic problems. If the plans are accepted the by-pass will link the main Cambridge-Ely road near the Slap-Up junction with the Clayhithe Bridge over the River Cam. The mile-long by-pass would replace the short stretch of road originally planned to link the A10 with the centre of Waterbeach. The County Surveyor said that the by-pass was now being recommended because of the large volume of traffic using the Fen Ditton - Waterbeach road as a short-cut to the Eastern side of Cambridge to avoid the congested city streets 18th June 1973

1973 Mini "bombers" are terrorising tourists on the River Cam. Mr Bell of Scudamore's boatyards, Mill Lane, Cambridge, said "A lot of people who cannot swim go out on the river. It seems nothing is going to be done till somebody is seriously injured or drowned". He said youngsters were playing "bombing" games, jumping in at the iron bridge and diving boards near the swimming pool and landing as close to the boats as possible. He understands that youngsters involved are in the seven to 11 age group 18th August 1973

1974 River Cam “in filthy condition” [3.8]

1975 swimmers ill after swimming Cam [3.9]

1975 8 million gallons of effluent from sewage daily, 7.6M galls unsatisfactory [3.10]

1975 The River Cam is not only so polluted as to be a bather’s health hazard, but in recent years has had to be artificially aerated to keep fish alive, an Anglian Water Authority spokesman has confirmed. He spoke of children who suffered “diarrhoea and tummy upsets” after accidentally falling into the river in the Clayhithe area, and of skin divers who were ill after a sponsored Cam swim. He agreed that via Milton Road sewage works some 8 million gallons of effluent were going into the Cam daily c75 06 14

1976 Giant oil slicks choked the River Cam following failures in the city’s drainage system at the height of last night’s storm. Oil poured into the already heavily polluted river as interceptor tanks were overwhelmed by the sudden surge of water and workmen erected booms at points where drains entered the river. It appears the oil could have come from the Garlic Row area and may have resulted from oil which has collected in the drains during the spell of hot dry weather c76 07 17

1976 oil pollution, Bin Brook dammed, traced to Churchill College , March [3.11]

1976 swimmers warned over pollution levels, Jul [3.12]

1976 The River Cam is so polluted at Waterbeach that people who fall in it suffer from skin trouble and are sick if they swallow any of the water, claimed Coun Hilda Hatley. She said that a special anti-algae paint had been stripped off the bottom of a boat by the water. Councillors agreed the problem was the severely over-loaded Cambridge sewage works. 2nd May 1976

1976 The annual swim through Cambridge, organised by the Granta swimming club, has had to be cancelled for the first time in about 40 years because of the low level of water in the river Cam. Because of possible pollution problems they dare not risk the health hazards involved but hope to put the event on again next year. Typically 70-75 women and about 80 men would enter the event 22nd June 1976

1976 Giant oil slicks choked the River Cam following failures in the city’s drainage system at the height of last night’s storm. Oil poured into the already heavily polluted river as interceptor tanks were overwhelmed by the sudden surge of water and workmen erected booms at points where drains entered the river. It appears the oil could have come from the Garlic Row area and may have resulted from oil which has collected in the drains during the spell of hot dry weather 17th July 1976 [3.13]

1976 The River Cam is being downgraded from its present status as a top-class river because of its deteriorating condition, mainly due to sewage and oil pollution. Downgrading would be a black mark against the Anglian Water Authority. More money will have to be spent on sewage treatment. Its Scientific Director said there had been an improvement during the past year, but low flow had aggravated the situation 76 12 18

1977 annual swim through Cambridge cancelled due pollution [3.14]

1977 Conservators criticised over filthy disgusting River Cam [3.15]

1977 River Cam Users Committee formed [3.16]

1977 There are those who say that swimming in the Cam is only marginally less dangerous than going for a dip in an oceanful of sharks. There are others who swim in the river day in, day out and are the very model of health. The two sides met at the annual visit of the City councillors to the slowly decaying bathing huts on Sheep’s Green. The Mayor said: “We’re told the Cam is polluted. All we can say is: Swim, drink it and kill yourselves. Only don’t say you weren’t warned” c 77 08 02

1978 Baitsbite Lock most expensive in Kingdom through which take boat [3.17]

1978 £3.7M improvement sewage treatment works completed after 2 years work, able cope 160,000 people, higher standard of effluent [3.18]

1978 Bin Brook spills over flooding houses in Gough Way, channel to divert flood water considered 1980 [5]

1978 The cost of providing a complete flood protection scheme for the Newnham and Riverside areas of Cambridge would be 'totally out of proportion to the benefits, however desirable', councillors have been told. Flooding occurred for two days on the Gough Way housing estate when the Bin Brook overflowed during heavy rain and the River Cam overflowed its banks at Riverside during the same period. But the emergencies arose from exceptionally heavy and intense rainfall for which it is not reasonable to provide capacity within the sewers, water courses or main rivers and relatively few residential properties were actually flooded 30 Jun 1978

1978 Cambridge sewage treatment works have been accused of turning the River Cam into one of the dirtiest, smelliest and most turgid stretches of water in the country. Now the works have been transformed into Anglian Water Authority's pride and joy – almost. It has been their top priority project but has generated fierce controversy with an eighteen-month sewage embargo prompting sharp criticism from local councils anxious to go ahead with development plans. At present the works cope for a population of 120,000, and there is scope for 165,000. But the river itself is already near the top of the Department of the Environment classification for chemical pollution 30th September 1978

1978 David Patrick, paddled down the River Cam in a boat which is thought to be the last of its kind afloat on the river. He bought the Princess Jane when she was used as just a floating platform for an overhaul of Ely High Bridge. It was pock-marked by rust, her steam engines were removed and she was without a wheelhouse. Now he has restored the paddle tug to its former glory. But sadly when the new steam engines are fitted the boat will need deep moorings, of which there are few along the river. 27th June 1978

1978 Cambridge sewage treatment works have been accused of turning the River Cam into one of the dirtiest, smelliest and most turgid stretches of water in the country. Now the works have been transformed into Anglian Water Authority's pride and joy – almost. It has been their top priority project but has generated fierce controversy with an eighteen-month sewage embargo prompting sharp criticism from local councils anxious to go ahead with development plans. At present the works cope for a population of 120,000, and there is scope for 165,000. But the river itself is already near the top of the Department of the Environment classification for chemical pollution. c78 10 28

1979 mass of floating oil sets Cam on fire [3.19]

1980 Sea Cadets have discovered a hoard of sunken treasure worth thousands of pounds in the River Cam. Their boat's engine failed and it was found that a fur wrap had fouled the propeller. Whilst attempting to free it they discovered parts of a suitcase containing silver cups, candelabra and boxes of jewels. Police put a guard on the river until divers could carry out a full search. It is thought to be the proceeds of a major crime and is now locked away at Cambridge police station 80 06 30b 30 Jun 1980

1981 thousands of fish die after storm brings pollution, restocking take more than 10 years; blamed on AWA as Riverside pumping works unable to cope, raw sewage flowed into river at height of storm, 93% total fish stock killed [4.1]

1981 The best thing than can happen to anybody who falls in the River Cam is to drown; the alternative is to catch all kinds of horrible diseases, a councillor said. Everything goes into the

river, which is one big drain. They would like it to be made safe for bathing but it was impossible to stop chemicals and fertilisers being washed in and would mean higher water rates. 81 01 29
1981 It is likely to take more than 10 years to restock a polluted stretch of the River Cam in which hundreds of thousands of fish died. Anglers say that fishing in the city has now been entirely wiped out. Around four tons have been removed from the river near Bait's Bite lock but many are still floating. It is feared that as well as causing a smell, the rotting fish could cause further pollution. It is suspected that raw sewage was washed into the river during heavy rain. 81 07 15a

1982 oil pollution - 4th serious incident in 18 months [4.2]

1985 Councillors considered proposals for a floating restaurant and waterbus on the River Cam. Two electrically-powered boats would run from Jesus Green through the Backs. One would be used as a quality restaurant and the other provide visitors with a running commentary in various languages. But they would destroy the beauty and serenity of the river; it is not a commercial waterway and there is already a lot of disturbance from punts. 85 05 07a

1985 Car floating on Cam after May Ball – 85 06 10

1986 A K-registered Ford Escort was found dangling from Clare College bridge. The vehicle came from a scrapyard but it remains a mystery how it got there. One theory is that it was brought down the Cam on punts then hoisted up and lashed into place with ropes and chains. The jolly jape brought laughter from river users but now the college is faced with removing it. They are seeking advice from King's who last year removed a Fiat that was 'parked' in the middle of the river on stilts 86 06 18c

1987 The AA were inundated by calls to motorists stranded in the snow and hundreds more were caught without anti-freeze as overnight temperatures plunged to -11C. The River Cam was iced up for the first time in five years and skaters were out in force on the flooded fen at Earith in perfect conditions of ice, sun and no wind. Many were practicing for the Fen Ice Skating Championships but for others it was pure pleasure. 87 01 13

c.47.4 : directories (started 08 2010)

1899 Frederick Morden told Cambridge court that the prisoner represented himself to be the representative of Messrs Stubbs Directory & asked if his advertisement should be inserted for another year. The price of the advertisement was four shillings which he paid. Later another representative called canvassing for the 1900 directory and he paid another five shillings. The managing director of Stubbs publishing said the prisoner had been employed as an agent for many years but had heard nothing from him since September. On searching the prisoner a number of slips of paper containing the names of different tradesmen were found 1899 04 10

1910 The Directory dodge is one of the oldest swindles to which the businessman is liable. A well-dressed man called on Miss Margaret Hurry and asked her to subscribe to "Spalding's Directory" which had done her a lot of good the previous year. But the firm said he had nothing to do with them. He had also called on two others claiming to represent the "Post Office Directory" and taken a shilling from each. It was a common trick and many preferred to lose the money rather than take the time to give evidence in court 10 09 02

1924 The 1924-5 edition of Spalding's Directory for Cambridge shows progress has been made with the development of various building estates and we find for the first time the names of Hawthorn Way, Harvey Goodwin Avenue, Haig Road joining Chesterton and Cam Road, and Coleridge Road which is the name given by Jesus college to the new road between Cherry Hinton road and Romsey Town c24 10 05

1937 The Blue Book Directory of Cambridge, published by the St Tibbs Press, comprises not only streets, trades and names of residents but also a wealth of information and a portrait gallery of our civic fathers (and mothers). An endeavour was made in 1936 to cover the immediate environs, including Shelford, Sawston, Milton and Grantchester. Now it has been enlarged to bring in Girton and Cottenham together with details concerning new or extended streets on the outskirts of the borough. It is extraordinary good value for five shillings. 37 01 09a

1950 Messrs Kelly Ltd, publishers of over 200 directories, have begun work in preparation for the second Cambridge edition, which should be ready next year. A staff of some 40 people are engaged on the work and during the next six months representatives will be in Cambridge compiling the new edition and checking names, addresses etc. The book will contain a streets section, commercial section, private residents and classified trades sections. It will also include streets on the post-war housing estates in the borough c50 04 17

c.48 : place names

started April 2008

1933 Sir – the gravel footpath from Brooklands Avenue along Hobson's River up Empty Common has long been known as Finch's Walk. But how did it get its name? Some people call it Senior Wranglers' Walk and connect it with the name of the Rev G.B. Finch who was Senior Wrangler in 1857. But he never mentioned that he had anything to do with it. In an 1834 deed relating to the Hobson's Conduit Trust there is mention of two trustees called Charles Finch, one of whom died in 1762, who had a foundry and ironworks in Thompson's Lane – W.D. Bushell. 33 05 19b

1933 Finch's Walk name and ironfounders – 33 05 27 & 33 06 03a

1958 Scotland Road estate road names – 58 04 22

1961 Whitehill and Peverel housing estates have no claim to antiquity but their names have considerable historical interest. The Whitehill Estate occupies an area which was for about eight years, the first Marshall's airfield, and before that Whitehill Farm. The first houses to be built in the area was Elfleda House, alias Whitehill, which after 70 years occupation, has just been demolished to make room for maisonettes. Elfleda was a great Saxon benefactress whose husband was killed when fighting the Danes. Peverel Road commemorates Lord Pain Peverel, standard bearer to King Henry I's brother while Jolan de Thorleye ruined his health trying to clear a debt of 600 marks on his church. 61 04 11

headlines

1888 1st large scale OS maps surveyed 2 years before published; Free Library purchase [Ch.13.4.88 p4]

1901 consider closing Emmanuel Street & new road St Andrews St to Drummer St - “gain a fine new road instead of an inconvenient one [1.6]

1903 Cambridge architect Edwin Bays has produced a plan for a new 60 feet-wide road from Downing Street to Guildhall Street, parallel to Corn Exchange Street. This would create valuable frontages for business premises on either side and lead to a site for a new Cambridgeshire County Hall. There would be a fountain to take off the nakedness of the wide entrance at St Andrew’s Hill, replacing the old Corn Exchange. It would relieve the congested traffic in the narrow Petty Cury and provide a direct access to the chief colleges. c03 12 23

1905 road across Coe Fen opposed [1.7]

1907 propose widening Fair St, Park Terrace, Guildhall St etc [1.8]

1910 Council make new road to connect Clarendon St & New Square [2.15]

1912 Council consider proposed scheme for new road from Mill Pool to Coe Fen; proposals to spend £14,000 relieve traffic Sidney St arouses protest [2.16.2.17]

1912 A new scheme for relieving the traffic in Silver Street recommends a new road and bridge passing on the east side of the old mill and along the wall of Peterhouse to Coe Fen Lane at a total cost of £14,246 (£1.3m today). The Corporation had purchased Mr Foster's mill. It was at present broken down and would never be used as a mill again. But there was a strong feeling against a road across Coe Fen and Sheep's Green; it ought to be more in line with Mill Lane. An alternative would take a road from Barton Road corner to Belvoir Terrace but this would destroy the bathing place. However some councillors said the congestion had been greatly exaggerated and there was no urgent need at present. 12 08 09c & d

1912 Silver Street traffic – Meik's scheme – 12 08 16dd & ee

1914 Cambridge Town Planning Committee had been in existence only a few months and had not yet decided anything in the way of town planning or building houses, the Mayor told a conference on Rural Housing. The Public Health Committee had erected dwellings for the poorer class in one part of town, some people thought them ideal and some otherwise. Some of the houses he would be sorry to lose from an antiquarian point of view but others, from a public health point of view, they would be exceedingly glad to lose 14 03 27, aa

1917 The future of Cambridge; prospects of the University; need for new industries: special article; pre-war prosperity dependent on University, building trade, agriculture and residential population; hopes for industry – 17 01 17a

1919 Town planning scheme selected – Romsey Town, Cherry Hinton, Coldham's Lane area – detailed article – 19 04 30a

1920 Planning inquiry as Cement Company object to their land being included in town planning scheme # - CDN 20 03 01

1920 Cambridge Town Planning inquiry considers objections of cement manufacturers about land Cherry Hinton Road; proposes new road from Cherry Hinton Road to Fen Ditton Road across Coldham's Common; had been excavation for coprolites and foundations were bad, brick pits. Was good supply for Cement works but this meant noise, dust and smoke – Ch 20 03 03a

1920 New Road, — A proposed road in Cambridge, which new will relieve the pressure of traffic in Silver Street, was described at a meeting of the Cambs. County Council on Saturday. The Town Council had written to the County authorities stating that they proposed to promote a Bill in the ensuing session of Parliament, and that they would be prepared to insert a clause providing for the construction by the County Council for a by-pass road from the Barton Road to Hills Road, with the necessary bridges. The Roads Committee of the County Council considers that such a road would be a desirable improvement, and the County Surveyor, the County Architect, and the Borough Surveyor are to confer with a view to preparing a plan showing the suggested links for the proposed new road, together with an estimate of the cost. Alderman J. Q. Vinter said that the time had come when there should be proper communications between these districts. Councillor W. L. Rayners observing that the scheme might not be clear to some members of It consisted of a road starting at the corner of the Barton Road, next to the Caius Ground, going down over a sort of drift way towards the bathing sheds at the bottom of the Lammas Ground, which the Borough bought a little while ago, then across some private land reaching the river. There was a bridge, and over that bridge the road would join

on the Pemberton Estate and link up with Chaucer Road, then reaching the main London road. It would then turn back a little way to the bridge over the Brook, joining up with Brooklands Avenue. It would make a main by-pass road which would avoid the necessity of using Silver Street, a main road with a bridge which was often dangerous for the traffic. The County Council agreed that the Town Council should be asked to insert a clause to the proposed bill which enable 20 04 21 CIPof

1922 County empowered to prescribe building lines [1.13]

1928 Planners suggested there should be a belt on the west side of Cambridge where, if there were any development at all, it should be very sparse. Most of the land belonged to the colleges and it would be a good thing if they got together and put their estates into the hands of an association so that land which would be sterilised would be balanced by other where development was allowed. Ribbon development was bound to continue but there should be a very wide belt between the road and the houses. While people could buy frontages to public roads at about £2 a foot they did not mind going out a few miles. c28 09 09

1928 “There are probably a large number of people in Cambridge who would like to pull down half the colleges for street widening purposes and more who would be entranced by a design for a new King’s College Chapel, done by the Borough Surveyor and suitably embellished with pagodas & geraniums”, claims The Observer. The article includes the headlines ‘A Threat to Cambridge. The Vandal on the Backs. Blackpool-on-the-Cam’. It reveals how ignorant they are of modern Cambridge opinion. c28 10 27

1922 The Ministry of Health Inquiry into the proposals for the development of the east side of Cambridge was conducted at the Guildhall. There was practically no opposition. It will be remembered that the scheme provides for the laying out of 21 new roads or streets, including a main road from Hills Road to Newmarket-road. The area includes 502 acres in the rural district of Chesterton c22 09 16

1930 There never was a time surely when there were so many works of destruction going on as at present. Little bits of old Cambridge are going one by one and elaborate new buildings are rising up in their place. Following demolition in Petty Cury and Sidney Street now we see old houses and shops in Sussex Street being knocked down. No wonder that those who come back to the town after a few years’ absence express amazement at the changes they see. When we think of the bridges built at Newnham and Chesterton, of the streets that have been widened, the new recreation ground opened and the great business changes effected in the heart of the town we may well gasp. 30 03 22 a

1930 Cambridge planners say that Huntingdon and Barton Road are already practically fully developed on both sides, similar building is taking place along Trumpington Road & housing in Madingley Road will increase now the sewers are laid. There will probably be spur roads which will have no regard to the traffic needs of the area as a whole and the result will be a hotch-potch similar to that before the days of town planning. Soon there will be no possibility getting a cross-road between Huntingdon Road and Trumpington without the demolition of buildings or serious interference with the land-owners. 30 07 21a-c

1930 Cambridge councillors have received consent for a new road from Milton Road to Histon Road at a cost of £18,135. St John’s College would give the land which was required for housing purposes, it would be one of the best estates and the frontages would sell at very high price. Grants have been received for King’s Hedges and Green End Road as part of the unemployment scheme with one-third of the labour being imported from the distressed areas. 30 07 25d

1930 Another example of the ‘new Cambridge’ in the making is the extensive site on which Magdalene College intends erecting an imposing new wing. It is at the rear of the Pickerel and

Cross Keys yards originally occupied by Bird's vinegar and mustard factory. Mallory Court will provide the principal access but eventually a complete transformation will be effected by the demolition of all the property between the bridge and Northampton Street making Magdalene Street a broad and handsome thoroughfare. 30 09 03c

1931 deed of covenant signed by Cambridge Preservation Society, Kings college & Borough council for preservation of college land in Grantchester area; Society paid £7,549 into university & college estates account of Ministry of Agriculture & Fisheries to safeguard college land from development, part of £10,000 grant from Pilgrim Trust; borough undertake not to plan any ring or other road crossing college property or sited nearer to Cambridge than southward of the village of Grantchester [4962.9]

1931 The parishes of Histon and Impington will vote on proposals for an extended Borough of Cambridge taking in the rural district within a three-mile radius. There was little desire on the part of rural residents to come into the Borough, there was no real community or interest between them. Cambridge would really be a little county with a population greater than Huntingdonshire. But what was left of Chesterton RDC would be unable to function and the administration of the rest of the county would be extremely difficult. 31 08 21c

1931 The question of the development of the industrial side of Cambridge has cropped up periodically over a good many years. Hitherto works and factories have not been encouraged - the serene, academic atmosphere should be maintained at all cost. But economic pressure, the diminution in the spending power of the undergraduates, depression of agriculture and trade have hit the town very hard. Cloistered calm is all very well, but people must live. 31 11 27b & c

1934 The Cambridgeshire Regional Planning Report, a handsome volume illustrated with original wood-cuts and photographs, contains many valuable suggestions for the development of the county. In villages the problem is not only one of controlling new development but also preventing their decay and alteration of character. Provision must be made for industrial expansion around Cambridge. The Government should construct new roads and the Roads Beautifying Association advise on the planting of verges with flowering shrubs to enhance their scenic value. 34 07 11 [3.1]

1935 new road suggested from Downing St to Sidney St [1.5]

1935 Cambridge Town Council was among the pioneers of town planning, the Mayor (Ald R. Starr) told a conference. "We town planned the eastern portion of our Borough in 1927. Why we did such a small portion I cannot understand, though I was chairing the committee, but we got on with it very satisfactorily. In 1928 we launched the Cambridge and district town-planning scheme and since then have been sticking very truthfully to it, dealing with difficult problems". Town planning is not smooth. It is full of snags with so many people to consult, he warned. 35 06 05 & a

1936 The Gog Magog Hills are in immediate danger. The rapid progressive uglification of Cambridge means that already the view is spoiled by 'the thoughtless spawning' of houses higgledy-piggledy. The Preservation Society has no money and it is no use leaving the matter to that body. Colleges and private owners should be compensated for the difference between what they would get by selling land for building and agricultural use. The 'Cambridge Daily News' should start a fund and undergraduates organise a flag day, Professor Rattray urges in an article in 'The Times' 36 05 25b

1936 The draft Cambridge town planning scheme would see the construction of bridges and closure of the level crossings at Histon and Shelford with footbridges for pedestrians. The line of the Ring Road from Huntingdon Road to Shelford was agreed and the difficult question of the aerodrome settled. 36 12 08

1936 Cambridge Town Planning scheme – 36 12 10g

1937 The Gogs preservation scheme is intended to secure the uplands and keep them open for the people of Cambridge at all time. The Prime Minister wrote a letter endorsing the appeal. There was a danger land might be developed for houses and once this started there was every possibility of it spreading. Speculative builders were spoiling the country. They bought materials cheaply and dumped them anywhere they chose, building incongruous houses all over the country. 37 02 25 & a

1937 Trumpington consisted largely of houses strung out along the main road but new plans for development on land owned by the Pemberton trustees would create a self-contained colony with a recreation ground surrounded by 280 houses. It would allow the village to develop a character rather than being a string of houses, an Inquiry was told. The Council would also like to borrow £13,300 to purchase part of the Cherry Hinton Hall Estate for public walks and pleasure grounds. The Hall might become a headquarters for the propagation of plants. This was likely to be a centre of considerable building development and it would be right to secure such open space 37 07 16

1938 King's Hedges Road was shown as a private carriageway under the Inclosure Award of 1840, so why was it now repairable by Cambridge ratepayers, Councillor Edwards asked. The Town Clerk said that in 1912, when the Borough was extended, part of King's Hedges Road was handed over by Chesterton Urban District Council as a highway repairable by the inhabitants at large and in 1934 the County passed over the remaining portion on the same terms. It seemed Chesterton UDC had simply begun repairing the road thus making it a public highway. It was a mistake made in good faith and it would be a waste of time to consider it further. 38 02 03b

1943 Cambridge will need 4,000 new houses after war say planners – 43 05 07

1946 Plan for new town in Cambs welcomed - 46 11 01; alternative to 'urban sprawls' – 46 11 05

1947 Cambridge loses planning powers to County under Town & Country Planning Act & Holford appointed consultant to County Council

1949 Holford Report presented to Borough for consideration - "did not consult them while preparing it". Considerable disagreement eg County want Spine Relief Road & to close Magdalene St while Borough want to widen it & rebuild bridge [1.11] (ironically the press report omits the word "out" to report statement: "it is possible to sort the traffic problems with widening ancient Streets throughout [1.10])

1949 population increased 16% between 1937 & 1949, compared to 1% for London; 500 due to national increase, 17,000 come to work in town; population now 84,000, should stop at 100,000 [3.7]

1949 Sir - I should like to see a stop put to the continued attempts to introduce new industries and build up Cambridge into an administrative centre. No one can deny that the town centre is grossly overcrowded consequent upon the locust-like plague of foreigners and civil servants that have descended during and since the war years. Wherever the spread continues the town centre will still be the main shopping centre and conditions will steadily deteriorate until it becomes imperative to demolish and rebuild and so destroy the old and loved Cambridge with its unique old-world charm, and transform it into something unattractive and ordinary – "Simplicitas" c49 09 15

1950 Holford report “over past 25 years many hours of laborious discussion have failed to deflect his plan from its course ... contained detailed drawings of Elizabeth Way route, the future of Mitchams corner, called for northern by-pass, west Cambridge university development; envisaged pedestrian precinct in which traffic banned but with spine relief route [17]

1950 Holford report suggests historic centre unable meet shopping needs of future, “We regard Fitzroy Street as ... a valuable relief for shopping pressure on the older centre” [9]

1950 Current tendencies towards over-planning and regimentation were criticised by the Master of Downing College at Leys School speechday. “I cannot but be disturbed at the modern tendency for intensive planning and indeed super planning where we have ever-growing hedges of regulations and a tendency to judge men by their records in a card index. Would the prize-winners of the future have their careers chosen for them by a civil servant – helped by a psychiatrist – who would study the child’s records from his first protest to the world to his leaving school. One day frustrated middle-age would rise in revolt and consign the super-planners to a gigantic bonfire of their own plans”, he said c50 06 26

1951 Lion Yard multi-deck car park plans [1.12]

1952 County Development Plan Inquiry [2.1]

1952 Ninety-one percent of the properties in the East Road area of Cambridge fell into the “short life” or “no life” categories the Development Plan inquiry was told. The area as a whole was described as “densely packed”. The age of the houses was about 100 years, they were generally poorly constructed and the worst property in Cambridge lay in the area. The plan envisages using Norfolk Street as a local shopping centre to keep East Road free for a traffic route. But Mr S.P. Yarrow, retail grocer at 35 East Road said that if he went to Norfolk Street his turnover would be cut by half. B.G. Reynolds of Renbro Wireless Services, East Road, said he had one of the best positions in the area and business would go down if he moved. They did not see why two shops in East Road should impede the flow of traffic. c52 11 15

1952 The inquiry into the County Development Plan has concluded. Its main object is the preservation of Cambridge as a University town & the deliberate prevention of its character becoming that of an industrial town or a town with large straggling suburbs. The problem of Cambridge was largely a traffic problem but measures to deal with this by the widening of streets would be a negation of the true object of planning which is to preserve the Cambridge we know today c52 12 27

1954 Minister announces decision on County Development Plan, City Council challenge it in Court but is approved. Basic principles : Cambridge should remain principally a University city; reduce the rate at which city is growing and stabilise population at not more than 100,000; to accelerate development of villages surrounding it to accommodate additional 7,500 people; provision of comprehensive road system capable of satisfying traffic requirements in city; to limit industrial expansion in & near Cambridge and to discourage the establishment of large industries of the mass-production type within the county (certain sites may be compulsorily purchased for purpose of rehousing those industries within city which require to be moved from existing sites);generally follow lines of original proposals submitted more than 2 years ago; only major items not approved are site of bus station between Christ’s college & Emmanuel & the proposed development for residential purposes of the smallholding land north of Arbury Rd during 1st 5-yearly period of the plan [18] [3.2,3.3,3.4]

1955 City appeal quashed [3.5]

1955 A scheme for the re-development of the Fitzroy Street area as the main commercial centre of Cambridge has been submitted by a London Architect. It is a counter-proposition to the official Development Plan which could only result in the eventual complete destruction of the essential character of the city. The greater part of the area consists of out-dated two-storey

cottages with extensive yards and is largely a slum. Re-development is due and can be done without the restrictions of historical associations and high land values. There would be a series of attractive courtyards unencumbered with traffic, one of which is large enough to take the place of the present Market Hill. An essential feature of the scheme is a new thoroughfare to link Gonville Place with Victoria Avenue and complete the inner Ring Road. 55 02 18a

1956 Arbury Estate starts [1.3]

1956 Kite area : Jesus College plan expected soon [2.3]

1956 proposal build 15-storey block flats Hills Rd - highest private residence block yet proposed in England [4.2]

1956 An enquiry heard that Cambridge city council had wanted to purchase land at the junction of Fitzroy Street and Wellington Street, pull down the old houses and use the land to re-site industry displaced from the East Road area. They offered to pay the current price but the owner, a former chairman of the Council's Finance Committee, said that if the land had potential for light industry then the price should be higher. Eventually negotiations broke down. Now he applied to redevelop the area, but the council opposed his plans. 56 04 19a &

1956 Councillors received a report on the redevelopment of the East Road comprehensive development area. The first stage provides for 51 dwellings – maisonettes, flats and houses – to house 206 people, as well as six shops and seven garages. Two more stages will see 212 dwellings, housing 737 people. There will be a district heating scheme from a central boiler house for the supply of hot water throughout the estate. 56 07 23a

1956 If the City Council feel unable to implement the development of the Lion Yard area, then the Government should nominate the County Council as the acquiring and development authority, councillors recommend. They have met University officials who have ask that a substantial area of floor space, including some at ground level, should be made available for their purposes. 56 11 01a

1956 A proposal to close Christ's Lane and provide an alternative footway between Drummer Street and St Andrew's Street was approved in 1954. But now Christ's College have proposed an alternative consisting of an arcade leading into a central courtyard then through another arcade to Drummer Street. The council would be responsible for maintaining, cleaning and lighting it 56 11 27a

1957 "a fever of demolition has seized the city" as little houses demolished East Rd area and elsewhere - Times [19]

1958 Elizabeth bridge proposed [8.4]

1958 An inquiry into plans for the compulsory purchase and clearance orders affecting 67 houses in East Road, Fitzroy Street, Adam and Eve Street and Gloucester Terrace heard from three objectors. Mr J.N. Baldry had plans to develop his site in connection with his mineral water business. But the Medical Officer said the area contained some of the worst houses in Cambridge : they were all unfit and clearance would serve the interests of public health. 58 09 25

1958 New schemes for the rebuilding of the Lion Yard car park and the surrounding area are being examined by town planning experts. It may be comprehensively re-developed to include a multi-storey car park and additional shopping facilities served by a new road passing through the middle of the area. But some say that instead of a broad shopping street, which might attract more traffic into the already overcrowded centre, it should be a 'pedestrian shopping precinct' with cars being parked a short distance away 58 12 22 [2.4]

1959 Lion Yard : City vote to go ahead with giant scheme, University object, Public Inquiry [2.5,2.6,2.7]

1959 Fitzroy St plans [4.3]

1959 The area between East Road, Norfolk Street and St Matthew's Street comprises narrow streets and courts of dwellings of the demolition standard, creating a general impression of decay. The whole area should be demolished and rebuilt, the Surveyor told an Inquiry. Every house in Staffordshire Street was damp, some roofs are sunken and some water closets are across the street from the houses they serve. But many owners objected to plans for compulsory purchase. 59 09 30c & d [4.5]

1959 abandon city ring road [4.4]

1959 The City Council is to consider the largest project ever undertaken in Cambridge. The giant Lion Yard scheme includes a two-decker underground car park taking 731 vehicles, a unique 'pedestrian shopping precinct', a new central library, residential hotel and a petrol filling station. Jesus College have also submitted a scheme for the redevelopment of the north side of Fitzroy Street. Many think that increases in shopping facilities ought to take place as an extension of this well-established area. 59 04 29a-d & 59 04 29e

1959 The giant scheme which is to transform the centre of Cambridge received the approval of the City Council. Not one hand was raised against it when the question of developing the Lion Yard—described as 'that revolting area'—was put to the vote. It would make it possible for townspeople to do their shopping away from the traffic on broad footpaths and provide a much-needed car park for more than 700 cars, removing the 'long-term parker' from town streets and leaving the kerbs free for motorists who wish to park for ten minutes. 59 05 01a,b, c & d

1959 "The Lion Yard scheme is the biggest re-development scheme yet in England, if we omit the blitzed cities". Ald W.G. James told the Women's Lunch Club. "In some respects it is more difficult, for the bombing often obliterated whole areas and redevelopment could start on virgin sites. Here, boundaries, established buildings and all manner of things have to be considered". Everyone agreed the area required comprehensive development but there was a divergence of opinion on how this should be done. A compromise was sought by 30 people on the County Planning Committee but as there were 30 different opinions, nothing was done. 59 05 21b [13.1]

1959 The giant new Prudential Building on the junction of St Andrew's Street and Emmanuel Street incorporates the latest building techniques with heating and hot water provided by electrical units which take power from the mains during 'off-peak' hours and store it for use during the day. Acoustic ceiling tiles provide quieter working conditions, floors are of a coloured plastic tile and decorations in pastel shades. The basement contains a large garage and special storage to cater for the large use of bicycles by staff. 58 06 18

1959 Lion Yard costs have risen colossally and some councillors hoped the Minister would turn the scheme down so they could start again. They could build a car park on the site more cheaply but they were bound to the developers, Edgers, and they would be a laughing stock if they went back on their word. It was the public who determined where the city centre should be and that was where banks, theatres and cinemas had moved. When a slump came it was those on the outskirts that closed down. The scheme must go forward. In the long run it would prove economical. 59 07 24a

1959 Councillors withdrew their attention from the Lion Yard area to a part of the city which some have always considered of equal importance—Fitzroy Street. This should be comprehensively redeveloped to provide residential, shopping and business facilities with a new bus station. The Lion Yard should be developed with a library, civic restaurant and small car park, leaving the frontages as they are, some argued. 59 07 24b & c

1959 Lion Yard scheme—questions and answers—59 07 18b

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 The Minister has rejected proposals to redevelop the Lion Yard area by the building of a giant car park, shops, offices and hotel. He called the scheme 'basically unsound' as it envisaged shop and office expansion instead of decongestion in the central area and crowded too much

development on to the site. He also thought that commercial expansion was neither necessary or desirable. The scheme was formulated by city and county council architects after years of study and research. It included a 750 place car park with petrol filling station and an unusual shopping precinct where all vehicular traffic was barred. 60 08 30 [2.8]

1960 Elizabeth bridge approved in principle [8.5]

1960 The Minister has confirmed compulsory purchase orders concerning houses in Norfolk Street which the City Council are anxious to pull down for the second stage of the East Road redevelopment scheme. The area affected was generally dilapidated, over-crowded and of a demolition standard with some of the buildings giving a general impression of decay. Now they can go ahead with erecting new houses, flats and shops 60 03 12

1960 Light industries already accommodated in Cambridge may be moved to a site to the east of Milton Road. S.G.B. have applied for eight plots for workshops on land used for breaking up Army vehicles. Part is used by the Cambridge Pre-Cast Stone Company and is within the proposed Green Belt. It is an area of no great beauty, is primarily derelict and very little use for anything else, an Inquiry was told. 60 05 03b

1960 Over 100 houses and shops, a Church Institute and a public house in an area near the Roman Catholic Church, Hills Road, may be compulsorily purchased by the City Council. Properties in Coronation Street, King George IV Street, Union Road, Bentinck Street, Princess Street and Queen's Street have reached the end of their useful life and were unfit for human habitation. Slates were off the roof, they had rising damp and woodworm. But shopkeepers protested and one owner said she was very attached to the house and it would be a great hardship to leave. 60 10 28

1960 Land between Kings Hedges Road and the Arbury estate may be bought by the city for housing – 60 11 22a

1961 Elizabeth bridge approved minister [8.5]

1961 University plan - keep & enhance character University Town & create regional shopping centre East Rd : allow nearly twice as many people to live near centre, 5 times as many cars, fast road access, pedestrian free area, modern shopping centre [4.6,21]

1961 University announce plans rebuild Science Island - New Museums, city reject [4.7]

1961 County propose new Mitchams, demolish property etc, Minister says too costly 1962 [4.8]

1961 road widening Four Lamps [4.9]

1961 Clore Cotton buy Lion Hotel [13.2]

1961 A questionnaire shows that most people think the Lion Yard area should include a concert hall, civic restaurant, hotel and assize court together with a library. This should feature a record section, an art lending department, reading room and small exhibition area. There should be a municipal crèche where children could be left while their parents shopped and a car park reserved for those who worked in the Guildhall. Half of the respondents were in favour of traffic wardens and parking meters, though some said they had no experience of them, while 81 per cent wanted a pedestrian precinct. Other suggestions included a news cinema where people could wait in comfort for evening buses and supermarkets near the edge of the city 61 01 02a

1961 Cambridge University published proposals to enhance the city's character as a university town. Historic buildings would be retained and where redevelopment is essential the new buildings would be on a scale and character compatible with the central area. The Lion Yard development could include a civic hall which is needed both by city and university together with a library and small art gallery. If the City Council cannot pay for it then the University and some of the colleges should join in a developing consortium to provide the necessary finance to carry out the development and benefit from the profits. 60 01 11b

1961 The only area of Cambridge suitable for a regional shopping centre is that around City Road and Fitzroy Street, a University development plan says. It has space for shops, restaurants,

car parks and houses and could be well-served by public transport. By contrast the city centre does not meet the land requirement unless there is such demolition that it would affect the character of the area. The roads are poor and provision of adequate car parking would be an impossible task. 61 01 11c

1961 Sir – some of the tower blocks proposed by the University for the New Museum site would be twice the height of King's College chapel. They are opposed to the very character of the historic centre. If approved it would be impossible to object to other towers such as those of the Lion Yard that have been criticised by the Preservation Society. Would it not be better for the gradual transfer of science buildings to the west of Cambridge where a development architecturally worthy of the University could take place? – V.I. Glaster 61 06 13

1961 A cluster of balloons was flown over Cambridge to give an idea of how the proposed 200ft towers of the 'Science Island' off Corn Exchange Street would look from the Backs behind the famous King's College Chapel. Theodolite readings were also taken from Rose Crescent. The proposal has been rejected by planners 61 11 16a & b

1961 A bold scheme to transform Cambridge Market Hill into the 'finest piazza in Europe' would involve banning traffic in King's Parade, demolition of a few buildings on the corner of St Mary's Passage and the complete clearance of the Market Place. The screen in front of King's college would be removed and the Senate House and Law Department buildings linked together to form one magnificent spacious vista, says architect G.M. Vickers 61 12 01b

1962 Mr Jack Cotton and Mr Charles Clore, the property millionaires, have bought the site of Heffer's from Emmanuel College on the understanding that the bookshop will be rehoused in any new redevelopment of Petty Cury. Their company, City Centre Properties, acquired the adjoining Lion Hotel site last year. The Director of Dolamore, the wine merchants, who hold the freehold of most of the corner with Guildhall Street, would not say whether they had also approached them. Recently this part of Petty Cury was included in the area scheduled for redevelopment. The firm also have an interest in the New Theatre site which is now being demolished to be replaced by a block of offices 62 05 07 [13.3]

1962 New Museums site tower blocks cause controversy due change of view from Backs; (height reduced by half 1964) [369.17.9]

1962 A Council debate to decide whether to create a post of City Architect ended in chaos after the Mayor stopped discussion. A qualified architect is vital if development is to be continued with taste. Council estates were dull in lay-out and their roads were not up to modern traffic. Uninspired planning must be stopped now. At a time when the Lion Yard, Museum site and City Road area are in the melting pot they should have the advice of an architect, some councillors felt. 62 01 04a 1962 row over appointment of City Architect [2.13]

1962 Lion Yard : Inquiry highlights 3 divisions of opinion. University want commercial development restricted to new regional shopping centre Kite area with Lion Yard to have amenities like library, art gallery, concert hall etc. County accept library but reject concert hall. City want commercial development in new pedestrian shopping centre [2.11,2.12]

1962 Kite area : endorsed as shopping area by city - develop shopping facilities & relieve pressure centre [2.10,4.11]

1962 City Road form association fight University plans [4.12]]

1962 work starts demolition New Theatre buildings [4.10]1

1962 Arbury 11-storey flats plan - protest [4.13]

1962 An inquiry into the Bradmore Street area heard that 119 houses between Petersfield, East Road, Broad Street and the CCAT were unfit for human habitation and should be demolished under the slum clearance plan. The area would be used for extensions to the college and the Mill Road Sorting Office. But six householders objected. One lady had lived in her home for 50 years, she was 89 and blind and would find it difficult to move. Another had been deaf and dumb from

birth; she had lived there for 54 years and was frightened at the prospect of being relocated. 62 05 03a

1962 The University's proposals for the future development of Cambridge are designed to enhance its character as a university town. The Lion Yard area should include a multi-purpose public hall, for which they have offered to pay half, a new public library, exhibition gallery and arts centre. There would be a regional shopping centre in the City Road area including department and chain stores with large scale car parking and the segregation of pedestrians from traffic. 62 05 31a

1962 University plans for city – 62 06 01c

1962 University plans for the future of Cambridge envisage that in the Lion Yard there would be a new hall for conferences, concerts and all kinds of music with a new library, small shops, cafes and homes for 300 people. A new regional shopping centre in City Road would be free of all vehicular traffic and there could be more homes on the site than before. The housing areas which are close to the centre are also the oldest and many are in need of redevelopment. Already 4,000 people have had to leave since 1950 but the University wants to see at least as many living in these areas as were there ten years go. 62 06 25

1962 University development plans attacked – 62 06 27

1962 The University's plans for Cambridge envisage a new shopping area off Fitzroy Street providing sites for large retailing units, segregated pedestrians and vehicular traffic areas and car parking close enough for shoppers to walk. All future schemes for redevelopment of University sites should have adequate car parking; this is the University's view and they will bear their share of the car parking burden, the Estate Manager told an Inquiry. 62 07 19

1962 Bradwell's Court arcade and shop development has been a joint venture between Jesus and Christ's Colleges and Ravenscroft Properties. It stretches from St Andrew's Street through to Drummer Street bus station and provides a continuous covered route to the city centre. Work on demolishing the out-of-date shops and buildings started as long ago as October 1957 but was held up by difficulties over leases. The last tenant to go was the well-known antique dealer, Mr K.A. Rowe. By the time the University term begins again the development will be complete and all the 20 new shops and showrooms fully occupied. 62 08 11a

1963 Editorial : "They come thick & fast - plans for the University's New Museums Site, plans for underground car parks with an attendant underground road, plans for parking meters, plans for a new surface water sewer, plans for a design policy for the control of the visual appearance of Cambridge. Indeed never in the history of Cambridge has there been such a paradisaical period for planners. And now ... County's turn with a scheme for a new village to the North of Cambridge" 28.3.63 [2.14]

1963 Logie proposes underground road to link the main centre with a 'joint centre & in Burleigh St area [9] [4.14] Underground road to service Lion Yard shops – 63 03 22a [See Memories 14 Mar 2013]

1963 Tower blocks should be banned from city centre says planning consultant Thomas Sharp in his report 'Dreaming Spires & Teeming Towers'. They would destroy the character of the Backs, Parker's Piece and Midsummer Common. The New Museums and Downing sites are 'deplorable in their high crowding, overdevelopment by dull buildings'. This comes when the University has plans for proposals for a tower block as part of its 'Science Island'. Any rebuilding in the central streets should be by small units rather than large-scale frontages, he says 63 01 26c

1963 Plans for the New Town area will retain the strong community spirit with different blocks of flats and houses centred on a 'village green'. There will be a church, local shops, public house, old people's flatlets, a children's playing space and hall, an Inquiry heard. However 87 properties in Russell Street & Coronation Street not fit for human habitation would be compulsorily purchased and 27 others redeveloped. The roofs are in bad shape, the brickwork and chimneys

perished and all have outside toilets. It could be rebuilt in stages to minimise disruption. But some residents objected. 63 02 20

1964 Kite residents protest against piecemeal demolition, Minister calls for plans for new high-intensity shopping area [11]

1964 The Lion Yard area is badly laid out and contains 'obsolete development'; there should be a small increase in shopping space with the rest devoted to civic and university uses, Sir Keith Joseph, the Minister of Housing says. A brand new shopping area should be created in the City Road area – the present twilight zone. It will take traffic away from the centre, cater for modern supermarket trends and fit in with plans for the continuation of the East Road housing scheme 64 08 28, 28b [4.15]

1964 Traders are split over proposals for a new shopping centre off Fitzroy Street. Claude Scott, motor agents, say trade would be increased but he would seek full compensation to leave. T. Tarrants tobacconists, say it would be good but family businessman A.P. Cook of Prospect Row, who has run a grocery store for 50 years, says he will fight hard against compulsory purchase. Mrs J.A. Douglas of Earl Street, who has just modernised her house, is horrified at the proposals. 64 08 28c

1964 University offer £20,000 so city engage planning team to speed City Rd scheme [4.18]

1964 County Planning officer says Cambridge may grow to 120,000 [4.16]

1964 Kite vast rehousing unenviable task- nearly 1000 houses & 65 acres in twilight zone [8.10]

1964 Macintosh replacement building opens - new ultra-modern, next Watches of Switzerland [4.17]

1964 Elizabeth bridge delays, route published, 17 houses to be demolished, 67 gardens affected [8.6]

1964 Compulsory purchase orders have been confirmed for the clearance of areas at Napier Street, Leeke Street, Coronation Street, Gold Street and Russell Street. But the Minister has excluded some properties in Newmarket Road and Burleigh Place together with no 9 Coronation Street which his inspectors say is fit for habitation. Objectors had claimed that compulsory acquisition would cause hardship and was not necessary for redevelopment. 64 06 06a

1964 No new industries employing more than five people will be established and only a moderate expansion of those existing will be approved, says the Minister of Housing in his review of the Cambridge Town Map. The inner relief road will be rerouted to take it clear of Jesus College grounds and Marshall's garage and the Western Bypass will now run next to the University Observatory and behind properties in Storey's Way. Local shopping centres will be expanded at Mitcham's Corner, Mill Road and at the corner of Alex Wood Road. There will also be a car park to the south of Silver Street. 64 09 02

1965 Llewellyn-Davies invited to prepare plan for new shopping Centre, Fitzroy Street – 65 01 30a

1965 Lion Yard plans unveiled by Gordon Logie – 65 06 25b [13.5]

- 1971 Riverside may become first Improvement area, agreed [6.1]
- 1971 "City going round in circles ... a muddle created by too many people trying to run the show" [6.2]
- 1971 Kite started become neglected WWI, acceleration last 15 years ... monument to planners, blighted & fossilised; some say slow destruction deliberate but unlikely Cambridge capable of such a calculated campaign, more likely derelict by default, "walls crumble, more slates slide., panes smashed" 1972 [8.11,8.12]
- 1971 Kite : "the first bricks will be laid in 1973" prediction [9]
- 1971 county dash city's hopes for more industry "heavy door of Cambridgeshire planning bureaucracy was slammed shut on ... hopes of attracting more industry [6.3]
- 1971 Government appoint J Parry Lewis to examine future Cambridge as major East Anglia regional centre [6.4]
- 1971 Science Park will not be stopped by Government, approved planners 1972 [6.5]
- 1971 Cambridge Townscape analysis [6.6]
- 1971 Elizabeth bridge official opening, speeds traffic 'like motoring on Sunday morning', 21,000 vehicles use per day, brings problems people living beside it [8.9]
- 1971 Progress on 'Science City' development adjoining Madingley Road may be slow, Senate says – 71 05 01
- 1972 Corn exchange St closed for work Lion Yard, Lion Yard car park opens [13.8,13.9]
- 1972 Buchanan Report "£113,000 blueprint to get city moving" - Railway route [6.7]
- 1972 plans 600 houses Clay Farm, Long Rd, County reject as 'premature' [6.8]
- 1972 Kite : city planners agree to 600,000 sq ft of shopping space because of interest shown by big chain store [9]
- 1972 Cambridge City Council's Trinity Hall Farm Industrial Estate looks more like an army practice ground than a land of golden opportunity for trade and commerce. The only thing that is conspicuous by its absence is industry. Although it is now 10 years since the 12.6 acres off Nuffield Road were designated for industrial use there are still only two firms with premises there. Only firms displaced by council re-development or public works can be sited there. At last week's council meeting members agreed to seek permission from the Department of the Environment to change the re-location criteria in order to allow other firms to take up sites on the estate c72 12 02
- 1972 A plan to build up to 600 houses on farm land off Long Road, Trumpington has brought mixed reaction from local residents. A Birmingham development company who earlier this year took over Cambridge builders I.J. Stocker Ltd, want to build houses and a group of shops on land at Clay Farm. But some local residents object because they think the land should remain open. It is zoned as open space and playing fields, with most of it within the green belt, in the Cambridge town map. The developers said it would be a 5 or 6 year scheme from the starting date c72 12 03
- 1973 Kite : delay considering till Parry Lewis report, 13 day inquiry [5.19,8.12]
- 1973 Kite : Parry Lewis double-crossed by Kite decision (he opposed) [6.9]
- 1973 "Parry Lewis says that Kite development will sign death knell for Market Square area, new focus of commercial development must be on edge of city & this cannot be done if Kite goes ahead ... his words have too uncomfortable a ring of truth about them ... in the past we have pressed for action on this plan; our 'City in shackles' series tried to express the frustration which many citizens felt at the stagnation of the planning process ... but now we, who have formerly pressed for action are now urging caution" [12]
- 1973 Prof John Parry Lewis, the Manchester don who has just finished the biggest Cambridge re-development plan ever devised, has told the Government that it may as well be scrapped now if the new Fitzroy-Burleigh Street shopping centre goes ahead. When his final report is published it will contain some sweeping proposals. One of these is for a new commercial centre on the

Cambridge outskirts - perhaps in the Trumpington area - in order to siphon shops and traffic away from the historic heart of the city c74 09 10

1973 Like some great suicidal spider Cambridge will have eaten its heart out by the turn of the century. Such is the dramatic prophecy of Professor John Parry Lewis who has been making a complete study of its future. Specifically he is saying is that if Cambridge proceeds with the scheme to build a twin shopping centre in the Fitzroy Street - Burleigh street area it will be signing the death knell of the present Market Square area. He concludes that a new focus for commercial activity must be developed on the edge of the city either in the Trumpington area or to the east near Marshall's airport. This cannot be done if the Fitzroy-Burleigh scheme proceeds, as the indications now are that it will c73 09 22

1974 clamp down on office development Hills rd Parry Lewis "most important document since Holford" calls for abandonment of Kite, development Trumpington [6.10]

1974 Save Kite campaign starts with clean-up; Kite Action committee set up 8 months ago [8.13]

1974 city seek scrapping of 25 year industrial development ban [6.11]

1974 "Blueprint for Cambridge" [6.12]

1974 Kite : Jesus-Samuel properties plan approved in outline but council talk about scrapping whole scheme [9]

1974 The Parry Lewis super plan for the future of Cambridge, which took three years to prepare at a cost of £20,000, has been rejected by all the senior city and county planning officers. The plan's main suggestions were for the immediate scrapping of the scheme for extensive development in the Burleigh street – Fitzroy street area and the building of a second shopping centre in the Trumpington area. Chairman of the County Planning committee, Counc. Tony Cornell, said: "The technical boys took a look at Parry Lewis and they have not liked what they have seen c74 10 27

1974 Parry Lewis rejected by all senior city & county planning officers, cost £20,000 & took 3 years, 'last rites 5.1975 [6.13]

1975 county reject 2 city approved schemes - Beehive extension & Downing development Regent St [6.14]

1975 Official Opening Brochure

1975 Kite : Ian Nairn calls for rehabilitation area [7.1]

1975 properties released from blight after 15 years [7.2]

1975 council accepts Piano & Rogers scheme & starts working out detailed plans with consortium [9]

1976 Kite : report [7.3]

1976 money problems : scheme will require £13m investment from city for return of £150,000 pa, look for help [9]

1977 Kite : Cheviot House & Amalgamated Developers put forward schemes; Cheviot House £10M for 4 large shops, 60 small shop units, parking for 1,250 cars, £91,000 pa profit for council after 5 years, Powley "as near perfect as it is possible to make it" [9]

1977 A multi-million pound deal for the rebuilding of large parts of the Burleigh Street – Fitzroy Street area of Cambridge (The Kite) which would involve a handsome handout to the ratepayers is being negotiated between the City council and two internationally known development companies. Under the deal the redevelopment could be carried out without any cost to the ratepayers. The council would hand some of its land holdings – much now derelict – to the developers on a long lease. In return they would build large car parks for the council, regrass the New Square car park and erect a number of shops, at least one of them a department store. And at the end of the development period the company would make either a substantial lump sum payment to the council or give it a large cut of the rents collected. CDN c 17.4.1977

1977 The Mayor of Heidelberg officially opened the rooftop garden above Lion Yard, Cambridge, which has been named after the German town to mark the link between Cambridge and its twin university town. Oberbürgermeister Renhold Zundel said a scheme similar to Lion Yard was being built in his city and they might have a garden named after Cambridge soon. 77 07 26

1977 Theoretically worth over £150,000 a year in rent, the 47,000 square foot office accommodation above the Lion Yard has stood empty since the precinct opened nearly two years ago. Agents trying to let the offices blame the economic malaise for their lack of success. The high price of central car parking is also a barrier. The city council made a former builders' site available to encourage offers and now one taker has at last been found. Vinters, the Cambridge solicitors have taken space. But Bidwells say matters will only improve when companies begin to expand and the perpetually optimistic estate agents say it is beginning to happen. c77 08 23

1977 The Cambridge department store Laurie and McConnal in Fitzroy Street is to close in December. Indecision over plans for the Kite area redevelopment is the reason, said Mr Anthony Frais. "We have tried everything we know to get something moving in the Kite, and while the council is now at last seeing sense we cannot afford to wait the two years before anything actually happens. As a small family company are paying penal rates." The business was established nearly 100 years ago. c77 10 07

1977 The sudden news of Laurie's closure has come as a shock to the City Council team involved in drawing up the Kite plans. Council leader, John Powley, said he was "very sorry indeed" and could well understand their frustration at the indecision. "Gradual renewal of the area, as some people want, just will not happen and will lead to a speedy decline of the whole area. A satisfactory scheme must be produced as speedily as possible. Constant delays are not good for the area, for the people of the city, or for Cambridge as a whole". c77 10 08

1977 The news that Laurie and McConnal's department store is closing will have come as a surprise to most people. But to anyone who regularly used the store it was only a question of time before they succumbed to the inevitable. Even at the height of the shopping day you could be the only potential customer in any one department. It had 50,000 sq ft of selling space, spread over five floors to service, heat, decorate and keep full of merchandise and the passing trade had dropped off dramatically as so many houses have been knocked down and food shops have disappeared from the Kite area. c97 10 09

1977 More shops in the Kite area will be forced to close unless something is done quickly to rejuvenate the area. A number of stores have been teetering on the brink for some time and could go out of business. This has been caused by all the little ginger groups, all pushing for their own things. They hack and maul among themselves and all they succeed in doing is to cause the sort of intolerable position that Lauries found itself in. It is all very well saying the Kite should stay exactly as it is. But it cannot. It has changed markedly over the years and is still changing. It either has to be redeveloped in some fashion, or it dies. c77 10 16

1978 Kite : residents stage occupation of unsafe houses [7.4]

1978 city unable to buy by compulsory purchase, 'kills scheme' [7.5]

1978 "parking is so easy on the Kite" advertising feature [7.6]

- 1978 Government blocks city borrowing £2.3M for scheme [7.7]
1978 squatters protest over eviction Kite [7.8]
1978 Kite : enter Grosvenor Estates Commercial Developers, backs scheme & enters partnership with City council [9]
1978 oversight in procedures mean council unable to compulsorily purchase land needed until 1983; council used wrong procedures in seeking to evict three people - one city councillor - from 72 Fitzroy St [9]
1978 Residents are occupying a deserted house in Fitzroy Street, Cambridge, after learning that the city council is about to demolish three other “unsafe” houses in the Kite area. Officers offered to re-assess the situation if the protesters paid them £340 – the cost of making the buildings safe. The Kite group stayed up collecting the money, only to be told the council would not accept it after all. The action is in spite of an assurance that demolition would only take place once the redevelopment scheme had been approved. The protesters are deeply disturbed that private citizens have to pay for council work in order to avoid the premature demolition of sound properties in the Kite. c78 03 07
1978 The Government has stopped Cambridge City Council’s plan to rebuild the Kite area. They have refused to allow them to borrow the £2.3 million needed to buy the land for shopping development which means the 20-year saga of decay will continue indefinitely. The council’s Conservative leader claimed it was a political decision, probably part of a General Election run-up. M.P. Robert Rhodes James said the blight in the Fitzroy Street area would be perpetuated and the general economic and physical decline of the area would continue remorselessly. But organisations which have been fighting the plans are delighted. c78 09 04 [7.7]
1978 The New Town area of Cambridge was developed in the 1820s with unpretentious terraces, many of which were ill-built. But at least they had unity. Today, largely demolished and patchily replaced, New Town strikes one as a sorry mess. Panton Street is a mixture of discreet, elegant houses with intrusive modern developments. The St Anthony’s Walk almshouses are a discordant construction, their severe frontage characterised by jutting ventilatory contraptions: a battery-house for humans. Opposite begins the Russell Court complex of flats; as such developments go the quality is good and attempts have been made at a humanised appearance. Will its stark modern brick ever attain the serene texture of the houses over the way – Graham Chainey c78 09 17
1978 One way of improving the environment of the St Matthew’s area of Cambridge would be to demolish many houses and widen the streets, says a City Council report. It contains 1,415 houses that are among the worst in Cambridge in terms of lack of amenities, structural repairs and the environment in which they stand. The problem is the long narrow streets where a small amount of through-traffic become an irritant and lorries cause congestion, noise and vibration. However well houses are renovated the area will not be greatly enhanced until substantial improvements are made to the environment. c78 10 09

1979 De Vere office block developed
1979 Kite : derelict house bought by council topping private £13,000 offer [7.9]
1979 Ombudsman report critical of oversight; Shelter report says demolition carried out with minimal concerns about effects on adjoining privately-owned property [9]

1980 Lion Yard rents increase 350-550%, from £9,000 to £40,000 [13.13]
1980 Cambridge Empty Property Action Group claims lost £350,000 potential income from derelict property [9]
1980 Debenhams pull out of major store but 6-month reprieve for plan - give Grosvenor time to find taker for main store, agreement expires end of month but no taker; Grosvenor must pay council a ground rent of £65,000 pa if scheme goes ahead; was known that Co-op would shut its doors in Burleigh street if another major store did not come into development [7.10,9,10]

1981 Kite : 4th Kite Community Action show - Clive James, Michael Palin & Terry Jones [7.11]

1981 traders give up battle to stay in Kite - Waffles etc [7.12]

1981 Debenhams to participate after all [7.15]

1981 Kite : car parks close [7.

1981 Little Kettle demolished [7.15]

1981 demolition causes problems traders [7.

1981 Grosvenor announce that Debenhams will take superstore [9] skirmishes continue

1981 Twenty years of uncertainty over the future of the Kite area have ended. Debenham, the major national chain store, is to move into a superstore planned for the £15 million shopping development. Labour councillors who have led opposition against the scheme have conceded defeat saying there is nothing they can now do to halt it. The Conservatives who initiated the scheme and have never flagged in their confidence that it would eventually get under way are delighted 81 05 23

1981 A Cambridge consortium which owns a shop in the centre of the planned £15 million Kite rebuilding scheme is steadfastly refusing to sell to make way for the giant new redevelopment. No.56 Fitzroy Street was bought in a bid to stop the scheme and their leader, a Cambridge don, says: "Under no circumstances are we going to budge – not even if they offered us £5 million. They can build all around us if they like – I am looking forward to our little shop becoming part of the shopping precinct with a large glass dome over the roof" 81 05 27

1981 The saga of property dealing and controversy in the Kite redevelopment area of Cambridge has come to an end. The last remaining privately-owned shop at 56 Fitzroy Street has been sold to the city council and its partner, Grosvenor Estates for a price of around £30,000. This has given the owners, a consortium of university dons, a £5,000 profit which will be distributed to two charities. As part of the deal a number of small traders will be allowed to stay in their shops for up to three months. 81 08 03c

1981 An era came to an end when the self-styled 'Lord Mayor of the Kite', Mr Arthur Sutton, moved out of his house in Christchurch Street. It occupies an important position in the £15 million development scheme but he refused to budge until the developers came up with somewhere nearby for him to live. Now they are to build him a detached three-bedroomed house a few doors away 81 09 26

1982 Kite : building begins to take shape [11]

1983 new scheme for hotel & car park [13.14]

1983 The fate of the old Laurie and McConnal store - which has been lying empty since it closed five years ago – has been decided at last. Habitat, a national chain of home furnishing shops, is to move in to the store on the fringe of the new Grafton Centre. Debenhams has taken the main store on the site, the supermarket booked by Keymarkets will probably open as a branch of Gateway and the biggest 'variety' store is being taken by C&A. But letting arrangements have still to be concluded on 30 of the 45 medium-sized shops 83 07 21 p1 [11]

1983 The Cambridge Civic Society, which fights planning applications around Cambridge, is being wound up and its members urged to join the Cambridge Preservation Society – the group from which it split off in 1961. Projects in which they have been involved include the Kite area, Stansted airport, the M11 Inquiry and Robinson College. At present they are concerned about the proposed large office development on the Shire Hall site, preferring to see it as a community area 83 09 29 p19

1983 The new Grafton Centre, the biggest shake-up in Cambridge retailing for a century, is only medium sized in terms of city centre redevelopments but is enough to upset the balance of trade in Cambridge. "No one would pretend that it is linked to the existing shopping centre to the

extent that people can use both on the same day”, said the man in charge of the project for Grosvenor Estates. The next six month’s trading will be keenly watched by shops in the historic centre. The attractiveness of the Grafton Centre will depend on easy access and whether it offers value for money and diversity. They have accepted lower rents in order to get shopkeepers which cannot afford big overheads. 83 10 11 p11

1983 A quarter of a century of planning wrangles ended today when the £27 million Grafton shopping centre development opened. Part is still unfinished but there was a general sense of relief that the Kite at last had its new prestigious shopping development. It looks slightly bare as many of the shop units were still unfilled however shoppers seemed happy as they walked through the new arcade of the main concourse. 83 10 20 p1 [20.1]

1984 lean post-Christmas trading [20.3]

1984 Kite : opened by Queen in May [20.3]

1984 office space going fast

1984 Cambridge’s Hills Road bus depot is to be moved to the outskirts of the city in a multi-million pound swap deal between Cambus and the Stechworth-based Unex property group. Cambus will exchange its one-acre site for a much larger section of the former D & H Contractor’s site in Cowley Road. In return Unex will get control of the bus depot virtually next door to the former Heffer’s printing works site which they successfully redeveloped as Botanic House, headquarters of Cambridge Electronic Industries, BBC Radio Cambridgeshire and Betjeman House which was subsequently sold for more than £4 million
84 11 20 p1

1985 Kite : plan for extension unveiled (agreed 1986) [20.4]

1985 Whitehall overrule no offices in residential area

1985 The Government’s decision to expand Stansted would put tremendous pressure on the Cambridge and there should be a conference every two years with academic papers on preserving the city’s ancient and historic environment. But the Labour leader says Cambridge already has more experts per square inch than any other city in the world and does not need to call in more
85 06 08

1985 Ian Purdy has probably done more than anybody else in modern times to shape the Cambridge we know today. He is the man who fought and won the battle to lift the years-long planning ban on Cambridge expansion, thus opening the doors to industrial development. He played the major part in approving the controversial Lion Yard redevelopment which changed the face of the city centre forever. But he did not design it – that was done by private architects - and doubts if such a scheme would have been approved even 18 months after it was given the go-ahead. “People had so much concrete redevelopment thrust on them after the war and called a halt to it”, he says. 85 09 01b & c

1985 The Green Belt around Cambridge was designed to protect the area from development and to preserve large areas of open space between villages. Now County planners want to release land to make way for the city to breathe including 70 acres at Trumpington, Histon Road allotments and the University Farm in Huntingdon Road. They say this would not mean developers’ lorries moving in. Nearly 500 organisations objected at an Inquiry but the County are pleased with the result which backs most of their proposals. 85 09 17 a b c

1986 County planners want less control offices, city say 0.5M square feet unused office space already Government agree high-tech block Hills Rd bus station [27.12.4]

1986 Cherry Hinton massive new development, 51a site [8.2]

1986 Another old Cambridge landmark – the former Little Kettle premises in Fitzroy Street – disappeared when it was demolished as part of the Kite re-development programme. Over the

years the premises had various uses, but they are best remembered as the general hardware shop which had a small kettle hanging outside. 81 07 11

1986 Plans have been revealed for a multi-million pound shopping centre on the outskirts of Cambridge. Marks and Spencer and Tesco have proposed a double superstore with park-and-ride facilities on land bounded by the M11 and Hauxton Road, Trumpington. A dual carriageway would connect the A10 to the privately-owned Clay Farm area which has already been identified for potential housing. 86 02 08

1986 Controversial plans to build a high-tech office block on the site of the old Eastern Counties Bus Station in Hills Road have been given Government approval, despite fierce council opposition. The Stetchworth-based property development company Unex Group can construct a three-storey office block. But alternative proposals for a four-storey block and sheltered housing, scorned by the council as 'a geriatric ghetto', have been dismissed. 86 12 08a

1987 Government ends distinction office use & research & development, city has used it to restrict firms wanting come Cambridge because of status etc [NS2.15]

1987 The Government is being asked to stop a controversial housing development planned for the Clay Farm site at Trumpington. Local MPs want the land to be designated as Green Belt as they fear the development of 100-plus houses would automatically open the door for almost 1,000 others. There is great public hostility to such housing on the open farmland. Housing giant Bovis Homes want to build 57 large houses, 33 small ones and 23 old people's flats on a 12-acre site off Long Road 87 12 14

1989 Radical plans for Cambridge's Station Road area could help the chronic housing crisis. Nearly 400 houses, 35 bedsits and 52 flats could be constructed together with 897 new car parking spaces and leisure facilities. The measures would alleviate chronic traffic problems caused by commercial development and some existing businesses such as Spillers, Charringtons

and Ridgeons might be asked to move out to more suitable sites. They are generally unattractive, out of scale and out of character with the area, councillors say 89 06 24

1990 Development plans that could have brought 1,000 new jobs to Cambridge have been thrown out by council planners worried about increased traffic congestion. Opposing the scheme for more offices on the Cambridge Business Park one councillor said 'Cambridge does not need 1,000 jobs'. Crown Estates wanted to build 15 new units on the Cowley Road site but the scheme was rejected since they felt it would bring firms from outside which would further worsen the housing problem. 90 03 22a

1990 City planning chief John Popper resigns; third official to leave within three months – 90 09 27a,b

1888 Tenison Road : council want to borrow £4,000 to build [3.24]

1889? Mill Road : bridge opened [2.21]

1889 Tenison Road : opened, all but completed [2.20,3.26]

1897 Guildhall Street : proposed new thoroughfare [2.19]

1898 The Cambridge surveyor gave particulars of what the council propose to do to the roads. From Station Road to St Andrew's street it was proposed to lay Australian "Jarrah" hardwood blocks in the whole of the carriageway. These blocks would also be laid between the tramlines. In Corn Exchange Street the paving was now granite, very rough, large setts being used. They had been put down probably 30 or 40 years. It was now proposed to substitute the wood blocks
c1898 06 16

1900 Cambridge town council were told a conference had been held between two members of the committee and the Master and Bursar of Emmanuel College with reference to the construction

of a new street from Drummer Street to St Andrew's Street, and the closing and giving up of Emmanuel Street to the college c00 04 18

1901 Castle Street : to purchase property to widen [1.7]

1901 large gangs pulling up wooden paving blocks [44.65.1.5]

1901 consider closing Emmanuel Street & new road St Andrews St to Drummer St - "gain a fine new road instead of an inconvenient one [1.6]

1901 Cambridge Council reported that in 1900 a meeting had been held with Emmanuel College as to the terms of exchange of the site of Emmanuel Street for a piece of ground to form a new street from St Andrews Street to Drummer Street. The existing street was the chief means of access to the centre of the town and carried a very considerable proportion of traffic with 1,030 cyclists on Saturday. The new road would be nearly 100 feet shorter and wider. Mr Campkin suggested the advantage would rest largely with the college c01 04 19

1903 Cambridge architect Edwin Bays has produced a plan for a new 60 feet-wide road from Downing Street to Guildhall Street, parallel to Corn Exchange Street. This would create valuable frontages for business premises on either side and lead to a site for a new Cambridgeshire County Hall. There would be a fountain to take off the nakedness of the wide entrance at St Andrew's Hill, replacing the old Corn Exchange. It would relieve the congested traffic in the narrow Petty Cury and provide a direct access to the chief colleges. c03 12 23

1905 Downing Street : building to start on corner of St Andrews Street : site cleared months ago, have needed police to regulate traffic since view obstructed by hoardings [4.15,4.16]

1905 Cambridge councillors discussed an alternative route from Madingley Road to the Cattle Market by constructing a road from Barton Road over the river by Newnham Mill Pit and along Coe Fen Lane to Trumpington Road. Two bridges would have to be erected and the Leys School would give up a strip of land. But there was no argument in favour of making a winding lane into a straight road unless it was for traffic. It was a bad system to introduce a big scheme piecemeal and commit the council first by one step and then another. 05 10 26b

1905 road across Coe Fen opposed [1.7]

1906 Bene't Street : cobbles to be replaced with wooden paving [4.17]

1906 problem of dust caused by motorcars; old remedy was an evil smelling solution, now to experiment with tar [8.11]

1906 An agreement had been made between the Borough Council and Emmanuel College for the closure of Emmanuel Street and the creation of a new road further north. As a result the college had taken no steps to erect new buildings on the site of two dilapidated houses that had been pulled down and had lost ground rent for several years. Now the council had changed its mind. They should make compensation by providing, free of cost, a subway to link college property on either side of Emmanuel Street 06 05 17b & c

1907 propose widening Fair St, Park Terrace, Guildhall St etc [1.8]

1908 Northampton Street : road improvement reveals walls of White Horse, widen corner but Chesterton Lane corner still need attention; is gathering place of workshy [1.9,IC.8.6,6.1]

1908 Trumpington Street : premises pulled down for widening [1.10]

1908 Petty Cury has been closed to vehicular traffic during the operation of replacing the Val de Travers cement that was removed to admit the underground telephone wires. This work by Italian workmen has been watched with much interest. The material in the form of steaming hot powder is placed on its concrete bed and rammed and levelled with hot irons. The rapidity with which the stuff hardens and becomes fit for use is quite remarkable. CWN 08 09 11 p5

1909 The advent of the motor has thrown upon the highway authority the burden of maintaining roads at a much higher pitch of efficiency with the result that county rates have increased by leaps and bounds. It is manifestly unfair that the average ratepayer should pay through the nose for the benefit of the wealthy motor car owner or that the motorist should defray the entire cost of improvements which benefit the whole community. Something must be done. Cycling for pleasure has become quite impossible for people of nervous temperament and even the pedestrian is attended by danger. Now the Government proposes new roads for the exclusive use of motorists to scorch along and the imposition of a ten mile an hour speed limit on the others. CWN 09 09 03

1909 The unanimous opposition to the scheme to drive a road across Parker's Piece should have disposed of it for ever. Should some rash member of the Council wish to make his name by re-introducing it he should first study the indenture made on March 23rd 1612 between the Master and Fellows of Trinity College and the Mayor and Burgesses of Cambridge by which the Piece became the property of the people. One clause stipulates that either body 'consenting to any act to impeach this agreement' should forfeit £300 to the other. It seems to me that the recent proposals would come under this head CWN 09 09 03

1910 Council make new road to connect Clarendon St & New Square [2.15]

1910 A new road between Rock Estate and Romsey Town would greatly improve communication between these largely populated and widely-separated districts, Mr W.P. Fison suggests. Rustat Road, which is a private road belonging to Jesus College could be continued until it cuts into Marmora Road. It would have to cross some allotments and a farm with a bridge over the railway line. There should also be a new road from East Road through Beche Road over a bridge into Old Chesterton. Both would provide work for the numbers of unemployed men in Cambridge 10 08 12e

1911 Emmanuel St : Southgate Lodge & house adjoining being demolished for new wing of Emmanuel College - are only modern houses in street, built 40 years ago by R.R.Rowe as architects office. Borough had intended to swap this Street for new land on which could have built another road, CDN campaigned against & proposal dropped; however to install underpass [6.2]

1911 Market Hill : roads around Market Square widened [5.12]

1911 Sidney Street : property purchased for street improvement [5.13]

1911 motorists petition about notoriously bad egress from Silver Street into Trumpington St [1.16]

1912 Council apply to Home Secretary for regulations about driving on the left & stopping people cutting corners; use of mirrors to assist visibility at certain corners considered but were fears these would be 'ragged' [9.5]

1912 direction posts to be erected [9.6]

1912 Garrett Hostel bridge & Burrell's Walk closed to motorcycles [9.8]

1912 Jesus Lane : widening at Sidney street corner includes provision of footpath & rounding off corner [4.20]

1912 Council consider proposed scheme for new road from Mill Pool to Coe Fen; proposals to spend £14,000 relieve traffic Sidney St arouses protest [2.16.2.17]

1912 A new scheme for relieving the traffic in Silver Street recommends a new road and bridge passing on the east side of the old mill and along the wall of Peterhouse to Coe Fen Lane at a total cost of £14,246 (£1.3m today). The Corporation had purchased Mr Foster's mill. It was at present broken down and would never be used as a mill again. But there was a strong feeling against a road across Coe Fen and Sheep's Green; it ought to be more in line with Mill Lane. An

alternative would take a road from Barton Road corner to Belvoir Terrace but this would destroy the bathing place. However some councillors said the congestion had been greatly exaggerated and there was no urgent need at present. 12 08 09c & d

1912 Silver Street traffic – Meik’s scheme – 12 08 16dd & ee

1912 Councillors debated the proposed scheme for relieving traffic in Silver Street. A bridge from Silver Street to Mill Lane with one road across Coe Fen and another taking traffic from Newnham Croft to the Station would be a very large expenditure and ruin Sheep’s Green, one of the most delightful bits of country in the town. The problem could be adequately met by widening Laundress Lane from Silver Street to Mill Lane and diverting the traffic in that direction. 12 09 27b & c

1913 suggestion to make Petty Cury & Market St one-way [9.9] work starts on new road from St Andrews St to Maids Causeway, via Clarendon St, will save at least 5 minutes [9.11]

1913 Motor Cars Act, 1903. Cambridge Borough Council have made application for a regulation to be made under the act to prohibit the driving of motor bicycles in Senate House Passage, Garret Hostel Lane & Burrell’s Walk 13 05 16 p6 CIP

1914 Abbey residents oppose new road bridge, “the class of traffic that makes East Road one of the most unpleasant thoroughfares in the town would pass through Abbey estate [10.1]

1914 Bene’t street : paved end to end in wooden blocks in 7½ hours [6.4]

1914 Jesus Lane : arbitration between Corporation & Sidney Sussex re strip property required for road widening - £1,471 [6.6]

1915 tram lines removed from junction East Road/Mill Road, granite setts replaced with Macadam surface [44.65.1.9]

1916 traffic island at junction of Victoria Ave & Chesterton road - for 12 months wooden structure with posts dumped each morning, removed evening to amusement of residents TT 4.11.1916 [10.9]

1920 New Road, — A proposed road in Cambridge, which new will relieve the pressure of traffic in Silver Street, was described at a meeting of the Cambs. County Council on Saturday. The Town Council had written to the County authorities stating that they proposed to promote a Bill in the ensuing session of Parliament, and that they would be prepared to insert a clause providing for the construction by the County Council for a by-pass road from the Barton Road to Hills Road, with the necessary bridges. The Roads Committee of the County Council considers that such a road would be a desirable improvement, and the County Surveyor, the County Architect, and the Borough Surveyor are to confer with a view to preparing a plan showing the suggested links for the proposed new road, together with an estimate of the cost. Alderman J. Q. Vinter said that the time had come when there should be proper communications between these districts. Councillor W. L. Rayners observing that the scheme might not be clear to some members of It consisted of a road starting at the corner of the Barton Road, next to the Caius Ground, going down over a sort of drift way towards the bathing sheds at the bottom of the Lammas Ground, which the Borough bought a little while ago, then across some private land reaching the river. There was a bridge, and over that bridge the road would join on the Pemberton Estate and link up with Chaucer Road, then reaching the main London road. It would then turn back a little way to the bridge over the Brook, joining up with Brooklands Avenue. It would make a main by-pass road which would avoid the necessity of using Silver Street, a main road with a bridge which was often dangerous for the traffic. The County Council agreed that the Town Council should be asked to insert a clause to the proposed bill which enable 20 04 21 CIPof

1920 Two new roads to make work unemployed – from Cherry Hill 29bnton Road to Mill Road (near huts to Brookfields) and from The Grove, Newnham to Trumpington Road via Coe Fen Lane – 22 12 22b

1922 Jesus Lane : widening & new wall at junction Bridge St IC.5.17]

1922 The principal new roads proposed as part of the Cambridge town planning scheme include a main road starting from Red Cross, on Hills Road, going approximately north to Newmarket Road at the corner of Fen Ditton-lane, divided into sections. Number 3 runs in a straight line as far as the old Newmarket railway line and then slightly curves into Mill-Road. There are two branches which both lead towards the station. It will be necessary to form a subway under the railway or bridge the line, unless this line, which at present is only used for storage of railway carriages, is done away with altogether c22 07 29

1923 Cambridge town council agreed a scheme to construct a road across Coe Fen from the Coach and Horse public house, Newnham, to Coe Fen Lane. The Ministry of Transport have agreed to pay half the cost, and the road will be commenced almost at once so as to provide work for the unemployed during the coming winter. The scheme had been before the Council for nearly 20 years. Nine or 10 schemes had been presented and each member of the council appeared to think his particular scheme was the best. The great advantage of the present scheme was that the whole length of the road would be on the council's own land.c23 09 29 [3.2]

1924 A consistory court heard a petition by the vicar of St Andrew the Great, Cambridge, for permission to sell to the corporation a strip of land in the church grounds required for street widening purposes. They all knew that the streets were hopelessly inadequate to deal with the volume of traffic which passed through. The only possible alternative would be to pull down the front of Christ College. If that strip of churchyard were taken and added to the street there might be less risk of accident, and the church would not press the claims of the dead at the expense of the claims of the living c24 04 23

1925 Petty Cury and Market Street, Cambridge, today commenced their career as one-way streets with the object of relieving congestion in these streets whose narrowness has ever been the subject of discussion. Petty Cury will only be used for vehicular traffic towards Market Hill. At present these regulations do not apply to bicycles. A policeman agreed that someone was bound to make a mistake – “It wouldn’t be Cambridge if they didn’t”, he said c25 01 13

1925 The “one-way” traffic system in Petty Cury, Cambridge, has now been in force for so long that most people have come to regard it as a settled thing, but the regulation has to be formally approved by the Minister of Transport. The only criticism is that ordinary bicycles should be included in the term “vehicular traffic” but the Chief Constable takes the view that to prevent these riding both ways as at present would cause more trouble than the change would be worth c25 06 22

1926 opening of Coe Fen Road ; Mayor & co arrived on bus, ‘project of relieving Silver Street traffic & making better communication between Newnham & town started as long ago as 1904 (though report of opening Victoria Ave in 1889 records a plea for a bridge to carry traffic from Lensfield Road to Newnham). In 19223 plans approved, had been 9 different proposals, ‘if not for urgency of the unemployment question we should be in the same position today only instead of 9 t-here would have been 19 scheme (built as ‘employment job’, 90 unemployed men had been found work on scheme). Public enquiry held Feb 1924, work started May 1924. Had been considerable opposition - ‘ugly & spoil amenities of Coe Fen & Sheeps Green but this some monstrosity they had conjured up”

1926 Fen Causeway, the new and important link between Newnham and the rest of Cambridge, was opened by the Mayor. The bridge and its approaches were gaily decorated with bunting and presented a colourful scene. The project of relieving Silver Street traffic had started as long ago as 1904 and discussion had gone on for nearly 20 years before the Town Council approved the plan in 1923. Nine proposals had been put forward and had it not been for the urgency of the unemployment question the same position would have existed today, only instead of nine there might have been nineteen different schemes (Laughter) c26 12 11

1927 council debate Huntingdon Road ? Histon road junction [7.6]

1927 improvement at corner of New Square & Fair Street by demolition of house & rebuilding with rounded corner

1927 The chief engineering feature of regional planning will be a new ring road all around Cambridge about two miles from the centre of the town. One length would be a road running north and south joining the Hills Road with the Newmarket Road, a length of about three miles. Certain roads and bridges were contemplated to obtain an inner ring road around the central portion of the town. Mr C.H. Tebbitt said that what had been done haphazard in the villages was the joy of the countryside and he wondered what would have happened to these beauty spots if they had been regional planned. CDN c5.3.1927

1927 Sir – the work has been started to widen Victoria Avenue, Cambridge, from the Four Lamps to Victoria Bridge. The roadway when finished will be wide enough for vehicle traffic to proceed four abreast. The Bridge will not be so wide as the road and heavy traffic may mean serious congestion. Some suggest the road over the bridge may be made wider by making the footpaths overlap the river. If this were done the narrow road on the north side would be an obstacle and as this roadway cannot be made right through to Chesterton Road this scheme should never go forward – E. Clayden c27 07 05 [3.21, 44.65 1.7]

1928 Bridge Street : road widening [IC.2.1]

1928 New Square : converted from grass to carpark [IC.7.17]

1929 Ring Road round Cambridge & Battle of Butt Green – parking CDN 26.9.1929

1930 Queens road being straightened back Trinity [44.65.1.6]

1930 opposition to Regional Planning Scheme proposals for a Ring Road [6.14]

1930 Sir – we Cambridge market traders notice that Councillor Longley wants to move our stalls into the Corn Exchange but we challenge him to produce a transferred market that has been a success. He wants to replace the stalls with car parking spaces. Can not he see the utter foolishness of congesting the very centre of a town with cars. Those on Market Hill consist of business townsmen, clerics and travellers who sit in their expensive car, eat bread and cheese, beg an onion to go with it but do little business. The Market Hill and Peas Hill are open-air markets. An arcade was tried years ago. The building stands today, a sorry sight, in St Andrew's Hill. The stallholders all failed – W.J. Sambridge. 30 02 25

1930 The University told Cambridge planners that if they would change the route of the proposed ring road to avoid crossing the University Farm on the Huntingdon Road then they would agree that the land would never be used for any business, commercial development or housing scheme but remain a private open space. After careful consideration the planners were unable to agree 30 06 07 f&g'

1930 The University is opposed to the proposed ring road round Cambridge crossing the University Farm on Huntingdon Road. It was of national importance, a road cutting up the farm would do a great amount of damage to the experiments which had been in progress for many

years. But everybody could use the same argument and say 'You are not going to come across my cabbage patch'. Somebody had to give way and the University should be big enough to do so.

Anyway the road would not be wanted for 50 years. 30 06 12a-d

1930 Cambridge planners say that Huntingdon and Barton Road are already practically fully developed on both sides, similar building is taking place along Trumpington Road & housing in Madingley Road will increase now the sewers are laid. There will probably be spur roads which will have no regard to the traffic needs of the area as a whole and the result will be a hotch-potch similar to that before the days of town planning. Soon there will be no possibility getting a cross-road between Huntingdon Road and Trumpington without the demolition of buildings or serious interference with the land-owners. 30 07 21a-c

1930 The controversy over the University Farm on Huntingdon Road was resolved when Cambridge councillors rejected proposals for a road across the land. It had never been a ring road, only a road to be planned in the event of traffic conditions demanding it. It was altogether wrong to put an arterial road in the middle of a rural area which they desired to preserve and which they hoped would never be required. They should ensure that Grantchester and Coton were not swallowed up by Cambridge in the way that Trumpington and Girton were. 30 07 25a-c

1930 Cambridge councillors have received consent for a new road from Milton Road to Histon Road at a cost of £18,135. St John's College would give the land which was required for housing purposes, it would be one of the best estates and the frontages would sell at very high price. Grants have been received for King's Hedges and Green End Road as part of the unemployment scheme with one-third of the labour being imported from the distressed areas.

1931 Ring road from Cherry Hinton Road across Coldham's Lane under construction – photo – 31 10 02t

1932 Magdalene Street : Magdalene College plan to demolish west side, doubling width; first stage implemented with Fisher Lane demolition [2.10]

1932 Perne Rd opened, as part of ring road (stopped by WWII); Brooks Rd to Newmarket Rd was part of proposal (revived c1975) [4.1]

1932 "Milton Road merry-go-round" - Mitchams roundabout installed [2.3]

1933 4-lamps roundabout [44.65.1.8]

1933 Mitchams roundabout working well ,new roundabout Four Lamps [1.10, 2.4]

1934 new traffic island at Four Lamps [1.7]

1934 Sidney Street & Petty Cury widened [2.6]

1934 Newmarket Road traffic heavy at night - "the sight of the wide open road ahead tempts drivers to accelerate near Christ Church [2.7]

1934 Petty Cury : widening [1.19]

1934 Sidney Street : widening proposed [1.2,1.19]

1934 Long Road bridges scheme – 34 07 30

1935c pre-war - middle 30s, always referred to as Eastern by-pass not "Ring Road" Ring road was to be made round Cambridge, from Trumpington Rd through Long Rd, Fendon Rd, Mowbray Rd, Perne Rd & Brooks Rd to Coldham's Lane; then a dual carriageway over Newmarket Rd to Ditton Walk, a viaduct over the two railways & river to Cam Causeway, then on to Green End Rd, across Milton Rd to Kings Hedges Rd to be carried on from bottom of Kings hedges road to cross Huntingdon rd, St Neots Rd, Barton Rd, Trumpington rd & so to Hills Rd; thousands of pounds spent to make a dual carriageway complete with cycle track from Coldham's Lane (with the outer part of the roundabout at Newmarket rd) finishing at Ditton Walk with a

ramp about 6ft high to start the viaduct; part of Ditton Walk was raised ready to meet the height of the ramp; this section of the Ring Road was finished, complete with drains & only required the final tarmac surface. In 1959 £34,000 spent : right half of dual carriageway from Coldham's Lane to Newmarket rd & also the left half of the dual carriageway from Newmarket Rd to Ditton Walk have been totally destroyed. The ramp has been bulldozed down & excavated several feet down & hundreds of tons of rubble carted in for new foundations to make what is left of the Ring Road curve into Ditton Walk. It appears that houses are to be built on what was actually the destroyed part of the road ... now appear to go ahead with bridge at Abbey Rd ... completed Ring Rd would have catered for through traffic ... [5]

1935 Corporation steam roller breaks through roadway & burst water main, Adam & Eve street [44.65.1.4]

1935 roundabouts proposed for Cherry Hinton Road/Hills Road, Cherry Hinton Road/Perne Road [2.16]

1935 new street proposed from Downing St towards Sidney St – 35 01 31a [1.5]

1936 one-way systems introduced in St Mary's Street, Bene't St, Market Hill, Peas Hill, Sussex St & Corn Exchange St; waiting restrictions introduced - 15 minutes, park different sides of street on odd or even days [2.17,2.18]

1937 The Borough Council approved a scheme for a ring road from Coldham's Lane to Ditton Walk. This would be a dual carriageway with a grass strip 26 feet wide between them, a nine-foot wide cycle track and paved footpath. It would be reduced to 100 ft under and near the bridge which would carry the railway over the road near Coldham's Lane. This will be constructed by the railway company. The cost would be £77,550 (£4.3m today), to which must be added the construction of a soil sewer. 37 12 13b

1937 Back in 1924 Green End Road and Kings Hedges Road were narrow country roads with hedges on each side and a narrow carriageway in the centre with rough grass margins on either side. Then the Cambridge Town Planning Scheme began to evolve and development started to take place. The Corporation built some wood framed houses on the west side of Kings Hedges Road and the housing society erected houses on the same side of Green End Road. Gradually houses began to appear on the opposite side and then the proposed ring road was agreed. Builders told to keep their houses far enough back to enable the required width but then the council purchased the land and constructed the ring road in front of the properties without any cost to them. The same procedure was followed on King's Hedges Road from Milton Road to the old borough boundary 37 12 16c

1938 Barton Road : Newnham Villa demolished to allow road straightening [IC.1.13,4.22]

1939 Cambridge & District Town Planning scheme inquiry heard that Grantchester Meadows, a large area of land between Cambridge and Coton, the University Farm and land at the Gog Magog Hills had been safeguarded. An area of 160 acres near Trumpington should be reserved for a municipal golf course. But at Rectory Farm, Milton the field the Corporation wanted to take was the only old pasture on the farm and the tenant had 21 cows and a bull. If he had to give it up it would take 10 years before the grass would be useful for milking purposes 39 03 07a

1946 Proposal for car park at rear of Regent Terrace, would take 85 cars and no parking ban on St Andrew's Street – opposed – 46 05 03; demolition of air raid shelters means more light for residents

1947 one-way system introduced St Johns St & Trinity St, Green St [3.4, 3.5]

1948 Today the one-way traffic system designed to relieve congestion in the centre of Cambridge came into operation. In Sidney Street and Bridge Street the traffic will flow in a northerly direction towards Magdalene Street from the town centre, while in St John's street and Trinity Street it will flow in a southerly direction towards King's Parade. In Green Street traffic will flow in one direction from Gifford Place to Trinity Street - and the remainder of Green Street will be open for two-way traffic. This extension of "one-way" traffic will link up with the system now in operation at St Mary's street, Market Hill (north side) and Market Street c48 06 01

1948 Sir - the one-way system has certainly created danger spots at the corner of St John's street, Cambridge. They could be remedied by putting traffic lights there back into operation. The only alternative would be to divert all traffic into Petty Cury. Every user of Petty Cury will have to agree that it is already far too narrow even for the present volume of traffic - pedestrians are crowded into the roadway and bus drivers often have their work cut out to squeeze their buses through at walking pace. Short of some more radical plan (e.g. banning all motor traffic from the streets round Market Hill) I think the one-way system is as good as we shall get - A.E.B. Owen c48 06 03

1949 Holford Report presented to Borough for consideration - "did not consult them while preparing it". Considerable disagreement eg County want Spine Relief Road & to close Magdalene St while Borough want to widen it & rebuild bridge [1.11] (ironically the press report omits the word "out" to report statement: "it is possible to sort the traffic problems with widening ancient Streets throughout [1.10])

1949 Holford proposed Inner Relief Roads Christ's Pieces to Huntingdon Road, East Road to Milton Road, Barton Road to Madingley Road to Huntingdon road [4.12]

1949 The Ministry of Transport has refused a request by Cambridge Corporation for a grant towards the cost - estimated at £23,288 - of work on the ring road between Coldham's Lane and Ditton Walk. A grant from the road fund was out of the question as the work was of "purely local necessity" and there was no prospect of completing the ring road for some years c49 07 21

1949

Sir - None of our streets in Cambridge is wide enough to allow vehicles to be parked all down one side, as they do now. Petty Cury, on a Saturday especially, is almost a death-trap. The pavements are not wide enough for people to walk more than two abreast; therefore they walk on the road, thus giving bus drivers in particular a nightmare. This could be relieved to a certain extent if there were no vehicles parked all down one side. I suggest a big improvement would be the abolishing of all street parking and a municipal car park made on Midsummer common - Frederick Prior c49 09 06

1950 Holford Report with Spine relief road, East Cambridge by-pass, New West Rd Chesterton bridge & Cross Town route; 1954 approved in Development Plan but further studies required into Spine relief road for consideration at the first review 1950 Inner Relief road : would provide access to centre point without permitting traffic to enter central area & divert non-stopping traffic from centre; would continue across Christ's Pieces to Emmanuel St [2.4,2.3]

1950 Holford report "over past 25 years many hours of laborious discussion have failed to deflect his plan from its course ... contained detailed drawings of Elizabeth Way route, the future of Mitchams corner, called for northern by-pass, west Cambridge university development; envisaged pedestrian precinct in which traffic banned but with spine relief route [17]

1951 Lion Yard : carpark plans [3.6] [1.12]

1951 improvement island Hills Rd Station Rd
1952 East Road : 91% of properties in “short life” or “no life” categories - 100 years old & in poor condition propose East Road as traffic route [3.11]

1951 Inner relief road : Inquiry scraps southern part, reserved line northern for consideration [2.3]

1951 Cambridge town planning committee say there can be no justification for a spine relief road between Histon Road corner and Jesus Lane merely to preserve for a few years more buildings on the west side of Magdalene Street which, although of some architectural interest, are sub-standard from every other point of view. Pending demolition the commercial use of the buildings should be terminated, doing away with the necessity for vehicles to wait outside c51 01 23

1951 A new one-way traffic system around the Cambridge Guildhall comes into operation on Monday. The direction of traffic in Wheeler Street will be reversed to complete the circulatory flow around the guildhall into an anti-clockwise direction and traffic around Market Hill in a clockwise flow. Buses will be unaffected by the new order but say instead of hoards of cyclists crossing over in their path all vehicles will turn in the direction the buses approach the guildhall. The scheme has resulted from the necessity to ease traffic around the guildhall in view of the proposed Lion Yard car park development c51 06 13

1952 Sir. Twenty-five years ago Magdalene College started a scheme which might have involved the widening of Magdalene Street and the removal of buildings opposite the college. But it does not now contemplate the completion of the scheme and is now strongly opposed to the widening of the street and the demolition of the buildings on the west side. The College would be strongly prejudiced if it should be divided by a street similar in character to the widened part of Bridge Street and would strongly object to such a change of character and loss of amenity in the neighbourhood – Henry Willink, Master. CDN c 21.1.1952

1952 Cambridge city council would like to see Christ’s Lane opened out as a thoroughfare to be used by the omnibuses and other traffic to alleviate congestion in the City centre and provide relief for Emmanuel Street. The present country bus station at Drummer Street would then become the main stopping place for the local buses which now pick up and set down passengers in Sidney Street constricting the traffic flow. They also propose a new road on the line of Post Office Terrace to Wheeler Street. With Corn Exchange Street widened this would provide for a good circulation of traffic in the city centre. CDN c 6.5.1952

1952 The inquiry into the County Development Plan has concluded. Its main object is the preservation of Cambridge as a University town & the deliberate prevention of its character becoming that of an industrial town or a town with large straggling suburbs. The problem of Cambridge was largely a traffic problem but measures to deal with this by the widening of streets would be a negation of the true object of planning which is to preserve the Cambridge we know today c52 12 27

1954 Minister announces decision on County Development Plan, City Council challenge it in Court but is approved. Basic principles : Cambridge should remain principally a University city; reduce the rate at which city is growing and stabilise population at not more than 100,000; to accelerate development of villages surrounding it to accommodate additional 7,500 people; provision of comprehensive road system capable of satisfying traffic requirements in city; to limit industrial expansion in & near Cambridge and to discourage the establishment of large industries of the mass-production type within the county (certain sites may be compulsorily purchased for purpose of rehousing those industries within city which require to be moved from existing sites);generally follow lines of original proposals submitted more than 2 years ago; only major items not approved are site of bus station between Christ’s college & Emmanuel & the proposed

development for residential purposes of the smallholding land north of Arbury Rd during 1st 5-yearly period of the plan [18] [3.2,3.3,3.4]

1956 Cambridge is beginning to taste the bogey of a serious traffic problem for the first time. The council has tried roundabouts, one-way street and traffic lights but the situation will worsen unless some drastic is done soon. It takes so long looking for a parking space that it would be quicker to leave the car a mile away and walk. It is better to ban all traffic from the city centre than to knock down buildings to accommodate new relief roads. Maybe this answer is too easy and not costly enough for our planners. 56 07 16b

1957 Motorists should be charged for parking on the road as a way of reducing traffic chaos in the centre of Cambridge. People who wanted to pay visits to shops or offices could park for short periods but a car park would be cheaper for stays of more than one hour. At present motorists take little notice of the 15-minute only restrictions, many staying for two hours. People will not walk a quarter of a mile if they can find a space closer to the centre, planners claim. 57 02 05 & 05a

1958 Elizabeth bridge proposed [494.8.4]

1959 A Ring Road was proposed for Cambridge before the war. It was to run from Trumpington Road and Brooks Road to Coldham's Lane, then on across Milton Road, Huntingdon Road and so to Hills Road. Thousands of pounds were spent to make a dual carriageway from Coldham's Lane to Ditton Walk with a ramp six feet high to start the viaduct across the river. This section was completed and only required the final tarmac surface. Now half of the dual carriageways have been dug up and the ramp bulldozed & excavated several feet down & hundreds of tons of rubble carted in for new foundations to make what is left of the Ring Road curve into Ditton Walk. It appears that houses are to be built on what was actually the destroyed part of the road. The completed Ring Rd would have catered for through traffic. It cost many thousands of pounds to make and over £34,500 to destroy 59 09 01 [5]

1959 Hills Road railway bridge reconstruction [44.7.3.4]

1959 More traffic went along Newmarket Road than any other and congestion often occurred at Four Lamps Corner. Any small incident – circuses on the Common or even May Balls - holds up traffic. Victoria Bridge vibrated when heavy vehicles had to stand on it with their engines running. We need a new bridge over the river at Walnut Tree Avenue. But a temporary bridge could be thrown over the Cam in six months by using the site of the old horse ferry next to the Chesterton footbridge. There would be a natural route for traffic up Garlic Row, Ald Symonds said. 59 10 16a & b

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Sidney Street widened to ease traffic flow [7.23a]

1960 editorial re planning [8.1]

1960 Elizabeth bridge approved in principle [494.8.5]

1960 The traffic situation in the Fen Causeway was desperate and the only thing to do was to widen the entrance so as to permit two full streams of traffic, Alderman James urged. The council had been negotiating to buy the frontage of the Leys School since 1957 but talks with the governors had broken down and now he proposed compulsory purchase. But this was very high-handed and not the proper way to do things, councillors decided. 60 01 22

1960 City councillors decided to drop proposals to use Butts Green as a car park for two years - even with the Lion Yard car park finished and new car parks in King Street and Park Street,

there would still not be enough parking and it would never be reinstated. The income would never meet expenditure. Eventually Cambridge would have a city centre park charging about one shilling an hour. If Butt Green was to be charged at sixpence nobody would use Lion Yard and the council would be sabotaging their own scheme. 60 01 21

1960 The City Council is to pressure the Ministry of Transport about the proposed new bridge over the river at Chesterton. The route was approved four years ago and both Messrs Pye and Marshalls – the two large employers of labour in the area – consider it to be a matter of urgency. But the Mitcham's Corner improvement scheme would be relatively inexpensive and was being forced on them by the Government. This would further delay the proposals to provide a complete bypass on the Chesterton route. 60 03 11

1961 The Minister of Transport has issued orders for the construction of a new bridge over the Cam at Walnut Tree Avenue. Now work can start 61 06 22 [494.8.5]

1961 County propose new Mitchams, demolish property etc, Minister says too costly 1962 [494.4.8]

1961 road widening Four Lamps [494.4.9]

1961 corner at Northampton St traffic lights being widened [19.8]

1961 The proposed King Street car park would have to earn three shillings and three pence per car space per day. But apart from Saturdays the car park would not be filled by members of the public. The Lion Yard only took three shillings – though councillors and employees parked there free. However they would also put in parking meters and with car parking meters there would be no worries about the multi-storey car park. But a shop and filling station were an important part of the project 61 06 30a

1961 By 1966 it is hoped that the new trunk-road linking the main Cambridge-London and Cambridge-Newmarket Roads will have been fully operational for some years. East Road would then be carrying about 1,000 vehicles an hour and Winton-Smith applied to build a petrol station in place of their slaughter house. But planners told an Inquiry that it would interfere with the free flow of traffic and cause confusion for motorists 61 07 08

1962 An experiment to prevent traffic jams at Mitcham's Corner was judged a success. It reroutes traffic along the Milton Road junction road island around the houses, and makes several of the nearby side streets one-way only. One-way traffic means cars could use the whole of the road and motorists would soon get used to it. Only three policemen would be needed to help control the traffic if the scheme was put into operation. 62 01 31

1962 Mitchams experiment - sends traffic along Milton Rd to Chesterton Hall Crescent before back Chesterton rd, protests, leads jams Chesterton Hall Crescent, dropped [19.10] [19.9]

1962 Inner relief road inquiry only lukewarm support for Northern part; would be bypass for Magdalene St & Bridge St only as other uses fall away [2.3]

1962 Sir – the subject of traffic problems is perennially popular. I suggest building an orbital road around Cambridge with a number of tiered car parks. All cars would be required to park and the journey would be completed by bus. Since everyone would use them the service would be well patronised. It would spare Cambridge from being a mere island set amid roads and car parks, bathed in swirling mists of exhaust, serenaded by that odious sound of creeping, choking traffic – R. Hennessey, Brookside. 62 06 08c

1962 County Council plans for a new “inner relief road” linking the Huntingdon Road-Castle Hill junction with Hyde Park Corner would cost £932,000 (£16.3m today). There would be a new bridge over the Cam at Jesus Green with an underpass at Four Lamps before the road continued to Parkside and Regent Street. This figure did not include the cost of acquiring additional land. It was needed to deal with traffic problems in Magdalene Street which is very narrow, an Inquiry was told. 62 07 05b

1962 The University's plans for Cambridge envisage a new shopping area off Fitzroy Street providing sites for large retailing units, segregated pedestrians and vehicular traffic areas and car parking close enough for shoppers to walk. All future schemes for redevelopment of University sites should have adequate car parking; this is the University's view and they will bear their share of the car parking burden, the Estate Manager told an Inquiry. 62 07 19

1962 Bulldozers and heavy earth-moving machinery have been followed by a fleet of lorries as clearance work starts on the site of the new multi-deck car park in Park Street. It should be completed within nine months and will form an integral part of the new parking meter system for which the City Council is to seek Ministry approval. Councillors are still waiting a decision on their earlier application for another multi-storey car park about 200 yards away in King Street 62 09 05

1963 East Road dual carriageway opened (pt Elizabeth Bridge route) [446.16.2]

1963 Logie scheme for underground loop road & car parks from Emmanuel Road to Jesus Lane to give traffic access but unspoilt centre [7.26] [9]

1963 Chesterton Bridge scheme is top priority [19.14]

1963 Editorial : "They come thick & fast - plans for the University's New Museums Site, plans for underground car parks with an attendant underground road, plans for parking meters, plans for a new surface water sewer, plans for a design policy for the control of the visual appearance of Cambridge. Indeed never in the history of Cambridge has there been such a paradisaical period for planners. And now ... County's turn with a scheme for a new village to the North of Cambridge" 28.3.63 [2.14]

1963 The Government rejected the City Council's scheme to build a multi-storey car park together with shops and a petrol filling station on land near the Malcolm Street junction at King Street. The site is obscurely located in a residential area and the roads leading to it are narrow, awkward and unsatisfactory. It would cause serious detriment to adjoining properties and initiate a substantial commercial encroachment to the detriment of the special qualities of the cultural and central area of the city. An alternative site should be found, the Minister says 63 05 15, 63 05 11

1964 Elizabeth bridge delays, route published, 17 houses to be demolished, 67 gardens affected [494.8.6]

1964 The first stage of Cambridge's Inner Relief Road would comprise twin-carriageways starting with a roundabout at Murkett's Corner, on the junction of Huntingdon and Histon Roads. The planned road goes southward through the Rex Cinema site, leaving space for the proposed law courts near Shire Hall. As it approaches Chesterton Road there will be a flyover to take the main traffic flow over a roundabout. Then there would be a new bridge over the Cam before it crosses Jesus Green parallel to Park Parade. A subway will give access under the road to Jesus Green. 64 09 15 [2.3,2.1]

1964 Elizabeth Way inquiry : needed before Inner relief road [2.5]

1964 Gordon Logie, the City Architect spoke of his desire to see the central area of Cambridge used for pedestrians only. Traffic conditions were 'frightful', especially on Saturday afternoons. "It will be impossible for everyone to drive into the centre in the future. I am afraid that most people will have to walk in from the outer fringe car parks or travel by shuttle-service public transport", he told the Trades Council. He would like to see a new city hall and central library to replace some out-of-date shops in an attempt to make the central area more pleasant. 64 01 16

1964 Lion Yard car park as traffic meters come into operation – 64 04 01

1964 The Mayor of Cambridge fed a parking meter on Peas Hill with a shilling "to make them hungry and ready to bite" as one official put it, and set the new parking scheme in motion. . Long queues of traffic soon formed in streets leading to the Lion Yard car park and motorists had some acid remarks about the meters. A moped rider complained about finding a ticket stuck to his bike

with thirteen inches of sticky tape. From the number of excess charges shown on the meters the city coffers will soon begin to bulge 64 04 02b

1964 Work on Cambridge's Eastern Bypass was interrupted by the war and today only a short section is in existence. It runs from Wadloes Road, across the main Newmarket Road and peters out at the end of Barnwell Road where a muddy track and footpaths picks its way towards Coldham's Lane. Standing amid the rubbish dumps, tumbledown sheds and chicken houses which adorn this part of the route one can hear the distant rumble of traffic on Newmarket Road. It is likely to be many years before the scheme is revived. 64 04 1

1964 A Regent Street trader has lost 78 per cent of his usual turnover since parking meters were introduced, Cambridge Chamber of Commerce was told. A survey of over 30 shops showed the average loss in turnover as 45%. There should be a reduction in rateable values and compensation for businesses which are forced to close. Meters should be closed down and a return made to unilateral parking supervised by wardens. But the Parking Committee chairman said that if motorists used the meters to the full they would get most of their customers back 64 04 30

1964 A car park was needed on the West side of the river to help clear Queen's Road and they should consider an underground car park at the Backs, councillors heard. Park Street was a mistake because it was too near the city centre but Coe Fen was one of the best places for a surface car park. Queen Anne Terrace was a marvellous site as it could have a basement, three or four storeys of flats and a roof garden restaurant. There would be a mini-bus to get shoppers into the centre which meant the Lion Yard would be used more by people who came to park for the day. 64 06 30

1965 report urges both Elizabeth Bridge & Inner Relief [2.6]

1965 Minister announces no modification Inner Relief line to save Jesus grounds, protests [2.8]

1965 city reject Inner Relief Rd but new plan to widen Victoria Ave to dual carriageway with new bridge; County continue Inner; city decide in favour again [2.9,2.10,2.11]

1965 Newmarket Rd dualled [446.15.3]

1965 Elizabeth bridge inquiry, approved [494.8.7]

1965 Bypass for Cambridge proposed in Development Plan – 65 03 04a

1965 Western bypass a priority along with ban on all vehicles parking Queen's Road – 65 03 30b

1966 "Shopping Growth" plan includes Christ's Pieces with underground car park, Kite favoured [494.5.5]

1966 outer bypass to come in early 1970s [2.12]

1966 Mitchams roundabout changed - new road at rear of large houses & Croft Holme Lane widened [12.7]

1966 Crumbling Cambridge: depression lurks over centre re transport policies – feature – 66 03 16a

1966 Could be western by-pass and motorway to north, City Architect Logie predicts – 66 04 28d

1966 How much more traffic can Cambridge take – article – 66 12 14, 14a

1966 Experimental one-way traffic system for Romsey roads to start – 66 12 28

1967 new plan Newmarket Rd - East Rd, stage 3 Inner Relief, several others [2.13]

1967 Mitcham's Corner, second huge island created between Chesterton Rd & Victoria Rd – 67 03 03b [12.10,19.16]

1967 Travers Morgan report costs £120,000 [18.2]

1967 Surveyors report on traffic one of most comprehensive ... also instructive in another context - a notable lack of reference to the City Architects dept & almost total absence of any obvious exchange of views [19.17]

- 1968 Elizabeth bridge work starts [494.8.8]
- 1968 Elizabeth Bridge inquiry [2.14]

- 1972 Buchanan Report “£113,000 blueprint to get city moving” - Railway route [494.6.7]
- 1972 Petty Cury pedestrianised, Councillor celebrates with lunch in street [3.10]
- 1972 Coun Chris Gough-Goodman and Jennifer Hall dine in Petty Cury to mark first day of pedestrianisation – 72 02 01; both ends blocked for trial period – 72 02 01a reopens end of month but closed & Corn Exchange Street opened June [12.13] [2.6]
- 1972 Buchanan suggests main town road - Inner Relief Brooklands Ave to A45 [3.13]
- 1972 72-day inquiry into Bypass : longest & most involved inquiry ever seen; (approved in 1973 but start delayed 1974) [3.13]

- 1973 Barnwell bridge improvement opens [44.7.3.2]

1973 The Market Square ends of Guildhall street and Peas Hill, Cambridge, were closed to traffic today as part of city council's plans eventually to make much of the central area into a pedestrian precinct. It is now possible to walk from Sidney Street to King's Parade without crossing a road. City surveyor, Mr Geoffrey Cresswell said that some motorists were still driving round Market Square attempting to get into Peas Hill. The present closure is officially regarded as only "temporary" - although it will last for possibly another two years - while rebuilding of the adjacent Lion Yard site is under way c73 04 09 [17.9]

1973 council adopt Travers Morgan report to cut central spine route but Govt refuse ban traffic Kings Parade [17.10]

1973 Trumpington-Lensfield Roads snarl up when lights restored [16.3]

1973 The Cambridge City Surveyor, Mr Geoffrey Cresswell, claimed today that speed-reducing ramps built into roadways - sometimes called "sleeping policemen" are "positively dangerous". He told the Public Works Committee that these bumps in the road could cause fatal accidents, particularly to cyclists and motor-cyclists. The Government are asking local councils to look for suitable areas where these ramps could be installed. After a brief discussion the committee decided they did not want any "sleeping policemen" in Cambridge

1973 The Cambridge by-passes have been given the Government go-ahead. Work may now begin in less than a year on the £30m.-plus scheme to give the city its biggest new road complex in history. Within four years Cambridge is likely to have 14 miles of new motorway and nine miles of new trunk road to bleed heavy lorries and other traffic away from the historic heart of the city. It will also mean a much-improved A604 route between Cambridge & Huntingdon - at present one of the busiest and most accident-prone roads for miles. Today's announcement ends years of argument and months of speculation following a record-breaking public inquiry stretching over six months early last year c73 09 17

1974 Cambridge city council's controversial plan to stop Gwydir street being used as a short-cut between East Road and Mill road has come into action and already shopkeepers are reporting trading losses of up to 50%. Norfolk street, once continually busy with traffic, is now silent and virtually at a standstill. And the shopkeepers of the street are beginning to wonder if they might soon be at a standstill too. Mrs Linda Gregoris who owns the Athena restaurant lent on her broom and surveyed the five customers. "It is 11am and normally this place is chock-a-block and people have to fight for a seat. Yesterday we had five people in here - normally it would be as many as 80 c74 02 09

1975 experimental closure in centre, close Kings Parade, Sidney st, St Andrews St; tea-party marks closure KP [17.11]

1975 The much-criticised second stage of Cambridge city council's central area traffic experiment has been abandoned and traffic flow systems introduced five weeks ago withdrawn. This means there is again two-way traffic in Regent Street, Parkside, Emmanuel Road and Short Street. Through traffic is still banned along parts of St Andrew's Street, Sidney Street & Kings Parade. City police said many motorists were confused by the changes which it was improving impossible to enforce. Long traffic queues had built up at major junctions since the start of the experiment which brought traffic chaos to the city c75 06 13 [17.14]

1975 Magdalene Bridge closed 10 days for tests [17.12]

1975 "expense rules out East Rd dualling" [17.13]

1975 first mini-roundabout Queens Rd/Northampton St [18.1]

1975 Railway Route proposals; dropped in favour of East Relief Road, Coldham's Lane to Newmarket Rd [3.5] [494.6.16] [20.3] [6.16]

1975 1960s Spine relief road moved further out & called Inner Relief Road; since then been eroded section by section & Cross Town route abandoned. Present position (1974) is relief will be provided by outer area link roads & by bypasses. After 25 years the Eastern by-pass from

Brooks Road to Milton Rd, the New West Rd from Huntingdon Rd to Trumpington Rd & stage one of Inner relief road are all that remain of Holford unchanged in centre over last 10 years
stead move towards reducing intensity of traffic & parking in centre by controlling non-essential traffic & getting high turnover of parking places in central area first proposals put forward by R Travers Morgan 1963-4, further developed in City Surveyors report 1967 which also proposed pedestrianisation some central areas, 1972 Transportation Plan endorsed proposals [10]

1975 City proposal road across Grantchester Meadows provide southern section of proposed Western Relief road around Cambridge, linking Huntingdon rd, Madingley Rd, Barton rd & Trumpington Rd [7]

1975 1931 deed of covenant signed by Cambridge Preservation Society, Kings college & Borough council for preservation of college land in Grantchester area; Society paid £7,549 into university & college estates account of Ministry of Agriculture & Fisheries to safeguard college land from development, part of £10,000 grant from Pilgrim Trust; borough undertake not to plan any ring or other road crossing college property or sited nearer to Cambridge than southward of the village of Grantchester [9]

1975 County leader complains 'Cambridge road planning disease spreading like a fungus' over the meeting [8]

1975 outer ring road proposals Newmarket Rd to Milton Road scrapped due imminence of Northern Bypass; also remove 1st part Inner Relief Rd [3.7]

1975 Brooks Road link to Newmarket Rd is revival part old Eastern Relief Road abandoned start war 1939, better than Railway Route [4.1]

1975 new West Road project - 1st part controversial Western relief road Madingley to Barton Rd to Trumpington now extended Huntingdon Rd - proposals deferred [4.3]

1975 experimental closure in centre, close Kings Parade, Sidney st, St Andrews St; tea-party marks closure KP [17.11]

1975 2nd stage - one way Emmanuel Rd, Parkside, Parker St brings chaos & abandoned [17.14]

1975 Cambridge's city centre traffic experiment swung into action today. Thousands of motorists faced the through-traffic ban for the first time. The road closures and a system of one-way routes will operate for six months unless "utter chaos" develops. The scheme could then be swiftly abandoned. It closes two sections of road in the centre of town to private cars. One extends along King's Parade from King's College gate to Gt St Mary's while the other runs from Woolworth's along St Andrew's street to its junction with Emmanuel St c75 02 10

1976 City ask county drop Western Relief Road, Barton Rd to Trumpington Rd, inquiry as county refuse & stays in their long- term proposals [3.8]

1976 Northern Peripheral link road Kings Hedges to Histon road started (opens Feb 1977) [3.9]

1976 Western bypass may be axed; work starts Northern bypass [4.4]

1976 work to turn Newmarket Rd into dual carriageway [18.3]

1976 The Government has decided that the experimental traffic restriction system in the centre of Cambridge can become permanent. Through traffic will be prevented from going along Sidney Street and St Andrews Street between Emmanuel and Market Street junctions, and along King's Parade. The experiment was introduced 18 months ago – against a background of support from amenity organisations and opposition from city centre traders who carried their protests to a public inquiry c76 08 03 [18.5]

1976 Cambridge's first bus and bicycles lane comes into operation along Victoria Avenue after the Government approved the city council's experimental plan to put down a special lane from the Four Lamps junction to Victoria Bridge. The plan also bans all parking along the Midsummer Common side; this means the hundreds of motorists who leave their cars there will have to find somewhere else. The aim is to speed up the substantial number of buses using Victoria Avenue,

particularly during the evening peak period when traffic congestion causes extensive delays c76 08 06 [18.6]

1976 Work is progressing smoothly on the extension of Barnwell Road, Cambridge, to link up in about two years' time with Brooks Road on the other side of the Cambridge-Newmarket main railway line. The aim is to provide a quick route for heavy traffic between Newmarket Road and Perne Road and out on to the main roads to London. This will by-pass the notorious traffic bottlenecks of Coldham's Lane. The scheme includes a new bridge over the railway and an extensive road island and an extensive road island at the Brook's Road – Coldham's Lane junction c76 10 11

1977 mini roundabout Newmarket Road/Coldham's Lane cures jams (put in when lights removed temporarily); also introduced Lensfield Rd/Trumpington Rd [18.7]

1977 Elizabeth Way resident is noisy and polluted choked artery which miraculously eased Cambridge traffic problems in 1971 but it now itself in urgent need of relief. Residents used to live in tree-lined Cam Road, a quiet residential street on a par with De Freville Avenue in houses which had front gardens. Now they have lead pollution and noise levels three-and-a-half times above "acceptable" limits. People live in back rooms as, despite double-glazing, front rooms are still noticeably noisy. "It is difficult to cross the road, nobody can come and see you and window cleaners refuse to come here – they say it gets too dirty", said Mrs Winifred French. Relief could come next year with the opening of the Northern Bypass – at least everyone living on Elizabeth Way hopes so. c77 07 17

1978 "parking is so easy on the Kite" advertising feature [494.7.6]

1978 County Council rejects plans Cherry Hinton bypass, press on with Eastern bypass, West & Northern bypasses [4.6]

1978 The northern bypass, described as a 'Christmas present to Cambridge' was officially opened at noon and then closed after police expressed reservations about the state of the nine-mile road and its interchanges. But as dusk was falling the barriers were pushed back and it was opened to the public. It includes one of the longest straight stretches of dual carriageway in the country and police asked drivers to get used to the road slowly. With the completion of the interchanges next year and the opening of the M11 Cambridge will have a road system surrounding it for which many other cities would give their eye-teeth c78 12 22 [4.7]

1979 computer lights opposed [18.8]

1980 calm descends on Castle Hill after bypass opens [18.10]

1980 M11 opens [4.8]

1980 plans widen Ditton Lane for bypass link shelved [4.9]

1980 Mill Road bridge dismantled, rebuilt [447.3.6]

1980 Senior dons at Girton are pursuing an astonishing plan to link their college with Cambridge by railway. They are proposing a mono-rail link which would run mainly at ground level on university and college-owned land to the Sidgwick Avenue arts site and University Library. The main difficulties are the high cost of the project, which would need to cross the Huntingdon and Madingley Roads and the delicate negotiations with other colleges. The college's undergraduates have to cycle two miles in all weathers to attend lectures and many have been injured in road accidents. But two recent changes may ensure it is never built: the opening of the Western By-pass has reduced the amount of traffic and there will soon be a cycle lane. 80 02 27

1981 Kite : car parks close [494.7. M11 reduces traffic volume, heavy lorries down 60%; 35-% Newmarket Rd, 30%, Huntingdon & Madingley Road, 26% Trumpington Rd [4.10]

1981 all traffic banned Kings Parade with bollards as experiment [18.11]

- 1981 chaos – Kite Parks lost & protests about parking on commons [18.12]
- 1981 A startling £3.5 million plan to tunnel under The Backs has been prepared secretly by county road engineers. It would be 20 feet wide and run under Queen's Road from the Madingley junction right up to Silver Street. Meter controlled parking would then be allowed up to Garret Hostel Lane and the area to West Road would be grassed over to give an uninterrupted view of King's College chapel. The plan is certain to raise a violent storm of controversy. 81 11 25 & 26b
- 1982 computer lights approved though city object; protest over memorial move suggestions [18.13]
- 1982 peace bid over roads - city and county clash over East Rd widening & Drummer St rebuilding [18.14]
- 1983 county plan to enforce traffic restricted zone Sidney St, reduce number cars in triangle & reverse central one-way flow [18.16]
- 1983 New Square returned to grass [IC.7.20]
- 1983 plan to dual East Road buried [446.14.4]
- 1983 traffic lights on Mill Rd bridge to cut accidents - increased out 1984 [446.14.4]
- 1984 restrictions on entry triangle start, St Johns street 8.30-6.30 [18.17]
- 1984 computer lights installed 6 months ago reduce delays by up to one- fifth [20.1]
- 1984 county say traffic will increase by 50%, suggest new N-S road following railway line, controversy, costed, killed off (Railway Route abandoned 1975) [20.2-4]
- 1984 The County Council chairman condemned councillors for their 'pathetic attempts' to sort out the Cambridge traffic problem. "There is no doubt whatever that what we do in Cambridge is pathetic compared to what is done elsewhere. We really do not know what we are doing in this city", he said adding that the county must keep up pressure on the city council to provide more parking facilities in Cambridge. 84 09 07
- 1985 A major shake-up to cope with the forecast massive increase in Cambridge traffic has been unveiled by the County Council. It suggests an underground car park at the Butts Green end of Midsummer Common and a new road following the main railway line with a new bridge over the Cam. There could be reconstruction of a number of major road junctions including East Road - Newmarket Road and at Hyde Park Corner with widening of dual carriageways and new cycleways. A park-and-ride system of new car parks linked to the centre by frequent buses is also proposed 85 03 11
- 1985 A furious political row has erupted over the sudden and unexpected publication by the Labour-controlled City Council of its new roads and traffic plan just before the County Council issued their proposals. It envisages a park and ride system, converting long-term city centre parking spaces to short-term shoppers' parks, an extension of Lion Yard car park, road closures, pedestrian areas and a special coach-bus interchange near the railway station. The Liberals describe it as a waste of paper. It has been produced without any councillors or officials being told about it before its release to the press 85 03 11a
- 1985 The controversial 'railway-route' road plan for Cambridge has been killed off for the second time in 10 years. It was intended to relieve traffic & would have run around the southern and eastern outskirts of the city, following the main railway line. Ten years ago Conservative county councillors discovered it would have cost millions of pounds to build and destroy at least 100 houses. Their revival of the plan earlier this year caused a furious outcry: they were swept from control at the recent elections and admit it was one of the main factors in their downfall 85 06 14

1986 within Cambridge city the traffic flow has reached the 1078 pre- bypass level, though numbers HGVs remains approx half 1978 flow [16.4]

1986 since 1960s Elizabeth Way, M11 & city centre closed [20.5]

1986 street narrowing starts using bicycles as traffic regulators [20.6]

1987 road scheme use bicycle as traffic regulator; amount of traffic using central roads drops, cars from 252 to 17 [NS3.14]

1988 traffic lights start Castle St/Huntingdon Rd ¢CEN 23.6.88

1988 city press for Eastern bypass ¢CEN 4.10.88

1988 Cambridge may have a city-wide high-speed monorail system linking with all nearby villages allowing shoppers to leave their cars at home and travel high above the traffic jams. It could be expensive to set up but would have low running costs and be reliable. Eight years ago dons at Girton College came up with a plan for a monorail to link it with the university quarter but nothing ever came of it. The County Council has already commissioned experts to consider a light railway system linked to the proposed park-and-ride system 88 10 18a

1989 Traffic chaos in Cambridgeshire is growing so severe that in five year's time drivers may have to set off at 7 am to be in work by nine. A massive upsurge in traffic has already extended the rush hour. Congestion is choking Cambridge city centre and deepening the parking nightmare, a report says. Action must be taken with new roads around the outskirts and controversial park-and-ride schemes or it will grind to a halt over the next ten years. 89 03 22

1989 Cambridgeshire's new traffic chief has vowed to end Cambridge's traffic and parking chaos within four years. He wants a better road system to serve the industrial quarters, a new light railway system linked to a park-and-ride scheme and a possible car park under Midsummer Common. A 'grand traffic management plan' will be drafted by officials and meetings arranged with business bosses.. 89 06 09

1989 The £15 million park-and-ride scheme planned for Cambridge is now officially buried. County Conservatives had promised during the election campaign that the plan would be dropped if they took control and have told officials to stop work on the joint scheme with the city council. And a plan for an interchange where Madingley Road meets the M11 has been delayed. Work was due to start in 1990 but now the M11 is to be widened into a three lane carriageway between Cambridge and Stansted Airport. The council is now looking for alternative road schemes to spend the money on. 89 06 10

1989 Controversial new plans to ease Cambridge traffic chaos would see starting and finishing times of all schools, main centres of employment and university lectures staggered. Vehicles would be banned from main roads during the rush hour, turning them over exclusively to bikes and buses. City planners say better traffic management is better than building huge and expensive new roads and rail systems. The plans are bound to provoke furious protests 89 09 04

1989 A mass boycott by drivers has forced a climbdown over charges at Queen Anne Terrace car park. Motorists have stayed away since fees were increased, leaving two-thirds of the spaces empty during peak periods. Now, just months after making it one of the most expensive car parks in Cambridge, it could become one of the cheapest. The present 40p one-hour parking will be extended to one-and-a-half hours for 50p, allowing shoppers extra time to walk into the city centre. But the maximum charge of £10 for more than five hours will remain 89 09 25

1989 The controversial Cambridge park and ride scheme has started with a whimper. At peak commuter time there were 17 cars at the 400-space Cowley Road and even fewer at the 150-space car park on Clifton Road. Users were enthusiastic: Sophy Moxley of Willingham, a sales assistant, said "It will save me money because it only costs 50p which is cheaper than parking in the city centre though Steve Field from Stretham says it is inconvenient as you don't have access to our car during the day. Councillor Andrew Duff said the area around Castle Hill, where

residents-only zones have been introduced, was ‘almost pastoral’ though Canterbury and Benson Street were packed with cars. 89 10 01

1989 A light railway system running in a tunnel under Midsummer Common is the latest official suggestion to help solve traffic problems in the centre of Cambridge. It would be an alternative to a line running down a widened section of Newmarket Road. The underground railway would link with a number of other lines from surrounding villages as far out as Fenstanton and terminate at a station in Malcolm Street. The County Council will invest £60,000 to see if a car park under Midsummer Common is feasible and another £150,000 in a feasibility study for a 60-mph light rail system. 89 10 03a

1990 Traffic plan approved, includes car park under Midsummer Common, new bridge over Cam and road across Ditton Meadows; light railway system, pedestrianisation, tow-away, roads and cycleways – 90 05 16a

1994 A14 opened, connects Mid Anglia with West Midlands [Rev]

Councillors discuss Kite – cartoon, April 1976

106.92

c.49.66 : Kite :

1936 Fitzroy Street shop owner blames losses on Corporation slum clearance and multiple shops 36 05 30

1950 Holford report suggests historic centre unable meet shopping needs of future, “We regard Fitzroy Street as ... a valuable relief for shopping pressure on the older centre” [9]

1952 Ninety-one percent of the properties in the East Road area of Cambridge fell into the “short life” or “no life” categories the Development Plan inquiry was told. The area as a whole was described as “densely packed”. The age of the houses was about 100 years, they were generally poorly constructed and the worst property in Cambridge lay in the area. The plan envisages using Norfolk Street as a local shopping centre to keep East Road free for a traffic route. But Mr S.P. Yarrow, retail grocer at 35 East Road said that if he went to Norfolk Street his turnover would be cut by half. B.G. Reynolds of Renbro Wireless Services, East Road, said he had one of the best positions in the area and business would go down if he moved. They did not see why two shops in East Road should impede the flow of traffic. c52 11 15

1955 A scheme for the re-development of the Fitzroy Street area as the main commercial centre of Cambridge has been submitted by a London Architect. It is a counter-proposition to the official Development Plan which could only result in the eventual complete destruction of the essential character of the city. The greater part of the area consists of out-dated two-storey cottages with extensive yards and is largely a slum. Re-development is due and can be done without the restrictions of historical associations and high land values. There would be a series of attractive courtyards unencumbered with traffic, one of which is large enough to take the place of the present Market Hill. An essential feature of the scheme is a new thoroughfare to link Gonville Place with Victoria Avenue and complete the inner Ring Road. 55 02 18a

1956 Kite area : Jesus College plan expected soon [2.3]

1956 An enquiry heard that Cambridge city council had wanted to purchase land at the junction of Fitzroy Street and Wellington Street, pull down the old houses and use the land to re-site industry displaced from the East Road area. They offered to pay the current price but the owner, a former chairman of the Council's Finance Committee, said that if the land had potential for light industry then the price should be higher. Eventually negotiations broke down. Now he applied to redevelop the area, but the council opposed his plans. 56 04 19a &

1956 Councillors received a report on the redevelopment of the East Road comprehensive development area. The first stage provides for 51 dwellings – maisonettes, flats and houses – to house 206 people, as well as six shops and seven garages. Two more stages will see 212 dwellings, housing 737 people. There will be a district heating scheme from a central boiler house for the supply of hot water throughout the estate. 56 07 23a

1958 An inquiry into plans for the compulsory purchase and clearance orders affecting 67 houses in East Road, Fitzroy Street, Adam and Eve Street and Gloucester Terrace heard from three objectors. Mr J.N. Baldry had plans to develop his site in connection with his mineral water business. But the Medical Officer said the area contained some of the worst houses in Cambridge : they were all unfit and clearance would serve the interests of public health. 58 09 25

1959 The area between East Road, Norfolk Street and St Matthew's Street comprises narrow streets and courts of dwellings of the demolition standard, creating a general impression of decay. The whole area should be demolished and rebuilt, the Surveyor told an Inquiry. Every house in Staffordshire Street was damp, some roofs are sunken and some water closets are across the street from the houses they serve. But many owners objected to plans for compulsory purchase. 59 09 30c & d [4.5]

1959 In the past few years the Fitzroy/Burleigh Street area, with its easy access, ample car-parking facilities and huge variety of shops, has become increasingly popular as Cambridge's most convenient shopping centre. Many of the shops were formerly in ramshackle buildings, combining timber and corrugated iron with a minimum of brickwork, often built over the front gardens of houses which had their ground floors converted. But now these have made way for up-to-the-minute shopping premises and improvements are constantly going on. 59 11 04 & a

1961 University plan - keep & enhance character University Town & create regional shopping centre East Rd [4.6]

1961 The only area of Cambridge suitable for a regional shopping centre is that around City Road and Fitzroy Street, a University development plan says. It has space for shops, restaurants, car parks and houses and could be well-served by public transport. By contrast the city centre does not meet the land requirement unless there is such demolition that it would affect the character of the area. The roads are poor and provision of adequate car parking would be an impossible task. 61 01 11c

1962 Lion Yard : Inquiry highlights 3 divisions of opinion. University want commercial development restricted to new regional shopping centre Kite area with Lion Yard to have amenities like library, art gallery, concert hall etc. County accept library but reject concert hall. City want commercial development in new pedestrian shopping centre [2.11,2.12]

1962 Kite area : endorsed as shopping area by city - develop shopping facilities & relieve pressure centre [2.10,4.11]

1962 City Road form association fight University plans [4.12]]

- 1963 Logie proposes underground road to link the main centre with a 'joint centre & in Burleigh St area [9]
- 1964 Kite residents protest against piecemeal demolition, Minister calls for plans for new high-intensity shopping area [11]
- 1964 The Lion Yard area is badly laid out and contains 'obsolete development'; there should be a small increase in shopping space with the rest devoted to civic and university uses, Sir Keith Joseph, the Minister of Housing says. A brand new shopping area should be created in the City Road area – the present twilight zone. It will take traffic away from the centre, cater for modern supermarket trends and fit in with plans for the continuation of the East Road housing scheme 64 08 28, 28b [4.15]
- 1964 Traders are split over proposals for a new shopping centre off Fitzroy Street. Claude Scott, motor agents, say trade would be increased but he would seek full compensation to leave. T. Tarrants tobacconists, say it would be good but family businessman A.P. Cook of Prospect Row, who has run a grocery store for 50 years, says he will fight hard against compulsory purchase. Mrs J.A. Douglas of Earl Street, who has just modernised her house, is horrified at the proposals. 64 08 28c
- 1964 University offer £20,000 so city engage planning team to speed City Rd scheme [4.18]
- 1964 Kite vast rehousing unenviable task- nearly 1000 houses & 65 acres in twilight zone [8.10]
- 1965 Llewellyn-Davies invited to prepare plan for new shopping Centre, Fitzroy Street – 65 01 30a
- 1965 Kite : design team include Llewelyn-Davies will be financed by University £20,000 [5.1]
- 1966 "Shopping Growth" plan includes Christ's Pieces with underground car park, Kite favoured [5.5]
- 1966 plans for regional shopping centre & Lion Yard principally civic centre approved [5.6]
- 1966 debate about inner relief road would mean dual carriageway between two shopping centres; Logie unveils 6 possible schemes for Kite area, are scrapped a few months later amid accusations that 20 years have been wasted [9]
- 1966 New Square Residents Association issue 'The Second Centre' report opposing Inner Relief Road; seeks bus station Gold Street, one-way streets, commercial development – 66 01 21c
- 1966 Burleigh/Fitzroy Street favoured for shopping redevelopment in preference to Lion Yard – 66 10 07
- 1966 Gordon Logie plans for Kite Area shows how may develop in 20 years' time – 66 09 16a
- 1967 new Logie plans involving parking for 2,000 cars, arcades, supermarkets & cycle paths, nothing happens [9]
- 1968 Cambridge businessman offers pay for summit meeting between city & county planners & Government to speed redevelopment, nothing happens [9]
- 1968 Kite area planning report from London consultants- 68 08 01a
- 1969 Llewelyn-Davies report proposing three car parks, bus station & 450,000 sq feet of shopping & office space [9]
- 1969 Fitzroy Street redevelopment – architect's impression – 69 02 21, 21a # c.49.66 # c.49.4
- 1970 county accept plan until reminded must be public inquiry into objections about link road; Samuel Properties & Jesus college commission own report from Piano & Rogers; county planners want more proposals by mid 1971 [9]

1970 Kite area plan 'torn up behind locked doors' – city reject consultants' recommendation, to form consortium with Jesus College and a property company, inquiry told – 70 06 17
1970 Fitzroy-Burleigh redevelopment may start as Samuel Properties start discussions – 70 12 29

1971 Kite started become neglected WWI, acceleration last 15 years ... monument to planners, blighted & fossilised; some say slow destruction deliberate but unlikely Cambridge capable of such a calculated campaign, more likely derelict by default, "walls crumble, more slates slide, panes smashed" 1972 [8.11,8.12]

1971 "the first bricks will be laid in 1973" prediction [9]

1971 Fitzroy Street shopping report published – feature – 71 04 28

1971 Kite – a sad saga of city-county clashes – feature – 71 12 06

1971 Mackay plans to extend engineering factory and build more shops and offices on East Road blocked – 71 12 07a

1972 city planners agree to 600,000 sq ft of shopping space because of interest shown by big chain store [9]

1972 Most of the people who will be displaced by the Burleigh Street-Fitzroy Street redevelopment (Cambridge) want to be rehoused in the same area according to a report. Counc. Christopher Bradford claimed that the land was bought by the city council for "chickenfeed" ten years ago and is now worth £65,000. The council paid only £200 to £300 development value for some of the houses and perhaps £2,000 for some of the others c72 93 26

1972 The Cambridge city council's planning consultants who are designing the redevelopment plans for the Burleigh Street- Fitzroy Street have suggested the building of a departmental store East of Napier Street. Consultants feel that the introduction of shopping uses at this point would improve the whole project in addition to saving housing land to the North of Maids Causeway and James Street. They have also proposed that the pedestrian way along Fitzroy Street should be graded down and Napier Street itself raised over the pedestrian way. This appears to be the best way of separating traffic and pedestrians c72 11 20

1973 Kite : delay considering till Parry Lewis report, 13 day inquiry [5.19,8.12]

1973 Kite : Parry Lewis double-crossed by Kite decision (he opposed) [6.9]

1973 "Parry Lewis says that Kite development will sign death knell for Market Square area, new focus of commercial development must be on edge of city & this cannot be done if Kite goes ahead ... his words have too uncomfortable a ring of truth about them ... in the past we have pressed for action on this plan; our 'City in shackles' series tried to express the frustration which many citizens felt at the stagnation of the planning process ... but now we, who have formerly pressed for action are now urging caution" [12]

1974 Parry Lewis "most important document since Holford" calls for abandonment of Kite, development Trumpington [6.10] Save Kite campaign starts with clean-up; Kite Action committee set up 8 months ago [8.13]

1974 Jesus-Samuel properties plan approved in outline but council talk about scrapping whole scheme [9]

1974 Save Kite campaign starts with clean-up; Kite Action committee set up 8 months ago [8.13]

1975 Kite : Ian Nairn calls for rehabilitation area [7.1] properties released from blight after 15 years [7.2] council accepts Piano & Rogers scheme & starts working out detailed plans with consortium [9]

1975 The Government has decided after two years deliberation that the Burleigh Street – Fitzroy street area of Cambridge is suitable for redevelopment. This now lays the responsibility

for action squarely on the city council who are likely to decide within two months whether to drop the much-criticised official development plan and go ahead with something less contentious. The plan has been unanimously rejected by the area's residents and shopkeepers c75 02 09

1975 The Labour-controlled Cambridge city council has decided by a two-to-one majority to develop the Burleigh-Fitzroy area mainly as a regional shopping centre in partnership with Jesus College and a London property company. This is the first definite and much substantial move the city council has taken about the future of the so-called "Kite" area in the 15 years of controversy and discussion that has surrounded it c75 04 19

1976 Kite : report [7.3]

1976 money problems : scheme will require £13m investment from city for return of £150,000 pa, look for help [9]

1977 Cheviot House & Amalgamated Developers put forward schemes; Cheviot House £10M for 4 large shops, 60 small shop units, parking for 1,250 cars, £91,000 pa profit for council after 5 years, Powley "as near perfect as it is possible to make it" [9]

1977 A multi-million pound deal for the rebuilding of large parts of the Burleigh Street – Fitzroy Street area of Cambridge (The Kite) which would involve a handsome handout to the ratepayers is being negotiated between the City council and two internationally known development companies. Under the deal the redevelopment could be carried out without any cost to the ratepayers. The council would hand some of its land holdings – much now derelict – to the developers on a long lease. In return they would build large car parks for the council, regrass the New Square car park and erect a number of shops, at least one of them a department store. And at the end of the development period the company would make either a substantial lump sum payment to the council or give it a large cut of the rents collected. CDN c 17.4.1977

1977 Theoretically worth over £150,000 a year in rent, the 47,000 square foot office accommodation above the Lion Yard has stood empty since the precinct opened nearly two years ago. Agents trying to let the offices blame the economic malaise for their lack of success. The high price of central car parking is also a barrier. The city council made a former builders' site available to encourage offers and now one taker has at last been found. Vinters, the Cambridge solicitors have taken space. But Bidwells say matters will only improve when companies begin to expand and the perpetually optimistic estate agents say it is beginning to happen. c77 08 23

1977 The Cambridge department store Laurie and McConnal in Fitzroy Street is to close in December. Indecision over plans for the Kite area redevelopment is the reason, said Mr Anthony Frais. "We have tried everything we know to get something moving in the Kite, and while the council is now at last seeing sense we cannot afford to wait the two years before anything actually happens. As a small family company are paying penal rates." The business was established nearly 100 years ago. c77 10 07

1977 The sudden news of Laurie's closure has come as a shock to the City Council team involved in drawing up the Kite plans. Council leader, John Powley, said he was "very sorry indeed" and could well understand their frustration at the indecision. "Gradual renewal of the area, as some people want, just will not happen and will lead to a speedy decline of the whole area. A satisfactory scheme must be produced as speedily as possible. Constant delays are not good for the area, for the people of the city, or for Cambridge as a whole". c77 10 08

1977 The news that Laurie and McConnal's department store is closing will have come as a surprise to most people. But to anyone who regularly used the store it was only a question of time before they succumbed to the inevitable. Even at the height of the shopping day you could be the only potential customer in any one department. It had 50,000 sq ft of selling space, spread over five floors to service, heat, decorate and keep full of merchandise and the passing trade had dropped off dramatically as so many houses have been knocked down and food shops have disappeared from the Kite area. c97 10 09

1977 More shops in the Kite area will be forced to close unless something is done quickly to rejuvenate the area. A number of stores have been teetering on the brink for some time and could go out of business. This has been caused by all the little ginger groups, all pushing for their own things. They hack and maul among themselves and all they succeed in doing is to cause the sort of intolerable position that Lauries found itself in. It is all very well saying the Kite should stay exactly as it is. But it cannot. It has changed markedly over the years and is still changing. It either has to be redeveloped in some fashion, or it dies. c77 10 16

1978 enter Grosvenor Estates Commercial Developers, backs scheme & enters partnership with City council [9]

1978 oversight in procedures mean council unable to compulsorily purchase land needed until 1983; council used wrong procedures in seeking to evict three people - one city councillor - from 72 Fitzroy St [9]

1978 Kite : residents stage occupation of unsafe houses [7.4]

1978 city unable to buy by compulsory purchase, 'kills scheme' [7.5]

1978 "parking is so easy on the Kite" advertising feature [7.6]

1978 squatters protest over eviction Kite [7.8]

1978 Residents are occupying a deserted house in Fitzroy Street, Cambridge, after learning that the city council is about to demolish three other "unsafe" houses in the Kite area. Officers offered to re-assess the situation if the protesters paid them £340 – the cost of making the buildings safe. The Kite group stayed up collecting the money, only to be told the council would not accept it after all. The action is in spite of an assurance that demolition would only take place once the redevelopment scheme had been approved. The protesters are deeply disturbed that private citizens have to pay for council work in order to avoid the premature demolition of sound properties in the Kite. c78 03 07

1978 The Government has stopped Cambridge City Council's plan to rebuild the Kite area. They have refused to allow them to borrow the £2.3 million needed to buy the land for shopping development which means the 20-year saga of decay will continue indefinitely. The council's Conservative leader claimed it was a political decision, probably part of a General Election run-up. M.P. Robert Rhodes James said the blight in the Fitzroy Street area would be perpetuated and the general economic and physical decline of the area would continue remorselessly. But organisations which have been fighting the plans are delighted. c78 09 04 [7.7]

1979 Kite : derelict house bought by council topping private £13,000 offer [7.9]

1979 Ombudsman report critical of oversight; Shelter report says demolition carried out with minimal concerns about effects on adjoining privately-owned property [9]

1980 Cambridge Empty Property Action Group claims lost £350,000 potential income from derelict property [9]

1980 Debenhams pull out of major store but 6-month reprieve for plan - give Grosvenor time to find taker for main store, agreement expires end of month but no taker; Grosvenor must pay council a ground rent of £65,000 pa if scheme goes ahead; was known that Co-op would shut its doors in Burleigh street if another major store did not come into development [7.10,9,10]

1981 Kite : 4th Kite Community Action show - Clive James, Michael Palin & Terry Jones [7.11]

1981 traders give up battle to stay in Kite - Waffles etc [7.12]

1981 Debenhams to participate after all [7.15]

1981 Kite : car parks close [7].

1981 Little Kettle demolished [7.15]

1981 demolition causes problems traders [7]

1981 Grosvenor announce that Debenhams will take superstore [9] skirmishes continue

1981 Twenty years of uncertainty over the future of the Kite area have ended. Debenham, the major national chain store, is to move into a superstore planned for the £15 million shopping development. Labour councillors who have led opposition against the scheme have conceded defeat saying there is nothing they can now do to halt it. The Conservatives who initiated the scheme and have never flagged in their confidence that it would eventually get under way are delighted 81 05 23

1981 A Cambridge consortium which owns a shop in the centre of the planned £15 million Kite rebuilding scheme is steadfastly refusing to sell to make way for the giant new redevelopment. No.56 Fitzroy Street was bought in a bid to stop the scheme and their leader, a Cambridge don, says: "Under no circumstances are we going to budge – not even if they offered us £5 million. They can build all around us if they like – I am looking forward to our little shop becoming part of the shopping precinct with a large glass dome over the roof" 81 05 27

1981 The saga of property dealing and controversy in the Kite redevelopment area of Cambridge has come to an end. The last remaining privately-owned shop at 56 Fitzroy Street has been sold to the city council and its partner, Grosvenor Estates for a price of around £30,000. This has given the owners, a consortium of university dons, a £5,000 profit which will be distributed to two charities. As part of the deal a number of small traders will be allowed to stay in their shops for up to three months. 81 08 03c

1981 An era came to an end when the self-styled 'Lord Mayor of the Kite', Mr Arthur Sutton, moved out of his house in Christchurch Street. It occupies an important position in the £15 million development scheme but he refused to budge until the developers came up with somewhere nearby for him to live. Now they are to build him a detached three-bedroomed house a few doors away 81 09 26

1982 building begins to take shape [11]

1983 The fate of the old Laurie and McConnal store - which has been lying empty since it closed five years ago – has been decided at last. Habitat, a national chain of home furnishing shops, is to move in to the store on the fringe of the new Grafton Centre. Debenhams has taken the main store on the site, the supermarket booked by Keymarkets will probably open as a branch of Gateway and the biggest 'variety' store is being taken by C&A. But letting arrangements have still to be concluded on 30 of the 45 medium-sized shops 83 07 21 p1 [11]

1983 The new Grafton Centre, the biggest shake-up in Cambridge retailing for a century, is only medium sized in terms of city centre redevelopments but is enough to upset the balance of trade in Cambridge. "No one would pretend that it is linked to the existing shopping centre to the extent that people can use both on the same day", said the man in charge of the project for Grosvenor Estates. The next six months trading will be keenly watched by shops in the historic centre. The attractiveness of the Grafton Centre will depend on easy access and whether it offers value for money and diversity. They have accepted lower rents in order to get shopkeepers which cannot afford big overheads. 83 10 11 p11

1983 A quarter of a century of planning wrangles ended today when the £27 million Grafton shopping centre development opened. Part is still unfinished but there was a general sense of relief that the Kite at last had its new prestigious shopping development. It looks slightly bare as many of the shop units were still unfilled however shoppers seemed happy as they walked through the new arcade of the main concourse. 83 10 20 p1 [20.1]

1984 lean post-Christmas trading [20.3]

1984 opened by Queen May [20.3]

1985 plan for extension unveiled (agreed 1986) [20.4]

1985 A plan devised by Grosvenor Estates could add a third to the size of the Grafton Centre. The extension would be built around a central mall at right angles to the present one using the site of the present bus interchange and the land now occupied by the yard of Coulsons, the building contractors. It would have a two-storey roof park for 350 cars with a number reserved for shop staff. Coupled with the opening of Habitat in Fitzroy Street it would strengthen the appeal of the area against that of Cambridge's traditional city centre. 85 12 02a

1986 Another old Cambridge landmark – the former Little Kettle premises in Fitzroy Street – disappeared when it was demolished as part of the Kite re-development programme. Over the years the premises had various uses, but they are best remembered as the general hardware shop which had a small kettle hanging outside. 81 07 11

1988 From the moment the Grafton Centre opened in October 1983, everybody connected with it knew that it was too small at 300,000 sq feet. It was locked in by its location with the only real scope for expansion on the East Road side. This needed a deal with Coulsons, the long-established Cambridge builder. Retailers had reservations about the initial plans for a major new store built around Presto supermarket. It had been intended to provide the kind of balanced development considered important in the 1970s, but had never proved successful 88 05 12 & a ¢CEN 12.5.88

1988 The Presto supermarket in the Grafton Centre, which has been there since the centre opened in 1983, is no longer economic and will close. The owners, Argyll Foods, say a major food store did not fit well into a development which had become much more fashion oriented and was becoming unprofitable to operate. Next day came news of a large extension to Debenhams, a major new store, 14 new shops and a multi-screen cinema complex. 88 05 03a & 4

1988 petition for grocery shop replace Presto ¢CEN 19.5.88

1988 planning granted for £30M expansion Grafton Centre, including cinema ¢CEN 3.11.88

1989 Grafton phase 2 delayed 9 months - opening due late 1991 ¢CEN 19.1.89

1989 jeweller leaves Grafton centre - "too downmarket"; rent rises from £5,000 to £12,500 ¢CEN 7.3.89

1989 planners approve phase 2 expansion Grafton centre ¢CEN 18.7.89

1990 Grafton Centre second phase, including cinema, is in doubt as major investor Sun Life Insurance puts its 84 per cent holding on market as it does not believe the extension is viable – 90 07 07

Kite commentary

It has had a chequered, tortuous history. Sensitive issues like housing shortages, the responsibilities of the welfare state and the pressure for large-scale redevelopment scheme in run-down areas were all there. It was a titanic struggle heralded by the Holford Report in 1950 & closed by opponents finally conceding defeat amid a welter of confusion in May 1981. In the interim there were proposals counter-proposals, repeated promises of an 'early start', back-peddalling, alternative schemes elsewhere & the emergence of rival developments. There were Government summits, college intervention, inter-council wrangling, critical missives from the Ombudsman & a general smokescreen of doubt. Holford report in 1950 pointed out the inadequacy of the historic centre as a commercial centre. In 1962 the University advocated development of the Burleigh & Fitzroy Street area & by 1965 the City Council had commissioned Lord Llewellyn Davies to prepare a basic scheme. His report was eventually published 4 years

later & caused uproar in all sectors because of the massive scale of building & development which it proposed. As a result the City looked for other developers to suggest alternative schemes. Another decade passed until finally the plan put forward by Grosvenor Estates Commercial Development was accepted & work began in August 1981. Their proposals was more modest in scale - for a 300,000square foot complex with parking pace for 1100 cars & 40 flats - more in keeping with environmental concerns of town ... It developed into an acrimonious political battles. On one side was the apolitical Kite Community Action Group (K.C.A.) fighting to stop the building of a monolithic shopping centre on its doorstep. The Kite had been an enclosed area full of street corner specialist shops that could not afford the rents in the city centre & a bustling community ranging from students seeking cheap accommodation to old age pensioners living in the houses of their birth. They agreed on the need for redevelopment but only on the basis of piecemeal reconstruction within the context of the existing structure. City Council who were now set on the idea of expanding Cambridge's role as a regional commercial centre. It was on these ground that an alliance was struck up in 1977 with Jesus College & property developers Grosvenor Estates. Grosvenor proposed "a scheme of quality & character sensitively integrated with the neighbourhood shopping & residential areas ...In 1977 Grosvenor Estate's proposals were accepted. They would pay for nearly all investment costs but would also receive all the profits. The City council was to receive ground rent only For many Kite residents the area then seemed to be deliberately neglected, a hostel for down-and-outs was opened which unsettled the neighbourhood, and combined with decay & empty premises reduced the appeal of the area; parking restrictions hit shoppers formerly attracted by ease of parking, elderly residents were falsely led to believe that their neighbours were selling up; the sewerage system was allowed to break down & rats became widespread

1988 The KCA had bought the Little Kettle, once an old style ironmongers. It was occupied by a rota of supporters to prevent demolition. Without warning bulldozers moved in. There was barely time to evacuate the shop. Grosvenor Estates had been set a deadline by the Council to resolve any problems. If it were not met, as seemed likely. plans would be dropped. But a 6-month extension was granted. The biggest banana skin of the lot was a slip-up in planning procedures which meant that the city council would not be able to compulsorily purchase land needed for the development until 1983 & as a result Januarys had to acquire more than 100 individual properties by private negotiation. Eventually Grosvenor Developments along with Sun Life Assurance and the city council in a three-way partnership came up with a satisfactory £27M package.

Lion Yard redevelopment site, 1972

154.52

c.49.67 : Lion Yard

Lion Yard redevelopment history – 88 05 05b

headlines

1951 Cambridge Council is to recommend a scheme for a multi-deck car park at the Lion Yard. The Surveyor suggests all adjoining property owned by the council should be demolished, the opportunity being taken to widen Corn Exchange Street and St Tibb's Row and that the possibility of further extensions to St Andrews Hill for offices, shops or increased car park facilities should be borne in mind. He submitted a plan showing a building of six floors which could accommodate 825 cars c51 03 14 [1.12]

1956 If the City Council feel unable to implement the development of the Lion Yard area, then the Government should nominate the County Council as the acquiring and development authority, councillors recommend. They have met University officials who have ask that a substantial area of floor space, including some at ground level, should be made available for their purposes. 56 11 01a

1958 New schemes for the rebuilding of the Lion Yard car park and the surrounding area are being examined by town planning experts. It may be comprehensively re-developed to include a multi-storey car park and additional shopping facilities served by a new road passing through the middle of the area. But some say that instead of a broad shopping street, which might attract more

traffic into the already overcrowded centre, it should be a 'pedestrian shopping precinct' with cars being parked a short distance away 58 12 22 [2.4]

1959 The City Council is to consider the largest project ever undertaken in Cambridge. The giant Lion Yard scheme includes a two-decker underground car park taking 731 vehicles, a unique 'pedestrian shopping precinct', a new central library, residential hotel and a petrol filling station. Jesus College have also submitted a scheme for the redevelopment of the north side of Fitzroy Street. Many think that increases in shopping facilities ought to take place as an extension of this well-established area. 59 04 29a-d & 59 04 29e

1959 The new plan for the centre of Cambridge will have as its central feature a 'pedestrian shopping precinct' from which all vehicles will be excluded. An earlier scheme which foresaw a new and widened Guildhall Street running through the Lion Yard, with new shops and a multi-deck car park, has now been dropped after being criticised as likely to attract too much extra traffic. The proposal incorporates a car park which might be placed underground. But it is certain that Corn Exchange Street would become an important vehicular road. 59 01 16

1959 The giant scheme which is to transform the centre of Cambridge received the approval of the City Council. Not one hand was raised against it when the question of developing the Lion Yard— described as 'that revolting area' - was put to the vote. It would make it possible for townspeople to do their shopping away from the traffic on broad footpaths and provide a much-needed car park for more than 700 cars, removing the 'long-term parker' from town streets and leaving the kerbs free for motorists who wish to park for ten minutes. 59 05 01a,b, c & d [2.5,2.6,2.7]

1959 "The Lion Yard scheme is the biggest re-development scheme yet in England, if we omit the blitzed cities". Ald W.G. James told the Women's Lunch Club. "In some respects it is more difficult, for the bombing often obliterated whole areas and redevelopment could start on virgin sites. Here, boundaries, established buildings and all manner of things have to be considered". Everyone agreed the area required comprehensive development but there was a divergence of opinion on how this should be done. A compromise was sought by 30 people on the County Planning Committee but as there were 30 different opinions, nothing was done. 59 05 21b

1959 When the elaborate scheme for the redevelopment of the Lion Yard area was approved one could be forgiven for being rather carried away by the sheer magnitude of the whole thing. What was to have been just a car park had rather surprisingly blossomed into a complete new city centre and we were impressed by the dazzling piece of town planning so adroitly placed before us. Since then we have had time to mull over the full implications. Cambridge still retains something of its own individuality and it would be tragic to turn it into just another New Town. The scheme is a town planners' dream. It must not become a ratepayers' nightmare 59 06 20 & a

1959 Lion Yard – University objections – 59 06 26a (other stories in chronological lists)

1959 A Cambridge man living in Los Angeles cautions against the new Lion Yard proposals. "Who is going to occupy the new offices and shops? If Cambridge thinks they can concentrate business in town and solve the car parking problem with a few hundred spaces they are indulging in the fondest of illusions. Parking meters in the streets don't help: they only add to the irritation of shoppers, free parking has become the essential stock-in-trade. In America down-town shopping areas are dying and shopping centres miles out of town are the new thing." 59 07 04

1959 Lion Yard costs have risen colossally and some councillors hoped the Minister would turn the scheme down so they could start again. They could build a car park on the site more cheaply but they were bound to the developers, Edgers, and they would be a laughing stock if they went back on their word. It was the public who determined where the city centre should be and that was where banks, theatres and cinemas had moved. When a slump came it was those on the outskirts that closed down. The scheme must go forward. In the long run it would prove economical. 59 07 24a

1959 Councillors withdrew their attention from the Lion Yard area to a part of the city which some have always considered of equal importance – Fitzroy Street. This should be comprehensively redeveloped to provide residential, shopping and business facilities with a new bus station. The Lion Yard should be developed with a library, civic restaurant and small car park, leaving the frontages as they are, some argued. 59 07 24b & c

1959 Lion Yard scheme – questions and answers – 59 07 18b

1959 Lion Yard development public inquiry: over 1,000 sign petition against scheme – 59 08 10a

1959 The proposed Lion Yard scheme provided for a pedestrians-only shopping precinct linked to Petty Cury, office space (to be offered to the University if needed), a new Emmanuel Road, the widening of Corn Exchange Street and an underground car park including space for 750 cars of which 230 would be for office staff. There would also be a new telephone exchange, an Inquiry was told. The scheme would be completed by 1965. 59 11 11c & d & e

1959 The University thinks the Lion Yard scheme was bad planning. They are not opposed to a pedestrian precinct nor to some commercial development but preferred a mixture of University use with a concert hall seating 1,500 and some shops and offices to fill in. This would attract far less traffic at peak times. Others thought the Corn Exchange might make a site for a car park with an elevator to take cars to the upper floors. Shops could give 'Free parking vouchers' for customers who spent more than £5. This would attract shoppers into the car parks and make them economical. 59 11 19 a & c

1959 The Inquiry into the Lion Yard scheme was told that the Petty Cury frontage should be excluded from redevelopment: the present useful buildings would be preserved and the character of the street maintained. But Planners said they could not be adequately served as they lacked any rear access. Runciman's veterinary premises in Downing Street had been used for 150 years and were specially designed for the purpose. They have dealt with animals as small as a mouse and as large as an elephant. The proposed replacement buildings were incompatible with the character of Cambridge 59 12 03 & a & 04 & 04a

1959 Several tradesmen gave evidence at the Lion Yard inquiry. Both Miller's and Lyon and Cade's were old established solicitors business, their premises would be entirely swept away. G.D. Pryor owned the land let to Mac Fisheries. The former Mr Pryor was one of the last coach drivers and a fishmonger who established his business in the first half of the nineteenth century. The coach was left at the Red Lion when business had been transacted next door. The Chinese Restaurant had been greatly improved since Mr Lui took possession and was now the centre for people who enjoyed this type of food. It is difficult to imagine where it could be resited, the pedestrian precinct did not promise to be lively at night 59 12 04 abc

1959 The official inquiry into the Lion Yard Re-development Proposals – that erstwhile car park scheme blown up to make a planners' holiday – covered 15 days and produced over half-a-million words. The sponsors of the scheme and the many objectors have placed their cases fully and fairly – and sometimes forcibly. One of the main criticisms is that no evidence of the financial side was submitted. Very few members of the public attended but there was a 'full gallery' on the final day. It will be six months before the Minister's decision is made known. 59 12 05

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Lion Yard : Minister rejects proposal [2.8]

1960 So Cambridge must be destroyed. Country folk from the surrounding pastures have decreed that, just because she develops a bald patch on her Lion Yard. But even when Petty Cury has been rebuilt with modern materials the day must come when all the new buildings fall down. But by 2020 there will be no cars, and therefore no parking problems; only the original debt. No

one can possibly question the integrity of the City Fathers: by their very selection they are men apart

1960 The Minister has rejected proposals to redevelop the Lion Yard area by the building of a giant car park, shops, offices and hotel. He called the scheme 'basically unsound' as it envisaged shop and office expansion instead of decongestion in the central area and crowded too much development on to the site. He also thought that commercial expansion was neither necessary or desirable. The scheme was formulated by city and county council architects after years of study and research. It included a 750 place car park with petrol filling station and an unusual shopping precinct where all vehicular traffic was barred. 60 08 30

1961 The Clore-Cotton deal over the Lion Hotel – the key to the city's central redevelopment – is probably the largest single property transaction made in Cambridge. But Mr Barr, secretary of the family company owning the Lion, says he had declined a much larger offer as he thought it was not in the best interests of the town. "It is a pity there has not been more co-operation of the people interested in the development. A few years ago they could have got the hotel for half the price I got today", he said. Now there was a golden opportunity for everyone to get together and sink their differences. 61 07 [13.2]

1961 Cambridge University published proposals to enhance the city's character as a university town. Historic buildings would be retained and where redevelopment is essential the new buildings would be on a scale and character compatible with the central area. The Lion Yard development could include a civic hall which is needed both by city and university together with a library and small art gallery. If the City Council cannot pay for it then the University and some of the colleges should join in a developing consortium to provide the necessary finance to carry out the development and benefit from the profits. 60 01 11b

1962 Mr Jack Cotton and Mr Charles Clore, the property millionaires, have bought the site of Heffer's from Emmanuel College on the understanding that the bookshop will be rehoused in any new redevelopment of Petty Cury. Their company, City Centre Properties, acquired the adjoining Lion Hotel site last year. The Director of Dolamore, the wine merchants, who hold the freehold of most of the corner with Guildhall Street, would not say whether they had also approached them. Recently this part of Petty Cury was included in the area scheduled for redevelopment. The firm also have an interest in the New Theatre site which is now being demolished to be replaced by a block of offices 62 05 07 [13.3]

1962 row over appointment of City Architect [2.13]

1962 Lion Yard : Inquiry highlights 3 divisions of opinion. University want commercial development restricted to new regional shopping centre Kite area with Lion Yard to have amenities like library, art gallery, concert hall etc. County accept library but reject concert hall. City want commercial development in new pedestrian shopping centre [2.11,2.12]

1963 Underground road to service Lion Yard shops – 63 03 22a [See Memories 14 Mar 2013]

1964 The Lion Yard area is badly laid out and contains 'obsolete development'; there should be a small increase in shopping space with the rest devoted to civic and university uses, Sir Keith Joseph, the Minister of Housing says. A brand new shopping area should be created in the City Road area – the present twilight zone. It will take traffic away from the centre, cater for modern supermarket trends and fit in with plans for the continuation of the East Road housing scheme 64 08 28, 28b [4.15]

1965 Lion Yard plans unveiled by Gordon Logie – 65 06 25b [13.5]

1966 plans for regional shopping centre & Lion Yard principally civic centre approved [5.6]

1966 Old Post Office, Petty Cury, Ministry of Pensions manned by a single clerk in room that precious housed counter activities; small corner occupied by National Savings Movement. Wide corridors lead to Overseas Students Club used by 10-12 students. Petty Cury shops well-maintained but accommodation above ground floor level has been condemned for years. Must all be demolished – letter – 66 07 15

1966 Burleigh/Fitzroy Street favoured for shopping redevelopment in preference to Lion Yard – 66 10 07

1968 Government stop city borrowing for 1st stage Lion Yard [5.12]

1968 “derelict site for 120 years” [13.6]

1968 Trinity building programme to accommodate 90 undergraduates will release land in Petty Cury for Lion Yard [16]

1970 Lion Yard library might be built by development company instead of the city council. Ravenscroft Properties may agree to build the three-storey library because it is scheduled to go on top of a block of shops; the city would then lease the building from the company – 70 03 04

1970 Lion Yard development – only legal snags remain – 70 07 23

1970 Lion Yard plan goes ahead on schedule – 70 12 07; work finally starts – 70 12 28

1971 Lion Yard plans approved by Government – 71 12 24

1972 Corn Exchange St closed for work Lion Yard, Lion Yard car park opens [13.8,13.9]

1972 Although the war ended 27 years ago the little patch of Cambridge around Alexandra Street has a distinct 1940s look. In common with all the little alleyways off Petty Cury, Alexandra Street is in the throes of the Lion Yard re-development scheme. The old is being swept away by the demolition gangs to make way for the new and soon the whole face of the area will begin to change. The first phase of the project - the multi-storey car park - is due to open at the end of next week. Work on the second stage - the demolition of the southern side of Petty Cury and the building of shops and service roads on the Lion Yard - is already under way and is expected to take about two years. The third stage - the building of a large central library - will start soon after this c72 06 27

1974 A warning that within 10 years the Lion Yard areas of Cambridge, now being completely redeveloped will become a “twilight zone” is given in a new booklet, “Walks round vanished Cambridge”, published by Land of Cockayne. It says: “Within 10 years the town centre will have moved east to the Kite area, the University west to the science city. Lion Yard will be a twilight zone lost somewhere between the two” c74 06 28

1975 Lion Yard opened [13.10]

1975 Lion Yard statue Talos given to Minos, ruler of Crete to defend island by God Hephaestus, by Michael Ayrton [13.11]

1975 Lion from Red Lion brewery at Waterloo station - original wood carving from which brewery coadstone made that now stands on the southern end of Westminster Bridge ...

1975 Official opening brochure

1975 How much are stores paying to rent a unit in the Lion Yard Development? Last October companies were being asked to stump up between £15-17,000 a year. In the Lion Yard itself the asking price was between £7-10,000 per unit. Smaller units described as boutique types were on offer between £3 & £5,000. Wealthy national companies can afford to speculate and rent properties for a few years, but for small local traders the rents have proved too expensive so far. Of 54 units rented out only two may be occupied by firms based in Cambridge – Campkins (cameras) & Waits (menswear) c75 07 21

1975 The Lion Yard lion is up, carrying in his proud frame many years of history as he looks down on the centre of the Cambridge new development's shopping centre. The city's acquisition of such an appropriate symbol is a combination of luck and circumstance. The lion is believed to be the original wood carving for a cast lion which stood over the old Red Lion brewery at Waterloo station. It was discovered at the Woburn Abbey antique centre four years ago. Since then it has been completely refurbished at the city engineer's workshops at Mill Road. Now it has been put up in its final home- the Lion Yard c75 12 04

1975 Princess Anne, making her first official visit to Cambridge, insisted on an impromptu chat with some of the thousands of sight-seers who thronged the city centre Lion Yard shopping centre. An estimated 10,000 people packed the Market Square and stood eight deep each side of Petty Cury as she walked into the new shopping centre. She stopped to talk to the delighted shop girls who were crowding their doorways and also to the eager shoppers who pressed forward to get a closer look at her. She explained: "I am not a complete stranger here because I have been shown around the university and city unofficially by two previous students who are both fans of the old city" c75 12 05

1975 Large crowds turned out to see Princess Anne wherever she went in Cambridge during her visit yesterday. Inevitably the criticisms that have been voiced about the architecture of the Lion Yard were referred to during the formal speeches. The city council's Labour leader, Coun Peter Wright, spoke of the 'dissension' which still existed over the complex. And Princess Anne, who declared herself a "VI – that means very independent" observer of the architectural scene, said she would report back on the project to two "former students" at Cambridge University when she returned to London c75 12 06

1977 The Mayor of Heidelberg officially opened the rooftop garden above Lion Yard, Cambridge, which has been named after the German town to mark the link between Cambridge and its twin university town. Oberburgermeister Renhold Zundel said a scheme similar to Lion Yard was being built in his city and they might have a garden named after Cambridge soon. c77 07 26

1978 Some of the long-disused offices above Cambridge's Lion Yard shopping complex may soon be turned into restaurants. The plans have been warmly greeted by councillors who have complained for a long time about the empty space standing in one of the city's key commercial positions. The applicants want to rent the bulk of the ground floor and turn it into two restaurants, one catering for general medium price trade and the other as a high-class 'night life' restaurant. The three-storey office block which contains thousands of square feet of space has been standing empty since the development was completed three years ago. c78 10 03

1980 rents increase 350-550%, from £9,000 to £40,000 [13.13]

1983 new scheme for hotel & car park [13.14]

1986 Cambridge City Council wants to increase central area parking as cheaply as possible and is prepared to do a deal with a developer to sell or lease the large area of waste land next the Lion Yard car park. Possibilities include an eight screen cinema complex to be developed by an American company, offices, houses and flats, a luxury hotel or shops linked to St Andrew's Street by moving walkways. Some of the schemes are very attractive visually but the ones that could give the council the best returns are amongst the ugliest. 86 01 25

1987 Ambitious plans for a £3million facelift for the Lion Yard shopping centre have been unveiled by Barclays Bank. The precinct – officially opened by Princess Anne in 1975 – will be brought bang up-to-date with new lighting, new paving and a new shop unit next St Andrew's the

Great. The biggest change will be a covered first-floor level incorporating the Heidelberg Gardens with four food kiosks and a seating area for 200. It will be a much better place and people will be able to get something to eat and drink there, developers claim. 87 08 19

LION YARD - commentary

new design dates back to 1950 Holford proposals which prompted the first development plan for Cambridge in 1952. This proposed two large shopping streets in the Lion Yard which was not acceptable & neither was the Edger Plan in 1959 which was rejected on the ground that it included too many shops. Redevelopment was inevitable & in 1961 the strategic Lion Hotel site was purchased by Jack Cotton & Charles Clore for City Centre properties in the largest single property transaction then seen in Cambridge & extra land was released with the start of Trinity College rebuilding in Trinity Street which incorporated a new bookshop for Heffers. Finally in 1968 the basis outline of the present scheme was accepted & Arup Associates were commissioned to prepare it in detail. Their design was approved in January 1970. Negotiations on a development partnership began with Ravenscroft Properties Ltd whose associated company, City Centre Properties Ltd had purchased the Lion Hotel & agreement was reached in September 1971. Under the agreement Cambridge City Council will share the profit from the leases to bring a return to the citizens of Cambridge for their investment. Work on first stage - multi-storey car park for 675 cars - was begun Dec 1970, first section opened by Mayor July 1972. Beginning of commercial development & new Central Library began 1973. The development was officially opened by Princess Anne in 1975. However high rents have led to steady turnover of traders

c.49.9 – maps

started 23.8.2005

1935 A map entitled ‘A plain delineation of ... Cambridge setting for the inns and taverns thereof’ and drawn in the eighteenth-century style has just been produced by Ian Cox. Together with two of his University friends he has been making a tour of the aforesaid inns, sampling the ales sold and the pastimes with which customers amuse themselves. There is a list of 199 places where beer and ale can be obtained and notes on the 15 brewers whose products are sold, as well as the Audit Ale. Five pastimes are named: darts, skittles, table-skittles, ring the ball and shove-halfpenny. The map is sold at half-a-crown uncoloured with hand-coloured versions at six shillings 35 12 07c

1980 Visitors to Cambridge will be confused if they use the latest Ordnance Survey map of the city. The Lion Yard shopping centre, completed more than five years ago, is not shown but marked as a collection of tiny streets. Christ’s Lane, closed for the past 15 years and not even visible, is still shown as leading from Drummer Street to St Andrew’s Street whilst the University Centre is an empty space. Even the Tourist Information Centre is shown as at the front of the Guildhall, rather than the back. The O.S. said it did not seem very satisfactory

Rance's Folly, 1950s

110.24

c.61 – architecture

note: includes some of prominent buildings lost
headlines

1898 Cambridge town council accepted a design for new police and fire brigade buildings, which it is proposed to erect upon the Spinning House site. If the new station is erected the whole of the existing buildings, which are not conspicuous for their beauty, will be removed, with the exception of the chief constable's house, and the fire station and firemen's quarters will be completely isolated from the police building. A new main entrance will be erected and it is suggested that the present stone gateway to the police station should be removed to the back entrance in Downing place. The only elevation of any architectural pretensions will be the main facade towards St Andrews's street. A copula forming a central feature will serve as a "look-out" in connection with the fire station. The plans include provision for a mortuary c1898 06 10

1909 F.W. Fawcett was the architect of many Cambridge buildings including the Cavendish Laboratory & various departments in the New Museums site. He undertook the restoration of a large part of Queens' College, designed additions to Addenbrooke's Hospital, remodelled the County Gaol & built the Training College for Women, the County Police Station, several college

boathouses and cricket pavilions as well as several large mansions including Longstowe and Six Mile Bottom CWN 09 01 01

1909 The 250-year-old Tithe Barn in Shelley-Row, Castle End is to be pulled down to make way for new houses. It is still in good repair with patches of new straw used to mend the high and thickly-thatched roof. It was used as a resting-place by the French prisoners taken in the Peninsular War during their journey to the prison camp at Norman Cross. Many people bought objects such as dice and dominoes they made from the bones of the meat supplied to them. The 'True Blue' in Hobson Street was also one of the billets. CWN 09 12 31

1925 Sir – the proposed garage on Christ's Pieces has called forth a crop of protesting letters; let them be directed against the ugly, barrack-like Councils houses at Chesterton and Cavendish Avenue. The majority of the houses are literally a blot on the landscape, badly designed, dreary and poverty-stricken, they are eyesores to every passer-by. Yet they are being built without a word of protest, while the cutting down of a couple of trees evokes a regular storm of indignation – Kappal c25 08 07

1925 The 100ft high chimney stack which has stood for close on 300 years on the site of the old disused flour mill at the corner of Mill Lane and Granta Place, Cambridge, was pulled down. A platform was erected at the base of the stack which rises from the now dry river bed, and fuel in the form of straw, wood and corn was placed thereon. The whole was then soaked with paraffin oil, a match applied and the work of destruction begun. But the old giant took a deal of shifting and it was not until the flames had licked about his feet for over a quarter of an hour did he sway and crash to the ground amid a deafening crescendo of falling masonry c25 11 21

1934 statues on Market Hill conduit named – 34 09 22

1935 Demolition work on Peas Hill for the new Guildhall has led to an architectural discovery of outstanding interest. It has revealed the residence and business premises of a well-to-do Tudor merchant which was subsequently divided up into a detached and two semi-detached houses. The magnificent front was covered up with lath and plaster in the reign of Queen Anne and finished with mock bricks. Dummy eaves were also added. Now each piece has been carefully taken down and numbered for preservation and re-erection. 35 04 10

1935 The Guildhall Protest Committee criticised plans for a useless portico of a most ornate and incongruous style which could be 'put on cold' in from of the proposed façade of the new Guildhall in two years time if the town really wanted it. The main entrance should be on Market Hill. It would allow a terrace which would form a platform for addressing meetings on Market Hill and give a façade of distinction that the people strongly desire. There was also intense feeling regarding the question of shops on the Peas Hill side 35 05 01

1936 King's College had employed a firm to supply a pump to serve half-a-dozen jets of water at their fountain. They had intended to use the water over and over again but found that with the heavy wind the water was blown over the gravel and did not go back into the fountain. So they had connected the mains to make up the loss. This contravened Water Company byelaws and there was a danger of contaminating the supply 36 10 20a

1937 Alexander Paul MacAlister was articled to Messrs Fawcett's, a Cambridge firm of architects, before starting on his own in St Andrew's Street 45 years ago. He designed the new block at Fulbourn Mental Hospital and the Tubercular Hospital at Antwerp as well as many houses in Madingley Road. He founded the Cambridge Amateur Operatic Society and played parts in all the Gilbert and Sullivan operas. 37 02 01

1944 Stone gateway at Holy Trinity churchyard erected by Richard Reynolds in 1770; he occupied a hose and hand a right of way over the churchyard from Crane Lane. It was made from

materials removed from the ruins of an ancient chapel at Reach, a small portion of which remains – 44 04 15

1944 Cambridge Sea Cadet Corps take Oyster Bar, Garlic Row for HQ; dates back to 1707 – 44 10 05

1945 Folk Museum new home – Lord Fairhaven offers Abbey House in recognition of VE Day – CDN 1945 06 13 Abbey House – historical facts by F.A. Keynes – CDN 1945 06 15

1951 The Minister of Town and County Planning has compiled a list of buildings in Cambridge, which are afforded a degree of protection which they have not hitherto enjoyed. The list is a formidable one covering colleges, University buildings, churches, public houses, business premises and private houses. It includes the modern Laboratory of Physical Chemistry in Free School Lane which incorporates the 16th-century hall of the original Perse school with its fine hammer-beam roof c51 01 04

1951 Cambridge town planning committee say there can be no justification for a spine relief road between Histon Road corner and Jesus Lane merely to preserve for a few years more buildings on the west side of Magdalene Street which, although of some architectural interest, are sub-standard from every other point of view. Pending demolition the commercial use of the buildings should be terminated, doing away with the necessity for vehicles to wait outside c51 01 23

1957 Hurst Park avenue windmill demolition [229.1.7]

1957 Rance's Folly, the large redbrick house now being demolished in St Andrew's Street once had several lifts, four bathrooms and central heating – as well as a swimming pool. Guests even played tennis on the roof. It was built by Henry Rance who was Mayor in 1878 and 1882 – when he held council meetings in his dining room - and included a ballroom whose floor was laid by experts brought specially from Germany. Here his granddaughters were never at a loss for partners. 57 06 21 & 21a

1957 The Senate House has been restored and redecorated. The roof was strengthened, large chandeliers removed and soft diffused pink coloured electric lighting installed in alcoves around the balcony to shed a clean warm light over the whole building. It now looks very similar to how it was nearly 130 years ago. 57 12 02a

1959 Emmanuel College's new building in St Andrew's Street has attracted many protests and the Anti-Ugly Society joined a mock funeral procession lead by four pall-bearers looking somewhat like Teddy Boys in their 'mourning weeds'. They bore a coffin inscribed 'Here Lieth British Architecture' which was placed outside the Porter's Lodge as mourners chanted 'Pull it down and burn it.' Although most onlookers treated the protest as a great joke for the Anti-Ugly Society it was a matter of serious importance in their genuine concern for architecture. 59 03 01b

1959 Cambridge Historic Buildings list published – 59 05 22

1959 The giant new Prudential Building on the junction of St Andrew's Street and Emmanuel Street incorporates the latest building techniques with heating and hot water provided by electrical units which take power from the mains during 'off-peak' hours and store it for use during the day. Acoustic ceiling tiles provide quieter working conditions, floors are of a coloured plastic tile and decorations in pastel shades. The basement contains a large garage and special storage to cater for the large use of bicycles by staff. 58 06 18

1959 The controversy surrounding the Central Hotel in Peas Hill, which King's College want to knock down and replace by a new hostel for students has reached a new stage with the publication of a booklet. The St Edward's Committee was established when it was announced that the Central Hotel, a largely 17th-century building forming an integral part of a square around St Edward's churchyard, was to all appearances doomed. They believe it could be preserved and are pressing for a public inquiry into the proposals. 59 12 21c & d

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 King's College has replied to criticism of its plans to demolish the 17th-century Central Hotel on the corner of St Edward's Passage and Peas Hill. Whilst the Midland Bank premises are scheduled as an ancient monument, the St Edward's Passage premises are not. The College has considered eleven schemes for the site, some of which would preserve the façade, but the preservation of the interior was a hopelessly haphazard proposition. Their architect has taken infinite care to ensure the new building preserves the essentially domestic character of St Edward's Passage, says Noel Annan, the Provost. 60 01 08b

1960 Central Hotel preservation call – 60 01 07

1960 The St Edward's Committee may launch a fund to buy the Central Hotel in Peas Hill and house students in converted rooms. King's College, the owner, says it would prefer to sell the building rather than undertake the work of preservation. The Holford Committee which suggested demolishing it has now decided to study the merits of the building 60 02 10

1960 One of the landmarks of Cambridge which has overlooked the city for about 60 years was demolished. The 100-foot chimney on the Newmarket Road once belonged to one of the city's brickworks which closed down about a year ago owing to the lack of clay. A large portion of the base of the chimney was cut away and propped up by wooden supports. These were then set alight using paraffin and wood shavings and smoke gushed from the top of the chimney for the last time before it fell slowly and gracefully to the ground. The actual kilns have already been demolished to make way for Watts and Son, timber importers 60 03 16

1960 A final decision to demolish the Central Hotel was made by King's College after discussion with the Cambridge Preservation Society. Only five Fellows voted to try to preserve the St Edward's Passage façade while demolishing the rest. Everybody agrees that the interior was in a hopeless state of disrepair. When the college bought the property in 1936 they intended to develop the site. In 1956 they concluded that no part of the hotel could be preserved and commissioned a new building. 60 03 10

1960 In demolishing the old Central Hotel near Cambridge Market Place, the contractors have found it to be in a worse condition than they anticipated, but it has conformed fairly accurately to the surveyor's report prepared by King's College who own the site. The comparatively recent facings of the interior of the building were concealing a rotting structure underneath and the building has had to be pulled down with extreme care – almost brick by brick. The hotel is being demolished in two phases of which the first has now been completed. The first half of the new building will be erected before the second half is pulled down 60 05 21a

1960 Charles Whitaker was one of the country's greatest wood carvers and sculptors. But his most prominent memorial is in Cambridge where he lived. His first stone-carving job was at Ridley Hall but every college bears the mark of his skill. He was responsible for the restoration of the outside of King's chapel, Trinity College fountain and the Gate of Honour at Caius. He also carved the University Arms over the Examination School in Mill Lane and designed the coats of arms on Fen Causeway bridge and Ascham Road Library. 60 10 31

1961 The Malting House stands on one of the busiest corners in Cambridge yet overlooks a backwater of the Cam bordered by a meadow where cattle graze. It was a brewery until converted for habitation in 1902 when the Corporation demolished the front of the house to widen the road. The bricks for the new façade came from the old properties being taken down at that time. In 1912 what remained of the old malting was converted into a small hall where countless musical evenings have been held. The whole house, which used to be a single domicile, now has six domestic units 61 10 20

1961 A bold scheme to transform Cambridge Market Hill into the 'finest piazza in Europe' would involve banning traffic in King's Parade, demolition of a few buildings on the corner of St Mary's Passage and the complete clearance of the Market Place. The screen in front of King's college would be removed and the Senate House and Law Department buildings linked together to form one magnificent spacious vista, says architect G.M. Vickers 61 12 01b

1961 Arbury Road takes a lot of traffic but one bungalow is peaceful because its wings act as a sound buffer. It is built in the form of a square with the fourth side open and has five front doors leading on to a courtyard. The main door – distinguishable from the others by the letter box – leads into a small hall. The eight rooms are interconnected and, apart from the kitchen and bathroom, can be arranged to satisfy individual tastes. Running along the right wing is a wash house with enough space to dry a heavy wash. 61 12 01e

1961 Pythagoras Hall in Northampton Street has been bought by St John's College. It is the earliest secular building in the city and was home to the first Mayor of Cambridge. But his family lost its wealth and it was sold to Merton College, Oxford, in 1270. For several centuries it was leased to farmers and became a granary. St John's hope to use it for collegiate purposes, though it means that Lord Rothschild, a University lecturer in Zoology, will have to move 61 12 06

1962 Roebuck House, Chesterton – 62 12 08 & a

1962 The changing face of old Cambridge will soon see further demolition. Already a number of houses have been pulled down in Shelley Row and four more are to follow including one boasting an elegant example of a Mansard roof. The building on the corner of Leeke Street and Newmarket Row, known as Mendicity House, formerly provided lodgings for beggars following the Napoleonic War. It was later purchased by the Industrial Dwellings Company, set up to improve the inadequate housing in the Barnwell area. It is now Harris' butcher shop. 62 02 01b & c

1962 A glass staircase is just one of the fascinating features of a house in Queen Edith's Way which was built just before the war. It was designed by W.A. Cairns with sweeping curves, enormous bay windows at the front, a canopy above the sun terrace and arched doorways. The framework is of steel and armour-plate glass treads on slim rubber supports. The lounge has a circular mirror decorated with an engraving of a polo pony and rider. Much of the furniture is built in, including a cocktail bar and writing bureau 62 04 13

1963 thatched cottage rethatched, thatched cottage to come down if extensions car park [446.15.6]

1964 'Cambridge New Architecture' criticises the new Addenbrooke's Hospital in Hills Road. No doubt these bleak buildings work efficiently but the bungaloid growth of the out-patients building cannot mitigate the overall barrack-room atmosphere, it says. Bradwell's Court shopping centre is attractively self-effacing and the Snowcat is one of the few well-designed modern pubs. But other Arbury building is weak with prim brick terraces and utility steel or concrete doorways of modish design. It is a squandering of Cambridge's short-supply of housing land 64 04 24b

1964 Listed buildings may not be demolished but owners need not keep them in repair and they often deteriorate until they are condemned as a danger to public safety. Cromwell's barn in St Ives was a magnificent example of a 16th-century manorial barn but it was burn down because it became unsafe. In Cambridge many little cottages are disappearing behind scaffolding to emerge with a completely different character and price-tag. Some houses in Portugal Place and a tiny court near Sidney Sussex College are in danger but Orchard Street has been saved by the Preservation Society 64 06 05b

1964 Chesterton towers to be renovated and opened to public. It would be fenced off from flats to be constructed alongside 64 07 22c

- 1966 scheme to make Corn Exchange into offices for City Architect [494.5.4]
- 1967 Dutch façade revealed on building during demolition work for Eaden Lilley; believed to be the only remaining trace of an old alleyway which ran parallel with Market Street – 67 03 04
- 1967 Cambridge police station now a listed building; built 1901 to design of John Morley – feature – 67 06 21
- 1967 County Council buy Howes Close mansion and 23 acres as extension Shire Hall site, to move Country Centre students – 67 07 26
- 1968 History Faculty building opens a year late – with leaks – 68 10 12
- 1969 Walt-ham-stell, large house in landscaped gardens, Barton Rd is the 1795 ‘House in the Fen’, a famous old coaching inn; is tunnel to Grantchester & Roman well. Permission granted for demolition but should be saved – 69 07 25a
- 1969 Manor House old Chesterton demolished without protest [446.9.1]
- 1969 Bridge Street buildings on corner Round Church Street must be restored to original condition; owners P.H. Allin want to demolish – 69 04 30a. Storm over plans to demolish – 69 05 14 , 14a
- 1969 Demolition of Regency Houses in Bene’t Place to make way for bio-chemistry department – inquiry – 69 10 25
- 1970 Regency houses in Bene’t Place may not be demolished for University biochemistry – 70 01 28
- 1970 History Faculty building wins RIBA award, despite leaks – 70 07 01

- 1970 Cheddars Lane should be preserved and listed say Government – 70 10 14
- 1971 Orchard St, Barton saga; moved in 1964, 1971 started plans [446.15.5]
- 1971 SOS as office blocks take over Hills Rd [446.13.5]
- 1971 Market Hill redevelopment – British Cinemas to build offices and shops at 3-5 but plaster ceilings and beams to be preserved – 71 03 12
- 1971 Bridge Street debacle: the two faces of Cambridge – laments crumbling buildings; feature ‘A city in shackles’ – 71 06 10 & a
- 1971 Newmarket Road derelict house last of ‘padding cans’ houses built for navvies who came to build railways and dig coprolite – 71 08 23
- 1971 King Street new buildings ruin environment, Architectural Review claims – 71 09 04
- 1971 Sidney Street and Bridge Street townscape analysis report – 71 12 10a
- 1971 Townscape Analysis report acclaimed – 71 12 17a
- 1972 The preservation and restoration of the historic frontage of 10-16 Bridge Street, Cambridge is assured in new plans for a 40,000 sq.ft. development by the Scottish Mutual Assurance Company. An earlier version of the scheme was turned down after a public inquiry. It involved knocking down the corner building and replacing it with a new structure which the inspector at the inquiry described as "aggressive in design". The new plans preserve the Bridge Street frontage. The scheme occupies a prominent site at the corner of Round Church Street and Bridge Street which has been a topic of heated discussion between developers, planners and preservationists for several years c72 08 29
- 1974 A £2 million plan for converting the old Cambridge corn exchange into a multi-purpose concert hall was accepted by the City Amenities Committee. An early warning of stormy times

ahead was given by Coun. Peter Cowell who said: "There is bound to be a lot of opposition". In their report the architects claim that "not only Cambridge but England as a whole will gain a concert hall of potentially international stature which could attract the finest musical talent". They suggest the reshaped building could hold up to 1500 people and would also be ideal for events such as boxing, wrestling, operas, plays, exhibitions and conferences c74 10 05

1982 One of Cambridge's most successful rebuilding schemes, Bridge House in Bridge Street, has received a top conservation award. The project involved rebuilding and refurbishing 16th century buildings which had fallen into a sad state of decay by 1970 – Tudor houses no longer fit to live in and derelict workshops. It was judged to be an outstanding piece of restoration work: the frontage was preserved and behind it was built a new office-block which can hardly be seen from the street. 82 10 14a

1982 David Roberts was an architect who contributed to the actual fabric of Cambridge. He has left the city crammed with his unobtrusive and modern buildings. Hundreds of undergraduates sleep, eat and study in the bedsit blocks, refectories and libraries he designed. He also converted St Michael's Court at Caius into sleek, street-level shops. His commissions included the X-ray department at old Addenbrooke's Hospital, an old people's centre, St Bede's School and three pubs. 82 12 20a

1984 Cambridge University's award-winning History Faculty building – which is plagued with defects – may be demolished only 16 years after it opened. Another option is to correct all the structural and heating problems as well as the leaks – but this could cost over £1 million. The building was heralded in a blaze of glory when it won a Royal Institute of British Architects national award for its designer so they do not want to demolish it 84 06 19 p6

1985 One of Cambridge's least-known grand houses has come on the market. The eight-bedroom mansion stands in more than three-quarters of an acre of ground and is approached by a long drive and carriage sweep. It has a fine entrance hall, large drawing and dining rooms, butler's pantry and a boiler house. It all sounds like the Newnham home of a Victorian worthy. The actual address is 242 Mill Road. The house is the former vicarage of St Philip's Church and there is planning consent for 17 sheltered homes to be built on the site. 85 08 22

1986 Chesterton Mill, in French's Road was built in 1847 but has stood derelict for the last 30 years. The eight-sided smock mill was only partially successful when driven by wind so the sails were removed in the 1890s and it was subsequently driven by steam, suction gas and diesel. It has now been renovated and starts a new lease of life as the home of Cambridge public relations firm Beveridge Kartupelis. 86 06 11a

1986 The Corn Exchange, Cambridge's new entertainment and conference complex, has opened after years of political wrangling. The four wall shell used for pop concerts, roller skating and badminton has been developed into an auditorium with versatile seating together with a tiered balcony and mezzanine terrace that can be used for a variety of purposes. At the back are changing rooms, dressing rooms and workshops while the King Room upstairs will be available for private functions 86 11 26d & e

1988 Sir Clive Sinclair's Stone House, on Madingley Road was built in 1896. If he had chosen a fortress to protect him from prying eyes he could hardly have found a more solid building. The walls are more than a foot thick in solid stone and even the front door is a formidable structure of metal and glass. It has a Middle Eastern annexe with a fabulous hand-painted ceiling and a collection of calculators and computers in a large glass cabinet. It is on the market for £750,000 88 10 29a

1990 Unex group has produced details of its big new development, Intercity House, on the former Pordage distribution site at the corner of Brooklands Avenue and Hills Road. It will offer air-conditioned offices with crèche, restaurant and gymnasium together with 301 car parking spaces. The windows will be high-performance anodised aluminium and the scheme will reflect the style and quality of the Victorian Royal Albert Almshouses across the road – 90 03 14

1901 Any attempt to portray life and characters at the 'Varsity, especially Cambridge, without mentioning that wonderful, but indispensable, personage technically known as the Bedmaker, would be the basest ingratitude on the part of the portrayer, says Mr Frank Rutter in his article on "University Types". What if she does clean your teapot with paraffin, or entertain her friends to breakfast in your room? Such little perquisites are well-earned by the "Bedder" who at her best is a motherly creature and known to stick staunchly to her "young gentlemen" in the hour of need. CDN 1901 08 24

1903 Sir – I believe a great number of antiquarians in Cambridge will learn with regret that the Falcon Inn Yard in Petty Cury has been removed to make way for modern improvements. So quietly has the old Falcon taken flight that I fear our local photographers have not secured pictures of the old buildings and its destruction has escaped even the lynx-eyed representatives of the Press. I am consoled that I have retained my water-colour drawing of this famous inn, which I made 25 years ago for 'Old Cambridge' – W.B. Redfern c03 08 19

1903 Sir – the alarm about the old Falcon Inn, Petty Cury, being demolished unrecorded seems to me unnecessary. Certainly within the last 40 years I have sent out almost as many drawings of it, to say nothing of the etchings. It, with the old Wrestlers Inn, has been a small gold mine to me. One noticeable thing I might mention: it was the last inn to hang out a flag as a sign that the recruiting sergeant was at home – Robert Farren c03 08 22

1903 Herbert Railton has contributed fifty drawings to the book 'Cambridge and its Story' in the reproduction of which a new method of lithography has been employed for the first time. The resulting prints have all the delicacy of pencil drawings and the effect is much enhanced by a slight wash of colour added by his wife. No such beautiful architectural drawings have been

produced since the days of Samuel Prout. A large-paper edition, of which 100 copies will be issued, will include an original pencil sketch by Mr Railton with each copy c03 10 16

1907 A house amid a clump of trees near Fulbourn station has been the residence for 50 years of the celebrated animal painter, J.F. Herring who has just died. He was the elder son of an earlier J.F. Herring, the leading painter of racehorses and coaching scenes, while a second son, Charles, became famous as a painter of Landseer subjects. He had just one pupil, Mr W.B. Redfern who visited his old master only yesterday. The funeral will take place at Great Wilbraham where there is a family vault. 07 03 06

1907 The original water-colour paintings of Mr W. Matthison commissioned to illustrate the new book on Cambridge by Mildred Tucker include subjects seldom depicted by artists. He has selected the daintiest spots: King's College gateway in twilight is a clever study while his view of the Bridge of Sighs was sold before the exhibition was opened. 07 05 09

1907 Mr Payne Garnett, the art master of the Leys School, is a versatile artist who has discovered many beauty spots in Swaffham. He shows the neighbourhood of Reach and the fens during the four seasons. There is a night scene, the moonlight gently illuminating a typical piece of Fen scenery and another of a deserted village road covered with hardened snow, so full of atmosphere that you need an overcoat. 07 10 31a

1909 Mr W.B. Redfern's unique collection of watercolour drawings of old Cambridge excited great interest. In 1875 he started to record places of bygone and antiquarian interest which but for his timely intervention would have been lost for ever. A good many had now entirely disappeared including two houses in Shelley Row which were the residence of Oliver Cromwell during the Civil War. They were panelled with two handsome fireplaces which he had moved to his own house. Old houses in Petty Cury were the most striking and perfect places which should never have been pulled down while parts of the Falcon Yard had remained until the last few years 09 03 19

1912 A School of Weaving has been established by one of the best-known of Cambridge artists, Miss Mary Greene at the Sign of the Pelican and Lilies in Botolph Lane. It is a most delightful little medieval house hung with beautiful works of art. The instructress is Miss Forsell, a Swedish lady, who has already started two schools of weaving. The chief object will be to execute customers' orders on the premises to their own designs. When the pupils have become accomplished spinners and weavers they will be anxious to possess looms themselves and in many houses the loom will be regarded as essential as a piano. 12 03 15d

1912 Robert Farren, the well-known Cambridge artist lived in Cambridge all his life with the exception of a few years' residence at Scarborough. In August he went to live in Highgate where he has died. He was a very clever water colour artist but best known for his work in oils and his etchings. His fen pictures were well-known and his series of etchings of cathedral cities amongst his most famous work. He also produced fine etchings of the Cambridge Greek plays. His 'Degree Day' was published as a photo by Wm Farren when he lived in Rose Crescent. Farren loved to paint Cambridge & Cambridgeshire scenery and there is scarcely a picturesque 'bit' in the town or county that has not been reproduced by him. At one time he had his studios at the top of which are now the University offices but were formerly a Liberal Club. A good many years ago he resided at Mayfield, Hills Road but during the last three years lived at no.1 Station Road. In his younger days he was a very handsome figure, tall and well-built. He was a skilful fencer and attained some note as a geologist. He married Miss Mason, a Cambridge lady and had a family of 14 children, none of whom are now living in Cambridge, his only relatives being his nephew William Farren, the naturalist, of Regent Street and his brother. Two of his daughters have inherited their father's artistic skill in no small degree. The funeral will take place at Old

Chesterton churchyard where his wife is buried. – 12 12 20bb Funeral at Old Chesterton. Three children of his eldest son, the late Ernest Farren live with their mother in Herbert Street 12 12 27b

1913

I.J. Aronowitz of Lyndewode Road has been granted a patent for a process in which printed pictures are treated to resemble oil paintings by mounting them on canvas and embossing them with a die prepared so as to produce marks on the picture in imitation both of the canvas and of the brush and other marks of an original painting. The effects are produced by applying a liquid which solidifies quickly and from which a second electrotype die is produced which bears in reverse the required markings. 13 12 19 p2 CIP

1914 Death of Mr. J. A. P. Titterton.— We regret to record the death, which occurred after a long illness, of Mr. John Titterton, one of Ely's oldest and respected citizens. The deceased gentleman, who was 84 years of age, was the only son of the late Mr. John Titterton who was Governor of Peterborough Gaol and previously Chief Constable and Superintendent of the Rural Police at Cambridge, of which he was the organiser. An artist, sportsman, photographer, antiquarian and astronomer, the deceased went to Ely as a young man, residing there for nearly 60 years. He was assisted in scientific matters by Professor Selwyn. He became fascinated by astronomy and did good work under the Royal Astronomical Society in completing an entire series of photographs of the solar system. Mr. Titterton had also the reputation of being a clever artist, his oil and water colour paintings being much admired by all who viewed them. A well-known, and even famous picture, "The building of Ely Minster", was from his brush, and he also possessed several others of an historical character.

1915 Edward Wilson, scientific illustrator; manager new department at Cambridge Scientific Instrument Company then scientific artist and illustrator in Post Office Terrace 15 04 23 p5

1922 Messrs W. Heffer and Sons have become well known for the excellence of anything exhibited at their Sidney- street galleries. Well above the standard of the rest of their exhibits is some of the truly wonderful work of a Scottish artist, Mr William Watt Milne, who has a studio in St Ives. The six pictures which are exhibited have been painted in the neighbourhood of Houghton. "Flood at Houghton" is the title of a pretty little piece of work depicting the picturesque village street on a grey day with the threatening sky reflected in a pool of water in the foreground. One of the best pictures is that called "The Old Inn at Houghton", a superb piece of work c22 06 16

1925 The funeral took place of Mr William West of the Art Department of the University Press. He was a versatile artist of considerable ability. His sketches of old Cambridge are numerous and beautiful & some may be seen in the book entitled "Cambridge re-visited" by Mr Arthur Gray, while many others have never been published. During the war he was much in request at the First Eastern General Hospital where he made valuable records of unusual aspects of certain diseases c25 05 09

1935 Cambridge Drawing Society exhibition includes many local views including 'Peas Hill' by Dorothy E. Bradford, 'Pembroke College' by Joyce Shillington Scales and Fenners by Mary Fyson. Fulbourn Mill has provided R.C. Lambeth with a subject. His detailed painting of the interior of the mill and its machinery will interest all with a mechanical turn of mind. Madame Raverat has some beautiful woodcuts including an unusually large cut of St John's Old Bridge printed from three wood blocks. 35 05 18

1935 Sid Moon, the CDN cartoonist for six years, is leaving to take up a similar appointment on the 'Sunday Despatch'. Speaking in a dual capacity as editor and as 'Uncle Robin' (of the Robin Fellowship), Mr Morley Stuart said Mr Moon had produced cartoons which were full of clever ideas but never objectionable and expressed regret that the special Robin Goodfellow cartoon characters he had created had no 'gone back into the inkwell' 35 07 27

1936 The Gordon Fraser Gallery owes its international fame to very humble beginnings at a tiny shop in Portugal Street. There was little passing trade at the newly modernised bookshop-cum-art gallery opened by Gordon Fraser in 1936. But amongst the merchandise on sale were original Picasso etchings and drawings by Matisse and James Thurber. The breakthrough came during the war when he commissioned local artists to produce cards which were printed in Bedford. It was there that the Gallery grew into a major force on the greetings card scene. 86 01 31a

1936 Herbert Ernest Fenn – a clever artist and cartoonist – 36 03 24a

1938 Charles Edmund Brock, the artist, died at his residence in Grange Road. He was chiefly known as a water colour artist and book illustrator, including novels by Charles Dickens and Jane Austen and did a fair amount of work for 'Punch'. He painted portraits of University worthies, several being exhibited at the Royal Academy, and two portraits of former Mayors, Ald Spalding and Ald Sinker, hung in the Guildhall before the rebuilding. His brother H.M. Brock, another artist, lives nearby. 38 03 01

1938 Cambridgeshire Photographic Record exhibition – includes watercolours of areas impossible to photograph including view of Fitzroy Street and Burleigh Street corner from roof of Laurie & McConnals painted by Beryl Pickering; other sketches include the Saxon Cement Works, Eagle Hotel yard, Hobson Street from King Street end, Miss M.C. Greene paintings of yards – Ninepin, True Blue, Ram Yard, Falcon Yard. Last thatched roof in Blackmoor Head Yard - 38 12 13a

1945 Ronald Searle exhibition drawings from Japanese prison camp – CDN 1945 11 30b, CDN 1945 12 01. CDN 1945 12 04

1950 We regret to announce the death of Mr Cyrus Johnson, the well-known portrait painter. He was the youngest son of the late Mr Elijah Johnson who founded the Cambridge bookselling firm in Trinity Street. Born at Cambridge he was educated at the Perse school and afterwards studied in Paris. He exhibited at the Royal Academy as a portrait painter in 1877 in which branch of art he achieved much distinction. He resided in Cambridge from 1916 until last year c50 02 28

1951 Miss Mary Charlotte Green of Harston House has died. Aunt to the distinguished author, Graham Greene, she was well-known for her deep interest in village activities. Her main occupation was painting which she continued right up to recent weeks, the paint on some of her works being still wet. She could often be seen painting on Coe Fen, even when there was frost on the ground. She exhibited at the Royal Academy and was President of the Cambridge Drawing Society. She also published a number of poems, reminiscences and one-act plays and was a keen horticulturist c51 12 21

1953 A portrait salvaged from a workmen's rubbish dump at Corpus Christi College, said to be of Christopher Marlowe, bears a resemblance to an engraving of Shakespeare which appeared in the First Folio of the plays in 1621. No other portrait of Marlowe, who was at the college from

1581 to 1587, exists. American experts have little doubt that it is of Shakespeare which could mean that the descriptions of the countryside described in his plays are really based on Cambridgeshire scenes and not around Stratford. The portrait, on a wooden panel & split almost in three, is now being restored. c53 10 23

1956 Roy Meldrum exhibition, artist - 56 02 18c

1957 A remarkable and widely admired artist, Mrs Gwendolen Raverat, of The Old Granary, Silver Street, has died aged 71. As a wood engraver her work was both decorative and illustrative; technically she was an excellent craftswoman and she chose to engrave without the aid of fancy. She was one of the earliest members of the Society of Wood Engravers founded in 1920. 57 02 13

1957 Mrs Gwendolen Mary Raverat of The Old Granary, Silver Street, engraver, artist and granddaughter of Charles Darwin died in February, leaving £1,000 to her housekeeper, Florence McMonagle, with another £1,000 to her indoor and outdoor servants. But Cottenham WI feel that such wills should not be published in newspapers without the executor's consent. To the strain of bereavement is added the embarrassment that your private business is an item of news and probably gossip. 57 04 30a

1957 Lloyd Gibson, aged 12, has won 102 painting competitions in four years. In his house in Isaac Walton Way are a television set, a portable wireless, three bicycles and a camera together with a pair of roller skaters and a set of hair brushes which he has won by his entries in boy's magazines. His pictures depict Red Indians, knights in armour and Spanish buccaneers but he would like to be a commercial artist when he grows up. 57 07 19a

1958 Cambridge artist Mrs Pamela Townshend had been commissioned to paint a portrait of Princess Margaret to commemorate her visit to open Langdon House. This young and vivacious woman has quickly become established as an artist and the Queen has bought one of her views of a French street scene. 58 01 03

1960 Angela Garnett, Hilton painter – feature – 60 01 08

1960 Sometimes talented people are intensely modest about their work and dislike publicity. Such is the case with Miss Isabella Mackay who is a partner of a local engineering firm and a remarkably fine artist. She was taught enamelling by the celebrated Louis Joseph of Geneva, attended two schools of art, jewellery and engraving in Birmingham and taught occupational therapy – including basket work – at Papworth in the early days of the Settlement. She has produced some original engravings of the colleges and has exhibited in this country and on the continent. 60 03 02

1961 Artist Jeanette Jackson and her husband are converting the old windmill at Hemingford Grey into a house and studio. It is this mill which has inspired her 15 paintings now on exhibition in London. The miller's horse and cart stables have been converted into living quarters and the loose box into a bedroom. The corn store is now a modern kitchen and the whole stable block joined by a glass veranda. The millstones will form the entrance steps and the huge wooden finial

which once topped the windmill is to have place of honour on the ground floor. The hardest job was the cutting of the 140-year-old cast iron shaft which carried the sails. 61 08 16

1962 Sir – I admire the paintings of Edward Vulliamy and hope there may be an exhibition of his work. I have two examples of his genius. One, dated 1929-31, is a superb watercolour of a drainage windmill that stood near Wicken Fen, the other is a pencil sketch of the windmill on Madingley Hill. They hang alongside other fenland etchings – R.W. Macbeth's 'Fen Flood', 'Potato Harvest in the Fens' and Robert Farren's 'Holywell' and 'Sunrise on Wicken Lode'. I hope I shall find somewhere that Cambridge people may enjoy them as I have done – William Farren, Milton Road, Cambridge. 62 02 23f & 24

1962 Francis Leach, stained glass artist and sculptor – obituary – 62 04 19

1981 Three valuable painting of Henry VI, Henry VII and Henry VIII have been stolen from King's College, Cambridge. All are contemporary works in oil on wood or panel. They were taken along with their frame from the college's main hall and people thought they had been removed for cleaning. 81 04 21a

1981 It took £10,000, two 20-ton cranes and a good deal of ingenuity for Cambridge artist, Philip Martin, to realise a lifetime's ambitions. He has taken delivery of a 70-foot barge. The 15-ton monster had to be winched off its transporter and lowered into the Cam at Riverside before being pulled by hand a mile up river to its permanent base opposite Alpha Road. It will take some time to convert it into one of the few floating art galleries in the country 81 05 01

1985 Harry Moden cartoonist, family fills gaps – 85 06 28b

1985 Lewis Todd was resident cartoonist of the CDN 30 years ago, following in the footsteps of Ronald Searle and Sid Moon who went on to Fleet Street. He is best-remembered for his composite drawings of cricket and football teams. He enjoyed a long career as an artist with the Ministry of Agriculture but now has an exhibition of his oil paintings of Cambridge scenes including a view of the Roman Catholic Church which makes it look like a Van Gogh structure. 85 07 24a

1922 Hills Road war memorial unveiled by Duke of York; was not bronze statue but plaster cast painted bronze; pouring rain threatened melt plaster; (new site on island 27.1.50, moved by 3.85) [455.13.2]

1922 His Royal Highness the Duke of York unveiled the War memorial which has been erected in Cambridge. The ceremony was attended by thousands of people and was of a deeply impressive nature. It was raining heavily as the Prince mounted the platform for the unveiling ceremony. The band played the opening bar of the hymn "O God, our help in ages past" to the accompaniment of rain drumming on hundreds of umbrellas. A few minutes later the rain ceased and the rest of the ceremony was carried though amid brilliant sunshine. The Prince pulled a rope which released the drapery revealing the bronze figure of an infantryman c22 07 04

1922 The model of the soldier on the Cambridge War Memorial which, owing to an unavoidable delay, had to be used for the unveiling ceremony last week, has to-day been replaced by the actual bronze, so that the figure now in position is as it will be seen for all time. The bronze was brought from the foundry at Thames Ditton by motor lorry at four o'clock this morning. Mr Kett and ten men were in waiting and so expeditiously was the work carried out that by 8 o'clock the model figure had been taken down and the other set up and fixed in its proper position. A couple of hours later the scaffolding was removed c22 07 11

1922 A service of commemoration for the members of the college who fell in the war was held in the Chapel of Jesus College. Immediately after the service the memorial tablet was dedicated by the Lord Bishop of Ely. After a short service, the Master, amid a silence so intense that it could almost be felt, read the names inscribed on the memorial. It was an impressive scene - the

clergy and choir in their surplices, row after row of gowned undergraduates, many of whom had also served, and a sprinkling of visitors from the outside world, all paying silent tribute to the 148 names read by the Master CDN c 28.4.1922

1934 Several hundred people joined in a peace meeting on Parker's Piece organised by the Cambridge Anti-War Council and the University Anti-War Movement before marching in a torchlight procession to the War Memorial. The procession, some 300 strong began their march along Mill Road, increasing in size as it went along. But they missed the turning into Tenison Road and crossed Mill Road Bridge before winding its way round the back streets to the War Memorial. They laid a wreath 'To those of all countries who fell in the last war from those who are pledged to prevent another' 34 11 12c

1937 Sir - What we have come to know as the Cambridge War Memorial was part of a three-fold memorial scheme which embraced a substantial grant to Addenbrooke's Hospital for extension work, a complete record in Ely Cathedral of the names of local men killed in the war or who died from wounds and the monument at the junction of Station Road. This was to commemorate all Cambridgeshire infantry and should be 'To Victory'. It was not to be a memorial to the dead but to the *living*. It is for this reason that we who pass the memorial do not lift our hats as we do at the Cenotaph in London – E.W.R. 37 05 20

1937 The Nazi salute was given as German ex-prisoners of war honoured Cambridge's war dead. Members of the Reichsvereinigung Ehem from Kriegsgefangener marched to the memorial where the ranks of local British Legion standard bearers were joined by the German standard-bearer, carrying the Nazi flag. While standards were dipped, one of the visitors placed a laurel wreath on the memorial as members of the German party gave the Nazi salute. They then left for a civic reception at the Guildhall. 37 06 30 & a & b

1949 Cambridge town council considered the proposed resiting of the war memorial. A scheme for a traffic roundabout at the Station Road junction means that if it were left in its present position it would be marred by the number of "Keep left" bollards and other traffic signs which would be necessary for the direction of traffic. An alternative position involved the acquisition of certain land fronting the Botanic Garden which would provide a restful haven away from traffic. None of the Servicemen's organisations was in favour of the removal of the War memorial front its present position. 49 10 12

1949 British Legion veterans of the 1914-18 war strongly opposed proposals to move and resite the Station road war memorial. Two sets of plans are being drawn up by the council. One involves the removal of the memorial into a proposed new entrance to the Botanic Gardens, and the other of placing it in the middle of a road island where it already stood. Capt Taylor said he thought the whole perspective of the memorial would be altered if it were removed. Dr R. Salisbury Wood suggested that floodlighting would add to the attraction of the site. The Cambridge memorial was the most beautiful one he had seen. If it was moved it would be a disgrace, said A.E. Mudd 49 10 24

1949 Construction has now commenced on a new roundabout at the junction of Hills Road and Station road, Cambridge. Proposals are being discussed for an alternative site for the war memorial. Site one : the memorial to remain in its present position in the eastern corner of the traffic roundabout. The dignity of the memorial might be marred to some extent by traffic signs. Two : memorial to be moved to the centre of the new roundabout. Three: the memorial to be moved to a position in front of the entrance to the Botanic Gardens, nearly at right-angle to Station Road so the statue of the soldier will still face the town centre. This site would provide a restful haven away from traffic and the memorial would not be marred by traffic signs. 49 11 02

1949 Smuts unveils Perse war memorial, Jun [3.11]

1950 new site for war memorial – cutting showing roadworks 27 Jan 1950 – 50 01 27

1951 “1939-45” added to War Memorial, April [4.2]

1952 Two hundred people gathered around the doorway of the new Memorial Hall of Cherry Hinton Free Church. In their midst stood the bricklayers and electricians, the carpenters and the painters who had built it. And there were the ladies who had made the tea. Churchgoers have built it with their own hands. It was a memorial to all those in the church who had played their part in the last war: on the civilian as well as on the military field of battle. It was a memorial to the living as well as to the dead. c52 10 17 [4.16]

1953 Ely Cathedral Memorial dedicated, October [4.8]

1955 A roll of honour compiled in memory of the citizens of Cambridge who lost their lives in the last war will be unveiled in the Guildhall. It is written on two skins of vellum with raised gold lettering and also commemorates the Women’s Forces and all the civilian casualties. It was executed by Miss G. Horsley, a designer at the Technical College and School and is a poignant reminder of how modern wars have involved the very homes of the people. The first name is a woman’s and the names of children killed in one of the air raids also appear. 55 11 02c

1957 When the Singapore Memorial was unveiled in the Kranji War Cemetery a wreath was laid in memory of over 370 former members of the Cambridgeshire Regiment who perished during the Malayan campaign or in subsequent captivity. After the formal ceremony, when the Guard of Honour had marched away, the relatives laid their personal wreaths and found the names which they had made their pilgrimage to see. 57 03 05a [4.12]

1959 Not many people know that on the wall of St Paul’s Church, Stockingford, near Nuneaton, there is a memorial to members of the Cambridgeshire Regiment who died in the Far East in the Second World War. But the Regiment’s Old Comrades Association never lets Armistice Sunday pass without remembering former comrades who were based there before embarking for overseas. The plaque is in proud memory of the 343 officers and men of the 1st Battalion who gave their lives in Singapore. The Battalion was stationed in Arbury Park from May to August 1941 and worshipped in the church 59 11 10

1982 computer lights approved though city object; protest over memorial move suggestions [18.13]

1983 Plans to move the Cambridge War Memorial from the Hills Road – Station Road junction have been scrapped. Instead of making way for a new system of computer-controlled traffic lights, the memorial will remain as an island. Originally the County Council wanted to relocate it to a small shady spot under the trees in the Botanic Garden, but the City refused to co-operate. 83 02 12a

1915 Trumpington's Roll of Honour. In the presence of a crowded congregation, the Vicar of Trumpington (the Rev. Dr. R. G. Bury) unveiled in the parish church of S.S. Mary and Michael, Trumpington, on Sunday afternoon, the village roll of honour. The names of 69 Trumpington men are inscribed on the roll which has been erected near the west door of the church to perpetuate the memory of the men of Trumpington who "went over in the Great War of 1914-15 to defend the honour of England and to preserve unscathed for future generations the great inheritance of British justice and British liberty 15 09 03 CIPof

History of Cambridge photography – 60 08 22

Cabinet-size portraits were invented in the spring of 1866 and John Werge visiting Cambridge two years later was surprised to find Cambridge men had not adopted it; writing in 'Photographic News' of 10 April 1868 he says: 'while there is a rush for cabinet portraits in Oxford, Cambridge holds aloof. ... lukewarmness of Cambridge photographers. Carte-de-visite size was most popular – 37 09 18a

George Proctor was earliest photographer, says Pink; he lived in New Square and died 1867.

Ernest Smart has a number of family portraits 39 12 30

Daguerreotype photographs were expensive and it was not until 1851 that a cheaper process came along. This was the collodion positive invented by Mr F. Scott Archer of Bishop's Stortford who died in 1857. These were framed portraits on glass and they were made in thousands at feasts in Cambridgeshire villages and on the beach at the seaside. One of the most notable makers was a Cambridge man called Dick Hutchinson who lived somewhere on the East Road and worked Yarmouth beach every summer. He had no studio in Cambridge. 39 12 23a

1898 A small fire occurred at the premises of Messrs Thomas Stearn and Son, photographers, at Bridge Street, Cambridge. The conflagration broke out in the darkroom and was probably caused by woodwork becoming overheated by gas. A considerable amount of photographic apparatus was destroyed by the flames, and some of the chemicals exploded with some violence in the heat. About 16 firemen turned out with a hose cart and three reels, causing no little excitement in the neighbourhood, but by the time they arrived on the scene the outbreak had already been extinguished by the inmates, by means of buckets CDN 1898 06 11

1898 W. Butcher photographer – adv 5 CDN 1898 07 06

1898 The photographer who is also an artist has a great advantage over the photographer who is merely a mechanic. One may realise this very clearly by paying a visit to the studio at St Mary's Passage, Cambridge, of Mr Clement A. Shaw. His first love was painting but in his portrait work he found the advantage of being able to take a photograph of the subject, in that tedious sittings could often be curtailed. His studios are covered with specimens of his work. There are photographs in all processes - opals, miniatures, pastels and oil paintings. There are several pictures painted on an enlarged scale from photographs which are very meritorious indeed CDN 1898 10 18

1899 There was a special temptation to the members of the Cambridge Wanderer's Cycling Club yesterday. It was "photo day"! We went away slowly for were we not mindful of the fact that a perspiring group would not make the best of photos? Moustaches shining in all the glory of a recent application of cosmetic had also to be studied. Our destination was Ditton Plough and when we arrived there was a general "spruce up", so anxious were we that such a "galaxy of beauty" should not be lost to posterity. Mr Lord placed us in position, endeavouring to look pleasant, keeping our heads on high and remaining perfectly still all at the same time. Three plates were used. That photo should be a good one 1899 06 26

1900 From time to time the announcement goes forth that at last colour photography is a fait accompli, but the statement proves without foundation While we wait for a solution there is something to go on with in the way of chromotype views. Messrs Boots took the lead in Cambridge and have just issued a new set which are beautifully printed and well worth framing. The set is packed in an elaborately designed wrapper, tied with Cambridge blue ribbon and would make a very acceptable gift CDN 1900 10 20

1901 A meeting of professional and amateur photographers met to arrange the Cambridge meeting of the Photographic Convention. The following were elected to the Committee: Messrs W. Refern, Tyndall (Ely), Bolton (Ely), Wilson (Saffron Walden) and Stearn Bros. Mr Sanderson

(Palmer Clarke) was voted to the chair. Mr Sidney Johnson, a University man, an amateur photographer and a contributor to the photographic papers was nominated as secretary CDN 1901 08 08

1901 A photographic exhibition was held, this is an entirely new feature to Cambridge and the object is to encourage photography and more especially to bring out the artistic instinct. There were a many good photographs. The judges, Messrs W.B. Redfern and J. Palmer Clarke considered artistic as well as technical merit. The challenge cup for the best photograph went to Mr J. Johnson for a seascape of exceptional artistic merit. Mr F.J. Stoakley illustrated the Sanger Shepherd process of colour photography and produced some magnificently coloured studies as near to the colours of nature as possible CDN 1901 09 13

1902 Coronation 1902. A Proclamation. Messrs Starr and Rignall, the people's photographers, being confident that every loyal subject of H.M. King Edward will appreciate some memento of this the most eventful year of the present decade have decided to give everyone the opportunity of securing one of their high-class cabinet portraits, finished in their best style, for one shilling. See window for special babies' offer. 108 Fitzroy Street, Cambridge. – advert CDN 1902 04 18

1902 Cambridge welcomed the Photographic Convention of the United Kingdom, numbering some 350 amateur and professional photographers. Quite early this morning numbers, with their indispensable cameras, were to be seen about the town and many impressions of the most interesting spots and ancient buildings will doubtless be taken away. Permission has been obtained for small parties of members wearing their badges to photograph in various colleges and churches. The official group photograph is invariably taken by a local photographer and as so many are competent the post was decided by draw and Mr T.B. Hunt was successful. CDN 1902 07 12

1902 The Horticultural Society's photographic exhibition was a great improvement on last year. The amateur photographer was apt to follow the lead of the professional and be influenced by his window exhibits. The professional photographer had absolutely the last chance in the world of producing the best photography because he had to work at a price and gain a livelihood. The Rev H.R. Campion, Ely, won a silver medal for a photograph of the entrance of Bishop West's Chapel, Ely and A.G. Swannell was commended for a study of Houghton Mill. CDN 1902 09 15

1902 There was a large attendance at a meeting to discuss forming a camera club in Cambridge. A long time ago there was a club but it had died through lack of interest. Prior to that there had been a club in connection with the University. In the early 1880s it was going fairly strongly but ultimately closed. Since then there was a club in conjunction with the YMCA but what they wanted was a club unsectarian. It ought to be social, but not political. Mr Tindall said he could get ten members from Ely and they had promises from villages all around Cambridge. CDN 1902 09 25

1902 At Cambridge Photographic Club the President (Dr Bansall) said pictorial work – by which he meant the making of pictures and not “fuzzygraphs” - was one of the most delightful branches of their art. It was easy to obtain a really high-class portrait for a reasonable sum of money, but the re-toucher polished away all the defects of the sitter's face. Cambridge was fortunate in having a first-rate colour photographer in Mr Stoakley who would give a demonstration of what he had done in this wonderfully interesting work. CDN 1902 10 15

1902 W.B. Redfern told Cambridge Photographic Club that he remembered a man standing at the corner of Parker's Piece taking photographs of a most ghastly character. At the time they thought they were works of art. Many of them were daguerreotypes and they saw a sort of ghost of themselves. Now Cambridge had some of the best photographers in the kingdom. Mr F.J. Stoakley lectured on photography in natural colours and the Sanger Shepherd process. CDN 1902 11 12

1902 Cambridge Photographic Club started at a horticultural show in the Corn Exchange in September 1902 when W.C. Squires and Addison organised a small photographic exhibition run by the YMCA. It was founded at the Prince of Wales' Hotel in October when several people came from Ely. Some of the early meetings featured a talk by Mr Stoakley on colour photography. W. Tams was a founder member - 38 03 02

1904 Since the introduction of picture post cards by Messrs Raphael Tuck five years ago much rapid strides have been made in the development of this delightful form of art. The 1904 productions surpass everything that has been previously issued. Each card in the 'Oilette' series is a veritable miniature oil painting, so perfect that to use it as a postcard seems profanation. The demand for these cards is simply unprecedented. Every particle of the work is entirely of English production and the previously undisputed superiority of continental colour cards is a thing of the past. CDN c 25.2.1904

1904 Newmarket is being well catered for in the way of pictorial postcards. A delightful set of six views in colour has been issued by Mr Ernest Parr, stationer. Having seen them one can well understand the enormous success with which they have been received. The cards are selling at the rate of 250 a day. The series includes views of St Mary's church, horses returning from a morning gallop, the royal entrance to the Jockey-Club grounds and the High Street on market day – CDN 22.3.1904

1905 With the next issue of the 'Cambridgeshire Weekly News' will be presented an art supplement containing photographs of the late Bishop of Ely and his successor. Both have been specially taken by Messrs. Scott and Wilkinson and are remarkable likenesses. They will be printed on specially prepared art paper in a style suitable for framing. Much disappointment will be saved if those who desire a copy will let their newsagents know without delay. Only a certain number will be printed and the issue will not be repeated. 05 08 19a

1905 A number of fishermen and fireman had an enjoyable outing on board the 'Majesty'. A photo was taken by Kidd and Baker of St Mary's Passage. On arriving at Upware they sat down to one of Host Peachey's liberal dinners after which the fishermen went fishing and the remainder had a trip to Ely, returning for tea and games. The return journey was enlivened by songs accompanied by Mr Sid Smith on his banjo. They reached home by 10 pm. 05 08 29d

1905 Thomas Stearn, the photographer, has died. He was one of the first resident photographer in Cambridge 60 years ago, though an itinerant exponent of the art known as Sarony had previously experimented with the faces and features of people at his van on Parker's Piece. He practised the wet process by which the unfortunate subject has to compose his features for at least 30 seconds until in 1880 the 'dry' process reduced the exposure to a fraction of a second. His wife had the distinction of being the first lady photographer in England. His two sons, Harry and Walter, continue the business. 05 09 07

1905 Sir – I believe the earliest Cambridge photographer was George Proctor, formerly a tailor living on the Market Place and later he removed to 32 New Square and carried on the business of a draper. It was here he practised photography until he died somewhere about the year 1850. About the same time Sarony, a celebrated photographer, was allowed to carry on his business in a caravan on Parker's Piece near the University Arms. Then in 1865 Thomas Stearn who had previously describes himself as a tailor now calls himself a dealer in fancy goods. In 1869 for the first time he appears as a photographer. Farren, Mayland, Monson, Nichols, Proctor, Pugh and Sheldon were all in business as photographers between 1850 and 1860. At that time Nichols had a

flourishing business and he removed from Slaughter House Lane to St Mary's Passage, and later his son to Post Office Terrace. He took my own portrait in 1854 and it is as good today as it was then. The late Mr Stearn was a tailor by trade and for many years was in partnership with his father. Mr Farren is still living as are also some of the children of George Proctor – 'Three-score and twelve' 05 09 13a

1907 lecture on colour photography starts with Clerk Maxwell in Cambridge [2.12]

1907 Cambridge photographic club – P.R. Salmon lecture – 07 03 27

1907 New photographic process – T.J. Sowden on Ozobrome – 07 05 09b

1907 The photographic world is agog just now in regard to the new colour photography. Two methods for producing plates in natural colours have been recently discovered. Now Fred Stoakley, who made the first 'three-colour' photograph seen in Cambridge, has produced an autochrome plate using the Lumiere or starch grain process. It is a flower study of geraniums, asters and petunias. 07 01 01

1907 At a lecture by Fred Stoakley on 'Real Colour Photography' the original photographs taken by Prof Clerk Maxwell, the pioneer of colour photography were shown, having been loaned by Prof J.J. Thomson. In Maxwell's method three successive plates had to be taken; now by the autochrome process the whole work is done on one plate. 07 11 23a

1907 Cambridge Photographic Club exhibition shows colour transparencies by Fred Stoakley – autochrome – also Squires, Farren - 07 11 13, 13a, 07 11 23

1908 The antics of 'The Castle End Musicians', a band of boys and girls, have caused endless entertainments to the inhabitants of that part of Cambridge. A lad who has had some experienced of the Boy's Brigade is the commander of the band, who form up in martial order, large and small, girl and boy, and parade up and down the streets with colours flying, playing the most extraordinary collection of musical instruments ever seen including toy drums and mouth organs. Now a local photographer has elevated them to picture postcard celebrities. CWN 08 09 18 p5 [2.14]

1908 A Horsley Hinton, photographer, appreciation – 08 03 05c

1911 The landlord of the Rising Sun, Somersham said a lodger, William Ward, alias William Wilson, with a camera told him that he was a photographer for picture postcards and was going to work the nearby villages. He had not paid his bill. The cook at Hemingford Abbots rectory said the servants had their picture taken in a group and had ordered a dozen postcard size prints. They had never been received. The man told the court he had been a travelling photographer for some

years but trade had got so bad he was forced to resort to this sort of thing. He had been to every village in the district but not actually taken any photographs. 11 02 03b 11 01 27e

1912 Sidney Campkin, the Mayor, recalled when photographs of family groups were taken on glass plate negatives. It took the greater part of the day and the result was not satisfactory. One advantage was that if one recognised people, they soon faded away. Dr Haddon told the Cambridge Photographic Club dinner that natives on a tropical island had cried when he'd shown the photographs of somebody who had since died but laughed to see someone who was alive. While developing in the tropics in a close atmosphere it was possible to wash your plates from the drippings off your nose! 12 09 27 & a

1912 Scott & Wilkinson & Stearn & Sons both received commands to take photographic groups of the King and his friends in the grounds of Trinity College – 12 09 27g, photo 12 09 27j

1913 A man entered Scott & Wilkinson's photographic premises and tried to steal money from the safe, but it was empty. He then visited Mr Mason's studios nearby and stole 25 shillings from the cash box before going to Kidd & Baker's photographer's studio to book a sitting, saying he would pay about 25 shillings for the photograph. Being suspicious, Mr Kidd followed him as he went into various shops, then called a policeman. But the suspect gave a satisfactory account of himself and disappeared. Had they known of the earlier thefts he would have found it much more difficult to satisfy the officer. 13 05 02 p9 CIP

1913 Cambridge Photographic Club opened new rooms in Park Place fitted up with enlarging and developing rooms together with a reference library. There is a permanent lantern screen over the mantel piece and beautiful specimens of photographic art are hung on the walls. Coton Church Institute also opened its new buildings with pictures of local celebrities on the wall. Games of bagatelle are provided and it is hoped to get a billiards table. 13 10 17 p7 CIP

1914 John Titterton, an artist, sportsman, photographer and antiquarian lived in Ely nearly 60 years. He became fascinated by astronomy. He was a successful photographer in the time of the wet plate process and it was pathetic to look through thousands of old negatives and realised how many Ely friends had passed away. He was a clever artist his famous picture 'The building of Ely Minster' and a racy and versatile writer. As a representative of the Press he wrote a great deal of copy relating to old Ely. His father, Governor of Peterborough Gaol and superintendent of rural police at Cambridge, had taken part in the Battle of Waterloo and rescued the Duke of Wellington when mobbed at Apsley House. 14 07 24

1918 Photographic club lecture by F Stoakley on making negatives using dyes made at University chemical laboratories Ch 18 10 30 p3

1920 Photographic Club activities curtailed by war; Mayor referred to old photos taken by Nicholls in the 50's or 60's and reproduced by Messrs Palmer Clarke; R. Starr recalls going as lad to Hills and Saunders to carry old silver bath. The old wet-plate process was just going out then, soon after dry-plates came in; several processes, one never gained popularity, collodio-chloride which were most permanent but needed delicate handling. Had ladies been engaged it would have increased in popularity. Photography had developed due to war. By means of aeroplanes and the camera they had been able to locate various enemy positions. Had been difficult to get professional photographers to combine. W. Farren, secretary, recalled in pre-war days when T. Snowden was secretary, they had a membership of over 200. This dropped during war, now 170. Important work at University Chemical Laboratories in which Mr Stoakley had a very great hand. Manufacturing dyes necessary for aerial photography which had previously been obtained from Germany – Ch 20 01 21 # c.65.5

1920 Photographic Club exhibition, printed by H.R. Champion of Ely & W.C. Squires – bromoil; colour transparencies by F.J. Stoakley – Ch 20 03 17d

1922 W.C. Squires honoured as picture hung International Exhibition London by Royal Photographic Society - bromoil [2.13]

1924 Cambridge men have become very prominent in the photographic world. Famous are the remarkable examples of colour photography produced by Mr F.J. Stoakley, and the fine examples of pictorial photography by D.J. Scott, Palmer Clarke and others, not forgetting the clever natural history studies by Mr W. Farren. Cambridge is also noted for its very large numbers of lady photographers c24 06 28

1924 The large body of photographers from the Royal Photographic Society, who visited Cambridge recently were much impressed by some very artistic coloured portraits in the window of J. Palmer Clarke's establishment in Post Office Terrace. They are something quite new, and of a very high artistic quality, as nearly like oil paintings as camera portraits are likely to be made. The method of colouring is the personal work of Mr C.E. Goodrich - 24 07 22

1924 My fiancée said she would like a photograph of me. I was shown into a room that appeared to be an artist's studio and the artist himself appeared and produced a camera from somewhere. The man had the effrontery to treat his business as though it were an art. He shifted a blind or two in the glass roof, put a few deft folds into a velvet curtain at one side of me and

returned to his instrument. I was about to adjust my features to the desired expression when I heard something click. I looked up and saw the idiot had actually exposed a plate c24 09 08 1924 Holiday Snaps. Why don't you make lantern slides of your holiday snaps. You will be surprised what pleasure it will give the youngsters to see themselves on the screen. Call and ask us about it. The winter evenings are coming on. Get ready for them, and make the youngsters happy. W.F. Turner, the Camera House, Trinity St, Cambridge – advert c24 10 14

1926 Amateur photographers will find a warm welcome at the exhibition of the Cambridge Photographic Club. Mr Langdon-Davies has a very nice collection of oil prints, which show great artistic feeling; his local scenes include St Clement's church and the University Press. Mr L.J. Jarman has a set of six prints, particularly pleasing is his picture of snow on the Backs. Mr R.H. Bullen has four exhibits, of which "Fairy Barges" strikes one as perhaps his best. The Misses M. & A. Johnson were bold enough to invade the precincts of the club and were awarded with two excellent impressions of Mr R.T. Bellamy, one being inscribed "The minutes of the last meeting c25 02 23

1926 Miss Olive Edis whose photographic portraiture is well-known in Cambridge has come again to St Columba's Hall. The collection is the fruit of many visits to Cambridge during recent years. There is an interesting collection of colour plates, some being fine examples of the Lumiere plate and others in the new gum-grain Agfa plate. The scarlet gowns make effective touches of colour and the portraits include Sir Arthur Shipley at the gateway of the Lodge at Christ's and a fine head of Sir J.J. Thomson which gives a far more natural portrait than most of his paintings, with colour. A view of King's College from the Backs is an exquisite example of what Miss Edis can do in landscape work and portraits of children and well-known nonagenarians and centenarians play an important part c26 10 16

1927 C.E. Goodrich spoke of 'Some joys and sorrows of a professional photographer'. A very irritating thing that every portraitist experienced was when a lady bought back her proofs with the statement that neither she nor any of her friends knew for whom they were intended; no one recognised them, in fact. On one occasion the complaint was met by a profuse apology from the photographer for having in error sent her another lady's proofs. Woe to the photographer who, catering for the general public in a moment of inspiration sought to apply some of the principles of art by suppression of some surplus furniture so as to allow the face of his sitter to become the centre of interest, for he would be thought to be working with a defective lens and not giving value for money. CDN c14.1.1927 [1.15]

1927 Deep regret is felt at the news of the death of Mr Frederick James Stoakley, chief laboratory assistant at the Chemical Laboratory for fifty years. He made a life-time study of colour photography and made the first 'three colour' photograph seen in Cambridge. He was one of the first to handle the Autochrome plate and produced some remarkable renderings of chemical objects. He was in great demand as a lecturer on colour photography and his photographic studies have been exhibited in all the big exhibitions. He was one of the founders & past President of the Cambridge Photographic Society CDN c 16.1.1927

1927 The work of maintaining a pictorial record of the streets and buildings of Cambridge is greatly facilitated by modern photography and much credit is due to those enthusiastic amateurs who perpetuate these important historical records. There are some excellent examples of the work of the Cambridge Photographic Club on exhibition at the Borough Library and the short time required to view the photographs will not be wasted. CDN c14.2.1927

1927 Cambridge Photographic Club celebrated its 25th anniversary. They were doing admirable work in conjunction with the Cambridge Antiquarian Society in securing a preserving a photographic record of various places which might disappear in course of time. Ald Starr said he had joined Hills & Saunders as a lad in 1880. They used wet plates at that time and had to coat them and sensitive them, and they would not keep for more than a few hours. c27 09 30

1927 Cambridge Photographic Club had made progress with the photographic survey of the county and over 100 prints were produced. There was still a great deal to be done and this should be regarded as one of the most important parts of the club's work. A collection of photographs of Cambridge was exhibited in the Public Library. The East Anglian Federation had held its summer meeting in Cambridge, but the weather was not in favour of photography. c27 10 09

1927 No woman has photographed more Royalty or distinguished people than Miss Olive Edis, the well-known expert in the production of monochrome and colour photography. She has her third annual exhibition in Cambridge, although she has worked in the town for some 20 years. One wall has a display of portraits of well-known Cambridge people but the greatest attraction will be the colour photography of local scenes c27 10 15

1927 Dr W.M. Palmer is chairman of the joint committee of the Cambridge Antiquarian Society and the Cambridge Photographic Club which is engaged in the formation of a collection of photographic records of old buildings and other objects of interest in the county, particularly those which are likely to disappear. He displayed 160 lantern slides made by him during the last two years of old houses, taken from the outside and from the inside, and a number of old photographs showing buildings now vanished and costumes that are no longer worn. The record will be of great value to the historian a hundred years hence c27 10 17

1929 Mr Walter James Stearn, the Cambridge photographer, has died. He was a son of Thomas Stearn, the founder of the photographic business, and with his brother Harry made it well known in University circles. His success as a sporting photographer meant that he was known to more undergraduates than any other townsman. In his younger days he was a keen sportsman, rowing being his principal interest. He was president of the Rodney Dramatic Club and always sent bouquets to all the lady members of the cast of the plays, but could never be persuaded to appear on the boards CDN c 10.2.1929 [1.9]

1929 Percival Rodrigo, a canvasser ... obtaining photograph ... from Gertrude Thompson ... said he was setting up a branch in Fitzroy Street and canvassing photos for advertisements – would enlarge it .. represented the Westminster Studios. Albert Chandler, photographer printed leaflets warning about canvassers - CDN 22.3.29

1930s Bansall Club 1930s – history – Snelson - 84 11 03
.36.94

1930 *undergraduates make cinema play of student life [1.11]*

1930 Alderman Ralph Starr entered the photographic studios of Messrs Hills and Saunders as a young man but then started a studio of his own and became one of Cambridge's most eminent photographers. He was Mayor in 1918 at a time when there was unrest among the ex-Service men. Trouble broke out in Luton and he was asked to send 20 constables to keep order. For the next three days Cambridge, which might have flared into disorder, was deprived of a considerable proportion of her own protectors but the danger passed. 30 07 15

1930 Sir – does Cambridge derive much pecuniary benefit from the photographer who blocks our busy street near the Post Office? I cannot believe that it was for this purpose that the graves were removed opposite Woolworth's. Other photographers would probably like the same privileges accorded to the one who now blocks our path – 'Old Cambridge' 30 10 06a

1931 A fire broke out at Messrs Towgood's Film Factory at Sawston but was quickly extinguished by the staff brigade. It was confined to a part of the factory where benzine was used, and the damage kept to one dyeing machine and the roof of the building over it. Some film was involved, but this being non-inflammable, did not burn 31 12 11c

1932 Photographic club – how newspaper blocks are made – J.W. Scott, manager CDN Photo Engraving Dept - 32 03 24b

1932 Inquest Henry Watson, photographic artist of Newmarket – worked for Frank Griggs – 32 05 13a and 32 05 20d & e

1933 When the Cambridge Daily News was founded in 1888 it was produced in premises in Camden Place. All who pass the Theatre Buildings will see we are taking over the premises vacated by D.J. Scott, the photographer. The present site, once an arcade of shops and offices in the passage leading between the New Theatre and Scott and Wilkinson, was acquired in 1901-2. Now we are expanding with new presses to enable a 24-page weekly paper, modern Linotype plate casting machinery and a larger photo-engraving department. We have also introduced a fleet of efficient delivery vans 33 02 14a & b

1933 H.S. Johnson on colour photography – 33 03 29e

1933 Snelson lecture on River Cam – 33 03 24b

1933 Briscoe Snelson lectures on Ouse with camera – 33 11 02

1933 David John Scott had been engaged in photographic work all his business life. He first started in 1884 in partnership with Mr Wilkinson at 47, St Andrew's Street. They bought an existing business for £300 and traded for five or seven years before the partnership was dissolved and he bought Wilkinson out. About September 1932 he had to leave those premises and remove to 59 Regent Street, which affected the business. Trade had declined and people were not having their photographs taken as much as they used to. 33 06 15c

1933 Anderson (Andy) Broom was keenly interested from a boy in amateur photography and became the first Press photographer in Cambridge, having been for 20 years on the staff of the Cambridge Chronicle. Before that he worked for 37 years with the firm of Flavell and Ellis, decorators. He was member of St Giles' parish dramatic society and an athlete, chiefly engaged in cycling and skating. 33 09 12

1933 Photographs taken during a holiday in Russia are displayed at Ramsey and Muspratt studio in Post Office Terrace. Two studies, 'Dneiprastron: the new town' and 'Moscow: the Kremlin' show there is beauty in the new and old. The human side is captured in a fine study of the 'Intourist' bus driver and a Young Pioneers' demonstration while 'The Infants School' shows the Russian child. 'Prison Settlement', is a photo of another aspect of Russian life 33 11 02

1933 Making of photographic blocks by CDN Engraving department manager – 33 12 06

1934 C.E. Goodrich, the photographer, started working at Cambridge under Mr Palmer Clarke and with Mr Sanderson took over the business, continuing alone after Mr Sanderson's death. He retired last summer. For over 25 years he was known for the special colour photographic process which he devised and used with great success in portrait and landscape works. He had photographed in colour most of the important members of the University and was always engaged to take pictures of new laboratories when they were erected 34 01 20

1934 J. V. Spalding lecture on amateur portraiture - 34 02 09

1934 suicide Douglas Gavin Reid 34 11 02b, 34 11 03, 34 11 12

1935 W.C. Squires exhibition – 35 02 16

1935 Briscoe Snelson gave a lecture of exceptional interest on the Ouse and its tributaries, showing several beautiful slides of the scenery. This was a stretch near the Godmanchester-St Neots road where the river ran alongside the rail-road and every morning an enthusiast would wait to race the 'Flying Scotsman' with his motor boat. "Elsworth was a photographer's paradise. It has no traffic problems, is on the bus route and has no petrol pump. It is a typical Cambridgeshire village, and I hope it will not change", he said. 35 03 21a & b

1935 Ramsey and Muspratt's photographic work will be even more distinctive by the use of the solarization process in certain of their portraits. It produces quite different results from the

usual photograph as by chemical means a black line is made to outline the face of the subject giving it the appearance of a drawing. Their other work captures not only the face but the character of the subject. An exhibition of photographs features Dr Alex Wood and Cavendish Laboratory scientist Mr Searle together with charming child studies full of the joy of living. Others are of commercial work, showing interiors and pictures from unusual angles. 35 10 25b
1935 Cambridge University Camera Club heard how the aerial camera acts as a kind of detective of the air, picking up clues helpful to the soldier, the prospector, the map-maker, archaeologist and even the tax-collector. Wing-Commander H.M. Taylor from the School of Photography at Farnborough told how on one housing estate an aerial photograph was fixed at the entrances as a guide to the streets for strangers. Panochromatic film was used to combat moisture. Showing an aerial view of Cambridge he commented; "There's always a lot of dust and haze over this town – there must be a lot of hot air talked!" 35 11 18

1935 Briscoe Snelson gave a talk, illustrated by lantern slides on 'The River Ouse with the Camera' 35 12 07

1936 Percy Clark left Cambridge for a life of adventure in South Africa. Today he is famous to visitors at the famous Victoria Falls because of his picturesque huts which house photographs and mementoes for the delight of the traveller. In his autobiography, 'An Old Drifter' he tells how, after working as a photographer with Mr R.H. Lord, he went to Rhodesia where he worked as a travelling photographer. Having returned to Cambridge to be married he went back to find that the man he'd left in charge of his photographic business had decamped, having sold nearly all the furniture. But his young wife made the best of it and they have two strong sons. 36 04 22a

1936 "I never let people pose" said Mrs Lettice Ramsey at an exhibition of modern photography. Her Solarised photographs are striking and new, giving the effect of charcoal drawing, while the unusual angle in the beautiful picture of Mrs Victor Rothschild is becoming as well as arresting. But the child studies are the most interesting: none of the usual sentimental darlings, but vigorous, animated children, almost walking out of their frames. Feminine sitters appreciate a women photographer's experience in matters of clothes and hair dressing while men – often vainer than women – can be flattered into good humour. Here is something new and original in photographic technique 36 06 04b

1936 A pilot summonsed for flying at a low altitude over the Cam at Fen Ditton told the court he was carrying a photographer for the Sport and General Press Agency. Herbert Cook was taking pictures of the Bumping Races from a side window using an ordinary camera with a long focus lens. They had to fly across the river and would not have got good photographs if they'd come down to the tree tops. There were a number of other planes from Marshall's flying about. Spectators complained he was too low and had caused one of the waitresses at The Plough to spill the things on a tray in the tea garden. The case was dismissed. 36 10 01 & a

1937 Briscoe Snelson lecture 'With a camera in East Anglia' – 37 01 22c

1937 Percy Salmon gave a lantern lecture on Melbourn to Cambridge Photographic Club. One drawback was a lack of water supply and this was a serious matter to a photographer. The method of washing slides at the village pump was slow, but healthy, while dangling them in the mill pond merely provided a free picture show for the stickleback, who ruin the slides by their curiosity and rubbed the gelatine off. He deplored the 'slum clearance fever' which has swept Melbourn. It has made the village more healthy but less picturesque and no longer a hunting ground for photography 37 10 20c

1937 Cambridge Photographic Club's annual competition was 'Street characters and customs'. There were interesting entries depicting well-known characters and street scenes. Graham Turner submitted a picture of 'William Davis, pedlar', Capt C.G.M. Hatfield was awarded a certificate for a photograph of 'Banjo Joe', a familiar figure on the Backs, while Graham Turner and T.E. Collier were praised for their entries 37 12 15c

1938 W.F. Turner pictures of Old Cambridge – interesting notes – 38 02 03a
1938 Briscoe Snelson lecture on East Anglia with a Camera – 38 02 10
1938 Ralph Starr, photographer recalls early advertisement in CDN – 38 05 31k
1938 Cambridgeshire Photographic Record exhibition – includes watercolours of areas impossible to photograph including view of Fitzroy Street and Burleigh Street corner from roof of Laurie & McConnals painted by Beryl Pickering; other sketches include the Saxon Cement Works, Eagle Hotel yard, Hobson Street from King Street end, Miss M.C. Greene paintings of yards – Ninepin, True Blue, Ram Yard, Falcon Yard. Last thatched roof in Blackamoor Head Yard - 38 12 13a

1939 Turner & sons of Trinity Street was founded by John Leach, chemist and photo dealer 50 years ago and taken over by W.E. Turner in 1912. It has one of the most modern photographic developing and printing factories at Humberstone Road – 39 08 02b

1940 John William Scott manager CDN photographic & engraving department; worked at Scott & Wilkinson and did occasional photographic work for CDN; also official police photographer. When CDN reorganised in 1929 was asked to form and take control of the Photographic and Engraving Department – 40 06 04

1941 CAS Photographic record has 7,000 prints; catalogued by Dr Mary Scruby and being used by Architects' Panel for recording ancient buildings; seeks pictures – 41 04 12

1941 Briscoe Snelson has pictures accepted for Royal Photographic Society's annual show; all of fenland scenery – rainbow over Reach lode, Reach, river farm at Fen Ditton – 41 09 13

Briscoe Snelson has 6 photos Royal Photographic Society show [1.6]

1941 James Henry Kidd of Kidd & Baker dies aged 72; first worked for Faulkner-White in St Andrew's Street, then Scott & Wilkinson. Opened his own business in St Mary's studios 36 years ago and was joined by Miss Baker who had worked with him at Scott & Wilkinson. Business thrived, good mixed trade with University and town. War produced difficulties in obtaining materials and the studio was forced to close – 41 08 15a

1943 Cambridge Photographic Society move HQ from Ram Yard to Cambridgeshire Technical School, though dark room will continue until Christmas; first lady president (Mrs K. Moore) retires Hon Sec for 15 years, I.S. Moore had died – 43 10 07a; death Agnes Johnson – 43 12 30

1944 George Henry Tyndall, proprietor Minster Press, Ely; accomplished photographer featured in Atkinson's Ely Cathedral and Hunts VCH – 44 12 28a

1945 Cambridge University Committee for Aerial Photography started when Prof John St Joseph began taking photographs in 1945 after his wartime experience showed him the value of aerial observation. In the first ten days he took 788 photographs. Until 1958 he used an RAF training aircraft but in 1962 the Department purchased its own plane. They have surveyed the whole of Cambridgeshire in colour. 89 07 07b

1947 Mrs E.H. Galsworthy has established a reputation as a photographer under the professional (and maiden) name of Miss Olive Edis. She started taking photographs 41 years ago and has no less than 35,000 ordinary negatives stored away. Mrs Galsworthy has specialised in colour work, using Lumiere plates and her collection must be almost unique for it comprises a cross section of some of the most notable men and women of the last generation. There are a number of Cambridge personalities, many of whom were personally known to her for Cambridge is what she calls her "third home". They include Lord Rutherford, Sir J.J. Thomson and Dr M.R.

James (Provost of Kings). Connections with the town date back to her early days and before her marriage she held annual exhibitions of her work in St Columba's Hall, St Andrew's Street 47 12 30

1950 Mr Ralph Starr, twice Mayor of Cambridge & once described as 'the best-known man in the town', died at his home. Few men have given so much of their life in the service of the town. He was first elected to the Council in 1904 and served continuously till November 1945. At a time when there were few Labour members of the council he was looked upon as the 'People's Mayor'. As a young man he entered the photographic studios of Messrs Hills & Saunders where he remained for eight years before starting the business to become well known in Cambridge & Ely as 'Starr & Rignall' c50 08 24 [1.8]

1955 Albert Grainger, the Burwell photographer, has died aged 69. A cheerful character he had made a host of friends during his 31 years in the photographic business. He worked as butler-valet for Lord Glanely at Exning House until in 1923 he set up in business at Burwell. His first job was a wedding the day after the shop was opened. Throughout his career he was assisted by his wife, Dorothy, who carried on the business for some time after his illness. 55 07 08b

1956 W.C. Squires had been a founder-member of the Cambridge Camera Club; he was a master of the technique of bromoil, his work being exhibited overseas, and an enthusiastic lantern slide worker. But he refused to lecture and many of his slides had never been shown. His speciality was the portrayal of open landscape and he aimed for a natural effect, be the conditions stormy or sunny. He loved the fen country round Reach 56 01 20d

1956 Baron the famous photographer (Mr Stirling Henry Nahum) commenced his career in Cambridge after his mother gave him a £16 camera. In 1935 he started a correspondence course with the Mallinson School of Journalism and Photography in Rose Crescent and had his lessons posted to Monte Carlo where he was living. He already showed promise and the School sold several of his photographs during the two years he was with them. 56 09 08e

1957 A.C. Barrington-Brown, photographer on trip to Far East – 57 09 04b

1959 Melbourn's most familiar figure, Mr Percy Salmon, has died aged 87. He was correspondent for the 'Cambridge Independent Press and Chronicle' for many years. Nothing could ruffle his even temperament although his articles were often controversial. In his youth Mr Salmon travelled the world as a press photographer and his lantern lectures were a popular entertainment when he first came to the village in the late 1920's. He was also an expert archaeologist. 59 08 26b funeral 59 08 28

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1969 Fencolor Laboratories move from Abbey Road to Coldham's Road; started in early 1950's in Bridge Street; will increase workers to 80 – 69 05 05

1970 Stearns joined Eaden Lilley, negs maintained - 70 10 09 [27.10.2]

1978 The Sunday Times devoted many pages to portraits of such people as Burgess and Maclean photographed during their undergraduate days in a "relaxed" style then very usual. They were taken by the famous Cambridge photographers, Ramsey and Muspratt in their studios at Post Office Terrace. The article also mentioned the 50,000-odd negatives left behind there by generations of photographic firms, but there could be even more. In a separate building at the back are cupboards, not opened for at least 70 years, that are absolutely stuffed with glass negatives. But now a selection of them have been printed by the Cambridgeshire Collection c78 05 15

1978 Cliff Squires and Briscoe Snelson were two of Cambridge's most talented amateur photographers, good friends who often photographed the same scene, though from their own distinctive viewpoints. Squires, founder of the Cambridge Camera Club died not long after his friend Snelson was widowed and in 1953 Mrs Kathleen Squires became Mrs Snelson. She remembers both husbands as simply, "lovely men". Now their widow has deposited a horde of their photographs with the enterprising Cambridgeshire Collection, who are planning to hold lunchtime lantern-slide shows this autumn. c78 09 10

1982 Frith photographs being sold by Cottenham firm – 82 05 05a

1983 At Anglia Photo works in Devonshire Road they know the party season is in full swing. There was a time when you could guarantee there would be hardly any photographs to process after September, said Tom Johnson, but the emergence of d cameras with built-in flash has changed all that". The average number of prints processed per film is now 22, much higher than it used to be. Now picture after picture flows from the processing machines and every one is personally scrutinised and inspected 83 12 10 p14

1984 KP Professional Sales started in 1968 when its position on King's Parade was ideal for building up business with university departments. But it outgrew its space in the KP Camera Shop, moving to Sussex Street and then Quayside before opening new premises in Clifton Road. It supplies Government departments, the armed forces and a host of professional photographers who need a vital piece of equipment at the last minute. There is a lot of new electronic equipment but as far as taking pictures is concerned Ian Bedson, the managing director, doesn't envisage any major innovation. 84 12 05 & a

1985 The rambling photographic premises in Post Office Terrace are best known as Ramsey and Muspratt's studios. It was in 1931 that Lettice Ramsey and Helen Muspratt took over the business previously run by Palmer Clarke. They built up the portraiture side of the work, photographing most of the university students in the 1930s and carefully filing their negatives. In

1978 the business was taken over by Nicholas Lee and then Peter Lofts but has now closed. All the glass negatives of previous photographers at the studio, dating back to the 1860s, are now in the Cambridgeshire Collection. 85 02 01b & c

1985 Lettice Ramsey, a member of the Bloomsbury Group and Cambridge photographer extraordinary, has died at the age of 86. Born in Ireland, she was educated at Newnham College and married Frank Ramsey a brilliant King's philosopher who tragically died three years later. Left with two daughters she studied briefly at Regent Street Polytechnic and set up in business as a photographer in Post Office Terrace with Helen Muspratt. She was instantly successful and rapidly became fashionable, photographing the influential and up-and-coming throughout the 1930s including Anthony Blunt and Virginia Woolf. She retired in 1978 85 07 18

1985 Cambridge Darkroom exhibition of Fen photographs – 85 11 18

1986 Starr and Rignall photographs given to Cambridgeshire Collection. – 86 04 04c

1990 University Audio founder Gruffydd Reece started University Cameras in St Mary's Passage after leaving the RAF in 1945. The business expanded and he opened Fencolour Laboratories in Newmarket Road, one of the first to offer colour developing and printing for amateurs. He was later joined by his brother Hugh and cousin Bryan Hyam who started University Audio in Peas Hill – 90 03 13

'Bachelor of Hearts' filming, 1958

109.02

see also c. 76.9 for cinemas

1904 The Midsummer Fair brought its usual amusements but the cinematograph held undisputed sway: it is the autocrat which swallows hundreds of 'tuppences' and is always ready for more. It was patronised liberally and showed some very excellent representations of national and local life. War pictures form no inconsiderable part of the programme and among the turns of local interest were views of the May Races and the boiler explosion at Linton. CDN 24.6.1904

1911 film made of Senate House procession and Balfour installation [2.15]

1913 Playhouse Cinema opened, first purpose-built cinema in Cambridge: had its own orchestra & camera man who took pictures of local events for newsreels [2.10,M]

1913 Builders working on the new Mill Road Picture Palace were taking their dinner on planks near the wall when a man rushed up and, pointing to the sky, called their attention to a passing aeroplane. Whilst they were gazing in astonishment at this interesting object he suddenly seized a dinner bag from one of them and bolted. A cry of 'Stop thief' was raised and a policeman gave chase, speedily joined by a fireman and a boy scout who captured his quarry with a lasso. The whole thing was a 'put up job' by the manager of the Electric Theatre whose operators took a cinematograph picture of the event to be shown at the cinema on Market Hill. 13 05 02 p10 CIP

1917 "The battle of the Gogs" – fine operations by Cambridge cadets; film made by A.J. Pointer of Victoria cinema. Includes filling bombs, march to battlefield, attack and counter-attack including planes, bombs and gas – 17 04 18a; photos – 18c

1922 Original "rags" in Cambridge are becoming few and far between, but there was something absolutely new this morning, when undergraduates treated their fellow-members of the University, and townspeople also to that rare spectacle - a film in the making - when there took place the filming of episode one of "The Supper Man". Shortly before noon we beheld a crowd seething round a lorry bearing camera men and some bright spirits with megaphones. These bright spirits made a loud noise with the aid of the megaphone whereat the villain, one Silas Windle, the most villainous villain that ever "villainised" appeared mounted on a handsome gee-gee c22 05 22

1923 The subject of the censorship of cinematograph films came before the Cambridgeshire county council. They agreed that no film - other than photographs of current events - which has not been passed for universal exhibition by British Board of Film Censors shall be exhibited without the consent of the council. The Vice Chancellor thought that films such as those of the rags on Market Hill, he personally would be very glad to see stopped. (Laughter.) If there were no films of "rags" there would be no "rags" to film. (Laughter) c23 11 05

1924 Pictures of the boat race were shown in several local picture theatres on Saturday night. At the Playhouse the Pathe film of the great contest was thrown on the screen at 8.25. The last camera from the race arrived at the Pathe studio at about 3.30. The first copy was made at 6.30 and the journey to Cambridge was made by motor. The audience cheered and roared all the way through the picture, and at the conclusion the noise was enough to bring the roof down c24 04 05

1926 The many hundreds of people who crowded Market Hill to see the meet of the Cambridgeshire Hunt on Boxing Day morning will have an opportunity of trying to pick themselves out in a special film at the Victoria Cinema. The photography is extraordinarily good and the picturesque scene well depicted. The spectator gets good views of various sections of the crowds and the huntsmen are seen partaking of the refreshments supplied by the Mayor. Later as the Hunt moves off we see them in King's Parade c25 01 02

1926 A splendid film of the Boat Race was screened at the Playhouse on Saturday evening and received a great reception from crowded audiences. Added interest was shown by the inclusion of pictures of the "Go-Ahead" wireless car receiving the copy of the film for Cambridge outside the offices of Pathe Gazette. It came with musical accompaniment as the loud speaker was giving forth the Daventry programme and when broadcasting in Wardour Street, London, the road was blocked by people who stopped to gaze at the novelty and to listen in c26 04 03

1926 No little excitement was caused when an undergraduate, fully-clothed and wearing cap and gown, jumped off the Magdalene Bridge into the river, using an umbrella as a parachute. A film record of the exploit was taken by Lord Burghley, the famous athlete, who had his baby film camera mounted on the top of his motor car. The undergraduate, being hard up, had hit on this idea as a way of getting money and has netted enough to keep him for a week or two in pocket-money c26 11 16

1927 Granta holds competition for Cambridge-based film [1.16,1.18]

1927 "Grit" is an undergraduate film taken by a little Cine-Kodak and projected by the Kodascope at the Tivoli Cinema. It is believed to be the first serious attempt in an English University to obtain experience in the technique of film production and is one of the first amateur films to be exhibited in the country. It has been directed by Mr Dennis Arundell and we get some good views of Cambridge streets and colleges. It shows how the stroke of a college crew is kidnapped so his boat might not go head of the river. c27 06 10

1928 Almost every aspect of undergraduate life will be seen in the new 'talkie' film now in course of preparation. The director is an old Cambridge man and he has persuaded the authorities

to permit the general public glimpses of the interiors of some of the most sacred institutions. Certain 'dons' whose names are household words are interested in the project and will describe the characteristics of some of the fine old buildings while in one scene the star part will be played by a popular University hairdresser whose saloon and waiting clients provide the setting. c28 12 03

1929 Cambridge Undergraduate film comedy – Aunt Matilda's Nephew – CDN 1.6.1929

1930 Cambridge University Cinematograph Society has just started on its new film; it will be even more ambitious than last year's "Aunt Matilda's Nephew". That was a two-reel burlesque on University life but "Varsity" is to be a more serious affair. It will be a mixture of comedy and drama. There will be a strong love interest and the services of some professional actresses are being sought. The director is Mr S. Legg and the camera man Mr Graff 30 01 25 & a

1930 Cambridge University Cinematograph Society's film 'Varsity' depicts University life through the eyes of undergraduates themselves. The director is Stuart Legg of St John's College and Mr J. Graaff is responsible for the production and photography. About 50 students take part including Mr Hunter, the son of a well-known Hollywood director and some well-known townsmen. It includes scenes at a Rugby match, Cambridge station and a roulette party at a public house. The film is not a talkie but includes gramophone recorded noises. 30 05 27

1930 Great liberties have been taken with Sherlock Holmes and in plays and films you can learn things that Sir Arthur Conan Doyle himself never knew. In 'The Three Students' Sir Arthur laid the scene in a Cambridge college but in the 'Moriarty' film Holmes and Watson are both shown as undergraduates. It was here that their great friendship began and from here that Holmes set forth to track down Moriarty and his gang 30 07 12b

1930 Chivers employees spent a pleasant and instructive time at the Central Cinema when they watched the new film 'From Orchard to Home'. It covered the processes in making jam from picking the fruit to labelling the jars and showed the facilities afforded the employees in their leisure hours. At the conclusion a good deal of merriment was caused by the showing of a similar film taken 25 years ago; it was interesting to compare the difference between the work then and now 30 12 23

1931 first talking picture made at Cambridge University by Stuart Legge in conjunction with British Instructional Film Corporation about day in life of an undergraduate [1.10]

1931 Cambridge professors were amongst scientists who made a film at Spicers of Sawston and less than four hours afterwards saw themselves in natural colours on the screen. Experiments in colour have been going on for two years. At present efforts are being concentrated on motion-picture film. One of the difficulties has been the provision for a sound track but this has been surmounted and talking colour films will be made. Sawston may become a complete film colony rivalling Elstree in importance. 31 05 29a

1931 A Band of Hope meeting in the Bethel Baptist Church, Swavesey welcomed Mr and Mrs David Moore and their programme of moving pictures. Mrs Moore deplored the fact that the gambling spirit was so rife and a scientific film showed the narcotic effect of alcohol. Pictures of the Skegness excursion gave great delight as many people saw themselves on the screen. They were followed by film of a garden party in Christ's College and the colleges in their winter mantle of snow. 31 12 11g

1931 If you spent Christmas in Cambridge you may see yourself on the screen at the Kinema. The enterprising management sent a man round with a cine-camera who took 'shots' of people doing their shopping on Market Square, a Christmas Day football match on Jesus Green and the Boxing Day meet of the Cambs Harriers showing many well-known faces including that of the Mayor drinking out of the stirrup cup. We hope it will not be the last time the Kinema send their camera round the town 32 01 01

1933 University Film Society filming ‘Power’ – 33 06 06
1933 Cosmopolitan : opened as part- time cinema, Market Passage Oct [1.7,1.6M]
1933 amateur film producers production – 33 12 02

1934 A film entitled ‘Cambridge and the University Town, directed by Peter Collin of Newmarket is a twelve-minute pictorial survey with shots of the backs, boating scenes and Grantchester. He had the collaboration of R. Colville-College, an undergraduate of King’s. The photography, which reaches a very high standard, is by S.W. Bowler who shows considerable promise. The film, released by Equity British Films will be shown in Ely, Littleport and Newmarket. As a lad Mr Collin assisted in the operating box of the Victoria Cinema and is now a director of Argyle Talking Pictures. 34 01 08

1934 Cambridge Photographic Club featured an excellent display of cinematograph films. They included a splendid pictorial film of Cambridge by Eric Twinn on 9.5 mm stock. It was a brief presentation demonstrating his ability to choose a pleasant viewpoint. Mr J.V. Spalding depicted some of the useful work of the Ouse Drainage Board with several very clever angles chosen to obtain dramatic effect 34 04 19

1934 Newmarket Amateur Cine Society, in only its second year, has accomplished a splendid performance by winning first prize in a competition organised by ‘Home Movies and Home Talkies’. Their film was directed by Merrick Griffiths, with J.W. McGlone responsible for the photography. The prize consists of a gold medal and a 16 m.m. projector 34 05 18

1934 Thousands greeted the King and Queen when they made their way to the new University Library. Washing and cooking alike was forgotten in hundreds of homes as women formed a great part of the crowds which were thickest in Trinity Street where undergraduates in cap and gown added to the number. Of all the wonderful products of man’s skill in art and labour the Library must rank of one of the most inspiring and peculiarly permanent of our national institutions and with while clouds scudding over its lofty tower this unique building occupied the centre of a delightful scene. An exceptionally good film of the visit, taken by Gaumont especially for the Victoria Cinema will be shown next week. 34 10 22 & 25

1935 Cambridge Photographic Club Cine Group films included ‘Yarmouth Scene’ by E.J. Twinn showing the curious narrow ‘rows’, the great herring season and a tragedy of the sea – a great cargo boat being destroyed by fire. E.F. Watson showed his travel film ‘Glorious South Devon’ and Arnold Darlington displayed ‘Puffin Island’. The tit-bit was the group’s 1935 film ‘Morning’ which starts in a leisurely strain and ends with the workers and school children beginning their day. The actors, Mrs A. Twinn and Mr E.F. Watson are to be congratulated on their performance. 35 04 17a

1936 Cambridge University Film Production Unit documentary on psychology at Psychological Laboratories – photo 36 03 03b

1936 Cambridge Photographic Club cine group showed a film by Eric Watson entitled ‘East Coast Holidays’ with some interesting shots of fisher girls ‘gutting’ at Lowestoft. ‘Neath Arctic Skies’ by Arnold Darlington depicted Eskimo life in East Greenland in 1935 while his ‘Offence and Defence’ was accompanied by a running commentary: the absence of sub-titles made it something of an experiment. The club’s combined film ‘Springtime for Henry’ portrayed a small boy’s attitude towards compulsory school attendance on a fine morning. Mr H.S. Johnson, president, thanked King and Harper for the use of their radiogram in relating the musical score accompanying the films. 36 04 22b

1936 Nearly 600 people attended a film show at The Dorothy arranged by King and Harper in connection with Morris cars. The chief film was ‘Sahara’ showing how a car broke the record

from London to Nigeria and illustrated what a standard Morris 25 saloon can do, while the 'Morris Gazette' included boats on the broads and some of the employees social pursuits. The programme included one of Walt Disney's immortal cartoons. It was 'The Service Station' and the audience found plenty to laugh about. – 36 09 23a

1937 Cambridge University Film Production Unit described their difficulties in making the film 'Psychology Today'. They used various laboratories for studios and when hounded out of one would look for another. The camera was of the hand-cranked type and had to be held down by three people when in use to prevent it rocking. While the film was being made they had no time for work or any other activities. A commentary had now been recorded and the sound track and visual film were in process of being 'married'. The unit is not confined to members of the University: townspeople are welcome. 37 01 21d

1937 Mr W. King's film display at Stapleford Institute featured scenes of the maiden voyage of the Queen Mary together with two of his latest films. 'Armistice Day' included colour pictures of Poppy Day in Cambridge and 'Village Life' showing the British Legion parade, Stapleford school children at their exercises in the playground and many scenes of farming life. Stapleford's ambition is to be right up-to-date. It has a water supply with hydrants in case of fire, gas and electricity though this has not been installed at the Institute and a wire was run from the Old Vicarage to operate the projector 37 02 04

1937 Cambridge Photographic Club cine group presented its annual show. Mr W. King's "Flood" was a magnificent epic of the recent Fenland troubles with some really brilliant photography. "Close of the Day" recalled some of the scenes witnessed in Cambridge every afternoon at 5 o'clock and showed the evening's life of a typical couple. Humour and trick photography are the keynote of the film which was written and directed by Mr F.B. Ives and produced by Mr E.J. Twinn. 37 04 21a

1937 'The Harassed Harrises', a play by local author Gerald Light, features a father who keeps a fried fish shop in a town that is obviously Cambridge. His son, a young man of brains, has won a scholarship to the university but feels he is looked down on because of his father's job. What makes things even more awkward is that his aunt is a bedder at his college who is very fond of whisky. Without a doubt the play was greatly appreciated by the audience at the performance given by the CUP Amateur Dramatic Society 37 10 02

1938 Mr W. King showed three of his films at the Dorothy Café. The first dealing with the fen floods of 1937 had been seen before but the others were new. One showing the inspection of the Cambridgeshire Regiment by General Kirke caught the spectacle admirably: the marching of the Territorials was transferred to the screen in colour and many town and county notabilities were seen. Another showed the demonstration given by the Cambridge Women's Physical Culture Club, concentrating on the beauty and grace of their movement and showing the great advance they have made in the art of keeping fit by easy, pleasure-giving exercises. 38 01 11a

1938 Mr W. King gave the premier presentation of two new films depicting his tour of the Continent, tracing the journey from Cambridge to Germany. Everywhere he went he was given a wonderful reception but he noticed the extraordinary signs of militarism with numerous little armies of men and children being shown. The first film was 'Flood' which has been placed among the ten best amateur films of 1937. It was followed by 'May Week' and 'Club Clippings' showing many well-known members of the Cambridge Motor Boat Club. 38 03 17a

1939 Mr W. King's latest films represent a remarkable advance on his past achievements. Apart from films of a domestic nature, such as the visit of Rotarians to Hemingford Grey and their outing to Houghton, there was one of the proclamation of Reach Fair. He visited this year to make a pictorial record but was unlucky in that the fair itself failed to materialise apart from a few side shows. He was able to catch the atmosphere of the opening ceremony and the children

scrambling for new pennies. He also filmed the lunch in the village schoolroom, obtaining some candid shots. This might find its way into the archives if the fair suffers the same fate as Stourbridge Fair. The best of his colour films depicted a visit to Messrs Engelmann's nurseries at Saffron Walden showing glasshouses filled with carnations. 39 12 20

1941 London Comes to Cheveley.—“The Rectory in the village of Cheveley (Cambs.) must be among the handsomest property now used by Friends." So states a note in a recent "News" sheet issue by the Society of Friends' War Victims' Relief Committee, which announces that towards the close of last month this rectory was occupied by mothers and children from Stepney and Limehouse. These folk were selected from East End shelters in which the Friends work. Most of the women had been to the country before — they returned because they could not stand living in other people's houses and the separation from their London friends. And they have come to Cheveley because they had been allowed to take some of their own essential furniture with them and live in a community of their London neighbours. To help them to make up their minds about coming, a film of Cheveley was made and shown in the shelters—which strikes me as being extremely accommodating, to say the least. "The scheme," says the 'News' note "would never have come into operation without the advice, help and encouragement of a Cheveley resident. Mrs Morriss, whose horse won the Derby a few years ago." There is, I believe, a similar 'Friends' centre at Wood Ditton for bombed-out people. 41 04 18 CIPof

1944 'Journey Together' film made by RAF for RAF features scenes in St John's College – 44 08 18b a

1946 Pathe newsreel file of Cambridgeshire Regiment Freedom to be presented Mayor – 46 12 20

1947 I hear that the "shooting" of the Cambridge Accident Prevention Council's new film finished this week, after difficulties caused by the death of five of its "extras" through poisoning. The "extras" concerned were puppies who absorbed through their pads a solution with which the kennels had been sprayed. They were duly replaced, and final shots of a number of pups walking over a pedestrian crossing were taken on Thursday in a garden at Stapleford. Teaching some of the lessons of road safety the film will show a dog doing kerb drill, as well as driving a small car and observing the rules of the road, including stopping at the traffic lights! The film is believed to be the first of its kind c47 09 22

1950 Film company International Realistic has been in Cambridge filming part of a feature film with many well-known local scenes as backgrounds. The film will probably be called "The scarlet thread", and is an exciting "cops and robbers" starring Laurence Harvey and Kathleen Byron. Market Hill is included with a dash to Gt St Mary's Passage and a realistic rugger tackle by the fountain. The exposed film was rushed each day to London for processing and back again next day in time for screening at the Victoria Cinema after the usual performances 59 06 01 shown Nov.1951 [2.5,2.6]

1950 As part of their propaganda campaign, the Cambridge Accident Prevention Council is making a 16-mm film, to be called "Horse Sense". The film is in full colour and is intended to be a successor to the previous production, "Almost Human", which is now on show throughout the world. Those responsible are Mr K.O. King (cameraman & director) and the Chief Constable, Mr B.M. Bebbington, for the script c50 08 09

1951 A year ago Cambridge was the scene of an exciting street chase – engineered for the purposes of a film. "The Scarlet Thread". Now it is complete and will be shown at the Victorian Cinema. It has a "cops and robbers" story concerning the theft from a jeweller's shop in Sidney Street and a chase across Market Hill. This part was filmed from the top of the Victoria Cinema.

The film was made by the International Realist Coy and stars Kathleen Byroa, Lawrence Harvey and Sidney Tatler c51 11 14

1952 Cambridge Accident Prevention Council gave a preview of their third film “Horse Sense” which deals with the adventures of a horse called Patch that escapes from its stable and wanders about the streets of Cambridge. It was filmed in Technicolor and directed by Mr K.O. King with P.S. Ives in charge of production and the script was written by the Chief Constable, B.N. Bebbington. The BBC’s John Snagge gave the commentary. c 52 08 28

1953 The Playhouse Cinema on Mill Road, Cambridge, celebrates its 40th anniversary as a place of cinematic entertainment. It opened at Whitsun 1913 when there were two shows per evening with a children’s matinee on Saturdays. Nowadays we are used to newsreels which are distributed on a national basis but then their own cameraman took the pictures for a newsreel of local interest, including the Cambridge Police Sports and Juvenile Fishing Match. Music was supplied by the Playhouse’s own orchestra under Musical Director Max Bennett c53 05 21

1953 Ealing Studios are getting into full production of their new Technicolor film, tentatively called “Newmarket Heath”. The location unit has been filming scenes in the yard of Kremlin Stables, loaned by Mrs Lambton. To Newmarket’s undying shame the unit has brought its own string of a dozen horses complete with six lads from Mr Vic Smyth’s stable at Epsom. On location were Bill Owen, who plays the part of a warned-off jockey, and well-known character actor Charles Victor. Next week heralds the serious business of getting shots in the ring at the Rowley Mile racecourse. c53 08 27

1956 Hallen’s presented a feast of films to suit the taste of motor cyclists. Most were manufacturer’s promotions but it was the film produced locally which aroused the most interest. It presented an entertaining picture of local scramble scenes with shots of local characters and celebrities. Those attending can also inspect the improvements to the workshops with special stands for the repair of the increasingly popular auto-cycle and scooter forms of transport. 56 03 20a

1956 A tattered and broken reel of film recently recovered from a cellar at King and Harper’s garage in Bridge Street has been overhauled by the chief projectionist at the Playhouse Cinema. It was taken around 1932 and shows scenes in the firm’s depots and features a man in an up-to-the-minute sports car, which appears very comical to modern eyes, whilst a lady is shown over the latest in six-seater saloons. The price ticket attached to the roof gives its price at £205 – brand new! 56 10 06c

1957 A coloured film based on Rupert Brooke’s ‘The Old Vicarage Grantchester’ is being made. The Marlowe Society provided many of the actors and a local girl was persuaded to jump into the Granta ‘with practically nothing on’ for one verse. Producer John Stewart will have to be tactful during the filming of the lines “Ditton girls are mean and dirty, And there’s none in Harston under 30” 57 07 15a

1958 “The Freshman”, a light-hearted film about life at Cambridge University, will bring in all the well-known local angles – the May Races and balls, chases by Proctors and their ‘Bulldogs’, visits to coffee bars – and of course, a local romance. It will star Hardy Kruger and Sylvia Syms. But they have had a mishap. While a motoring scene was being shot along Trumpington Road the crankshaft of a vintage 1927 Bentley car suddenly snapped. Now mechanics are searching for a spare, or a new car! 58 08 29a [2.23, 2.24]

1959 The Regal Cinema was crowded for the Cambridge premier of ‘Bachelor of Hearts’, the film of University life which was made on location in the city. A reception was attended by the film’s producer, Mr Vivian Cox, director Wolf Rilla and one of the ‘starlets’ from the cast, Miss

Gillian Vaughan. The film deals with the adventures of a young German student, played by Hardy Kruger, and an attractive Girton girl (Sylvia Syms). Comments varied widely but everyone agreed there were many good laughs along the way. No plans have been made for it to be shown in Oxford. 59 01 16c, 59 01 20, 56 01 21

1961 'Grantchester', film of the Rupert Brooke poem screed at The Orchard – 61 06 08

1961 Cambridge Film Unit is in Germany making film of Displaced Persons camps – 61 10 27f

1961 After a gloomy day's location work on the film 'The War Lover' some thirty men and women trudged to their cars parked on Queen's Road and made off for a hot bath. The day had seen two shots of film stars Shirley Anne Field and Robert Wagner walking up to and leaning on King's bridge. Miss Field plays a research worker and Mr Wagner an American officer, caught up in the romantic agonies of war. Such is the way of film making that even after a morning in which it was too wet to work, the fire brigade still had to hose water onto the bridge to make it wet enough to show. 61 12 14b, 61 12 13 [2.25]

1964 "Nothing but the best" film features scenes in Cambridge – 64 04 21

1964 'Focus on Cambridge' is a new documentary film seen through the eyes of two tourists as they drift along the Cam in a punt. Made by Norman Mason-Smith of Forgeron Films it is intended for people lecturing on Cambridge or tourists wishing to take home a memento of their visit. It was filmed in Technicolor, lasts 16 minutes and is available in 16mm format for £22 10s [about £370 at today's prices]. Cambridge City Libraries have agreed to take a copy 64 08 17

1965 BBC producing film showing residents in Cambridge to be broadcast on Channel Five transmitters not visible in Cambridge – 65 06 30

1965 Cambridge Film Society organise Animation Festival – 65 10 29a

1976 The Cambridge pressure group Kite Community Action are making a half-hour television film to be screened as part of the Open Door series and will put the case against the proposed re-development of the Kite as a regional shopping centre. They are trying to show something about the people who live there. The film will show the kind of neighbourhood which is likely to be sacrificed in the interests of motorised shopping c76 01 19

1980 "Chariots of fire" film (though much shot in Eton) [6.2]

1980 When the word first went out that a major feature film, 'Chariots of Fire' was seeking 150 undergraduates for a couple of day's filming in Cambridge the film-makers found themselves oversubscribed. But the response from other sections of the University was less enthusiastic. Gonville and Caius and Trinity College have refused to allow filming and several 'Cambridge' scenes are being shot at Eton 80 04 17 [6.2]

1985 'Revolution' filmed at Ely – 85 06 15

1985 Pamela Sue Martin – who played Fallon in 'Dynasty' – along with veteran actor Dick Van Dyke and Ben Cross, star of 'Chariots of Fire', were part of a glittering galaxy of Hollywood stars who have been smuggled in and out of Cambridge during the last couple of days for the filming of a multi-million dollar TV mini-series called 'Strong Medicine'. Shooting began in King's Parade with heart-throb Sam Neil and then shifted to the university's chemistry department in Lensfield Road. Two local schoolboys James Stevenson and Dan Nashaat gave a hand fetching and carrying. They met the stars and were paid £3 for their work. 85 11 05

1987 Cambridge author Tom Sharpe's gloriously irreverent comic novel 'Porterhouse Blue' is about to become a new four-part TV series and the University should be bracing itself. Nothing is

sacred: a dignified procession through the streets dissolves into farce and gas-filled condoms fill a college courtyard like some shimmering, quivering wheatfield. Every college is convinced it is based on them. Little was actually filmed in Cambridge: Ely provided a more attractive alternatives. David Jason stars in the role of Scullion, the college porter who will put up with anything from the students as long as he considers them 'gentlemen' 87 05 28

M.J.Petty. A century of Cambridge Daily News 1888 -

c.67 – decoration, stained glass etc'

started 27 Dec 2007.

1917 Stained Glass Window, - An interesting little ceremony was performed at St. Philip's Church, Romsey Town, Cambridge, on Thursday afternoon, when a stained glass window, given by a former member of the choir, was dedicated. The Vicar (the Rev. C. Howard) read the dedication prayers. The window, which is a single figure panel, has for its subject St. Philip, and is a very beautiful piece of work. It was designed, made and presented to the church by Mr. Thomas C. Eastwell, son of Mr. and Mrs. T. Eastwell of 93, Sedgwick Street, Cambridge, who has for the last, three years been studying at the Royal College of Art, South Kensington. Mr. Eastwell was for a number of years a chorister at St. Philip's Church 17 09 19 CIPof

1933 Arthur Savell, stained glass, tile and decorative artist came to Cambridge forty years ago but kept his workshop at Albany Place, Regent's Park, London. His work can be seen in the chancel windows of St Bene't's Church and in the stained glass windows of the University Arms ballroom. 33 01 05

1935 The rector of Doddington has bought a remarkable stained glass window dating back to 1510. From the auction catalogue it seems that it was in the Strawberry Hill sale where Horace Walpole had a collection of stained glass which is believed to have come from Cambridge. Experts believe it is not the lost window from King's College Chapel though the subjects are the same. The glass has been temporarily installed in several rooms at Doddington Rectory. 35 05 25

1935 Christ's college library new stained glass window to William Skeat - 35 05 25

1936 A new church banner at St Andrew the Great features a boat, taken from a medieval brass, resting on a sea of silvery waves in which fishes may be seen. It is an interesting example of needlework, linen and silk having been skilfully applied to a handsome hand-woven blue background and richness obtained with stitchery and couching in silks and metal threads. It was designed by Mrs Allworthy under the direction of the Cambridge Embroiderers 36 12 02

1938 St Giles church stained glass window unveiled in memory Bishop Charles Gore – 38 01 19

1959 Rutherford Almond, robemaker death – 59 10 10

1986 Jack Carter, the Portugal Place outfitters which has been hiring gowns, tails and dinner suits since 1937 is to close. The shop's lease, owned by Jesus College, has run out and the rent has been trebled. The business has been hit in other ways: last year they sold just six gowns because colleges now buy their own supplies and there are not as many formal functions as previously. The remaining stock will be sold off at the start of the new university term. 86 09 22b

1895 Arcade closed due to lack of support, Marie Lloyd concert cancelled (when the new Corn Exchange opened the old was used as a shopping centre until 1884. For a while it stood empty till Ernie Hayward, enterprising local concert promoter, opened it as a variety music hall which was successful for a while. Its closure was caused by the long frost December 1894 to March 1895 which brought about night skating by electricity a great novelty which emptied the Arcade) [1.16]

1899 A very pleasant evening may be spent at the Red Cow Inn Concert Hall, Cambridge. The best of local talent is requisitioned and the concert hall promises to have a run of uninterrupted success, judging by the support which has already been given to the new venture. Its American bowling saloon is now also open c1899 01 18

1900 A campanological, vocal and instrumental entertainment was given by the Walford Family at the Cambridge Guildhall. One instrument of their invention is the Hydroaktulopsychichamonica, or aqueous musical glasses, on which selections were very prettily played c00 01 17

1900 A very attractive programme is presented at the popular hall in Auckland Road, Cambridge, this week. One of the most enjoyable items is kept to the last – Edison's Concertphone. This machine is Edison's own invention and is vastly superior to the phonograph. It is manipulated by Mr Oliver. Most of the records were taken by Mr Oliver himself and are well up to date – indeed one of the best was that of Dan Leno singing "The waiter", which was taken but six days ago. The records of the bands are very fine indeed, each instrument being very distinctly reproduced and heard in every part of the house CDN 1900 06 19

1900 The proprietor of Tudor's Circus of Varieties, Cambridge was sued by Foulger's Band. They had been hired for three weeks. The band was composed of five performers – cornet, piano, euphonium & two violins. They were each paid £1.12s.6d. per week. On the first night it was a "scratch band" as Mr Foulger could not be there, & the pianist could not accept the engagement. An important feature in the performance was singing and dancing but a piano was not an essential part of the orchestra. The only complaint was from an inferior artiste who could not sing & had no music. c00 07 19

1901 Guidice Gelsomnio, an Italian organ-grinder was summonsed for playing a musical instrument in Jesus Lane, Cambridge; as the defendant did not understand English an interpreter named Antonio Arpino was engaged. The occupier of Little Trinity, Mr James Herbert Taylor, said he asked him to desist playing within 100 yards of his house. Defendant gave up playing and went away. He was playing in Bridge Street in the evening. P.C. Evans measured the distance to be 75 yards. Defendant said he did not know how many yards it was from one house to another. He was fined 2s.6d c01 05 25

1903 Dr Mann's famous Festival Choir dissolved but singers change name to Cambridge Choral Society, town rather than gown organisation (1924 name changed to Cambridge Philharmonic Society [2.21,4.11]

1903 Cambridge is becoming an uncongenial place for the purveyor of pirated music. The latest of several seizures took place at the instigation of Messrs Bedwell, music dealers of St Mary's Passage. A member of the firm, with the assistance of police, examined a stock of music being sold by several hawkers on Market Hill. About 80 copies of well-known songs and some of Sousa's marches were found among the stock being sold cheaper than authorised charges for music produced by the holders of the copyright. They were promptly confiscated and taken to the police station. The hawkers were agents of a huge and craftily constituted organisation that exists for the distribution over the country of music of this description. c03 07 10

1904 Penny Pops Concerts held years ago by college music societies revived by Town Council [3.19]

1904 Few realise the lavish expenditure on the May Balls held in Cambridge Corn Exchange. After the corn merchants have vacated the building on the Saturday evening a small army of workmen take possession. They labour until midnight when the advent of the Sabbath and the strict rules governing municipal buildings shut them out for 24 hours. With the first hour of Monday morning they re-enter and by eight that evening the place is transformed into an artistic ballroom through which not a vestige of the prosaic Corn Exchange is seen. What of the cost? There is not less than £2,000 worth of goods in the ball room; add to that the cost of utilising the Guildhall as a supper room and include the china and plates for the supper and you have a total of some thousands of pounds to provide our moneyed visitors with an evening's entertainment.

DCN 2.7.1904

1904 For a number of years Cambridge has been without a troupe of minstrels and the idea was mooted of reviving the old X.L.C.R. Minstrels who performed about 14 years ago. The new company is composed chiefly of employees of the University Press. The band comprises nine performers and the chorus and singers provide ample testimony of the excellent training of Mr Stanley Spring. It appears to have a promising future. CDN 24.10.1904

1905 John Philip Sousa with his famous band performed at Cambridge Guildhall but they are capable of filling a much larger building with a wonderful volume of sound. The programme included selections from the works of Wagner and Puccini. Encore followed each item and in response some of Sousa's celebrated military marches were given with great effect 05 05 06b

1905 Sir – I was given permission to give Pierrot concerts on the children's playground, Christ's Pieces but then the committee refused to allow me to use any seats for my audience. I was then told they must be discontinued but offered a site on Midsummer Common, only to have this withdrawn when residents complained. I am now left with artistes on my hands and money wasted. My position is consequently very awkward - Robert Elmslie 05 08 02

1905 A unique feature of the entertainment to be given in the Fellows' Garden of King's College will be a series of cinematograph pictures illustrating the recent visit of the French fleet. During the display the Police Band will discourse descriptive music. The Chorister Glee Singers will be present and Mr Gambling will introduce his new set of Italian Marionettes. 05 08 16

1905 Sir – may I raise a feeble voice of protest in regard to street music? Now examinations are nearing it is heart-breaking to feel the wasted hours slipping away to the tunes of 'Navaho' or the otherwise impressive 'Hallelujah' chorus. My rooms are the scene of furious contests between an organ grinder of foreign extraction, a body of carol singers and a violinist; the latter must be the envy of the male cats of the district – 'Undergrad'

05 11 30b

1906 Dr A.H. Mann, the University organist and chorus master, completed 30 years work in Cambridge. He was appointed organist of King's College in 1876, coinciding with the founding of the new choir school and important changes in the musical services at the chapel. They hoped his tenure of office at King's would match that of his predecessors – Dr Pratt (55 years) and Dr Randall, 66. 06 06 08a

1906 Robert Reed told the court he'd hired a piano organ from Antonio Dermaco of Gas Lane, Cambridge, piano organ proprietor, and went out in company of a man named Fuller. They visited the Plough, Comberton leaving it outside. He returned after five minutes to find the organ had disappeared – it had been thrown into the village pond. He got it out and tried to play it, but it did not work and had to be repaired in London. A Comberton carpenter and butcher were seen moving it, but claimed they had left it at the White Horse. 06 07 28

1906 Two Cambridge organ-grinders appeared in court. Joseph Fuller claimed Antonio Demarco had pulled his organ out of the shed in which it was kept in order to get at his own.

They argued about it at the Bird Bolt public house, one struck the other with his fist and knocked him down, then aimed another blow but missed and fell over. The other tried to throw a glass at him. Demarco made a long rambling statement in broken English and was fined five shillings. 06 08 21

1907 Extraordinary scenes were witnessed at Cambridge Guildhall when Mischa Elman made his second appearance. At the conclusion of his marvellous performance enthusiasm was unbounded with vociferous cheering for several minutes. The audience consisted largely of undergraduates and maidens still well in their teens. He was afterwards besieged in the retiring room by a crowd of admiring autograph-hunters. 07 02 28

1907 The Moody Manners Opera Company from Covent Garden are paying a return visit to Cambridge with 70 performers. On Monday 'Faust' was presented to a full house who enjoyed the complete and artistic manner in which it was performed. The orchestra is well-balanced and gave unbounded satisfaction to the audience 07 04 30

1907 Charles Henry Swornsbourne was as well-known as any man in Cambridge. He was an albino, possessing unnaturally white skin, hair and eyebrows and pink eyes. 'Whiteheaded Bob' was a talented violinist who, years ago, attended undergraduate 'wine parties' accompanied by a harpist named Calcott. He led the band at the A.D.C. from its foundation, was musical director for the Bijou Amateurs and provided music for the Beefsteak Club when they met at the Lion Hotel. 07 10 08

1907 Cambridge had at one time a very professional musical society, but it collapsed. Then came Dr Mann's Festival Choir. It was followed by the Cambridge Choral Society which originated the presentation of 'The Messiah' in the Guildhall on Good Friday, drawing large audiences. Through the illness of Mr Fred Dewberry, the conductor, no performances were given this year and the Society fell into a bad way. Now another conductor has been found and it may be set going again. 07 11 16a

1908 "the gramophone nuisance of a fine evening is quite appalling" [4.3]

1908 About 100 were present at the Misses Storey's Christmas dance at the Victoria Assembly Ball Rooms, prettily decorated with ferns, mistletoe and festoons. Two new dances, the Empire barn dance and the Esperanto figured in the programme. There being a dearth of Valeta music Mr Oliver Clifton has produced a pretty composition named 'The Storey' which he played on the piano with Mr G. Jackson on violin. Dancing continued until 2.15 am. 07 12 28

1908 In tall scarlet lettering the name of 'Miss Florence Atkin' has been a poster that has appeared on every hoarding in Cambridge. The name is as familiar to concert-goers as Sarah Berhardt and Marie Hall. She was born in Cambridge and won a scholarship to the Perse School. But the discovery of her superb voice took place when she went to Miss Evans, the head-mistress of the Girls' County School. Miss Evans has spent her life in an atmosphere of music, her one desire to find out and develop all that is best in a girl. She knew at once the importance of her find. 08 02 24a & b

1909 Dr Naylor wins prize for best opera written by Englishman [3.22]

1909 The first visit of the Cambridge Police Force band to Coton some years ago will not soon be forgotten. A resident had arranged for a wagonette for their conveyance but when turning a corner by Gt St Mary's they were surprised to see a wheel careering along beside them and the wagon gracefully toppled over, depositing the bandsmen in the roadway. They continued by charabanc but their former driver was accosted by a policeman and ordered to 'clear that wreckage away' or he would be run in. Considering he had brought it over for the conveyance of the police band his indignation can be imagined CWN 09 07 23

1910 Borough council concerts popular, 740 average attendance, charge 1d, make profit [3.23]

1910 Dr R. Vaughan Williams lectured on ‘The Folk Songs of East Anglia’ and the enjoyment was enhanced by Mr J. Steuart Wilson of King’s College who gave expressive renderings of a number of Old English ballads. Vaughan Williams had discovered the early folk ballad ‘Geordie’ at Fen Ditton but whether there was a great deal more to be found he did not know. At Fowlmere the Rev Campbell Yorke had got the ‘May Day Song’ from an old gentleman who rejoiced in the name of ‘Hoppy’ who preferred to do odd jobs and sleep in sheds and outhouses. He often started the first verse of a song with an entirely different tune and only got into the right swing at the end. 10 02 18 & a

1910 A professional singer from Old Chesterton told magistrates he was married at 18 but suffered a serious accident when working as a butcher’s carman. His right arm was paralysed and he could do no manual labour. He earned a precarious living by singing at cinematograph shows and entertainments and was often ‘one week in and two weeks out’. His wife said they had last lived together four years ago. She had gone out to service while he was trying to earn his living roaming about seeking engagements. He had contributed nothing to her support except in November when he gave her five shillings. But her application for a separation order on grounds of desertion was rejected. 10 04 29b

1910 A man told the court that he earned £1 a week playing a street organ. It had cost him £18 10s.6d, he’d spent £5 for new tunes, twelve shillings on a new wheel and three-and-six on tuning. A motor car had run into the back of it, knocking it over and causing considerable damage. A four-year old boy who had been in the shafts was knocked over and his hands were cut. There was nobody in Cambridge who understood the instrument and it would have to go to London to be repaired. Repairs would cost at least £3. He had another organ which his son took out. He was awarded £5 for damage to the machine and £3 for loss of earnings. 10 09 23 c & d

1911 Dr Mann inaugurates 2 series symphony concerts - Sir Henry Wood, Sir Edward Elgar, Thomas Beecham conducts; 1st a success but lost money, 2nd failure - lack of support [4.4]

1911 Corn Exchange used twice for concerts, never been used for this before & will perhaps never be so used again [4.5]

1911 whole country interested in Magic Flute, October term [4.4]

1911 Cambridge Amateur Operatic Society first performance was ‘Yeomen of the Guard’ [16]

1911 The demand for tickets to hear Melba sing is very naturally heavy. At Millers seats are being continually booked by telephone and every post brings letters. Although Mr Miller only engages the very best talent for his concerts he always tries to accommodate as many people as may be in the cheaper parts of the hall so the general public shall not be deprived of the pleasure of hearing famous singers. Some of these lower-priced seats will be sold at the door. 11 02 17

1912 “New Tunes to Hymns, Ancient and Modern” is the title of a little collection composed by the Rev Richard Owen of St Giles’ Vicarage and published by Mr A.J. Gillson of Cambridge. In these days of multitudinous hymnals, when every church, sect and connection has its own original compilation of hymn tunes, cribbed and purloined from each other, one seeks the reason for any fresh one. This one is intended for a practiced body of choir singers, the stanzas are unsymmetrical and the rhythm is unconventional. We cordially recommend it to the attention of up-to-date choirs. 12 05 10h

1912 Cam University Musical Society 500th concert – 12 12 12

1912 Mr Herbert Reynolds was presented with a street piano purchased following a benefit concert in the Beaconsfield Hall. Many local gentlemen had subscribed to alleviate the misfortune of Reynolds’ blindness by giving him a means of an honest livelihood. The piano would prove a boom to him in his affliction and – they hoped – he would always conduct himself as befits an Englishman. The first tune was then played on the instrument which was made by Pasquale and Co and has a round of ten of the latest melodies. An explanatory board is being gratuitously painted and with the collecting-box and the piano cover the outfit is complete. 12 12 20b

- 1922 The Cambridge Salvation Army Citadel, Tenison-road, was well filled with visitors and friends when a presentation of new silver-plated instruments took place under the chairmanship of Gypsy Smith. The first instruments to be presented were three cornets, the next consisted of two flugel horns and a euphonium. Mr M. Stuart recalled what the old General had said to him about Salvation Army bands : "It is better for a man to beat a drum than to beat his wife". It was better for a man to blow a flugel horn than to blow his brains out, which was what some poor fellows in the depth were tempted to do c22 05 30
- 1922 The winter season of the Saturday Popular Concerts had a splendid send-off at the Cambridge Guildhall. People began to queue up over an hour before the doors were to be opened and the building was packed before the performance commenced; many people thought themselves lucky to be able to stand at the door. Outside crowds of unfortunate latecomers were turned away. The artistes gave of their best and the audience's demand for encores was almost unappeasable c22 10 17
- 1922 Dame Clara Butt had a great reception at the Cambridge Guildhall when, with other well-known artistes, she presented a second International Celebrity Concert. The hall was quite comfortably filled and for two and a half hours music lovers had a rare time. The famous contralto gave two trifles by Franco Leoni, "Poor Robin" and "The Little Bird", a delightful humoursous number. The audience were much taken with it and, having given it to those in the body of the hall, Dame Clara Butt turned round and sang it to those in the orchestra c22 11 19

1923 YMCA operatic society 1st season [4.9]

1923 Cambridge music lovers can never complain that their wants are not catered for. A new departure will be the introduction for the first time of the Negro spiritual and plantation songs which have long held such a prominent place in the musical life of London. The remarkable thing is that their introduction to Cambridge has been so long delayed. Dressed in the costumes of the period, Miss Edna Thomas, gives her audiences, surfeited did with Negro syncopations, real plantation songs born in the days of slavery c23 10 20

1924 Cambridge Choral Society name changed to Cambridge Philharmonic Society [4.11]

1926 An appeal for the modification of the ban on gramophone music has been addressed to the Vice Chancellor on behalf of a party of musical undergraduates. University orders forbid the playing of gramophones in punts on the river during the May terms and gramophone music has been banned from certain colleges altogether. "We have no wish to express any opinion upon the playing of jazz records but suggest the playing of good music, such as the London String Quartet, by students in their hours of relaxation on the river could do nothing but enhance the beauty of the surroundings and the taste of the modern young man", they say c26 05 29

1926 It may not be generally known to the Cambridge public that Mr Carne, the manager of the Playhouse, Mill Road, is the "Victor Carne" who figures in the record list of the Vocalion Gramophone Co. He has recorded "The Holy City" and "The Star of Bethlehem" for their Christmas list and these and other of his records are obtainable at Messrs Leavis's, Regent Street. Wireless enthusiasts will no doubt remember the many times he has sung from London and Daventry c26 12 17

1927 St Johns Chapel Choir make gramophone recording with HMV - "Have Mercy" [2.19]

1927 The Cambridge Albion Band and the Cambridge Town Band have decided to amalgamate and will be known in future as the Cambridge Silver Band. They proposed to buy a complete set of new triple silver-plated instruments made by Messrs Hawkes, London with the now famous 'Profundo' basses as played by the St Hilda Colliery Band. This would greatly improve the tonal qualities of the band; there was not another band in the Eastern counties with such instruments. CDN c24.1.1927

1927 Undergraduate singers and musicians are distinguishing themselves just now. Following the enjoyable broadcast by the Trinity Madrigal Club I hear that the Quintaginta Band are to appear at the Holborn Empire during Boat Race week. Mr Charles Gulliver who heard them whilst on a visit to Cambridge has made them "a tempting offer" to appear in one of his halls in the Eastern vacation. The salary, however, is not stated. CDN c20.3.1927

1927 The Charleston shows no signs of waning in popularity at the Premier Dance Hall, Chesterton, and still reigns supreme among the habitués there. In fact this dancing habit has become so much of the place that one sees more uniformity in the style than at any other hall in Cambridge. On Saturday evening Manning's Band were in their usual good form and played extremely well. Miss Robinson must be one of the last jazz pianists in the town at present. CDN c25.3.1927

1927 Chief Os-Ke-Non-Ton, a prince of the Mohawk tribe, gave a fascinating song recital of North American and Red Indian music at Cambridge guildhall. Arrayed in the picturesque costume of his race he rendered invocations, incantations and war whoops of various tribes and concluded with a selection of primitive Red Indian music to tom-tom accompaniment, and a demonstration of making fire by rubbing sticks together. The local arrangements were made by Messrs Miller & Son. c27 06 06

1928 Dancers and band musicians thronged to a dance band contest at the Rendezvous in Magrath Avenue, Cambridge. Eleven bands took their turns on the platforms. Each played a fox-

trot and a waltz. A fault with several bands was that the violinists showed a tendency to overdo their parts. Judging was by popular vote and the results were: 1st Cambs Mental Hospital Dance Band, 2nd Jack Vivian's Dance Band & 3rd Sid Parsley's Dance Band. The winners, who previously were practically unknown to the dancing public, played in confident style and nicely together. The band is a six-piece and undoubtedly more will be heard of it. c28 04 14

1930s Stirlingaires, Cambridge best known war-time band formed early 1930s by employees of Marshalls & Shorts [10.9]

1931 Sir Henry Lytton and Miss Bertha Lewis, two of the best-known members of the famous D'Oyly Carte Opera Company were injured as the result of a car skid on the Huntingdon Road near Cambridge. Miss Lewis received very serious injuries to the head and neck and is now lying in a critical condition at the Evelyn Nursing Home. Sir Henry fractured a rib, received flesh wounds and is suffering from severe shock. He was driving his Wolseley saloon which turned completely over. The door had to be broken open before the passengers could be extricated 31 05 08l

1931 Paul Robeson, the famous singer and star of 'Show Boat' sent into raptures an audience of over 1,000 at the Guildhall when he paid his second visit to Cambridge. He took up his position within the shelter of the grand piano where he sang songs of his own land that went straight to the hearts of the people. They ranged from the most sacred of spirituals to "Ol' Man River" followed by the convict song "Water Boy".31 12 04f

They made their first appearance at the Footlights Club room, Corn Exchange Street. Dressed in red and white check costumes they song plantation melodies like 'Oh, dem Golden Slippers' and 'Polly Wolly Doodle' 33 01 11b

1933 Alabama coons concert party – 33 01 28

1933 Sir Thomas Beecham, on a first visit with the new London Philharmonic Orchestra to Cambridge Guildhall, completely won over the most severe body of critics in the country – a Cambridge symphony concert audience. They are accustomed to taking their musical pleasures somewhat sedately but let themselves go and the applause and cheering at the end were unusually enthusiastic 33 02 09, 33 01 04

1933 Mr A.W. Jones, the Cambridge music teacher, has added yet another to his growing list of compositions. It is a song fox-trot 'The Girl Most Suitable for Me' which has been featured with success by Alex Alexander and his Radio boys. It should prove very popular. 33 02 17

1933 Cambridge Town Silver Band are champions – 33 04 14

1933 A great wave of cheering swept across the footlights to welcome Jack Payne and his band at the New Theatre. As soon as the world-famous signature tune 'Say it with music' began, the applause commenced, and when the curtain rose upon Jack and his 21 players, the tumult was

deafening. It was a tremendous tribute to one of the most cheery figures in vaudeville today. They opened with the American unemployed's song 'Brother, can you spare a dime?' 33 05 09

1933 The Backs near King's bridge were crowded with punts when the Cambridge University Madrigal Society performed the annual rite of singing on the river. As the sun went down and the moon rose from behind the Gibbs' Building, the cawing of the rooks and the noises of the town ceased, and over the water came the sounds of a Brahms' motet. An aeroplane buzzed like an angry wasp across the sky but failed to break the spell of magical voices which softly floated in the air. 33 06 07

1933 George King will always be associated with Miller's music shop's fortnightly gramophone recitals that he popularised when he came in 1929. He introduced the performance of opera on records with full scenic and lighting effects and sang and played at the recitals. He also undertook the entire managerial duties for University dance bands and was compere when the Union Society first staged classical and light gramophone music. Now he is moving to Dale's Brewery as sales manager. 33 08 16

1933 Old time minstrel entertainment and Memories of the old Arcade – 33 08 14

1933 Memories of R Vaughan Williams & Cambridge – 58 08 30 f & g

1933 Godwin Hunt was one of the most popular comedians and vocalists that Cambridge has ever known. Born at Soham, he was associated with many famous theatrical enterprises including the D'Oyly Carte Opera before becoming Lay Clerk at St John's College. He was the founder, 30 years ago, of the Magpies Concert Party which enjoyed a tremendous vogue when amusements were not so plentiful as today. Up to the war they were a male voice quartet but then it became a mixed concert party who travelled far beyond Cambridgeshire. 33 12 06 & Godwin Hunt, Magpies founder appreciation – 33 12 09

1934 Arthur Rubenstein captivated a Cambridge audience in the Guildhall with a brilliant performance at the piano. Good humoured and gifted, he inspired confidence from the first chord and when after two hours the audience wanted more he obliged twice, although he had arranged to motor to London the same night. He was always commanding, often thrilling and at times grand. Rarely have we heard such volume and power, rarely such incredible crescendi. Sadly half the seats were empty. 34 02 10

1934 Many dancers in Cambridge will learn with regret that Ron Wickes has been compelled to give up his position as official drummer to Percy Cowell's Band. He started drumming with them at the old Rendezvous before joining the band run by Mr Hensher, and later played with Manning's Band when the Premier Hall at Old Chesterton was opened up. From there he went to Skegness for two seasons, returning to the Rendezvous in the interval. He came back to Cambridge three years ago when Mr Cowell started his band at the Dorothy Café and has played with them ever since. 34 02 16

1934 Paul Robeson is a genius. The beautifully proportioned giant who has played baseball for the United States, is now studying for a degree in African languages, has an almost perfect Russian accent and a voice whose texture has been described as reminiscent of velvet and mulberries, is no ordinary singer. And thus when he gives a recital at Cambridge it is only natural that he should receive such an ovation as he did at the Guildhall. His songs included two Russian folk songs and Negro ballads 34 05 17

1934 Gilbert and Sullivan, Henry Lytton's farewell appearances – 34 05 10 & 34 05 18

1935 Albert Chevalier Cambridge visit recalled – 35 01 05a

1935 Dr Alan Gray composed many famous pieces of Church music. In 1893 he was appointed organist of Trinity College and was conductor of the University Musical Society – 35 09 28d

1936 Friends of the Cambridge Town Silver Band will be glad to know that they are to give another broadcast on Saturday afternoon. This will be on the 'National' wave length but all

B.B.C. stations are taking the programme. Last time the band opened with an original item by the conductor (Mr R.E. Austin) called 'Cambridge Bells' which featured the melody of the Roman Catholic Church chimes. This time they will start with his new military march 'Cantabrigia'. The band will be having a busy day for that evening they will be playing for the promenade concert on Christ's Pieces 36 06 06b

1937 Joseph Reed, the well-known tenor, has retired from his appointment at Trinity College and from the concert platform. He first came to Cambridge in September 1891 as principal tenor lay clerk at Trinity College. He sang in the Mozart Centenary celebrations, at Ely Cathedral and in Dr Mann's musical festivals in King's College chapel. Sir Edward Elgar was a terribly nervous man and when 'The Kingdom' was being performed in King's he was pacing up and down the side of the chapel all the time. Reed undertook concert tours with Dame Clara Butt when a saloon carriage was attached to any train and they sang on the platform every night. 37 02 23 & a, 37 92 24, 37 02 25b

1937 Sir – today I wandered down to Christ's Pieces. Hearing the band I came to the entrance and behold there was a sign 'Admittance 3d'. I am told that an ancient footpath crosses there. But it must be kept select or perhaps a poor woman with her pram might mix with the few who have paid their threepence. Besides poor people cannot be expected to enjoy the music of a band. The hedge around the bandstand is thick enough to protect those inside from the gaze of the vulgar crowd. So we listened and looked at the band from the street. Cambridge knows how to keep the common herd in their place. But did I not hear somebody say that the people, not the council, own the park? – Canadian 37 05 26a

1937 By a majority of one vote Cambridge Town Council voted in favour of establishing the Cambridge Municipal Orchestra of 50 players, the first in the country to be run on a voluntary basis. Being amateur it would only cost £20 a year and the director, Mr Parkinson, would maintain a high standard. But some thought the orchestra's excursions into serious music were very rare and very slight; something should be done to provide serious music and not music of the level of the lunch-hour concerts from the Savoy 37 07 29c

1937 Paul Robeson recital at Regal – 37 11 15

1938 Cyril Rootham distinguished musician and composer – 38 03 19d

1938 The Theatre Cinema reopened after a closure of over nine months with a performance of 'The Mikado' by Cambridge Amateur Operatic Society. They had found the building in a poor and dirty condition and put in much work to recondition it. Now it was crowded with a delighted throng; it was itself again. That pre-overture buzz of conversation created a delightful feeling of mild excitement. At the final curtain everyone was thoroughly happy 38 11 22

1939 Paul Robeson gave a concert at the Regal Cinema; his friendly smile and magnificent stage presence completely won his crowded audience. He included items of both Russian and Negro origin including "Short'nin' Bread" and Ezekiel Saw de Wheel" with the well-known "Canoe Song" from "Sanders of the River" as an encore. It was followed by "Ol' Man River", "Ma Burly-headed Baby" and "Joshua Fit de Battle of Jericho" 39 02 06a

1939 Cambridge Municipal Orchestra presented the first Sunday concert of the season. Under the able conductorship of Mr J. Parkinson, the 45 voluntary musicians rendered a programme of popular melodies. Although the opening overture started well, it was ponderous and a poor indication of what was to come. Guest artists William Armistead & Alan Murray sang "I'll walk beside you" and the performance concluded with "Chu Chin Chow" 39 11 20a

1939-45 During the early years of the war, when the Government was encouraging people to spend their holidays at home the Cambridge Entertainments Committee organised August Bank Holiday athletic sports meeting, swimming sports, baby shows and other attractions. They

obtained permission to open the Corn Exchange as a canteen for troops stationed in the area; later alterations were made, music and games provided and it became a social centre for thousands of Servicemen and women, a very useful contribution in the dark days of war. It could still, in the hands of an imaginative architect, become the much-needed concert hall Cambridge needed

1950 death of J. Parkinson conductor of former Municipal Orchestra built around YMCA which was established during the War [1.14]

1951 The finals of the crooning contest were held at the Playhouse Cinema, Mill Road. Only two finalists competed, Miss Eve Lynn and Mr Bob Garner. Judging was by Mr Dickie Valentine, who appeared by permission of the New Theatre management. Music for the finals was supplied by Freddie Webb and his band. Mr Garner was declared the winner and presented with the Vaughn Munroe trophy by Dickie Valentine, who then sang three songs at the request of the manager, Mr Eric Dallman c51 05 22

1951 Cambridge Festival began and as dusk fell to the strains of the madrigals sung under King's College bridge further beauty was added to the well-loved entertainment given by this programme of "Singing by the River". The West end of the College chapel and the Gibbs Building, their outlines softened in the dimness of approaching night, suddenly flowered under floodlight, their stones warm in the glow but retaining still all its classical dignity of form. The reflections of the chapel rippled in the still river, distracting attention from the madrigals sweetly sung by the Cambridge University Madrigal Society. A BBC recording van on the bank recorded the sounds of this splendid evening in a permanent form c51 08 01

1952 Choir Festival, Kings College chapel [4.8]

1955 Teddy Boys warned about their behaviour [2.8]

1956 The Cambridgeshire Orchestra, a newly formed group conducted by Ludovick Stewart, the County Music Advisor, gave its first concert. It has a sound basis in a group of talented string musicians led by Anne Macnaghten and hope to add woodwind and other sections later. Arnold Ashley gave an accomplished performance of Vivaldi's concerto for cello, never faltering even in the most sprightly passages. 56 03 12

1956 Miller's Music Shop began a 100 years ago when Mr A.T. Miller opened a workshop in Hobson Street as an organ builder and piano repairer. The family home was above his wife's millinery shop in Sidney Street and one of the rooms was opened as a pianoforte showroom. His son introduced the sale of instruments and sheet music and later came harmoniums, gramophones, radio and television and now electronic organs and tape recorders. 56 03 24d

1956 The demolition of the bandstand on Christ's Pieces jogged memories for Robert Austin who played on it as a band-boy, bandsman and conductor for over 45 years. It was originally built for the Royal Show on Midsummer Common and afterwards re-erected on the Pieces. It was lighted by naked gas jets which usually blew out and had to be re-lit several times during a performance. The Volunteers, Police and Town bands - between all of whom there was intense rivalry - played there. It was also used for mass meetings and an annual open-air service of Cambridge Men's Brotherhood. 56 04 21c

1956 A cantata 'Fen and Flood' for soprano, baritone, chorus and orchestra composed by Prof Patrick Hadley with words by Charles Cudworth will receive its first public performance at the King's Lynn Festival. It was originally performed privately by the Gonville and Caius Chorus and has been rearranged by Dr Vaughan Williams. The orchestration includes a wind machine. 56 07 21 a & b

1956 Millers music shop has been reshaped, redecorated and reorganised from top to bottom. There are spaces where walls used to be and the radio department is where the pianos were. Frank Chacksfield, the television and recording star, was the first person to make use of the special record booths built into the record departments downstairs. There is now a 'browsery' where 'discophiles' may browse through records. Long playing records are played over high fidelity equipment and there is a section for 45 rpm records with remote control. 56 09 19 & a

1956 King's College chapel was the setting for a big gathering of choirs numbering about 400 singers drawn from local churches. A large congregation filled the ante-chapel and overflowed outside the open west door. With the rays of the declining sun streaming through the magnificent west window and the candles inside already alight, the entry of the long procession of choirs and clergy, led by the choir of Saffron Walden church, was most impressive. 56 09 24

1956 Cambridge Licensing Magistrates have asked Associated British Cinemas not to show the controversial American musical film 'Rock Around the Clock'. The film features a new style of dancing known as "Rock'n'Roll". It is a rhythm similar to some of the African native 'beats' and is alleged to have a startling effect on young people who like 'hot music'. In London dancing youngsters have caused trouble in the streets and assaults have been made on the police. 56 10 09 [2.15]

1956 Young people from both the city and university have formed a club called 'Stan Kelly's Skiffle' at the Dog and Pheasant, Newmarket Road. Each Thursday evening the rafters ring with folk tunes, work songs, ballads, blues and the like. It has a membership of 80 and anyone who can sing or play an instrument is welcome. Stan Kelly himself leads the group which comprises guitar, bass, drums and a wash-board. The beer crates which form the furniture help add to the atmosphere. 56 11 03b [2.13]

1956 Stan Kelly's Skiffle club, which meets at the Dog and Pheasant on Newmarket Road, has grown in popularity and threatens to become one of the outposts against the mass entertainment media of film and television. Stan is a mathematician working in London who says only a few traditional folk songs have yet found their way into print and the only way to preserve them is by singing them. Now the BBC may feature it in one of their programmes. 56 12 11

1957 Riverside Jazz band formed [10.7]

1957 The skiffle playing craze is attracting teenagers to youth clubs all over the country. If you want to make yourself popular, unearth grandma's old metal washboard and take it along. Skiffle groups use them with thimbles for making music. Empty Christmas cigar boxes for turning into box fiddles, tea chests used with a broomstick as a base and clothes brushes which produce a swishing sound on an old suit case are also welcome. 57 01 09

1957 Stan Kelly and his skiffle group transformed one of Banham's craft into a full-blown Mississippi boat. Singing "We're Alabama Bound" they set off for Clayhithe. Despite playing all the way there and back they still had energy to provide a lively beat on the Bridge Hotel lawn. In no time there was jiving on the grass. 57 06 04c

1957 Alice Reynolds made her first appearance as a trained singer at a concert in the Guildhall in 1916 when, according to the News, 'she created a sensation'. During the war her 'Variety Highlights' party gave 1,000 concerts for troops around Cambridge, making a real contribution to morale. Now although still in good voice she feels it time to make way for younger people and can sit back 'with a song in her heart', knowing she has entertained so many. 57 06 33

1957 The landlord of the Green Man in Trumpington is Charlie Shadwell, the well-known conductor of the BBC Variety Orchestra which has made over 11,000 radio broadcasts, many of them in the 'Itma' series that were so popular during the war years. He also conducted the Cambridge New Theatre orchestra during 1930. He makes regular trips to London to arrange music for the BBC television shows. 57 08 31 & a

1958 Cambridgeshire Regiment's band – March Railway Band mass enlistment – 58 06 10

1958 Cambridge Co-op ventured into the specialist field of gramophone records with the opening of a modern record bar in its Burleigh Street department store. Recordings are filed in classified order to make for ease of selection of the standard L.P. and E.P. records. Six sound booths give superb reproduction for customers who wish to hear the recordings. It also stocks a selection of record players, radiograms and tape recorders. 58 08 23b

1958 Cambridge music firms history – 58 101 25e

1959 The banks of the Cam were lined when the Cambridge University Madrigal Society gave its annual concert on the Backs. It was a very English scene: crowds of impassive spectators defied the fickle weather and a forest of coloured umbrellas rose from the punts on the river. Even the roar of a passing aeroplane and the threat of rain never put the singers off their stride. As the strains of the last madrigal – 'Draw on Sweet Night' - wafted slowly across the river, lanterns were lit and the punts carrying the singers began to move slowly downstream 59 06 10c & d

1959 Cliff Richard, the 19-year old baby-faced star and the hit parade's present top-notch, took Cambridge by storm. Excited teenagers, predominantly female, packed into the Regal cinema and clapped, screamed and wailed in readiness for their idol. Cliff, dressed in a 'shocking pink' jacket with matching tie, performed his remarkably successful hits 'Living Doll' and 'Travelling Light'. He was accompanied by the Shadows featuring drummer Laurie Jay in place of Tony Meehan who has undergone an appendicitis operation. It was a triumph from start to finish. 59 11 11 & a [2.27]

1959 Dr Hubert Middleton presided over the Cambridge Philharmonic Society for many years and will be remembered for his inspiring lead in promoting festivals for village choirs. His visits to the smallest hamlets, dating back to 1925, are still spoken of with pleasure. As a choral director he demanded the highest standards of those who could achieve them but never lost patience with

non-professional choristers. The last combined choirs performance under his direction was perhaps the most triumphant of his career 59 08 19

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 Cliff Richard returns, Adam Faith appears - “screaming teenagers sparsely mixed with incredulous & slightly-dazed parents”; “show deplorably uninteresting but audience gave magnificent performance” [3.9.3.10,12.1]

1960 A crowd of teenage girls waited for an hour outside the Regal Cinema hoping for a glimpse of ‘pop’ singer Cliff Richard. Inside attendants were placed near the stage to head off the teenagers who surged forward at the end of his performance. Cliff’s first three numbers were drowned by the screams, his fourth was barely audible and the rest of the time he unsuccessfully tried to make himself heard over a crescendo of stamping feet, clapping hands and screaming voices. 60 05 14

1960 jazz - Acker Bilk, Terry Lightfoot, Johnny Danckworth [12.2]

1960 “Miller & sons have been largely responsible for past 100 years for bringing International celebrities & leading orchestras to Cambridge”, International celebrity concerts between wars [8.19.1]

1960 Madrigals sung at Trinity (previously at Kings) [9.2]

1960 Lonnie Donegan and his skiffle group made their first appearance in Cambridge on the stage of the Regal Cinema and played his songs “Does the chewing gum lose its flavour on the bed-post overnight”, “Gambling Man” and “Tom Dooley”. It was a more restrained reception compared with the continual screaming which deafened Cliff Richard when he appeared a few months ago. Amongst the other acts were Miki and Griff a polished husband and wife act who soon had the audience where they wanted them. 60 02 19b

1960 The floor shuddered under 200 pairs of dancing feet. The combined sounds of the trumpets, trombone and clarinet bounced from ceiling to wall to hit the ears with a pleasant sweetness. The Riverside Jazz Club was in full swing. Every week 200 teenagers get together in an upstairs room of the Y.M.C.A. and jive. Baggy sweaters, tight-fitting trews or flared skirts for the girls are the order of the day with jeans and sweaters for the boys. The band line-up includes Ted Vouden on banjo, Tony Thurlbourn on trumpet, Andy Cooper (clarinet), Tony Scott on drums and Sid Barrett on bass. Rodney Dale features as pianist for specialist numbers. 60 03 25

1960 Students lounged on the river banks using their gowns as table cloths for alfresco meals and thousands of people crowded the Backs for the University Madrigal Society’s punt-borne concert. Madrigals for five voices did not carry far against the chilly breeze and aeroplanes (‘most tiresome’ said the conductor, Raymond Leppard) and ducks competed for attention. But the audience listened in rapt silence until the singers’ raft moved slowly away to the strains of ‘Draw on, Sweet Night’. 60 06 08b

1960 Within the next few days a Cambridge rock’n’roll group may be offered the chance of turning professional. The Redcaps has five members, average age 19: Robin Bailey on drums, Jimmy Graham (lead guitar), Graham Smith, Neddy Bishop and vocalist Tony Clark. Their guitars cost up to £148 and the drums £98 but they were fortunate in being given an amplifier. They dress in grey trousers and black shirts but hope to buy new gold lame jackets soon. Their first performance at Newmarket was ‘a bit sticky to begin with’ as was that at Daddy’s Night Club in Cambridge, but now they play in halls around the region. 60 08 20a

1960 Cambridge Amateur Operatic Society gave first performance in 1910 – 60 12 14

1961 City Music Festival week (?1st?) [7.3]

1961 Staff formed a barricade to stop girls from storming the stage in the closing minutes of the Adam Faith show at the Regal. Dressed in a casual beige sweater, Adam spent most of the

evening he was not on stage signing books or photographs and talking to fans. He sang most of the songs he has put in the hit parade including "Who Am I" accompanying himself on the guitar with the backing of four of the John Berry Seven who played throughout the evening. Gerry Dorsey gave a vigorous performance, pulling the maximum screams, but Johnny Le Roy did not bother with gimmicks, using his rich voice to open the evening's programme. The Honeys, dressed in sugary pink, brought some glamour to the show while Chris Carisen worked hard as the compere 61 03 25a [8.4]

1961 The Chequers Rock'n'Roll group, formed by members of St Luke's Youth Club, staged a dance in the Guildhall. Jennifer Smith plays the drums, the vocalist is Andy Peters, bass guitarist Tony Saintey, rhythm guitarist Noel Gooch and solo guitarist Tony White. They featured four of their own tunes which are intended for an experimental record they hope to make soon. Johnny Cullum and the Phantoms, a group better known in Newmarket, also performed. 61 02 01c

1961 The Phantoms rock and roll group have signed an exclusive contract with Palette Records. The group comprises Ken Leverington, David Cooke and Cliff Gentle, of Cambridge, on guitars, Freddie Smart, a Chatteris hairdresser on drums and Johnny Cullen of Bottisham as vocalist. They had been playing together for six months when two undergraduates, both songwriters, heard them at a dance. They learned 10 new numbers in three weeks and recorded a demonstration disc. Now 'Phantom Guitar' is to be released through Pye in April 61 03 09

1961 'Mr Cliff Richard and his associates have done more to continue some children's musical education than the whole world of music teacher and administrators', Ludovic Stewart, the County Music Adviser says in his annual report. Music teachers are in short supply and pupils find solace in the sort of music they can teach themselves with the help of a shilling guitar tutor and some pop records. Rock-and-roll music depends upon amplification and is expensive but some outlay on guitars would benefit pupils, he recommends. Skiffle groups provide an ideal club activity and should be encouraged by head teachers 61 04 13a

1961 The Shadows, an instrumental group who have developed an individual style of their own, entertained fans at the Regal Cinema. They have an elaborate arrangement of electronic and amplifying equipment that produces a sound that has become so effective, novel and unusual. The group, who until a short while ago were responsible for most of the backings in Cliff Richard records, played many of their popular numbers including 'Frightened City'. Supporting acts included the Brook Brothers and the Red Price Group while Dave Allen the compere kept up a quick-fire routine of off-the-cuff humour 61 05 29

1961 Local rock 'n' roll fans were given a bumper evening at the Regal Cinema. Star of the show was Billy Fury who received a tremendous reception from the teenagers and several young girls ran down the aisles but were turned back by cinema staff. Amongst the supporting cast was Joe Brown, a singer from the East End of London, Eden Kane, the Allison's (who came second in the Eurovision Song Contest), Tommy Bruce, the Karl Denver Trio and the Viscounts. Musical backing was provided by Peter Jay and the Jaywalkers 61 10 25a

1961 Pop-singer Billy Fury was taken to Addenbrooke's Hospital after collapsing in his room at the University Arms Hotel. He was carried on a stretcher to a waiting ambulance watched by 20 people, including schoolgirls and teenagers. Fury – real name Ronald Wycherley – had been working for the past five days against doctor's orders. He is suffering from bronchitis and a throat infection. Last night he cut short his act at the Regal Cinema, singing only three numbers including the hit 'Halfway to Paradise'. A series of X-rays later revealed that he was suffering from a kidney complaint and he was taken by car to a London clinic 61 10 25, 61 10 26 [12.4]

1961 Cambridge Amateur Operatic Society celebrate golden jubilee – history 61 10 28a 61 12 12a

1990 Cambridge Festival set up by volunteers in 1961, Mary-Rose Clark recalls hard times – 90 07 12a

1962 pop stars appearing include Cliff Richard (Feb), Adam Faith, Billy Fury (8.11), Phil Everley a(Oct) [3.11]

1962 Madison demonstration Dorothy, Nov 1963

1962 The Big Star Show at the Regal Cinema was assured of success before it began, helped by the enthusiasm of modern teenagers with hands sore from clapping, feet aching from stamping and throats sore from shouting. Billy Fury went through his handful of hits, did a series of acrobatic gyrations and left to an onslaught of applause and a stampede of young girls. Eden Kane sang the songs which have made him famous, Joe Brown called for quiet – to no avail - but Shane Fenton and Jackie Lynton received less hero worship and wild enthusiasm. It was a slick show, loved by the teenagers and witnessed with amused benevolence by their elders. 62 04 09

1962 'Prowlers' pop group – photo – 62 04 23c

1962 Billy Fury meets Cambridge fans Roger Crow & David Mackie – 62 11 19

1963 Cliff Richard Feb [8.15]

1963 Chris Montez, the young American singer, sang his hit tune "Let's Dance" before packed houses at the Regal Cinema and judging from the amount of screaming and cries from the female section of the audience, he was worth it. Tommy Rose gave a more sedate performance of "Little Sheila" but the most versatile group was the Viscounts. The Beatles, a four-man 'rock' group with weird hairstyles as a gimmick, sang and played their current hits, "Love Me Do" and "Please Please Me". The fast-moving show was not the best Cambridge audiences have seen but enthusiastic teenagers agreed the flying visit of the stars was well worth while. 63 03 20 [3.13]

1963 Rolling Stones appear September [3.16]

1963 There were so many artists appearing in the Regal Stage Show that ten of the performers had no dressing room space and had to change in the nearby University Arms. Heading the cast was singer Billy Fury whose songs were accompanied by the usual shrieks and squeals of teenage girl fans. Joe Brown and 'The Bruvvers' nearly stole the show as he jumped round the stage playing his guitar behind his head. In more relaxed vein The Karl Denver Trio presented their hit 'Still'. But Marty Wild and the Wildcats received only lukewarm applause. 63 10 14 [3.17]

1963 A thousand teenagers queued outside the Regal Cinema in the early hours of the morning to obtain tickets for the visit of the Beatles, the Liverpool pop singers. Police patrolled the line which stretched over 200 yards along Downing Place. Armed with transistor radios, blankets, sleeping bags and even primus stoves, they settled down for the night. When the doors opened at 7 a.m. – three hours early – Maurice Cornell of Byron Square was at the head of the queue 63 10 26, a b

1963 in November the Beatles returned; they arrived in city under a police escort, smuggled in a Black Maria to Downing Street Labs. The queue started at 10.30. The Cinema was like a fortress with drawbridge off. Red Cross had dozens of men ready for fainting or hysteria. 4000 in audience [3.18]

1963 Lennon and cynical Cambridge – Beatles visit 1963 – 80 12 10

1963 Cambridge's latest jazz club in the dimly-lit cellar of the Dolphin public house in Coronation Street is fast building a reputation for modern jazz. Every Wednesday the resident group, the Percy Seeby quartet, backed during the interval by records, plays to a membership now limited to 100. Half an hour after the band starts the cellar was full and it was even difficult to climb down the dozen or so steps. Another popular item in the programme is poetry reading lead by Nigel Gordon. 63 04 15

1963 Cambridge Riverside Jazz Club has moved from the YMCA Hall to the Red Cow public house behind the Guildhall. The clubroom is being converted and several murals for wall decorations have been prepared by local art students. The club, which has over 500 members, will feature the Percy Seeby quartet playing modern jazz on Sundays, Pete Sayers and the Bluegrass Cut-Ups with their country and western music on Wednesday and the Riverside band with traditional jazz on Thursdays. 63 05 10

1963 The Beatles, the current idols of Britain's teenagers, were smuggled into Cambridge by the City Police in a Black Maria. They were driven into the Downing Street site then rushed into the rear entrance of the Regal Cinema before 200 screaming girls broke through the police cordon and dashed along Downing Place. Once inside the doors were slammed shut. Police will not let them out until after the last performance. Every available Cambridge policeman is ready for duty. But the elaborate security measures taken to prevent demonstrations before they were due to appear at the Regal Cinema went wrong: police were due to meet the Beatles' car near Trumpington but they had almost reached Lensfield Road before it was spotted 63 11 26

1963 The Regal Cinema rocked with sound during the visit of the Beatles – but only a small part of it was musical. During the two performances there was a continuous crescendo of screams and shouts. Girls jumped up and down in their seats, many tearing at their hair and waving souvenir programmes. The Red Cross had a dozen men in pairs to deal with cases of fainting and hysteria while the foyer resembled a miniature battle station with blankets and large bottles of smelling salts. Afterwards, with the curtains still closing, hundreds of excited squealing girls rushed from the cinema to wait for the Beatles to come out. But the singers had already been smuggled away to their hotel across the road. 63 11 27c

1963 The Phantoms, four young Cambridge men, went to Sweden two years ago to find the fame every guitar group seek. Since then they have never looked back, getting a best seller in the Swedish hit parade and become trend-setters where they have appeared – a sort of Scandinavian equivalent of the Beatles. They can earn up to £70 a week each, after expenses (about £1,200 today). Kenneth Leverington, Cliff Gentle, Dave Clarke and Robin Bailey formed the group in June 1960 having played in different local groups. Altogether they have made 10 best-selling singles and a LP album. 63 12 12b

1964 Sir Arthur Bliss conducted premier of own 'Golden Cantata' [9.4]

1964 Jazz club opened Lion Hotel [9.5]

1964 "Five centuries of Cambridge musicians" commemorates quincentenary of first recorded Degree in Music – 64 02 14a

1964 City of Cambridge Brass Band needs new instruments: the old are obsolete and fashions have changed. They are having a successful season, getting through to the finals of the Daily Herald National Championships and taking part in an open air brass band concert in London as well as frequent appearances at holiday resorts like Yarmouth. But over all their activities hangs the fear that their instruments could give up the ghost at any minute. 64 04 24c

1964 Strawberry and the Fruit Drops, The Wreckers, The Huntsmen, The Inmates, The Ancestors and The Spyders are beat groups who rehearse in the building which adjoins the Grand Cinema in Huntingdon. The premises are occupied every night of the week by one group or the other. Most of what the boys earn goes towards buying instruments, equipment and running three minibuses. During weekdays they restrict their bookings to 40 miles from Huntingdon but they will travel any distance on Saturdays. Two of the groups, The Wreckers and the Huntsmen have reached the finals of a Beat Competition at Northampton that was judged by Norrie Paramour who asked for a recording. But now their rehearsal area is to close 64 05 02a

1964 Screaming teenage girls besieged the Co-op in Burleigh Street when the Merseybeats, a 'pop' music group from Liverpool, made a personal appearance. Four policemen pushed the crowds back when the group arrived in a taxi and inside girls clambered on to radiograms, refrigerators and television to see them as they signed autographs in the record department. Some girls wept and others grabbed publicity photographs. Finally John Banks, Tony Crane. Aaron Williams and Johnny Gustafson escaped and relaxed with coffee before departing for Manchester 64 05 30

1964 Undertakers, The Moving Coils, Black Diamonds and Dawnbreakers. Most nights it provides a musical attraction: jazz sessions on Tuesday with top flight bands such as Kenny Ball and Chris Barber. But just around the corner the Dorothy Restaurant has featured Kathy Kirby,

the Merseybeats and Manfred Mann. Helping to bury the old cry that Cambridge is 'dead' after dark are the cellar-bar 'shuffles' where regulation dress is jeans or slacks, sloppy sweaters and dark glasses. When not twisting or shaking the current rage for both sexes is to smoke miniature cigars and drink 'James Bonds' 64 06 06b

1964 Club Jazz, which opens at the Lion Hotel, is the first to have Musician's Union support and is an attempt to sink differences between bands, individuals and musicians which have bedevilled the jazz scene for many years. Mondays will feature folk music, Tuesdays modern and Thursdays traditional jazz presented by local bands. Sitters will be able to sit and listen without a soundproof screen of dancing bodies. Dancers can dance without being invaded by drinkers from the bar and drinkers can listen at a distance that makes the music a comfortable background to conversation and not a vociferous profusion of decibels 64 07 14

1965 Peter Coe of Cambridge blows the tenor sax for Georgie Fame on 'Yeh Yeh' which has pushed The Beatles from the top spot in the hit parade. He is an ex Cambridge High School boy and began his playing career at Coleridge Youth Club. The jazz group he helped to found came third in a national competition organised by 'Melody Maker'. He is now a full professional with the Blue Flames who pick up £200 a performance. His parents in Catherine Street are devoted to the Blue Flames new wave Rhythm and Blues – 65 01 16

1965 J First Folk Festival attracts 1,500 fans – 65 08 02aa

1965 Rolling Stones – police operation to get them to Regal – 65 10 16c; Rolling Stones interview – 65 10 22e [12.6]

1965 P.J.Proby dropped - smutty act [12.8]

1965 concert hall plans alone as high as £1M

1965 A more suave, more affable Billy Fury sang briefly at the Regal Cinema but he left out the storming and the wriggling which he pioneered a few years ago. The show was a little frayed. He sang flanked by his own group, the Gamblers and 11 John Barry men. As there were quite a few saxophones, his voice was sometimes drowned. "Lost Without You", his recent flunk was moaned and demonstrated how Fury has lost his fangs 65 03 19a

1965 A new folk group, the Blue River Boys, specialise in American Bluegrass Music. They comprise two guitarists, Andrew Kendon and Mike Scott, mandolin player Joe Watson, banjo picker Erik Grainger and bassist Adrian Kendon. Meetings at the Horse and Groom have become so packed that the Cambridge Folk Club is moving to the large hall of the YMCA in Alexandra Street where 200 can sit in comfort. Later a concert will be held featuring Mike Seegar, brother of America's leading folk singer, Pete Seegar 65 04 02b

1965 Yardbirds cancel Corn Exchange concert due to flu – 65 04 12b

1965 'Cambridge concert hall needed' in 1903 3,000 people heard Melba sing in Corn Exchange, up to 1920s were Saturday Night Penny Pops at Guildhall but plans for expansion shelved; Corn Exchange and Regal Cinema also used and were afternoon concerts – feature by Millers Music Centre – 65 06 22

1966 1st discotheque club - "La Capannia" at Rose, Rose Crescent [12.9]

1966 Harry Day played penny whistle; at Stourbridge Fair joined 'Herb' Reynolds and Charlie Hunter with their concertinas and harp on the upper floor of the Oyster House playing reels, waltzes etc – 66 09 06

1967 Cambridge Players formed (10 years 1977), 20-40 players, professional - ie most make living as professional musicians [11.1]

1967 Pink Floyd started, only real claim to pop fame [11.6]

1967 concert hall plans rejected [76.6.4]

1967 Concert Hall plan at Queen Anne Terrace rejected, multi-terrace car park and sports hall instead – 67 10 13

1968 Jazz & Drama Festivals added [7.10]

1969 Midsummer pop festival, 3,000 attend first of 4-days, Midsummer common; complaints about noise, another Jesus Green – 69 06 10a

1969 Riverside Jazz club revived at Romsey Labour Club after several years, was previously held YMCA when 3-400 attended each week [9.7] – 69 03 07a
1969

1970 free pop concert Coldham's Common [7.13]

1970 Moore Pianos to close after 50 years due problems skilled staff – 70 03 09

1970 Harold Woolfenden runs Cambridge Music Shop – profile – 70 04 25

1970 Cliff Richard sings and speaks at Gt St Mary's – 70 06 22

1971 pop concert - trouble-torn pop festival could be the last [7.14]

1971 mini pop festival Grantchester Meadows [7.15]

1971 Jazz Festival lost £1,450, no more but concerts [7.16]

1972 Stepping through the doors of the Rock Hotel, Cambridge last night was like stepping back in time. Teddy boys were propping up the bar, Jerry Lee Lewis was rock'n'rolling on the turntable and other teds were jiving around the floor. But these were not the teds who slashed cinema seats and slouched around in the late 50's. The velvet drapes were there along with drainpipe trousers, bootlace ties, frilly shirts and hair cream. But the years had mellowed the people wearing them. The occasion was the first meeting of the Cambridge Rock'n'Roll Club. One ted said "It's nice to remember the good old days" CEN c May 2nd 1972

1973 David Willcocks leaves Kings, at Cambridge since 1957 [10.1]

1973 Ken Stevens own band success 1950s, won Melody Maker Musician of Year award (1955), orchestra started as resident bans Rex, now full-time professional, playing Norwich, started 1958, moves shop Petty Cury to Guildhall St (1967), moves Sussex St 1973 27.2.10.7] {69}

1973 It could be a record year for four singers from Cambridge area who have all had new LPs issued within the last few months. They are Pete Atkin, Jancis Harvey, Pete Sayers and Shusha. Mr Atkin, a professional singer appeared in several University Footlights Club revues. His lyricist is Clive James, a Pembroke graduate, critic, journalist and erstwhile front man of the television programme "Cinema". Jancis Harvey, clear-voiced as ever but now very much more professional, has filled the Albert Hall at Nottingham while singing in concert. Pete Sayers, country singer and gov'nor of Grand Ole Opry, the monthly show at Newmarket, needs no introduction to countless Newmarket fans c73 05 06

1974 1,000 pop fans rampage when Drifters fail to appear at Corn exchange [11.8]

1974 free pop festival, Strawberry Fair [11.9]

1975 Jazz festival - no suitable venue & scrapped, run past 4 years by Jazz Club [7.18]

1975 Cambridge University Chamber singers formed [11.4]

1976 Cambridge boasts some of Britain's best buskers and two of them will appear on BBC Television's Nationwide. No doubt accordionist Dag Ingram and flautist Michael Copley will perform classical music with their customary elan but one viewer will watch with a baleful eye. Jerry Bol, the accomplished 22-instrument one-man band from Gt Staughton, a veteran of many

television appearance, is sometimes belting out “I love to go a-wandering” at the same time that his rivals are dashing off a quick burst of Bach c76 05 22 [38.16.1]

1976 Michael Copley & Dag Ingram to Germany 1976 & on return started in Cambridge, busked for policemen's ball at Huntingdon & back Germany where record released [38.16.7]

1976 clamp-down on buskers sought [38.16.2]

1976 The Cambridge Symphony Orchestra concert turned from a potential flop to a solid hit when music-lovers rallied round to save it from disaster on Saturday. The concert seemed doomed to lose more than £2,000 but with nearly 1,000 people attending they could just break even. The managing director of the non profit-making orchestra, Mr Jonathan Wearn said: “Beforehand were all very despondent and our guest soloist and conductor, Mr Tamas Vasary, was doubtful about confirming his March booking. Afterwards he said it was definitely on. We were so encouraged by the tremendous response and the way people rallied round at the last minute that we shall continue our links with the city”. He admitted that administratively the organisation still had some problems to sort out but most of the concerts have been successful financially c76 12 12 [9.10]

1976 Sports Hall first attempt at own concert flops, poor acoustics, amplification & atmosphere, “I feel like I am singing in a morgue” - Julie Felix; “I’ve never worked in an aircraft hanger before” - Eric Morcambe; but Spinners & Stephan Grapelli sell out [23.9]

1976 More than 100 people were turned away from Holy Trinity church when Cliff Richard, pop star and evangelist, visited. About 700 people had already been admitted. Some of them had queued in freezing conditions to be sure of a place at the service. Earlier in the afternoon the singer had appeared in an evangelistic concert with the Brightwinter Group at Lady Mitchell Hall. Some 500 people paid £1 a head and the profit will go to a Christian charity c76 02 02

1976 One-time superstar Billy J. Kramer, who had a string of world-wide hits in the 60’s, walked down Mill Road, Cambridge, looking for a sauna. The more exotic delights of the street didn’t quite capture his imagination. Later at Romsey Labour Club his hour-long show combined new material with well-rehearsed medleys of old hits. By the end of the night people were standing on tables, clapping, stamping and cheering as he ran for the door to a waiting get-away car c76 11 14

1976 Nick Barraclough leads one of the most entertaining bands to emerge in Cambridge for many years. Halfway through the set of Telephone Bill and the Smooth Operators in Willingham village hall, Nick, a veteran of Cambridge’s folk scene, former member of the Grand Ole Opry Road Show and with masses of musical experience, is tall with a mop of curls a moustache and ever-ready grin. On stage he does the talking, sings and plays guitar, slide dobro, banjo. He also tries to keep the group disciplined, no easy task. All the music has a good time feel and the group bubble with good humour c76 11 16

1976 Val Doonican, Harry Secombe, The Spinners, Julian Bream, Stephane Grappelli, Los Paraguayos – all of these artists have appeared in Cambridge within a year. All were presented by the City Amenities and Recreation Department, working under director John Wilkinson. Every concert cost city ratepayers 6p per seat for every person attending, but two years ago the figure was 50p-per-seat. Sales for Val Doonican were disappointing and a loss of £1,100.83 was incurred but The Spinners drew a full house of 1,500 to the Sports Hall for the first time and a profit of £360.09 resulted. It now provides Cambridge with an auditorium large enough for bigger artists to draw sufficient numbers of people to pay their fees c76 11 20

1977 CSO start concerts again after 3 months, still owes money [11.2]

1977 Cambridge Concert Orchestra in 10th year, started as Cambridge Light Concert orchestra [9.11]

1977 Cambridge Youth orchestra 1st public concert (formed 7 years) [11.3]

1977 Duke of Edinburgh opens University Music School [02.4.18]

1977 Musicians' discontent over the Cambridge Symphony Orchestra turned to anger as more professionals claimed they were owed money. And as a London orchestral agency told of their wrangle over a cheque for more than £1,0000 the Musicians' Union attacked the orchestra's policy of not paying amateurs.. The eight-month-old semi-professional orchestra is in a desperate financial condition. A London orchestral agent reported that he was "flabbergasted" at the way the Orchestra had treated its players. "I can't think why you people in Cambridge support it. I knew this would happen. You can't hope to run an orchestra on a shoestring", he said. CDN c 24.4.1977

1977 Cambridge's £3 million concert and conference hall that never was began with a £2 million promise to pay for the conversion of the Corn Exchange. But that promise, made in 1974 was short-lived. Mr David Robinson decided that the Corn Exchange was ugly and should be pulled down. Instead he favoured a purpose-built concert and conference hall on the Downing Street end of the Lion Yard complex. The man at the centre of those protracted negotiations was Coun Jack Warren who told him it was a listed building and could not be pulled down but he pooh-poohed this. In October 1976 Mr Robinson wrote to say it would be impossible for him to provide the money, and then gave another £7 to Robinson College. c 77 08 06

1977 Cambridge pop groups are to be given a chance to make their names in the music industry. Lee Wood, the owner of "Remember Those Oldies" record shop in King Street has just launched his own record label for lively local bands. Having acquired the 16-track recording facilities at Spaceward Studios he is looking for local groups to promote on his new label entitled "RAW" and has plans to produce an LP of all the Cambridge groups over the last ten years. One of the first bands to be recorded are punk-rockers The Users, whose single "Sick of You" has already sold 10,000 copies. c77 08 07

1977 Sitting in the enormous blue tent on Jesus Green and watching the incomparable Sadler's Wells Royal Ballet I felt that this is what a fully international university city should be all about. The huge tent provides a sufficiently large stage and seats to stage large performances and make them pay. Cambridge should consider investing in something of this sort. It took a lot of courage, hard work and imagination to bring Sadler's Wells to Cambridge and they have brought Cambridge to the crossroads. Either it goes forward from here or it retreats. c77 09 06

1977 Before I met The Stranglers I met their fans who formed a bizarrely-painted and clothed chain stretching from the Corn Exchange to King's Parade. First in the queue was a character by the name of Rat Rancid, with his mate Garry Gangrene, from King's Lynn. Here were some punks that looked every bit as vile as the ones we've all read about. They were horrible. I think it was the safety pins through the cheeks that made me feel slightly sick, but it may just have been the chains through their noses. They snarled and leered while my colleague, Mike Manni, took their pictures. Then Rat put down his can of Party Seven and scribbled his address. Could we send some prints. "To Rat Rancid", I asked. "Oh, no", he gasped. "My mum wouldn't like that" c77 09 30

1977 Cliff Richard, pop superstar and hot gospeller, fervently preached a message to the converted during his first Cambridge concert for many years. Unfortunately the message was hammered home between every song. He talks about his religious beliefs so much that I was bored beyond embarrassment. Why couldn't he just sing? He delivered Elvis' "Heartbreak Hotel" and his own unforgettable early hit, "Living Doll" and just before the end really started rockin' up a storm with two heavy beat numbers, real vintage Richard rock 'n' roll. c77 10 28

1977 A suggestion that the controversial punk rock group, the Sex Pistols, should visit Cambridge has been turned down by city council officials who fear they would attract the wrong sort of clientele. All punk rock groups who appear in council buildings should be of the moderate and non-controversial kind. An agency had suggested that they could perform in a tent on Midsummer Common. c77 11 28

1977 The Spinners filled the 1,600-seat Cambridge Sports Hall for the second time this year, with their Christmas show. They are a perfectly assured, wholly-professional, middle-of-the-road

group with a wide-ranging repertoire and pitched into a selection of songs and carols including some of their hits like “The Family of Man”. Audience participation is very much a part of the technique; they had the people at the back drowning the rest of the audience in a four-part ‘round’ & started a three-part medley with “While Shepherds Washed Their Socks by Night” c77 12 22 1977 Cambridge is not short of record shops, so what chance has another one got? The answer, says Andy Gray, is plenty. His latest shop “The Beat Goes On” is something out of the ordinary in that it caters for those interested in “golden oldies” and New Wave records. They specialise in records up to the 1970s and have on display portraits of “The Jam” who opened the shop on Friday. The new shop in Regent Street supplements the premises opened in Mill Road three years ago and Andy’s Record Stall on Cambridge market which is still a gathering place for music lovers. c 77 12 23

1978 Cambridge Buskers move into big-time, concert Wigmore Hall [38.16.4]

1978 Three publicans are so alarmed by the prospect of trouble at punk rock concerts in Cambridge Corn Exchange that they will close or guard their premises on the nights of the shows. Their concern follows two concerts when four youths were taken to hospital after a fight and a shop window was smashed. The licensee of the Eagle said “It was absolutely dreadful: all the London trains were full of punk rockers coming to Cambridge because all the other towns have banned them. They spit and strip on stage”. The groups on stage that night were the Ramones and the Rezillos, two American bands. c78 01 93

1978 The star that has shone over Cambridge Folk Festival of the past 14 years appears to be waning. There is increasing evidence among the mass of faces at this international event that the serious folkie is now staying away and that Cambridge – once the most prestigious event in the folk calendar – is slowly being taken over by an unfortunate yobby element who treat Cherry Hinton Hall like a Pontins holiday camp c78 08 01

1978 Jerry Bol, the popular Cambridge busker, was fined £2 as a result of the police crack-down on street vendors causing obstructions in the Lion Yard shopping precinct. Police said they counted a crowd of 67 people listening to his one-man-band. Mr Bol told the court he became a busker five years ago & since then had appeared in 25 TV programmes & films. “The children of Cambridge call me ‘Mr Music Man’ and I stand in Petty Cury for their safety. The Duke of Edinburgh and the Mayor of Heidelberg came to see me”, he told the court, & would pay his fine with £3 given him by well-wishers since his arrest. c78 08 25

1978 The Cambridge Symphony Orchestra is set to rise ‘like a phoenix from the ashes’ of its collapse last year. It has financial backing by four local businessmen to guarantee their first three concerts and hopes to regain the goodwill of local people. The format continues as before with a nucleus of professional musicians aided by enthusiastic amateurs and music students, some of school age, who will all be good enough to make a professional sound, bringing a symphony orchestra to Cambridge at a price people can afford to pay. c78 09 16 [11.5]

1979 Ronelles, a disco restaurant, will soon open above Lion Yard in the heart of Cambridge and one of the city’s most interesting business gambles will be under way. It’s a big bet. The lease is long but the odds are short that young Cambridge people will patronise a place which they have long insisted is overdue. The club will have a membership of 500 and be relatively expensive with a £100 a year membership fee. It will have an elevated restaurant, two bars, a dance floor, a waterfall and cabins. These together with palm trees and a native mask on the logo suggest the premises may have a Caribbean flavour. It will be a welcome solution to an embarrassing problem for the space, originally intended for offices, has stayed empty for years. CEN 11.9.1979

1979 At the Strangers performance in Cambridge Corn Exchange the punks were matched in numbers by a fair splattering of pseudo-intellectuals and Hawkwind types. They could remember the energy the band used to put into their shows, but now with their softer approach the maniacal

crowd response was lacking. The pulverising brutality of 'Death and Night and Blood' still surges out but the Stranglers have now come of age and command respect. "We're trying a lot of new things, more complex, a bit of jazz. It went OK, at least Cambridge is always a good crowd", said Hugh Cornwell, recalling the Corn Exchange concert two years ago when bouncers took unkindly to being picked out by spotlights. CEN 20.9.1979

1980 1st rock music festival flop [7.19]

1980 rock concert Midsummer Common cancelled due to noise fears [11.11]

1980 The Carioca building on Newmarket Road, Cambridge has had a chequered history, from non-conformist chapel to furniture store and now night-club. When it first opened in March 1978 it did a roaring trade into the early hours but has been plainly feeling the impact of the opening of Ronelles' in Lion Yard. It offers a restaurant, disco and dance floor together with a games room with bar billiards and juke box for a membership charge of 10p a week. Drinks are cheaper than pub prices but the choice of draught beers – Tolly's Cobbold and Younger Tartan – is disappointing. 80 05 31

1980 Cambridge is now left with only one regular nightly music spot following the closure of the Beaconfield and Alex Wood Halls and the Alma pub, mainly because of complaints of noise. But there are at least 40 bands desperate for somewhere to play and countless people who want to hear live music. The Carioca Club on Newmarket Road is willing to let bands play on Tuesday nights but at a total rental cost of £115 bands can't afford it while the Salisbury Conservative Club on Mill Road is almost fully booked until 1982. It leaves just the Great Northern Hotel. 80 07 02b

1980 'Mandy Morton? Is she still around? – that reaction is one reason when the ex-Spriguns singer / songwriter is back in Cambridge after a long absence. In 1968 she formed a folk group to raise money for Cottenham Amateur Dramatic Society then started Spriguns as resident group at the Anchor. Decca records transformed their image with velvet shirts and fancy frocks and when the band broke up they were elegantly dressed but not very rich. She became extremely popular in Norway and has now returned to try her hand at the home market with a new album on Polydor out soon. 80 08 28

1980 The Specials will remember their visit to the Supertent on Cambridge's Midsummer Common. They had to contend with the vast acoustics imbalances of a grotesquely inappropriate circus arena, the mindless inanities of their so-called followers and the inevitable trouble. The music was terrific but the tension for too pronounced. Lead singer Terry Hall tried to defuse the atmosphere but finally led the band off stage in mid-number to escape the volleys of beer cans and spit. 80 10 10b

1980 Emilie Lewis established the Mackenzie School of Music and Dramatic Art in Cambridge in 1923 and many students benefited from her training, winning prizes at local festivals. From it developed the Mackenzie Society with weekly concerts to give young students experience of performing to a live audience. Both organisations continue to flourish in the hands of her former students. Now a subscription had been started for a cup to be awarded at the Cambridge Festival reflecting the high standard Emilie herself set in her professional life. 80 10 17

1981 concert hall 5,00 planned Barnwell Rd, Whitehall approves 1982, new site urged, should go Marshalls 1981, multi-use music centre planned Cattle Market Site 1983 [38.11.4, 6,8]

1981 Taboo disco club closes after 19 years, Regent St [38.11.5]

1981 pop noise problems in Corn exchange, pop fans demonstrate at council meeting re live music [6.3]

1981 Crofters celebrate 16th birthday [10.6]

1981 Six hundred young people took to the streets to demonstrate against the threat to live music in Cambridge. They marched from the Great Northern Pub in Station Road to the Corn Exchange – the two rock venues at the centre of a row over noise levels. The landlord of the pub

has been in dispute with the city's environmental health department over the noise made by band playing there and the Corn Exchange also faces legal action if they do not act on the noise problem. 81 03 30

1981 Cambridge Folk Festival 81 08 03a

1981 The Taboo disco club, one of Cambridge's longest-running nightspots, is to close. It was originally the Kashmir restaurant, started up in the mid 1960s; it then became the Harlequin Club and eventually the Taboo. Now the owners, Downing College have won a High Court judgement to regain the building so they can go ahead with the redevelopment of the area. 81 10 28

1981 The Shadows returned to Cambridge after too long an absence – 15 years or more – to find that their audience had multiplied. There is no nonsense about Hank Marvin, Bruce Welch, Alan Jones, Brian Bennett and Cliff Hall and they played nearly 30 numbers including 'Apache', their first hit, 'Wonderful Land' and 'Frightened City' as well as Chuck Berry and Sam Cooke numbers to prolonged applause. 81 10 29

1981 The Oak in Lensfield Road had a world-wide reputation as a centre for good Irish music. Before modernisation it was a wonderful place. Playing sessions would start up automatically on Friday nights, Saturday lunchtimes and Sundays too. But now venues for Irish music are fast disappearing in Cambridge. The demise of the Ancient Druids was another blow and the Cow and Calf on Pound Hill is virtually the only one remaining.

81 12 04b

1982 Beaconsfield club ordered close due loud music & rowdiness, 100 year old [38.11.7]

1982 London Symphony orchestra 1st outdoor performance of Classical Rock in England at United Ground [10.2]

1982 Ten local bands will appear at the Graduate Centre in a presentation of the history of Cambridge rock music. They are Telephone Bill and the Smooth Operators, Milestones, Duke Duke and the Dukes, The Lonely, Weak at the Knees, High and Lonesome, Nick Nick and the Nickettes, Floating Unit, Drink 'N' Jive Band and The Light Blues Band. Sindy and the Action Men will promote their debut single on a new label, Wimp Records, based in Kingston. 82 01 20a

1982 Andy Gray decided 13 years ago to move his collection of 500 second-hand singles from Bury market to serve the more discerning musical tastes of Cambridge. He can still be found in the market square today, though now he has eight shops in the region. He puts his success down to undercutting the traditional record retailers as well as offering the obscure stuff you just couldn't buy elsewhere. Rather like John Peel he has kept abreast of changes, opening 'The Beat Goes On' to cater for new trends.

82 02 03b

1982 Cambridge has nurtured many stars of the pop world. Pink Floyd, Yes, 10 cc, Roxy Music, Foreigner, Procol Harum, Small Faces, Quiver, Elvis Costello's Attractions, The Clash, The Foundations ... all have had links with Cambridge bands. Now Graeme Mackenzie has published a family tree of rock groups since 1964. It has proved unbelievably complicated due to the musicians appalling memory for names and dates. 82 05 04 & a

1982 England football manager Ron Greenwood and 13 of his World Cup squad were at the Abbey Stadium to watch the London Symphony Orchestra's first outdoor performance of Classic Rock in England. They were joined by more than 3,500 fans for rock music's version of the Last Night of the Proms with people clapping and cheering through the last few numbers. Tony Butcher, the new rock of England's defence, said "Tremendous – we heard the Rolling Stones last week and this was a contrast". The United Manager John Docherty said the event was "unbelievably successful" and had broken even. 82 06 01a

1982 The Great Northern Hotel on the corner of Station Road had a wide reputation as a 'jazz pub. In the 1970s it was converted into a hostel for Technical College students with rooms directly above the stage and Raffles nightclub in the basement. Despite music on two levels there

were no complaints until a new landlord introduced rock bands. Now its licence has been withdrawn and Cambridge has lost one of its last live music venues. 82 06 03

1982 Cambridge now houses an extraordinary number of musical instrument makers. In addition to Mark Stevenson and Trevor Beckerleg, makers of harpsichords, and William Johnson, maker of chamber organs, there are many lesser-known names. Charles Hall is another organ builder, Daniel Bangham specialises in clarinets while John Isaacs and Ian Harwood from Ely are making lutes based on original designs from Bologna and Venice.

82 08 06a

1982 A new compilation album, "Honey for Tea", features 12 bands with Cambridge connections – The Rapiers, Hondo, Sindy and the Action Men, Su Lyn Band, The Amyl Dukes, The Lonely, The Great Divide, Your Dinner, Pure Thought, The Agents, Seven Fifty-Four and the Innocent Bystanders. But there are notable absentees, particularly Shakatak. It is one to buy for your old age – a means of going down memory lane once you're too old to see them live. 'Cos that's where they are best 82 10 10

1982 The Riverside Jazz Band celebrated its 25th birthday at the Carioca Club in Newmarket Road. It began as a University outfit set up by undergraduates, one of whom was later sent down as he spent so much time playing his trombone. The only local lad was Ted Vousden, now the sole remaining founder member. At first they played at the Criterion pub in Market Passage, then were regulars at the YWMCA in Alexandra Street. Over the years there have been dozens of members and all kinds of different line-ups, but the name has never changed. 82 11 24a

1983 The Carioca Club in Newmarket Road is today a burnt-out shell after fire was started in three different parts of the building. The entire contents were destroyed and walls and floors wrecked. Police say an 'flammable liquid' was poured over materials in the building to start the blaze. 'Racks' night club which has 450 members is now looking for a temporary venue. The Carioca was originally a chapel and was used as a furniture depot before it became a night-club in 1978 83 09 26 p1

1983 Cambridge Co-operative Band have recorded a powerful piece composed specially for them. The music by Dr Arthur Wills, the organist of Ely cathedral, is the four movement 'Fenland Suite' – the first for brass band and solo organ 83 05 09 p10

1983 Cambridge pianist Doris Waterson began her career playing for silent films at the old Playhouse in Mill Road. She played ballet and modern dance music for the Perse Girls and the old County Schools but was best known as pianist with Josephine's Gypsy Orchestra. It was formed about 1934 and played for 26 years at venues such as Christ's Pieces bandstand. Doris also had her own band called the Keynotes and worked during the war with Alice Reynolds who organised concert parties for troops 83 07 07 p16

1983 The arson attack on the Carioca Club has removed a bright nightspot from the already bleak picture of Cambridge entertainment. It leaves Ronelles, the up-market disco restaurant in the city centre, Route 66 and the Last Resort. Complaints about noise spelt the end of Silks in Hills Road. The city council is thinking of building a special factory-type unit on the old cattle market industrial site off Cherry Hinton Road to house an 'alternative venue centre' 83 09 27 p13

1984 Cambridge Baroque Camerata established [10.5]

1984 Cambridge's Savoy Jazzmen, who are celebrating 25 years of rip-roaring music, have announced they are to quit. The group's leader and only remaining original member, Barry Palser, has promised they will get together for special gigs. The Jazzmen have performed throughout Europe and have a single due for release in Germany. They got together to play for their own enjoyment in 1959 but were then invited to play for parties. They have become part of Cambridge music heritage, playing in parades, jazz clubs and Festivals. Barry remembers when

Kenny Ball and Acker Bilk called into the Rose pub in Rose Crescent and joined in a couple of sessions. 84 11 22b [10.8]

1984 “No one is buying hand-made harpsichords today”, says Trevor Beckerleg, the Cambridge harpsichord maker, so he is selling his Gwydir Street home. The house has many odd features, not least the downstairs walls and ceilings which are smothered with graffiti in green ink: it is his notebook, representing his thoughts over the past couple of years. It contains his last two instruments including the world’s only submarine pintable harpsichord with a keyboard at either end 84 07 07

1984 More than 20 members of the Cambridge Symphony Orchestra have been fired following a decision to make it eligible for funding from the Arts Council which insists that all musicians should be wholly professional. But some see it as unfair: they have all helped establish the orchestra and although they did not earn the majority of their earnings from live performances, they all played to a professional standard 84 07 12 [10.3]

1985 1st Cambridge Rock competition [11.13]

1985 Katrina & Waves ‘Walking on sunshine’, 1st top-10 hit by Cambridge based band [11.14]

1985 Council chiefs are setting up an ‘action squad’ to in a bid to defuse mounting mob tension on the streets of Cambridge following a violent clash outside the former Thakes cycle shop on East Road. At a noisy meeting in the Guildhall more than 100 youngsters spelled out a simple desperate plea – give us somewhere to meet. Now the councillors will try to find a disused warehouse for them to convert into a late-night venue or set up an ‘open house’ building which they could use during the day. The unemployed workers’ centre could also be put to more intensive use. 85 12 10a

1985 More than 200 young people entered the Rob Roy pub in Chesterton Road to hold a late-night disco. Sixty-five police prevented any more entering as toilet rolls, a chair and other pieces of furniture rained down. As there were no lights on, except for the disco light and with a crowd in excess of 200 police decided it would be unsafe to enter and clear the building. The pub had not been derelict but undergoing refurbishment and considerable damage was done to the upstairs room. It followed confrontation with several hundred youths outside the former Thakes cycle shop in East Road 85 12 10b

1986 live music venue Clifton Industrial estate approved [38.11.14]

1986 CSO cash crisis, Prince Edward becomes patron

1986 pop concert flops due Bank Holiday gales [11.15]

1986 The great Cambridge Rock Group Competition has attracted 42 bands. They include Pressure Drop who specialise in blues and jazz, Grass Asylum and Double Yellow Line who describe their music as pop, The Beeno who simply ‘rock’ and Tyrade a heavy rock outfit. Wild Party Productions whose musical styles embrace both rock and pop will also perform as well as the Harvest Wood Quintet who are into contemporary rock music. President Regan Is Clever and Sardines in Red Striped Dresses will also take part. 86 01

1986 The Cambridge Rock Group Competition has seen 41 bands battling it out for the prestigious pop title. The BBC’s “Whistle Test” duo, Andy Kershaw and Trevor Dann joined the six regular judges for the final which included Colonel Gomez, Therapy, Strange Brew and Children of Some Tradition. The top two places were contested by Double Yellow Line, playing pure Wham and Duran Duran style pop and President Regan is Clever, a student group in the mould of Cambridge’s own Perfect Vision who eventually took the title 86 03 03b

1986 Young people in Cambridge have come up with a revolutionary idea for a new late night rock music venue in the middle of the busy roundabout in Elizabeth Way. It is centrally situated and its underground location would cut down disturbance. But it would be expensive and there would be problems of access for emergency vehicles. Councillors think the former Cattle Market on Clifton industrial estate is a better option. If the venture failed the site could be converted back

to industrial use with a smaller financial loss. But they have asked officials to make a feasibility study of both sites 86 03 08

1986 Michael Copley and Dag Ingram were undergraduates at Churchill College in the '70s. One had a recorder and the other borrowed £5 to buy an accordion and they started playing on Saturday morning in Lion Yard. One day they received a knock on the door from a policeman. He wanted to book them for a policeman's ball at Huntingdon. The Cambridge Buskers were on their way to stardom. They toured Germany and did a recording with Deutsche Grammophon which made them pop stars. Now they have been invited back to Cambridge to play at the University Music Club 86 04 24c

1986 Stan Kelly was one of the last people to live in the Oyster House, Garlic Row where his parties were a mixture of the talented and the well-heeled. He was a Liverpool working-class boy who came to the university in the early '50s with his wife and children. In those days he was involved in folk music, mixing Liverpool seamen's songs with those of the American Depression and some of his own. One was 'Hard times in the Old Oyster House, Hard times, poor boy'. Later his skiffle music became successful on both sides of the Atlantic. Despite this he managed to secure a double first in maths and obtained a job with a world-famous computer firm. 86 10 09

1986 Cambridge Philharmonic Society centenary – history – 86 11 24

1986 The Corn Exchange, Cambridge's new entertainment and conference complex, has opened after years of political wrangling. The four wall shell used for pop concerts, roller skating and badminton has been developed into an auditorium with versatile seating together with a tiered balcony and mezzanine terrace that can be used for a variety of purposes. At the back are changing rooms, dressing rooms and workshops while the King Room upstairs will be available for private functions 86 11 26d & e 86 12 01d

1987 Corn Exchange set to lose £140,000 in full year; Folk Festival & Cambridge Festival are
£30,000 down £CEN 14.11.87

1987 Veteran rocker Lonnie Donegan danced the night away at Cambridge Corn Exchange – but didn't manage to sell out the hall. Only 500 fans turned up. The problem was that the Hollies were on the following night. Then huge traffic jams built up with a 150-yard queue. The Manchester 60s super group stepped on to the revamped stage and into the hearts of a once-swinging generation of pop fans playing 'Just One Look', 'Carrie Ann' 'Bus Stop' and a host of other hits 87 02 26

1987 Veteran rocker Jerry Lee Lewis gave a high voltage performance at the Corn Exchange. The audience ranged from the Mayor, John Woodhouse, to the secretary of Cambridge Elvis Presley Fan Club. Quiffs and DAs sprouted from male heads while the girls sported pony tails, satin or chiffon ribbons and bright lipstick. Teds wore their distinctive plumage of drape jackets and drainpipe trousers. All united in a huge roar as a short figure strolled on to the stage and the opening bars of 'Roll Over Beethoven' powered round the hall. 87 04 06

1987 Cambridge's cult band, Harvey and the Wallbangers, are making one last date in the city before bowing out of the business. The good-time/rock harmony/doo-wop swingers are splitting up. The Wallbanger's cocktail of music and comedy made them one of the best-loved bands of their kinds. But founder and supreme Harvey Brough says they are getting tired of constant touring; they want to write and record. Guitarist Johnny Griffiths is becoming a maths teacher but the rest are sitting back and waiting for whatever comes next 87 04 24

c.69.2 : dance

1897 The Guildhall floor has become so unsafe that when a ball is held in the large room the most elaborate precautions have to be taken to support the beams in the ceiling of the Free Library beneath. This shoring-up process costs something like 30/- each time and is a sheer waste of money 1897 02 27 CDN

1904 cost of converting Corn Exchange for ball is several thousand pounds for one evening [6.19]

1905 Souza's band visits [3.17]

1909 May Ball traffic allowed over Garrett Hostel bridge [6.29]

1909 The new skating rink at the back of Hertford Street was constructed to avoid any noise nuisance. Rinking was a fashionable amusement and there would be a charge so it would not be overrun with the rough element. They wanted to have a string band, with no drums, to play at intervals. There was not the slightest intention of making it a dancing saloon but they would like a licence so it could be used for subscription dances during May Week. CWN 09 12 10

1913 Upwards of 400 guests attended the Cavalry & Artillery Ball at the Corn Exchange and Guildhall which were beautifully decorated. The ballroom was fitted up in the Corn Exchange where a capital floor had been prepared. The room handsomely and luxuriously upholstered and decorated by Eaden Lilley & Co. A striped canopy set off with festoons of artificial flowers hit

the roof and large mirrors on the walls reflected the light of hundreds of electric lamps. 13 06 13

1915 Mary Macaulay teacher of folk dancing at Folk Dancing Society, enthusiasm died out
with coming of the war 15 06 11 p7

1923 Mackenzie school of music & dramatic art established [9.6]

1924 The renewal of the music and dancing licence of the Cambridge Co-operative hall, was
objected to on the grounds of noise. Burleigh Street was one of the most densely populated parts
of the town. The hall was not originally built for dancing, it had a large number of windows and
the dancing room was situated on the top floor of the highest building in the neighbourhood, with
the result that the sound was dissipated considerably further. As a rule the dances did not
terminate until midnight and sometimes a great noise was caused by the people leaving -
shouting, singing and the back-firing of motor cycles, of which a large number were brought by
the people who attended c24 02 02

1924 A feature of the concert given at St Paul's Institute was the debut of Mr Sydney
Coulson's dance orchestra in Cambridge. The band comprises Mr Percy Stock (violin), Tom

Sydney Coulson (director) at the piano. With the dance season here the need for a good dance
orchestra grows ever greater and there is no doubt that the Coulson band will be in great demand
c24 11 04

1925 County Ball at Guildhall a brilliant function [3.5]

1925 For the University Pitt Club ball the Guildhall has always been very cleverly decorated.
The Large Room served as ballroom, the orchestra seats hidden behind tapestry hangings. There
were close on 400 dancers. As a buffet the Small Room has seldom looked better. Supper was
served in the Corn Exchange, access to which was gained by means of a covered way connecting
it with the Guildhall. The fare provided was most appetising. Our representative gazed with
pardonable envy upon a well-dressed boar's head, a swan with a waxen neck and other fine fare
c25 02 17

1926 At the Licensing Session Mr Eric Pointer made an application for a new music and
dancing licence for the Assembly Rooms, Market Passage, Cambridge, from 1pm to midnight. A
complaint had been received on the grounds of the noise being more or less a perpetual nuisance.
During term time the noise and hubbub had been almost unbearable. Not only was there shouting
and yelling, but there was hammering as if someone was tacking something up. There was plenty
of accommodation for dancing – the Central Hall, the Guildhall, the Corn Exchange and the
Dorothy – and this new licence was unnecessary. The application was refused c26 03 05

1926 A Country Dance party on Christ's Pieces, organised by the English Folk Dance Society
who are holding a Summer School in Cambridge, attracted a large audience. The party comprised
some 500 dancers from America and all parts of England whose dances such as "Rufty Tufty",
"Newcastle" and "Sellenger's Round" took one as far back as 600 years. The natural and care-
free movements were a pleasant relief from the Bunny Hug, Cakewalk and Charleston c26 08 08

1926 P.C.Q – "Please Charleston Quietly" is the plea of all real dance lovers as was evidenced
at the Rendezvous Ballroom, Cambridge, when demonstrations of the new Flat Charleston Waltz,
Tango and Fox-Trot were given. In its new form, with all distasteful kickings and stampings
eliminated, the Charleston will appeal to the most fastidious. The Rendezvous with its new
decoration, improved sitting-out accommodation and the popular Nobby Clark and his band is
assured of an even greater following c26 10 02

1935 Dance band contest – 35 02 22c

1936 “for 30 years from 1936 Vic-Wells Ballet gave regular performances at Festival theatre (?) [9.5]

1936 Marjorie Moss who is well-known to local dancers as a crooner with Percy Cowell’s band has won a round of a £600 light singing competition organised by the Gaumont-British Corporation & the News Chronicle at Peterborough. Miss Moss, who is a member of the Enthusiasts’ Concert Party, chose as her song ‘Some of these days’ and was accompanied by Percy Cowell himself. 36 05 09b

1937 Les Walton, the popular Rendezvous band leader, who introduced the ‘Jig’ which proved a success, has introduced a new dance to Cambridge for the first time. It is called the St Bernard. One of the bandsmen, George Oldfield, brought it back with him after a visit to Streatham Locarno. It is undoubtedly going to make a ‘hit’ and was enthusiastically taken by ‘Rendy’ patrons. It is nice to have something fresh in the way of a dance. 37 01 09

1937 Four members of George Challice’s Band had a remarkable escape from serious injury. They were being driven back to Cambridge from a dance at the new Bottisham Village College when their car, a Riley Nine, skidded on the wet road, caught the verge and somersaulted several times. It finished up on the road with the wheels in the air. The occupants scrambled out with considerable difficulty. When an attempt was made to right the car, it fell to pieces. 37 05 07b

1938 Dick Whittington and his cat ushered in the New Year at the Dorothy Café where Percy Cowell and his band kept up a programme of old and new dances including the Palais Glide. Just before midnight all lights in the ballroom were extinguished as Dick, joined by two fairies, bombard the 650 dancers with paper hats and other carnival novelties. At the Salisbury Conservative Working Men’s Club in Mill Road just over 200 danced to the rhythm of Cliff West’s band while Son’s Accordion Band played to a packed floor at the Beaconsfield Hall. 38 01 01a & b

1940 Sir - we notice that the Rex management persists with their 'curfewed' dances, closing at 11pm. The men of the Services who now frequent the ballroom go away at about 10.30 pm so they say there is no need to carry on the late nights till midnight. Yet it was the regulars who kept the place going before the war and it will be these dancers who will be expected to do so when the war is over. - Rendy Regular 40 01 10b

1943 Cambridge Corn Exchange venue for Barn Dance staged by American Red Cross for US forces’ celebration of traditional American custom of Hallowe’en ... at one end a Guy Fawkes surrounded by straw ... dances consisted slow foxtrots and quicksteps to the famous American Flying Eagles band. Were crates of apples and pears from which the many dancers, numbering about 1,800 were at liberty to help themselves. Refreshments served free of charge by an American clubmobile – a canteen on wheelers – about 3,000 American doughnuts, 25 gallons of coffee and 30 gallons of cider, beside orange and lemonade. Pumpkins cut into faces grotesquely illuminated by candles ... 43 11

1946 EFDSS 1st festival in 7 years [9.3]

1947 In the words of Councillor Frank Priest "the new floor of the Cambridge Guildhall is well and truly laid". This brief ceremony was performed last night at the first Ball of the season, and what a delight it was to dance on such a new and beautifully polished floor. One couple, probably so unaccustomed to such smoothness in Cambridge, were rather too enthusiastic and found themselves, quite unintentionally, making a seat on the floor! It is thought that some of the shoes and hob-nail boots worn by dancers during the war years was the reason for the bad state of the previous floor. c22 09 03 [2.2]

1948 A new Cambridge ballroom known as The Embassy is to be opened at Mill Road tomorrow evening. Formerly a billiards hall, the building has been converted by Mr Harry Bradford, who claims that as a result of the labours of himself and friends the building is now "a lovely ballroom". For the opening tomorrow the new resident professional band is led by Freddie Webb, who has just left the Bag o'Nails Club, London, to take over the leadership. With him are Tony Rivers, alto saxophone, Dusty Myatt (piano) and Freddy Webb, drummer. Guest vocalist with the band is Harry Roy, vocalist Terry da Costa c48 02 03

1948 "It could not have been better placed for now it will eliminate the necessity of people of this district having to go to the Guildhall and like places for their entertainment. The management are to be congratulated on the redecoration of the building". So said Ald A.E. Stubbs, M.P. of the new "Embassy" ballroom Mill Road, Cambridge. And if the reaction of a "capacity" crowd who flocked to this new venture are anything to go by, his words were most heartily endorsed. From the word "Go" at 7.30 the crowd set out to make the most of their new ballroom, and numbers steadily increased until the maximum of 300 dancers had been reached c48 02 04

1948 History was made at the New Theatre, Cambridge, last night when the International Ballet Company presented the most spacious classical ballet spectacle ever to be seen in Cambridge. And the result was an evening of sheer beauty. A company of over sixty presented a performance outstanding for its virility and attack, and there was a first class orchestra - their numbers made it necessary for them to "overflow" from the orchestra pit into adjoining boxes and the stalls. The work last night was the full-length version of "The Swan Lake". Leading the superb company is the prima ballerina Mona Inglesby c48 04 13

1949 To celebrate the first anniversary of the opening of the Embassy Ballroom, Mill Road, Cambridge a birthday ball was held there when the resident band, under Freddy Webb, was augmented. A very happy note was struck by the appearance of Ken Turner and his band from the Rex Ballroom, together with their wives and lady friends, on the dance floor, dancing for a change, instead of playing for others. Altogether a very happy birthday evening for the ballroom c49 02 09

1949 The reopening of the Dorothy ballroom gave a capacity crowd of 600 a preview of a large-scale modernising scheme. A first glimpse of the ballroom's "new look" provides a startling contrast with its former style. A striking feature of the room is the domed ceiling which forms a background for a finely-traced pattern of gold-rib - one of the foremost of modern decorative trends. A central feature has been created from the orchestral stage, which accommodates a newly-formed band of ten instrumentalists, under the direction of Reg Cottage c49 10 06

1950 In these days, when it is not always easy to let the ballroom for a dance, it is unusual to hear of the Cambridge Guildhall being booked two consecutive nights in order to accommodate all those wishing to attend a function. This happened when the Cambridge Co-operative Society held their annual staff party for 900 employees and friends. Special trains brought them from Duxford, Melbourn, Burwell, Willingham and Bishop's Stortford c50 01 20

1951 The name of Roy Fox will conjure up many nostalgic memories for the generation of dancers who had their hey-day in the years before the war. It was way back in 1930 when he first left America for England and now he has returned to give a new generation the pleasure of dancing to his distinctly individual style of playing. At the Rex ballroom, Cambridge, there was a packed house to hear the melodies of his Whispering Rhythm. Of the 13 members of the orchestra five are violinists – unusual for a popular dance outfit these days – and has a more pleasing effect on the ear than the rather ‘brassy’ arrangements which one normally hears with modern dance bands c51 09 11

1955 May Balls are with us again. At Trinity Nat Temple and his band played for a large number of dancers, at St John’s guests danced to the music of Hedley Ward and his orchestra while at Clare Tommy Kinsman provided music for everyone – one room being set aside for jiving! Downing had a marquee setting where two hundred couples danced to the music of Chappie D’Amato, who also played at Christ’s. 55 06 15

1956 Guildhall bans jiving at dances - “people jiving to waltz” complaint [2.14]

1956 dance halls ban rock & roll sessions [2.16]

1957 Rex ballroom allows rock & roll sessions [2.5]

1957 Cambridge dancers will learn with pleasure that the Ken Stevens Orchestra have been engaged as the new resident band at the Rex Ballroom. It features singing star Jimmy Cross, sax players Don Jenkins, Mike Waller, Bert Smith and Denis Range with Barry Mason (trumpet), Ken Southee (bass), Bernie Stubbings (drums) and Ken Stevens (piano). 57 10 12

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 A 25-hour non-stop jive session at The Dorothy ballroom was won by The Rebels, a team of jivers from the Corner House Café in King Street. The American team from Alconbury were the first to crack, followed by the Corpus Christi team and Daddy’s Nite Club. At the end of the session only three members of these teams were on their feet. Back at the Corner House Café the Rebels’ supporters took the news of their triumph quietly. In their leather jacket and jeans they talked over cups of coffee. But the juke box was silent by order of Magistrates. Two of the Rebels, Colin Knight and Graham Jones used the session as a practice for a 25-mile cycle sprint race. 60 03 07 : Corpus Christi student attempts world record for non-stop jiving [3.8,12.3]

1961 Ted Heath at Dorothy, Dec [8.5]

1961 When elderly dons sported kid gloves at Guildhall dances – feature – 61 05 31a & b

1961 Nearly 400 people in the south of Cambridge have protested about a proposal to build ‘the greatest and best dance hall in Great Britain’ in the middle of the Queen Edith’s Way housing estate. The hall, which would be used for wrestling bouts, boxing matches and rock and roll sessions, will be ‘completely out of keeping with the nature of the district’, they claim. The proposer said the area was currently scheduled for quarrying purposes and a hall would increase the amenities. “We could either mine chalk or build a really beautiful place”, he said. 61 06 14
1961 Two Cambridge couples are attempting to beat the Cambridge 25 hours non-stop jiving record at the Freebooters Club in Wellington Street. The dancing started last night at 9 o’clock with eight couples competing but six of these became exhausted and had to give up in the early hours. However Adrian Mead and his partner Linda Worboys and Fred Ellis with Bridget Holmes are continuing. The boys are not allowed to stop, but their partners can have a standby 61 10 28

1962 The new Victoria Ballroom was opened by Ronald Fraser, the film and television star, who had previously appeared at the Regal Cinema as part of its 25th anniversary celebrations. Converted from a café above the Victoria Cinema, it will reduce the number of 'wallflowers' on Saturday nights when special buffet dinner dances are being run at a cost of a guinea for a double ticket. When not in use for dancing it will still be put into service as a café 62 04 05 [3.12.8.9]

1962 Several hundred people packed the Dorothy to watch UK 1962 ballroom dancing champions Bob Burgess and Doreen Freeman give an exhibition of dances including the waltz, quickstep, cha-cha, twist and Madison. After demonstrating the basic steps and variations of the Madison Bob & Doreen called for other couples to join in and soon the floor was crowded with keen enthusiasts 61 11 16a

1963 Dorothy new ballroom opened, Apr

1972 Young people in Cambridge have lost their Saturday night dances - the high spot of their week - and this has meant more violence in the city, Steve, an apprentice chef at Christ's college claims. The Dorothy - the city's best known catering and dancing centre - closed in August. Teenagers have looked for other dances, but tend to spend more time wandering around looking for somewhere to go than staying in any place. Saturday night dances at the Corn Exchange suit another type of person, said Steve. They prefer a different sort of music, which he describes as "heavy". He and other young people who frequented the Dorothy preferred Tamla Motown music. There are more than 80 people who used to go to the Dorothy. Many of these now wander the streets of Cambridge, travelling from one pub to another looking for something to do c72 11 14

1973 Ken Stevens own band success 1950s, won Melody Maker Musician of Year award (1955), orchestra started as resident band at Rex, now full-time professional, playing Norwich, started 1958, moves shop Petty Cury to Guildhall St (1967), moves Sussex St 1973 27.2.10.7] {69}

1977 Royal Ballet in Big Top (previous visit 1967) [9.5]

1979 Hundreds of disappointed ballet enthusiasts had to be turned away from the Big Top on Jesus Green when the opening performance of the Sadler's Wells Royal Ballet was cancelled. City council entertainment staff headed by Mr John Wilkinson were standing by as ballet-goers trudged through the squelching grass only to be told the bad news. Most people took it in good part, though there were complaints from those who had driven from as far as Bishop's Stortford and Hatfield. They were not interested in refunds, they wanted another chance to see the ballet. But most of the 1,200 tickets have been sold and the company's schedule means that no replacement performance can be held. CEN c 29.5.1979

1983 There just aren't enough ballroom dances to meet all the demand in Cambridgeshire. Already a resurgence in the dancing of 30 years ago is causing overflows and tea dances are catching on. A dance at the Long Road Sixth Form College attracted 230, too many for dancing, so numbers are now restricted. The local big band, SoundIdea, under Bob Kidman, averages three bookings a fortnight. Now a new one has made its debut: the Umbrella Big Band, a few survivors from the defunct Impington Dance Orchestra. 83 11 22 p13

1984 Cambridge discos are awful: Ronelles is all right for up to 18s but you feel out of it when you're in your 20's. And it's not just the youngsters who are complaining: their mums and grannies have their own gripes. They miss the dance halls from the Rex and Embassy, which enjoyed their heyday during the Rock and Roll boom to, the more sedate Dorothy. The Corn Exchange, formerly home of all kinds of entertainment, closed two years ago and the Kelsey

Kerridge Sports hall is not ideal for stage events. So people turn to the nightclubs at Peterborough
84 11 09 p27

c.69.4 : organs

1898 Henley Arthur Bedwell, a Cambridge piano and organ builder claimed £2 from the Great Eastern Railway for damages sustained by a piano and a case which had been considerably damaged by wet. The manager of the Cutter inn, Ely said he packed the piano before it was sent back. He took it to Ely station and deposited in a goods shed. James Merry, goods foreman at the station, gave evidence as to loading the piano safely on a truck. A tarpaulin was tied over it. There were some barrels of beer in the same wagon, but they were not leaking. Harold Pain, an optician, produced a register proving that there was no rain during the transit of the piano c1898 09 30

1906 Dr A.H. Mann, the University organist and chorus master, completed 30 years work in Cambridge. He was appointed organist of King's College in 1876, coinciding with the founding of the new choir school and important changes in the musical services at the chapel. They hoped his tenure of office at King's would match that of his predecessors – Dr Pratt (55 years) and Dr Randall, 66. 06 06 08a

1910 A man told the court that he earned £1 a week playing a street organ. It had cost him £18 10s.6d, he'd spent £5 for new tunes, twelve shillings on a new wheel and three-and-six on tuning. A motor car had run into the back of it, knocking it over and causing considerable damage. A four-year old boy who had been in the shafts was knocked over and his hands were cut. There was nobody in Cambridge who understood the instrument and it would have to go to London to be repaired. Repairs would cost at least £3. He had another organ which his son took out. He was awarded £5 for damage to the machine and £3 for loss of earnings. 10 09 23 c & d

1920 Wesley church organ unveiled as war memorial - CDN 20 11 29, Ch 20 12 01b

1925 The opening of the new Guildhall organ marks a fresh era in the history of Cambridge music. The old organ had no virtues but many vices. The pitch was wrong, much of the tone was bad, the action quite defective and the general scheme and plan quite unsuited for the purpose and room for which it was designed. Erected in 1882 by voluntary subscription it had become almost unplayable. Both the heating and ventilation of the room were bad and gross variations in the temperature had the effect of putting the organ out of use with an orchestra and even of rendering certain stops unusable with others c25 05 12

1935 Dr Alan Gray composed many famous pieces of Church music. In 1893 he was appointed organist of Trinity College and was conductor of the University Musical Society – 35 09 28d

1937 At the dedication of a new organ at Histon Methodist church Dr W.H. Rouse said he had an organ which had been in the late Henry Martyn's church. It was rather like a chest of drawers. It was 'played' by putting rolls like sausages through a hole in it; then one turned the handle and the hymns came out! A Histon church once had a similar organ which played four hymns. It was not possible to select any one of the four; the whole four had to be played in strict order. The new organ, built by A. Noterman of Shepherd's Bush was used as a demonstration instrument in the film made by Gaumont-British showing the building of a church organ. Several of the leading cinema organists of the day have played on it. 37 11 01

1938 Guildhall organ electrification report – 38 06 18a

1949 For over 10 years the inside of the Cambridge Guildhall organ has remained almost untouched, except for a few occasional minor adjustments, but now for the first time since the Guildhall was rebuilt in 1938 it is having a really good overhaul and cleaning. Six weeks has already passed since the day two skilled local craftsmen, Mr Walter Hall and his son, first started on their great task, which is expected to take at least another week. To the layman this may seem a very long time to take in cleaning it, but those who know anything at all about organs will realise the amount of work that is actually involved. Already four buckets of dust has been removed along with various items hardly associated with the interior of an organ c49 09 03

1956 On Thursday Clifford Birchall recorded a programme of popular music at the Hammond organ of the Cambridge New Theatre. Although the theatre is closing, the melodies will linger on, for this recording, arranged by King and Harper, will be played during the evening performance on Sunday at the Playhouse Cinema. 56 03 16b

1956 Miller's Music Shop began a 100 years ago when Mr A.T. Miller opened a workshop in Hobson Street as an organ builder and piano repairer. The family home was above his wife's millinery shop in Sidney Street and one of the rooms was opened as a pianoforte showroom. His son introduced the sale of instruments and sheet music and later came harmoniums, gramophones, radio and television and now electronic organs and tape recorders. 56 03 24d

1956 The new organ at Cambridge's Holy Trinity church will cost approximately £6,000 as compared with the £300 spent on the original organ built in the 1850's by Messrs Walker of Ruislip, who are carrying out the present installation. The original two-manual organ was rebuilt in 1904 by Messrs Bedwell of Cambridge who moved it from the north transept into the organ chamber. 56 09 29b

1957 The removal of the mighty organ from the pit of the Victoria Cinema illustrates graphically how far this kind of musical entertainment has fallen from public favour. The only other cinema organ in Cambridge – that at the Regal – is never seen without its dust cover. The management says it is kept in good order and could be played at any time. However it would need a travelling organist to come up from A.B.C. headquarters in London. If the truth be told it is in permanent retirement. 57 10 01b [6.3]

1959 Holy Sepulchre new organ – 59 11 19

1960s – Cambridgeshire Collection has newspaper cuttings files from this date

1965 St Luke's church organ, built 1726, needs repairs – 65 07 13a

1971 Jesus College new organ, older one restored – 71 03 09

1971 Regal cinema organ – last chance to preserve – 71 05 12

1982 Cambridge now houses an extraordinary number of musical instrument makers. In addition to Mark Stevenson and Trevor Beckerleg, makers of harpsichords, and William Johnson, maker of chamber organs, there are many lesser-known names. Charles Hall is another organ builder, Daniel Bangham specialises in clarinets while John Isaacs and Ian Harwood from Ely are making lutes based on original designs from Bologna and Venice. 82 08 06a

1983 Cambridge Co-operative Band have recorded a powerful piece composed specially for them. The music by Dr Arthur Wills, the organist of Ely cathedral, is the four movement 'Fenland Suite' – the first for brass band and solo organ 83 05 09 p10

1987 The Guildhall organ is very rarely used for concerts It is a fine instrument by William Hill one of Britain's major 19th-century builders and the city's only organ in a public venue. It was last overhauled in 1925 and has been allowed to fall into a state of disrepair. Much of the internal workings are based on leather and when the atmosphere is damp a great deal more of the organ works than when it is bone dry. 87 08 14a

1987 Sir – I have been privileged to play the Guildhall organ for the last 19 years and have noticed a gradual deterioration. This is no reflection on the tuners, who have done a marvellous job. The heating and humidity of the large room plus general wear and tear has seriously affected the action. It is little used because the courts are often in session and it costs £100 to hire the hall for recitals. Sir David Willocks and Dr Arthur Wills have given recitals on it but since the last borough organist, Alan Tranah, left the area no-one has bothered to reappoint a successor. – Claude Ingrey, Babraham. 87 08 20

1988 Guildhall organ restoration plans dropped – 88 07 13

Handbell ringers, 1890s

186.17

c.69.6 : bellringing

1898 At the vestry meeting of St Paul's church, Cambridge the chairman said that every Sunday morning their quiet communion service was greatly disturbed by the Roman Catholic Church bells. When they first started they hoped they would get used to them, but, as they continued to disturb them he took the opportunity of speaking to the Roman Catholic priest, and he said he would consult his congregation. But for a long time he could get no response, but afterwards he replied that the St Paul's bells rang for five minutes before eight o'clock, and disturbed the Roman Catholic service. The speaker had given orders that St Paul's bell should be rung for half a minute to warn the people, and half a minute when the service was to commence, and expressed a hope that the Roman Catholic priest would see his way to having his rung for a short time only. This he refused to do, and so every Sunday morning half the St Paul's quiet service was disturbed by the ringing of the Roman Catholic bells. Mr Catling also spoke of the noisy bells of the Catholic Church, and the disturbance caused to those living around c1898 04 10

1899 Sir – In order to affix the new clock St Matthews church bells have been floored. A very strong protest should be made against the bells being again re-hung, for of all the abominable, discordant clanging, nothing can be compared to them for wretched sound. Instead of drawing people to church, they are calculated to drive people away from them as fast as possible. The effect on the nerves of the poor inhabitants is dreadful. They should be condemned as a most intolerable nuisance to a large section of the people in this thickly populated district – “Cantab” 1899 02 11

1911 The famous old bells in the chapel tower of Trinity College have been re-cast and lowered in tone by Messrs Taylor of Loughborough. They had not previously been taken down since their erection. The largest one bears the date 1610 and was made by Richard Holdeld, another is the work of Thomas Osborn of Downham and was put in the tower in 1795 while the third dates back to 1726. They have not been striking properly for some time past. The late Lord

Grimthorpe left money for the provision of a new clock which was obtained in September. 11 01 27

1912 Sir – In recent years many parishes have had their church bells re-hung in metal cages, instead of in oak cages, which was the old method. This is likely to harm old church towers. A properly-constructed bell-cage stands clear of the walls so that the timbers can spring and a minimum of jar is transmitted to the tower. When metal cages are fixed rigidly the vibration loosens the masonry and cracks the walls, causing damage not easily repaired. Old towers are valuable works of art: who is happy to risk damage coming to them? – A.R. Powys. 12 02 23i
1912 Church bells and church towers – H.B. Woolley – 12 03 01d

1917 Lady Bellringer. — Mrs. Percy Taylor is acting as bellringer at Great St. Mary's Church. She is thus continuing the unique record of her husband's family in connection with the belfry of the University Church. For 38 years the late Mr. George Taylor, who died in 1915, was steeple-keeper at the church, and on his death his son Alfred took over the duties. He has since passed away, and succeeded by a younger brother, Mr. Percy Taylor. The latter has now joined the Colours, and his wife is serving in the belfry during her husband's absence 17 10 10 CIPof

1918 Ancient church bells in Cambridge by A.H.F. Boughey – history – 17 05 23c

1923 The seventh bell at Great St Mary's Church, Cambridge, which was cracked on armistice night by some over-enthusiastic revellers, has just been returned from the founders. It now inclined on a pedestal in the nave of the Church awaiting re-fixing in the tower, and there it will stay until paid for. The cost of taking down, re-casting and re-fixing is close on £100. The bell was originally cast in 1667, and recast in 1723 c23 10 29

1937 Arthur Hoppett, 73, the oldest organist in Cambridge, started his musical career as a chorister at Trinity College under Sir Charles Villiers Stanford. His first appointment was at the Abbey Church, later moving to All Saint's. He played for five or six services every Sunday during the Great War and was accompanist at the musical evenings given by the late Oscar Browning where he met artistes of world-wide fame. His great hobby was his fine collection of stamps of the British Empire 37 01 13c amusing incidents – bumped into King Edward – 37 01 16f

1942 Bell-ringer's Death, — Many friends in Cambridge and throughout the Eastern Counties will learn with regret of the death, at his home in Union Lane, Chesterton, early on Wednesday morning of Mr. Walter Eusden, known for over three score years as one of the foremost bellringers in East Anglia. Eighty-two years of age, he had earned for himself by his unique knowledge of bells a reputation that was second to none. For 61 year of his life, he was bellringer at St. Andrew's Church, Old Chesterton, where perhaps his loss will be most felt. It was his hands that helped to toll the bells of Great St. Mary's, where for over 30 years he rang for countless famous occasions and events. Naturally, the curtailment of bellringing at the outbreak of war robbed him of his greatest interest in life. It was his ardent wish that he might ring for his diamond wedding, which he celebrated about 18 months ago. On one occasion, that of the Diamond Jubilee of Queen Victoria, he rang no fewer than 5,042 changes on the bells of St Andrew's, Old Chesterton, and a tablet in the left aisle can be seen commemorating this. One of his greatest performances was to ring the first peals on the bells of the Roman Catholic Church, where also a tablet, this time in the bell tower, can be seen recalling thee event. One of the most remarkable things about Mr. Eusden was that although he suffered from extreme deafness, he could tell exactly when any one bell was not striking correctly by the pull of the rope alone. He was also a great handbell ringer 42 02 13 CIPof – 42 02 12b

1942 Joy Bells for Victory,—The bells of the Parish Church, Swavesey, long-silent as a war-time precaution, were rung from 9.30 to 10 a.m. in celebration of the British Army's victory in Egypt There were similar peals at various other churches 42 11 20 CIPof

1953 The fund for re-hanging the bells of Cambridge's widely famed Great St Mary's church has raised under £1,000 of the £2,600 needed. The bells were taken down last year because of the ravages of a wood-destroying parasite and now the CDN has decided to open its own Bell Fund to supplement that sponsored by the church. All contributions will be acknowledged in our columns and whether large or small they may be handed in at our office. The CDN is opening its fund with a donation of £25 and hopes there will be a satisfying response. c53 10 07

1954 Gt St Mary's bells returned. Debate over whether the curfew which was rung on them since Medieval times at 9pm but stopped during War should be restarted. Decide against in 1956 [2.7]

1954 The bells of St Mary's will soon ring out again due to the famous peal of 12 bells at Gt St Mary's Church, Cambridge, being re-erected after a two-year absence. A new steel frame has replaced the 200-year-old wooden frame which was eaten up and diseased by woodworm. The Coronation was the first that has not been hailed by the early 18th-century peal; they are rung for all national events and used to be rung for new and old masters of Cambridge colleges. There is a 13th bell in the tower; during the First World War it was used as a fire alarm at the First Eastern General Hospital CDN c 18.3.1954

1954 Every seat in Great St Mary's church, Cambridge, was occupied when the Bishop of Ely rededicated the recently-reconditioned bells. A procession of bellringers, representatives of the bellfounders, the clergy, the Archdeacon of Ely and churchwardens went with the Bishop to the bell tower during the service. The bells were handed in to the custody of the Vicar to be used only with his authority. Then for the first time in two years the clamouring of 12 bells was heard over Cambridge. CDN c 12.4.1954

1956 The bells of St Andrew the Great, Cambridge, were there long before the present church but are in poor condition. They are individually tuneless and badly blended together. Many are 'odd-struck' with the clapper not placed centrally inside the bell making ringing difficult. The bears are worn and rough and the frame in which they are hung was roughly constructed and moves when ringing is in progress. Now they have been taken down to be recast and rehung and are lying in the churchyard. 56 08 02

1957 The bells of St Andrew the Great returned to the church after being away for re-casting and re-tuning at Taylor's Foundry, Loughborough. The oldest was installed in 1660 when the new church was built. They are being re-hung and a full peal will be rung after they have been dedicated by the Bishop of Ely. 57 02 13a

1958 The four bells of St Michael's church, Cambridge, which have not been rung for many years, are going as a gift to the church of St Augustine, Cashmere Hills near Christchurch, New Zealand where they will be in regular use. They date from the seventeenth-century prompting great excitement that bells of such antiquity should be going out there. Financial responsibility for the removal and shipping has been assumed by New Zealanders. The project was initiated by Michael Stewart-Smith of Fitzwilliam House which used St Michael's as its chapel. 58 07 12

1985 Reg Badcock of Lode repairs cracked and broken church bells. He has made almost all the special equipment he needs from pieces of metal debris which fill every corner of his workshops. A few bells were experimentally repaired by the British Welding Institute at Abington, where he had worked for 25 years. But they were not prepared to carry on the task, so Reg took over. He has worked on bells from Abbotsley and Foxton. Each has its own character and markings but he clears away one his cluttered benches and solves the problem. The

importance of his work is recognised nationally: amongst the jobs waiting for him is a bell from a church near Stratford-on-Avon. 85 10 24c & d

1987 Frank King, bellringer at Gt St Mary's – feature – 87 04 09

1988 A three-ton monster bell, the biggest in Canterbury Cathedral, has been bought to a small Lode firm for welding repairs. It is the largest job ever undertaken by Soundweld, of Quay Road, in its 20-year history. 'The Great Dunstan' which tolls the hours at the cathedral is one of the largest bells in the country, almost 60ft in diameter and more than five-feet tall. It arrived by transporter and was lifted by crane to a specially-prepared plinth. Repairs will take several weeks

'The sporting term is over' by Richard Heron Ward is set in Cambridge where – according to the blurb – 'the extreme communities of pseudo-intellectualism and excessive athleticism are constantly warring against each other'. There are too many unpleasant and abnormal people: one effeminate creature is thrown into the river by fellow undergraduates and another lad hit over the head with a heavy candlestick. But it does describe a Poppy Day rag. 33 07 08

1846 An appeal for information about the visit of the famous American dwarf known as General Tom Thumb had brought a number of letters. Mr A.E. Reeve recalls that during his visit in March 1846 he was shown in the morning for half a crown for members of the University and in the evening for one shilling for townsmen. But the undergraduates ignored the morning opening and crowded out the 'townies' during the evening show. A town and gown row followed.

Mr E. Saville Peck has lent one of Tom Thumb's visiting cards that he found amongst his old papers belonging to his mother who went to see him at the Town Hall CDN c21.2.1952

1885 First production of Mikado at Theatre Royal, May 30 1885 – 41 08 04

1889 Rodney Dramatic Club begin annual performances

1894 Cambridge University & Corporation Act abolishes Vice Chancellor's veto on theatrical licences [4.13]

1895 W.B. Redfern purchases St Andrews Hall, St Andrews street & rebuilds as New Theatre,

1896 New Theatre opening [NI.1.22] foundation stone laid by Beerbohm Tree

1897 The second annual meeting of the shareholders of the New Theatre, Cambridge, Ltd was held at the Theatre. The Chairman said it was difficult to select pieces that suited all classes. What suited the undergraduates did not suit the townspeople, and the undergraduates were some of their best patrons, and they had to cater for them very often, when they would like to give, perhaps, a really better class entertainment. They did the best they could. That was the reason that they had never played at a loss for a whole week. One of the best sources of income in a small way was the hiring of opera glasses c1897 07 11

1898 Cambridge Pierrots 1st performance, Beaconsfield Hall [5.9]

1898 George Baynes, proprietor of the newly opened wax works exhibition in Petty Cury, Cambridge, was summoned for carrying on his show without the permission of the mayor. Dr Cooper (looking at the wax works programme): I see this is a regular chamber of horrors Sergeant Baker said he had told the defendant he was liable to a penalty of £20 and advised him to close the show. The defendant however said he did not think it was necessary as he had a similar show eleven years ago without permission. He kept the exhibition open till 10 o'clock and a large number of persons visited it, the crowd causing great inconvenience in the street. The bench inflicted a fine of 20s

1898 That electricity is a great boon everyone is prepared to admit, but we shall enjoy better when scientists have solved more of its mysteries, and when it has dropped the tendency to drop and die away just at the time when it is most required. The New Theatre is one establishment where loss of light means loss of money. The incandescent lamps with which the interior is efficiently illuminated drooped and finally the current failed all together. Having been accustomed to brilliant electric light, the fact that the theatre was illuminated by means of ordinary lamps gave rise to much comment amongst the audience. As far as the stage was concerned the management had taken the precaution of retaining the gas. However before the performance commenced the truant current resumed its ordinary course and gave the steady light which continued the remainder of the evening c1898 11 02

1899 Rodney Dramatic Club formed

1899 In noticing the entertainment given at the Conservative Club by the Cambridge Pierrots, we would at the outset congratulate the management upon shortening the programme. No more enjoyable evening can be spent in listening to the excellent numbers contributed by that talented troupe but we may say that three hours is somewhat of a strain on the troupe and audience alike.

As it was a programme of twenty-six items was got through. The sextette, "Oh! see the lambkins play" is undoubtedly one of the best items c1899 12 21

1900 A very attractive programme is presented at the popular hall in Auckland Road, Cambridge, this week. One of the most enjoyable items is kept to the last – Edison's Concertphone. This machine is Edison's own invention and is vastly superior to the phonograph. It is manipulated by Mr Oliver. Most of the records were taken by Mr Oliver himself and are well up to date – indeed one of the best was that of Dan Leno singing "The waiter", which was taken but six days ago. The records of the bands are very fine indeed, each instrument being very distinctly reproduced and heard in every part of the house c00 06 19

1900 There is that about the re-opening of the Cambridge Theatre after the 'Long' which is unique. In other towns a re-opening night is a great night. In the stalls and circle are seen the ladies, bright and brilliant; and an array of men in dress suits. In the pit are the 'pitties; in the galleries the 'gods'. Not so at the New Theatre when the doors are reopened. The stalls are occupied by those who will in a week or two be sitting in a lowlier part of the Theatre and so on right through the house. But few other towns have long vacations. A fortnight's time and there will be a normal theatre aspect CDN 1900 09 25

1901 Sir: The directors of the New Theatre have under consideration plans for doing away with what has most undoubtedly been a great discomfort. We refer to the fact that we have not had enough space for men to smoke in between the acts. The rooms provided are too small and, as a consequence, the undergraduates smoke in the passages, the smoke pervades the house and the ladies are, in many cases, deterred from coming – T. Hyde Hills c01 02 09

1901 Mr W.B. Redfern enters today upon his twentieth year of theatrical management in Cambridge. He is a personal friend of Sir Henry Irving and all the leaders of the theatrical world. He has been instrument in eradicating prejudice against the theatre in Cambridge and in vindicating the possibilities of the drama in the moral elevation of the people. In managing a theatre in a University town he had peculiar difficulties to overcome but he is entitled to congratulation on all that he has achieved. The New Theatre is one of the best in Britain CDN 1901 11 22

1902 proposed Palace of Varieties, Auckland Rd opposed [1.9]

1902 Charlie Chaplin in Sherlock Holmes play cTT 2.3., 7.3. & 14.3.1931

1902 The Cambridge Review refers to the conduct of three undergraduates whose behaviour disgusted all respectable people at the New Theatre. But the acts to which reference is made – loud talking during the performance, inopportune laughter and the evident watchfulness for double entendre – are condemned by the great body of undergraduate theatre-goers. To drag an offender out during the middle of the play would cause disturbance and annoyance to the audience. Mr Redfern has instead reported their names to their tutors who have seen that punishment has been administered. The few silly young men who still act in this way will find it prudent to amend their manners. CDN 1902 02 28

1902 Joseph Poole's Myriorama, now showing at Cambridge Guildhall, takes the form of a tour round the world. Much is made of the South African war and the mechanical sound of the canon roaring enhances the realism of the spectacle. Particularly good is the battlefield by night and a bivouac on the veldt. The tour ends in a grand display depicting shipping in which are faithfully portrayed some of the principal vessels in the navy. CDN 1902 03 11

1902 Thomas Askham applied for a licence for the public performance of stage plays at the Circus of Varieties, Auckland Road, Cambridge and presented a petition of 900 signatures in favour. The Committee would recommend it on condition that the old buildings were pulled down, that electric light was placed throughout and at least four hydrants connected with the water supply. Plans would have to be produced. Mr Askham intimated his willingness to do so. CDN 1902 04 03

1902 The following notice has been issued by the Vice Chancellor of Cambridge University. "Whereas the attendance of members of the University at certain public exhibitions, performances and places of dramatic entertainment has been productive of grave disorder, notice is given that the attendance of any member in statu pupillari at the Circus of Varieties, Auckland Road, is prohibited and will render him liable to be punished by suspension, rustication, expulsion or otherwise." CDN 1902 06 04

1902 An entirely new company is responsible for the programme at the Auckland Road Circus, Cambridge this week. The judicious mixture of "turns" by music hall artists and items by circus performers of the old stamp seems to find favour with Cambridge audiences. Miss Babette Rose, a clever vocalist and dancer merited the applause awarded her. Ecnarf, a wire walker was vigorously applauded and one of the most enjoyable items was a clever act on horse back by Miss Daniels. The Sisters Korosko Bale gave a clever exhibition of juggling, a feature being their performing pigeons. CDN 1902 09 02

1902 Mr W.B. Redfern, the managing director of the New Theatre Company, Cambridge, is an attractive and familiar personality. He has completed twenty years of continuous theatrical management, which constitutes a record. The theatre in Cambridge has had to struggle hard for recognition and toleration; it has had to combat opposition to make its way to favour in the minds of those most ignorant of its possibilities. He has won almost all – we say 'almost' because there still lurk in the minds of reactionary and antiquated brains some feelings of prejudice which the theatre had yet to overcome. c02 11 26

1902 At Cambridge court Mr Redfern, director of the New Theatre, renewed application for licences to allow two children, aged 10 and nine, to perform at the theatre with Mr Edward Terry's company. The children's performance was not an acrobatic one; they simply came on and had some lines to repeat. They were under the watchful eye of a governess and their parents were travelling with the company which was on tour and acting every night. It was not unusual for the Government inspector to run down from Norwich to visit theatres in which children were acting and had always been satisfied. c02 11 27

1902 The Auckland Road Circus, Cambridge, has re-opened under the name of the Empire Circus of Varieties and enjoyment of an excellent nature is assured at each performance. Several excellent 'turns' are included in this week's programme including the London serio-vocalist comedian, George Egerton and the first appearance in Cambridge of Leno, the midget comedian. The Great Dakota, an American necromancer in original stage illusions, keeps the audience in wonderment and laughter from the start. CDN 1902 12 30

1903 Thomas Askham was summoned for presenting a stage play, "Robinson Crusoe", at the Grand Circus and Hippodrome, Auckland Road, Cambridge, the building not being licensed as a theatre. There was pantomime action and considerable dialogue in verse. There was a temporary stage with scenery at the back and footlights. But it could not be described as a play, it was only an entertainment. The Theatre catered for the 'Varsity and the better classes and the more humble people went to this music-hall and circus. c03 03 10 [4.4]

1903 An inquest was held on the former assistant manager of the Empire Theatre of Varieties, Cambridge. He had deposited £10 as security on taking the post and after he had held the position for a month this was to be returned to him in instalments. But the company was a failure and he had lost his savings in the venture. He had pawned his watch for half-a-crown and said he did not have a farthing. But he had £40 in his bank and his mind must have been deranged by his theatrical reverses. c03 04 02

1903 Mr Askham applied for a theatrical licence for the Auckland Road Circus, Cambridge. A dramatic performance was instructive to the working classes and tended to keep them out of public houses. But those who were labouring in connection with the various religious organisations felt strongly it would be injurious to the morals of the people. As soon as the audience came out they were 'on the Common in the dark'. A poster for one play contained the

figure of a young lady almost in a state of nudity and if a man took his wife or daughter in the vicinity of it the ladies would hardly know where to put their heads. c 03 05 01

1903 A section of noisy undergraduates at a performance of 'Naughty Nancy' at the New Theatre behaved in an unruly manner. Remarks, many of them in bad taste, and incessant shouting delayed the progress of the comedy and Mr Redfern, the Managing Director appeared on the stage. For 20 years he had had the management and until the last three or four such conduct was perfectly unheard of. He said he was sure they would cease this ungentelemanly conduct but if they continued he would simply drop the curtain and the performance would cease. Cries of 'Good old Redfern' were heard at the conclusion of the protest. They speedily subsided and the performance was concluded quietly. c03 05 16

1904 New Theatre production again disrupted, scenes howled down; undergraduates fined for obscene language [4.5]

1904 New Theatre suffers in commercial depression, Ellen Terry visits [4.12]

1904 The terrible catastrophe at the Iroquois Theatre Chicago has caused English theatrical managers to overhaul their precautions against fire. Mr Redfern has caused the whole of the arrangements for the Cambridge New Theatre to be made as safe as possible. The stage and foot lights are all electric, it is amply provided with fire hoses and experienced firemen are told off each night. The hydrants are on the high-pressure main and they have all desirable exits. The greatest danger is panic but every man, woman and child had the means of getting out of the building. He has timed the people making their exit and it had never exceeded four minutes, without one emergency door being opened. c04 01 07

1904 There was another infringement of the rules for preserving order at the Cambridge Theatre and three undergraduates were ejected. They occupied seats in the front row of the stalls and commented somewhat too audibly on the subject of the piece. When requested to leave two quietly complied but their companion remained seated and accordingly two attendants were instructed to remove him by force. The undergraduate, seeing that his ejection had been determined upon, capitulated in time to avoid the indignity of being roughly handled. "Don't take me out, my dear sir", he pleaded. "I will go out quietly". He did so. It was not necessary on this occasion to stop the performance. CDN c 6.2.1904

1904 A new era in the chequered existence of Cambridge's second place of entertainment, the Empire in Auckland Road, has opened. Hitherto its reputation for providing entertainment has not been entirely faultless but the new programme revealed a pleasant change and there was a packed audience. Performers included an impersonator of characters in the works of Charles Dickens, the Danby-Gordon Trio who displayed a tragic interlude entitled 'The Penalty' and Miss Gladys Fontaine, a singer with a cultivated contralto voice. Two comedians amused with 'patter' and songs of 'nonsense rhymes' and music was supplied by Miss Zetti Handel's Ladies Orchestra. CDN c 8.4.1904

1904 Cambridge New Theatre had a poor year. The depression affected the well-to-do people who sent their sons up to University and naturally the first thing a young man was warned about was not to be extravagant about his amusement. The theatre being the chief amusement it was the first thing the undergraduate cut off. The New Theatre endeavoured to spend as much money as possible with local tradesmen but they went to London for their amusements, which was very hard lines. Several companies cancelled their engagements but good companies with people like Ellen Terry had been unable to half-fill the theatre which spoke very badly for the taste of the Cambridge audience. CDN 19.7.1904

1905 The Cambridge Amateur Dramatic Club completed its 50th year of existence with a dinner in the Guildhall. It has experienced financial embarrassment and its defaulting cashier; it has been served with writs; in its early days it suffered from something nearly akin to ostracism. A Royal patron and social and official recognition followed. The first performances were given in

lodgings over a shop in Trinity Street, then moved to a room at the Hoop Hotel. In 1856 one of its members while escorting some ladies to a ball underwent the unpleasant experience of being served with a writ for £50 due to a carpenter 05 02 25

1905 The University and the New Theatre have joined hands to warn undergraduates that ungentlemanly behaviour will not be tolerated. A warning was placed in every programme and supplemented by a speech between the acts by J.W. Clark, registry of the University and Chairman of the Theatre Company. His words were received with respect by the audience, already in high spirits by a splendid production of the 'Mikado'. He was loudly cheered as he walked on to the stage and at the conclusion he was accorded quite an ovation. 05 05 02a

1905 The Auckland Road variety theatre, Cambridge is now known as the Hippodrome. It has been taken over by Geo. Saphrini who has experience at the Britannia Theatre, Glasgow and Alex Aubrey who has performed at all the principal halls in Great Britain. Although the old circus ring has been retained there were no equestrian turns but Professor Garford's performing dogs and pigeons proved very wonderful and the hundreds who filled the building saw feats of agility and strength and extraordinary examples of human dexterity.. The programme was to have concluded with a bioscope exhibition but owing to a mishap with the lamp the pictures could not be shown. 05 09 12

1905 The English-speaking race are mourning the death of the greatest theatrical figure of modern times, Sir Henry Irvine. He received an honorary degree from Cambridge University and maintained a keen interest in Mr Redfern's struggle to free theatrical performances from the strangling control of the University. He was to have visited the New Theatre on his farewell provincial tour next year. 05 10 14a & b

1905 Having been closed for a week when it was handed over to the care of the carpenter, the Hippodrome, on Newmarket Road Cambridge reopened. The performances will now be carried out on the music hall principles, the old form of ring having been dispensed with and a large and spacious stage erected with all the necessary scenery and curtains. There will be one performance nightly with half-prices after nine o'clock. The Carr Brothers kept the house in a constant state of applause by their wonderful manipulation of a large inflated ball 05 10 24

1905 The licensee of the Cambridge Hippodrome made a claim for breach of contract against Charles Prinz, described as 'the most wonderful and sensational lion tamer on earth'. He had agreed to perform for a week at a salary of £40 but had taken another engagement at the Olympia, Liverpool. As a result their takings had fallen to £30, compared to £112 the week before. The Hippodrome would seat about 2,000 people and £25 had been taken one evening. The judge said that in his undergraduate days the University would not allow a theatre to pollute the atmosphere. They had changed their views since then. 05 10 25

1906 ADC - Rupert Brooke makes first appearance on stage [7.8]

1906 Thomas Askham, proprietor of the Hippodrome, Auckland Road applied for a licence for the performance of stage plays. The University had protested that a theatre near the common was detrimental to undergraduates but it would not be used as a low type of music hall, rather as a proper theatre for the poor classes at a time when students were not in residence. However the neighbourhood would not attract a first-class company and a lower type of entertainment would be detrimental to the morals of the people. 06 06 19a & b

1906 Thomas Askham applied for a licence to stage plays at the Hippodrome, Auckland Road. It was built for the poorer classes of Cambridge for whom there was no such accommodation. Plays would be presented of a high moral flavour such as 'East Lynne' & 'The Harbour Lights' which would have a good effect on the public. He would provide healthy amusement in a proper building. But local ministers felt it would not tend for the highest welfare of the people. The application was refused. 06 07 26

1906 The arrival in this country [in 1952] of the greatest film mime of them all, Charlie Chaplin, has released a flood of memories. I have the programme of a production of "Sherlock

Holmes” at the New Theatre in January 1906. It includes ‘Billy ... Master Charles Chaplin’. Charlie was then 16. Among the adults in the cast was his brother. Charlie has announced that he intends making a sight-seeing tour while he is here. I hope he will consider Cambridge. c52 09 30 06 10 12a

1908 Hippodrome licensed after acrimonious debate [1.10]

1908 Marlowe Society formed to perform Faustus with Rupert Brooke as President & George Keynes as Secretary (continued to produce an Elizabethan play each year) [4.19]

1908 undergraduate misbehaviour, New Theatre – 08 03 20a

1908 Thomas Askham, manager of the Hippodrome, Auckland Road, was convicted of staging a play, ‘Sally in Our Alley’ which had not been approved by the Lord Chamberlain in a building which had three times been refused a licence. Afterwards he announced that it would be turned into a picture palace and a first-class, up-to-date set of animated pictures would be presented. The old artistes would not get the sack but would sing to them every night and have their ‘funniosities’ all the same. He would also apply for a dramatic licence. The Hippodrome was required in Cambridge by the working classes – as a working-class theatre. CWN 08 10 23 p3, CWN 08 10 30 p3

1908 There is a rule at the New Theatre which degrades that undergraduates may not charter a box unless they are accompanied by a lady. So four fertile brains sought to overcome it. No relative of the softer sex being available it was determined that one of the four should undergo sufficient outward transformation to satisfy the authorities. The charming gown was of white satin bespangled with sequins designed by Kate Reilly of Dover Street, the beautiful head of hair was done by Clarkson who came down himself to direct the final ‘touching up’. The group dined at Buol’s and taxied to the theatre. But what happened afterwards and how the ‘lady’ was smuggled into college we are not at liberty to divulge CDN 08 12 03

1909 Cambridge New Theatre was built on the site of an arcade of small shops from St Andrew’s Street to Parkside. The arcade became a roller-skating rink but this proved a bad speculation. It was taken by the Conservative Club who christened it St Andrew’s Hall, where amateur theatrical performances were sometimes held. Mr Redfern leased the building which he reconstructed and in 1882 the first performance was given in ‘The Theatre Royal’. Then in 1895 the foundation stone of the New Theatre was laid 09 01 22

1909 The University Pentacle Club gave their annual performance covering most of the usual forms of magic. There were impressive sleight-of-hand acts with Mr S. Bosanquet adept with billiard balls while Mr Edward Beck’s ‘Magical Moments’ included threading needles in the mouth and the spiriting away of two live doves in a collapsible box. Dramatic effect was cleverly combined with magic in “N’orrible Murder” by Messrs Branson, Wheeler and Eacott. But the thought-reading act by Mr Hayes seemed a little strained. 09 03 01

1909 Cambridge actress, Hilda Evelyn, Bijou ADC – 09 04 16

1909 Miss Florence Gower was well-known as an amateur actress and musician who played leading lady in productions of the Rodney Amateur Dramatic Society. She received her education at Miss Bowen’s school, Islip House, and studied music under Mrs Hague Ingram of Lyndwode Road. She frequently played at private receptions and ‘at homes’ and occasionally sang in public. Some mystery surrounds her death 09 05 14

1910 The New Theatre being closed, the rowdy section of undergraduates have turned their attention to the Hippodrome, despite the fact that the house is ‘out of bounds’. Last week some 40 or 50 attended nightly – of course without cap and gown – which made things generally uncomfortable. On Friday some beat time to the music on the backs of the musicians while others, spying some young ladies began, in full view of the audience, to make protestations of undying affection to them. Later they pelted artistes with bars of chocolate and lighted cigarette

ends before the orchestra played 'God save the King' and the curtain was lowered to shrieks, whistling and shouting from the disappointed audience. 10 06 24e

1911 undergraduates forbidden to take part in any musical or dramatic entertainment in public room outside University Society [5.5]

1911 University versatile dramatic club formed [5.7]

1911 repertory movement launched, supplies great need in Cambridge [5.6]

1911 At the New Theatre Mr Milton Bode with the assistance of clever scene-painters, musicians with melodies, marvellous modistes and a tip-top cast has made nearly three hours of fun and spectacle out of the history of Cinderella, the prettiest fairy story ever dressed up in pantomime. The catchy music, dainty dresses and refreshing humour provide an evening of unflagging enjoyment. Never was there a Baronial hall so well stocked with entertaining people without the usual troublesome outsiders who stop the story because they want to ring bells or spin plates 11 01 0

1912 Playhouse opens (3.23)

1912 proposal to ban smoking at new Theatre rejected, "delighted to see it" [5.1]

1912 notes re undergraduate misbehaviour at theatre [5.2]

1912 A splendid test of the safety of the New Theatre in the event of an alarm of fire was carried out on Saturday night when it was found that 1,400 people passed from the Theatre in less than four minutes. The audience had no knowledge that a test was taking place and the staff had no orders except to throw open all auditorium doors and emergency exits. The house was crowded to its fullest extent and, as it was pantomime week, there was an exceptional number of children. The result is of particular interest as the New Theatre is to be used periodically as a cinematograph and variety theatre in which people are needlessly nervous of fire 12 01 19b

1912 Dickens Centenary, Guildhall, Cambridge, February 6th 1912. Messrs Grant & Lane beg to announce Frank Speaight Dickens Recitals. Pickwick. Tickets: reserved seats three shillings, second seats two shillings, admission one shilling. Schools, not less than 10, special terms. – Advertisement 12 02 02

1912 Sidney Gandy was one of the ablest of our society entertainers. As a ventriloquist he had few equals and his skill in thought-reading was exceptional. He had been a keen sportsman, organist, choirmaster and schoolteacher at Histon before leaving in 1887 to take up the professional life. Strange to relate the directors of the Histon Institute wrote to engage Mr Gandy for their forthcoming annual entertainment on the very day he met with his accident – 12 02 16d & e

1912 New Theatre annual report – 12 08 02a

1912 Sophocles' 'Oedipus Tyrannus' was performed in the original Greek at the New Theatre by members of the University. The performance was in every way beautiful and intensely impressive. How much time and work it must have cost everyone concerned can only be guessed. There was a distinguished audience and a sincere enthusiasm which stamped the performance as a true success. 12 11 29d

1913 Jack Hulbert ("possibly the most famous ex-Footlight"(1953)) writes 'Cheer-oh Cambridge' at New Theatre 93.7)

1913 New Theatre repainted, carpets etc [5.3]

1913 The members of the company who are appearing in pantomime at the New Theatre had a narrow escape whilst travelling from Wolverhampton to Cambridge. Whilst the theatrical special was at a standstill, a passenger train ran into it from behind, but fortunately no life was lost. Mr Milton Bode's Company, consisting of about 50 actors and actresses was fortunately in the front of the train and beyond severe shocks, escaped without injury. Also travelling was the 'Wild Australia' Company including eight horses and a number of snakes and alligators. When the

actors scrambled from the train they were mixed up with a giant python and an alligator that had escaped from their boxes 13 01 03b

1913 Sir – A visitor to the Mill Road Picture Palace of Varieties complained that a song with a refrain “But I’m not satisfied, and you’re not satisfied” was very suggestive and the entertainment was too much of that class. This song is sung in every music hall in the country. It is my aim to provide an entertainment to which men can bring their wives and daughters without embarrassment. My patrons number the most respectable families and if I were to allow anything questionable, they would cease to patronise me – Fred Hawkins, The Empire, Mill Road. 13 04 18 p7 CIP

1913 Jack Hulbert of Ely & Gonville & Caius, who made a ‘hit’ both in Cambridge and London in ‘Cheer-Oh Cambridge’ the musical comedy of his own construction, has been engaged by Mr Robert Courtneidge for the forthcoming production of his new musical play at the Shaftsbury Theatre. Miss Cicely Courtneidge (fresh from a holiday in South Africa) is another member of the notable company. 13 08 22 p5 CIP

1913 New Theatre Company – few new productions but growth revivals, competition from picture shows and variety undergraduates’ conduct 13 08 22 p7 CIP

1919 proctors visit New Theatre for first time to correct undergraduate misbehaviour - stink bombs etc [5.11]

1922 George Rylands, President of Marlowe Society plays 'Diomedes' in Troilus & Cressida & encourages young photographer named Cecil Beaton [3.12,2.2]

1922 The performance of the musical comedy "My Nieces" at the New Theatre was delayed for ten minutes as the result of the unsportsmanlike behaviour of a number of undergraduates in the stalls. During one scene one of the young men threw a jumping cracker on the stage. The members of the company were startled and cries of indignation arose from all parts of the house. The manager had the curtain lowered and the stage cleared. The Proctor and "bulldogs" appeared on the scene, being received with the customary cheers. After a number of names had been taken a large party of undergraduates left the Theatre, their exit greeted with applause. Afterwards attendants found a number of crackers in the Theatre c22 10 31

1923 Charles Coborn, the veteran comedian famous for his singing of "Two Lovely Black Eyes" and "The Man Who Broke the Bank at Monte Carlo" recalls an early visit to Cambridge: "We were drummed out of Cambridge a day before we had arranged to leave because of having infringed some Medo-Persian law of the Vice-Chancellor by stationing ourselves on market day in some prohibited place". He also met two gypsy brothers named Smith who lived in caravans and supported themselves by chair mending. One was father of the now well-known Gypsy Rodney Smith. c23 10 03

1923 The forthcoming production by the Bijou amateurs brings into prominence once again a club that has held a big position in the life of Cambridge for the last 50 years. In 1870 Mr W B Redfern founded the Bijous, who took over premises on Peas Hill, where for many years was provided the only dramatic performance in Cambridge that were given with any regularity. As time went on the club found that the old Peas Hill theatre was not big enough for them and finally removed to the old skating rink in St Andrews's street, on the site of which the present New Theatre was built. It was not until 1881 that ladies were introduced into the cast, the female parts having before that date being taken by men c23 03 30

1923 This week is the last of a successful variety season at the New Theatre, Cambridge, and the programme forms a very attractive wind-up. It consists of comedy and more serious turns combined in very acceptable proportion; all the turns are quite good and very entertaining. Gaston Morrel is a comedian of a type but little known to Cambridge, in that he never says a word. His turn is called "Cleaning a lamp" and since a certain beverage of inebriating properties and a ladder are used, then there is some excitement. Laura and Kaley, a couple of witty ladies attired as school girls, sing and tell funny stories. Nan Foster, a vocalist with a pleasing soprano voice, sings some charming songs. Joe Cohan and Anna Dorothy play the old old comedy of the quarrelling husband and wife, their turn being known as "Two Wise Fools". Fred Keeton, a comedian is a very cheerful soul, with a partiality for donuts with jam in the middle. He sings a lengthy ballad on the trials and tribulations of a fireman c23 09 09

1924 That enterprising organisation the Cambridgeshire Band of Hope Union, under the energetic direction of Mr and Mrs David Moore, are giving the pageant of old Cambridge, "Olde Sturbridge Fair" in the Guildhall next week. This pageant was first produced in 1914 with great

success. It has now been re-written and includes a weird and fantastic scene with a witch and her retinue of Cambridgeshire imps, with which she hopes to work dire evil on Cambridge town. It is hoped schoolteachers will take parties of children to see this locally historical pageant c24 04 21 1924 The quality of the entertainment presented by the People's Theatre, East Rd, Cambridge, by Mr James Weight is, with occasional lapses, "getting better and better". Messrs Harvey and Taylor's "Boom" company provides enough laughter in the two hours' programme to make even "Dismal Jimmy" unbend. Miss Dorothy Owen, is a charming soubrette with a speciality as a clever child mimic, and Will Osborne, a light comedian, is no stranger to Cambridge. He did much concert work on behalf of Addenbrooke's Hospital in the war days c24 07 09

The chief attraction was the pageant depicting Stourbridge Fair in 1450, a brilliant affair for which the Women's Institutes were responsible. Over 500 performers took part. Among the gay throng were monks and nuns in the sober habits of their orders and an undergraduate or two. Morris dancers, jongleurs and mummers, with a dancing bear have a merry performance c74 07 13

1925 Ralph Richardson appears at New Theatre [4.9]

1925 The danger arising from coins being thrown on to a theatre stage was emphasised when a man was fined £1 for damaging an electric bulb in the New Theatre. The bulb was splintered and flying glass might have gone into the eyes of the artistes and cause serious injury. Defendant said he threw two halfpennies to a comedian because he did not like the song he was singing. He did not know a bulb was broken c25 09 18

1926 D'Oyley Carte visit New Theatre, long queues [2.15]

1926 The old Theatre Royal, Barnwell, has been acquired for a repertory theatre. The auditorium is to be re-seated and the stage remodelled and equipped on modern lines. It will have its own company of actors and actresses and a play will be presented each week during term. Mr Herbert Prentice of the Sheffield Repertory Company will be resident producer. The building will be known in future as the Festival Theatre and it is hoped to establish with it a training centre of dramatic art c26 04 27

1926 Mummers founded [4.20]

1926 When the new Festival Theatre in Newmarket Road, Cambridge, opens on Monday a fresh phase in the history of the Drama in England will have commenced. Without destroying the principle of the old Theatre Royal, with its memories of the old Regency days, the promoters of this new venture have so adapted the building that it is the most modern and up-to-date in England. The new stage gradually merges into the stalls by a series of shallow steps, behind is a revolving middle stage backed by a raised and sliding backstage with the cylindrical cyclorama as its background. The lighting will be a special feature and the theatre will be warmed by a central heating system c26 11 20 [2.16]

1927 Festival Theatre opens Roof garden, W.B. Yeats visits as does George Bernard Shaw to see a performance of his 'Androcles & the Lion' [2.21,4.1,42] New Theatre installs Samoiloff stage lighting [4.6]

1927 Part of the club room of the Footlights Dramatic Club above the Masonic Hall in Corn Exchange Street Cambridge was damaged as a result of a fire with flames coming through the roof. It was fortunate it was discovered early or it would have worked round to a little stage where inflammable material might have created a more alarming blaze. It is feared some photographs of former members of the club have been destroyed. The water came through the ceiling of the Masonic Hall and the fine dance floor was soon flooded. The Rodney Dramatic Club had engaged the Hall for a dinner dance and it may not be available for part of the function. CDN c 2.5.1927

1927 The Festival Theatre in Newmarket Road, Cambridge has opened a roof garden. In warm weather there could hardly be anything more pleasanter than a meal on the roof preparatory to seeing the performance below and there is not the slightest doubt that it will be a great attraction to visitors. The view is not extensive, it is true, but the surroundings are novel and amongst undergraduates it will certainly be “the thing to do” as often as funds permit. CDN c 10.5.1927

1928 New Theatre announces its largest profit - £2,617 [2.22]

1928 Negotiations have been concluded for a fusion of interests between the Oxford Playhouse and the Festival Theatre, Cambridge and J.B. Fagan and Terence Gray will be jointly responsible for the policy of both theatres. There will be an interchange of companies between Oxford and Cambridge and the ultimate aim will be the setting up of a theatre in London. When the ensuing term is finished the Oxford Playhouse will be demolished and an entirely new theatre constructed. c28 10 14

1929 University Mummers formed, first group to admit women to full membership (by Alastair Cooke 1928, first performance Central Hall 1929) [2.18,7.9]

1929 Cheers greeted George Robey, the great comedian, on his initial entry at the Cambridge New Theatre. This riotous reception came, of course, from a huge contingent of youthful ‘Varsitymen’ but the theatre was packed in all departments. The brilliant show was carried along by waves of cheering, culminating in a furore at the end and a great roar for a speech to which Mr Robey responded in his own inimitable style and the ‘house’ departed in good humour. He had never appeared at the New Theatre before and so we had the unique spectacle of a famous father following his son, for Mr Robey junior was up at Cambridge a few years ago and appeared there in two of the Amateur Operatic Society’s productions. CDN 5.11.1929

1929 Before the war the only real place of amusement in Cambridge was the New Theatre and even that found it necessary to close down when the undergraduates were away. Today we have two theatres, five picture places and frequent amateur productions. Recently I decided to see a show but the Central Cinema had no seats under three shillings unless I queued for two hours. I tried the Festival Theatre but they only had a ‘standing seat’; people were fighting to get into the New Theatre and the A.D.C. only had expensive seats left. As I trailed home I wondered where all the people and the money came from CDN 7.12.1929

1930 Many in Cambridge will bid good-bye with regret to F.C. Pool, the general manager of the New Theatre. Despite ever-increasing competition he saw record profits and turnover in his first full year. His successor is Bertram Brown who is not used to the ways of Cambridge undergraduates but has had something to do with Leeds ‘medicals’ and imagines they are much the same type 30 10 04a

1930 The visit of Jack Hulbert’s popular review carries the mind back to 1913 when he made his first appearance at the New Theatre in the May Week production ‘Cheer-oh Cambridge’ of the Footlights Dramatic Club. I remember his sprightly dancing, which has since developed so successfully. Then in 1921 we had Claude Hulbert making his first appearance in the Footlights production of ‘What a picnic’ 30 12 06e

1930 Stars such as Jack and Claude Hulbert delighted Cambridge audiences in their early days. The latest is Harold Warrender who just two years ago was the mainstay of the University Footlights production, acting in many of the skits. It was very evident that he had great gifts and he is now playing at the Criterion with the famous Alice Delysia in a new farce, ‘A Pair of Trousers’, making the most of the opportunities it offers 30 12 27d

1931 Terence Gray profile – 31 04 24a

1932 New Theatre transformed, upper circle [1.14]

1932 working arrangement announced between Festival Theatre & Gate Theatre London [1.14]

1933 New Theatre to convert to cinema, 100 staff out of work [1.15]

1933 Festival Theatre 'farewell season', rescued by J.G. Macleod with £2,800, has difficulties finding contemporary plays [1.16,1.17]

1933 ADC stage & scenery dock destroyed by fire [3.15]

1933 George Robey, knighted in the New Years Honours, appeared at Cambridge Guildhall with a variety company in the 1920s and made his last appearance at the New Theatre in September 1933. The Daily Express asserts that he took a science degree at Jesus College and was an engineer for four years. In his autobiography Robey claims to have had part of his education in Cambridge but says his father's speculations went wrong and his undergraduate dream had to be dropped. Now Dr Brittain, keeper of the records at the college, has proved that he never was a member of Jesus, although he had once hoped to become one. CDN c 8.1.1954

1933 Sherlock Holmes play rag recalled 33 02 18a

1933 Greek play – 33 02 15a & 33 02 15

1933 Terence Gray has been connected with the Festival Theatre for seven years. Many of his productions have aroused the most intense antagonism and many times caused me to gnash my teeth and anger. It has always been a place of experiment. It set out to present the best plays in a modern manner, introducing new devices: the cyclorama, atmospheric lighting, formalised scenery. Controversies were frequent. But his work was never boring and frequently exciting. I would not have missed any of the productions. 33 04 20 & a

1933 Keen regret has been expressed that Terence Gray proposes to give up his directorship of the Festival Theatre at the close of term, after seven years of magnificent work. Efforts are being made in University circles to enable the theatre to continue. Mr J.G. Macleod has expressed a wish to run a Festival season, but his plans depend on a guaranteed sum of £4,000. He has produced, acted and written for the theatre but is not one of those who believes in queerness for the sake of queerness. 33 05 13b

1933 The New Theatre has closed for the Summer Vacation by which time it will probably be converted into a 'talkie' house. Even star actors have failed to attract crowded houses – apart from the D'Oyly Carte Company. It will mean the throwing out of work of over 100 staff, several of whom have given many years to its service. In nearly every town the story is the same. Owing to the competition of the talking films the theatres are suffering as never before. As many as 157 have closed in the past twelve months. 33 06 17a

1933 Cambridge's New theatre is to be run as a cinema but every effort will be made to continue some theatrical form of entertainment. It has been leased to Mr P.V. Wallis who was the originator of the Central Cinema ten years ago and later took over the Tivoli and Playhouse cinemas. A Western Electric sound projector system will be installed together with some structural alterations and it is hoped to reopen in September. 33 07 25, 33 08 15

1933 Sir – it is a disgrace to Cambridge that our only theatre, the New Theatre, should close like it has done and have to re-open as a cinema. It used to be the finest in the Eastern Counties. When such attractions as Ruth Draper, Jack Payne and Matheson Lang visited it was packed and many people were turned away. But they put up prices and had too many variety shows instead of good plays and musical comedies – Lionel Cherry 33 08 18

1933 Godwin Hunt was one of the most popular comedians and vocalists that Cambridge has ever known. Born at Soham, he was associated with many famous theatrical enterprises including the D'Oyly Carte Opera before becoming Lay Clerk at St John's College. He was the founder, 30 years ago, of the Magpies Concert Party which enjoyed a tremendous vogue when amusements were not so plentiful as today. Up to the war they were a male voice quartet but then it became a mixed concert party who travelled far beyond Cambridgeshire. 33 12 06

1933 Old time minstrel entertainment and Memories of the old Arcade – 33 08 14

- 1934 Kings College offer to rebuild ADC rejected, issue appeal [1.20,1.21]
- 1934 rumours that Festival Theatre to close are denied, starts Cambridge first repertory [1.22, 1.23]
- 1934 Arts Theatre Company registered [2.2]
- 1934 Cambridge's New Theatre has been hit by the theatrical slump which began in London in 1932. There was a shortage of plays in the provinces and the alternative of plays eked out by variety shows had failed. The Directors have been unable to let the Theatre to a repertory company and had no choice except to run it as a cinema with occasional stage plays until the present financial depression has passed away 33 12 30
- 1934 play performed in Bloy's smithy, East Road – 34 02 26
- 1934 'Overture to Cambridge' had its premier at the Festival Theatre. The play, written and produced by the Director, Joseph Gordon Macleod, exposes the pettiness of Town Gown and University. It tells of an invalided idealistic Mayor who comes to be regarded as a madman. His wife is killed in a car accident, his daughter becomes deranged and he falls to his death whilst addressing a meeting after being 'debugged' by a crowd of undergraduates. As he hovers between life and death he sees the future, with people living in the co-operative ideal which he preached. 34 10 10
- 1934 Fred Tuck was a great performer on the concert platform. 'Funny Fred' was a comedian but also a conjurer, juggler, tumbler, raconteur and trick cyclist. His most popular character was that of an old-fashioned clown in traditional make-up. His most famous trick was to balance a burning newspaper, made into a cone, on his nose until it had practically burnt out. He would make his exit balancing a chair on his nose, or the table he had been using for his tricks, if it was not too heavy. 34 10 19
- 1935 ADC reopens, January, announces that it 'welcomes town' [1.2,2.4]
- 1935 Festival closure announced : Macleod had tried to make it part of the Cambridge scene & invested his own money but claims "Cambridge does not want us"; "Save the Festival" meeting, "not to close permanently", October [1.3,1.4.1.5.,2.3
- 1935 Cecil Beeton makes name as dress designer at ADC 7.2.1925
- 1935 The new A.D.C. Theatre in Park Street was opened by Miss Ellaline Terriss replacing the one destroyed by fire 14 months ago. It was a wonder it had not burnt down every time the stage was used years ago, as there was no fire-proof curtain, the theatre was lit entirely by gas and the proscenium made of painted canvas stretched on wood batons, reminisced E. Mellish Clark 35 01 17
- 1935 The news that the Festival Theatre is definitely closing will come as a severe blow. When Joseph Gordon Macleod took over from Terence Gray two years ago he set out to make it a very definite part of the life of Cambridge. Not only has he worked tremendously hard but he has also sacrificed every penny of his personal capital and it a great blow that Cambridge has not supported him. One is equally sorry for the company which was developing into one of the strongest repertory companies in the country. Now they will be split up. 35 04 27
- 1935 The finest Chinese actor of today, Mr Mei Lan-fang, who has to have a three-strong bodyguard to protect him from kidnappers, visited the Festival Theatre. He granted the News his first interview ever to an English newspaper as Chinese actors have a genuine dislike of publicity in every shape and form. Since Mr Mei could not speak English, and the reporter knew no Chinese, the conversation was conducted through an interpreter. He is actually a female impersonator for in China women do not take part in classical drama. 35 06 08
- 1935 The Theatre Cinema returned to a programme of cine-variety with a programme of stage turns and films. The variety bill is headed by that inimitable comedian, Max Miller, 'the cheeky chappy'. All his jokes have the air of spontaneity and his suggestion of breezy good humour is infectious. The stage programme includes the most daring roller-skating acts we have seen, a

juggler and a young lady who has achieved success as a wireless crooner. The principal film is 'The Personality Kid' with a clever cartoon and the News. 35 06 20

1935 The management of the Theatre Cinema (New Theatre) have returned to their popular cine-variety policy. There are four excellent stage turns and an exceptionally fine film. A snappily presented singing and dancing act featuring Jack Lewis and his Rolling Stones with the Wellington Sisters forms the principal item in the stage show, combining dancing by a cheery trio, saxophone work and percussion 'fireworks'. Savona is a remarkable juggler while 'the racketeers of mirth, Roy Lester and Jack Cranston offer a quick-fire cross-talk act. Finally Sereno and June's head-to-head balancing and tumbling act has much which is new even in these days when vaudeville simply abounds with this kind of act. 35 08 06a

1935 Joseph Gordon Macleod, director of the Festival Theatre, has announced its closure because of lack of further capital – 35 10 07a

1936 It is many years since Raymond Bennett was a Cambridge semi-professional entertainer who made early appearances in cine-variety at the Playhouse, Mill Road. He has progressed rapidly and Cambridge audiences now have an opportunity of seeing him at the Theatre Cinema with his partner of many broadcasts. Bennett and McNaughton have achieved great success on the music halls, including the Holborn Empire, and have attained great popularity as broadcasting stars. Those who have listened to their broadcasts will be glad of this opportunity of renewing acquaintance with a popular local artiste 36 01 17

1936 The Cambridge Arts Theatre opened with a gala performance by the Vic-Walls Ballet Company. It is a beautiful piece of work with furnishings in autumn leaf and includes a restaurant and café bar. The cinema and sound apparatus is of the very latest type with facilities for the reproduction of gramophone records designed by Messrs Morley and Duke. The fresh air supply can be warmed or cooled while the main heating by water-fed radiators is instantly adjustable to meet the vagaries of the English climate 36 02 04 & a [1.1]

1936 The world premier presentation of the new GPO film unit production 'Night Mail' was given as the second gala performance in connection with the opening of Cambridge's delightful new Arts Theatre. It deals with the work of the Royal Mail night train from London to Scotland with plenty of novel-angle shots and some quick-fire doggerel which is made to synchronise with the train beats. Other features were a highly-diverting slapstick Mickey Mouse cartoon and the British Movietone News 36 02 05a

1936 The Cambridge University Mummies, who are still the only University Dramatic Society to admit women members equally with men in all their activities, are presenting 'Heartbreak House' by Bernard Shaw. In the cast there are four members of Newnham, the most prominent of whom is Miss Teresa Mayor. She will be supported by Beryl Eeman, Cecilia Hopkinson and Deirdre Moore. The play will be produced by George Rylands who is well known for productions at the A.D.C. 36 02 06a

1936 Billy Cotton, who is bringing his popular band to the Theatre Cinema, St Andrew's Street, has a style of his own. He stands coolly in the centre of the stage and with little more than a flick of the wrist gets just what he wants from the musicians. The band is a variety show in itself, best-liked on the stage because the wireless and gramophone cannot do them full justice. The comedians are especially good, there are two Japanese entertainers, a conjuror, dancers and a pair of trick cyclists. But Cotton is also a keen racing motorist and has just bought Sir Malcolm Campbell's original 'Bluebird' which he intends racing at Southport. 36 11 28a & 36 12 01

1937 Cambridge Festival Theatre has started a million farthing fund to ensure they have money available in case of emergency. The weekly receipts have to cover weekly expenses. When a bad week comes the manager hopes things will pick up next week. During the summer people had come to the theatre but recently there had been a falling-off. The workers' voucher system had increased attendance but the vouchers were finding their way into the hands of people who were

not entitled to make use of them. They entitled people to purchase two seats for the price of one
37 01 06

1937 The Festival Theatre in Newmarket Road reopened under entirely new management. The building has been redecorated and improved and will begin with what it is hoped will be a successful regime of plays, ballet and opera. Meanwhile the glamorous Marlene Dietrich's Technicolor film 'The Garden of Allah' is the principal attraction at the Regal Cinema while the Kinema presents 'The Princess comes across' starring Carole Lombard and Fred MacMurray 37 10 15 Festival Theatre reopens under J.B. Somerville [3.18]

1937 The fate of the open-air theatre on Christ's Pieces is in the balance. Michael Walsh has been most unlucky; three of the four performances have been spoiled by rain. Thursday's show was particularly unfortunate as the programme, with the Town Band and St George on his charger, was essentially an outdoor show. His decision to transfer it to the Corn Exchange was taken to spare the 80 young performers disappointment. He says the drops of rain that fell from the roof to members of the audience are nothing compared to the tears that would have fallen on his head had he decided to cancel the production – 37 07 17b [3.16]

1937 Cambridge Repertory Players moving from Festival Theatre to Cosmopolitan Cinema which will be renamed the Little Theatre – 37 09 04

His son, a young man of brains, has won a scholarship to the university but feels he is looked down on because of his father's job. What makes things even more awkward is that his aunt is a bedder at his college who is very fond of whisky. Without a doubt the play was greatly appreciated by the audience at the performance given by the CUP Amateur Dramatic Society 37 10 02

1937 Festival Theatre refurbished with electric candelabra from Alhambra in London – 37 10 20f

1938 After a successful fortnight of the pantomime 'Cinderella', the Theatre Cinema is closing down without any indication as to what its future may be. It was 42 years ago that the New Theatre was opened and has had a great history. Many of our leading actors have appeared and all tastes catered for – comedy, drama, musicals and grand opera. It was the coming of films that changed the Theatre's fortunes and after a hopeless struggle it was converted into a cinema with an occasional week of variety. 38 01 08a [3.19]

1938 New Theatre reopens for performance of The Mikado [3.20]

1938 Memories of stage and screen – 38 05 31w

1938 Festival Theatre to reopen under direction Neville Towne with his own Repertory Company – 38 10 19

1938 The Theatre Cinema reopened after a closure of over nine months with a performance of 'The Mikado' by Cambridge Amateur Operatic Society. They had found the building in a poor and dirty condition and put in much work to recondition it. Now it was crowded with a delighted throng; it was itself again. That pre-overture buzz of conversation created a delightful feeling of mild excitement. At the final curtain everyone was thoroughly happy 38 11 22

1939 St George's players first performance – 39 02 04

1939 Plans to make the Festival Theatre a twice-nightly music-hall were knocked on the head by the war scare last September, a bankruptcy hearing was told. A lady trading as 'Diana Tempest', who was previously a clairvoyant under the name of Alexia, became actress manager at the Festival and the Theatre Royal Aldershot. But the venture was not successful: she did not take more than £50 a week and the expenses were £90. She was now earning £2 a week in Cambridge by her clairvoyancy. 39 03 17a

1939 Theatre Cinema, St Andrew's Street, known for many years as the New Theatre, was closed in January of last year after the pantomime but specially reopened for one week in

November for the annual production by Cambridge Amateur Operatic Society of 'The Pirates of Penzance' Now the ABC company has decided to use the building once again as a cinema 39 06 17

1939 Raymond Bennett has made a name for himself on the professional stage and will soon be returning to his home town, Cambridge, as the principal comedian in the pantomime. He has recently spent some weeks entertaining troops and homes to go to France shortly with Wee Georgie Wood and Jasper Maskelyne. He has faced big audiences at the London Palladium, the Coliseum and the Alhambra but confesses to a slight nervousness about coming home. 39 12 16a photo 16b

1940 Raymond Bennett, the Cambridge-born comedian, claims to have been the first to use the new popular chorus song "The Chestnut Tree". "Many years ago," he told me, "whilst I was here in Cambridge, I was going down to the Cam Sailing Club grounds at Clayhithe, and on the way I passed a school where the children were doing an action song. I watched them for a time, and it struck me that here was something that could be used as a good chorus song. And I memorised enough to enable me to sing it with success for a good many years 40 01 12 CIPof

1940 Play 'The Seven Deadly Virtues' by Hugh Ross Williamson takes place opposite Trinity – 40 04 27b

1941 Sanger's Circus to close due blackout, lack animal feed, petrol difficulties etc; during WWI camels and elephants used for ploughing and haulage – 41 08 30a

1941 Max Pemberton 'Varsity Tales' articles in Windsor Magazine includes a tin theatre with troupe of comedians; shower of oranges, boots etc – 41 08 23 # c.76

1947 St John's Players established (unbroken run from 1949, 40th year 1987) [7.6]

1947 It was "L'Entente Cordiale" night when the redecorated New Theatre, Cambridge, after an almost ten-year closure, re-opened yesterday as a cinema for the showing of Continental films. The Cross of Lorraine hung side-by-side with the Union Jack outside the cinema in honour of the visit of Francoise Rosay, the famous French film star who performed the opening ceremony. The Mayor (Coun. Doggett) wished the venture every success and expressed the hope that successful films may be followed by stage plays. "We have one theatre in this town but in my opinion there is plenty of room for a second theatre, particularly one with a larger stage". Capt A.C. Taylor, Managing Director of the "Cambridge Daily News" echoed the hope that some theatrical shows would be staged c47 10 15 [2.9]

1948 Some years before the recent war, Cambridge's New Theatre, having been a "live" house for over 40 years, not only ceased to be "new" in years but suffered a "sea change" into something neither rich nor rare - a theatre turned cinema - and saddled too with the hybrid title "Theatre Cinema". This was the beginning of a period that might be described as a winter solstice, for the building eventually closed, and during the war it was in the hands of the military. But now, after another brief life as a cinema, it has at last reverted to the type of entertainment for which it was built, and the merry band of players which yesterday presented the first professional "live" show to be seen in the theatre for many years are the successors of a long line of theatre folk, who during the palmy years passed across the New Theatre's stage in glorious array. The

large audience who crowded into the building for the reopening found that the theatre with its re-decoration, modern lighting and stage equipment, including the inevitable “mike”, had been given a new look c48 03 26

1948 History was made at the New Theatre, Cambridge, last night when the International Ballet Company presented the most spacious classical ballet spectacle ever to be seen in Cambridge. And the result was an evening of sheet beauty. A company of over sixty presented a performance outstanding for its virility and attack, and there was a first class orchestra - their numbers made it necessary for them to “overflow” from the orchestra pit into adjoining boxes and the stalls. The work last night was the full-length version of “The Swan Lake”. Leading the superb company is the prima ballerina Mona Inglesby c48 04 13

1949 New Theatre gives backstage tours [2.14]

1949 The audience remained in their seats and the play continued when fire broke out in the men’s cloakroom at the A.D.C. theatre during a performance by the Cambridge Training College for Women Drama Group. The blaze was caused by a smouldering pipe left in the pocket of one of the coats in the cloakroom. At the height of the blaze, the auditorium became hazy with smoke as it drifted in through the ventilators. The audience, composed largely of university members did not panic and cheers greeted an announcement that the fire was under control c49 05 18

The performance was extremely amusing – some of the fun was not altogether intentional c50 12 06

1951 New Theatre changes from Music Hall & revue to season of West End plays [2.19]

1951 A journey, in many ways reminiscent of those made during the war, was repeated by members of the Romas Concert Party. This time it was not through the black-out to some remote RAF site or searchlight emplacement, but to the Cutter Inn, Ely, where they celebrated their reunion dinner. Over 500 shows had been presented for the forces between 1940 and D-Day. They had overcome transport difficulties by commandeering a meat van with a pheasant on the side c51 03 13

1952 New Theatre renovated, install sprung seats & best sound available [3.2]

1952 Arts Theatre ask City Council to help meet their losses but withdraw request “since Council has no pride of ownership of theatre or gratitude over what achieved over last 16 years” [3.3,3.5]

1952 Claude Hulbert, the loveable comedian, heads the cast at the Arts Theatre, Cambridge in his brother, Jack’s production of the famous farce, “Nothing but the Truth”, which ran for 578 performances in London. The Hulberts have many associations with the area. Sons of an Ely doctor both came to Caius College and were enthusiastic members of the Footlights Dramatic Club. Jack appeared at the Arts in “The Hulbert Follies” with his famous wife, Cicely Courtneidge, in July 1941, while Claude had a notable success in “Worth a Million” when he co-starred with Edmund Gwen and Ruby Miller. CDN c25.3.1952

1952 Considerable reductions in the price of admission are to be made when the New Theatre opens next week which represent the absolute minimum that can be charged. When really outstanding radio artistes, whose salaries are sometimes fabulous, are booked it may be necessary to revert to the old prices. Most of the alterations have been structural – dry rot had attacked some of the timbers – but an enormous amount has been done to ensure complete comfort with sprung seating and a new microphone installation giving the best sound reproduction obtainable. c52 08 29

1953 Cambridge Daily News feature on Arts Theatre's "17 years of successful endeavour"
[3.8]

1953 with Old Mother Riley there is no compromise – either you like her immensely or you dislike her intensely. And judging by the queues at the New Theatre the 'likes' heavily outnumber the 'dislikes' in Cambridge. In 'Going Gay' she takes the lion's share of the programme in several amusing sketches. The humour is of the simple, homely kind in which Arthur Lucan excels. A lot of people will be looking for the boisterous fun and frolic which has become identified with the name of Old Mother Riley and they will not be disappointed. c53 03 18

1953 A Pageant for Coronation year is to be performed in the grounds of St John's College in aid of the Cambridge Residential Home for Old People. In this enterprise Town and University combine. About 150 people take part from a distinguished historian to a little girl of six. It includes a genuine ancient broadsword lent by Prof G.M. Trevelyan, Master of Trinity and greatest of living historians. Amongst those taking part are Michael Cogman, a nine-year-old pupil from Milton Road School, Charles Batts, Timothy Roach and David Bartlett. c53 08 04

1954 Mr John Gambling of Milton Road Cambridge who has died at the age of 82 was the oldest active magician in the British Isles. A member of the Inner Magic Circle since its earliest days he first became interested in 1881 when he acted as assistant to 'Signor Bosco' and later performed on land, sea, in the air and down a coal mine. During the First World War entertained nearly every evening at the First Eastern General Hospital. After retirement from his post of Borough Road Surveyor he lived a life of adventure. He made many trips to Morocco and was the only white magician known to have performed in a harem. The Moors learned to recognise his pointed moustache and would gather round him clamouring for an on-the-spot show. CDN c 22.3.1954

1954 New Theatre reopens [3.11] The crowds who queued up for tickets outside Cambridge's New Theatre put paid to the story that Music Hall is dying. There was slap-stick comedy, Eddie Arnold with his variety of voices, Brian Andro on the high-wire, a strong-man acrobat, Rusty – a dog of mathematical powers, Bobby Collins – a first-rate whistler and the Lee Youngsters, a trio of singers. The star attraction was Tony Brent, a crooner of promise, but surely there will come a time when we shall have heard his songs just once too often. Forthcoming attractions include Don Saunder's Circus and Don Lammaree and his Lone Star Road Show, Phyllis Dixey and Cinderella on Ice. If the Cambridge public give it support then even bigger names will be attracted from London. CDN 28.9.1954

1954 It is said that nude shows are killing the variety theatre. Well now the Cambridge New Theatre gives you a chance to form your own opinion. The leading lady is none other than 'Jane', the famous strip cartoon character; we catch glimpses of her flitting behind illuminated screens or lying on discreetly lighted couches. There are also a variety of young ladies performing weird and wonderful gyrations in varying stages of dress and undress – all for the sake of art and culture no doubt. In my opinion nude shows are becoming too frequent and the novelty is beginning to wear off somewhat. CDN 16.11.1954

1954 George Rylands to produce Troilus & Cressida for BBC tv [3.12]

1955 ADC celebrate centenary [3.13]

1955 Cambridge's New Theatre has introduced stereophonic sound for a production of 'Las Vegas'. There is nothing really revolutionary about the system which consists of a series of loudspeakers hung in various parts of the auditorium through which the voices of American singing stars are relayed as a background to the action on the stage. But it does show enterprise on the part of the producers and enterprise of any kind should be encouraged.

55 03 20

1955 The Arts Theatre unveiled an extension to its Roof Garden restaurant, decorated in gay modern style and complete with the latest Espresso Coffee equipment. Some regretted the

reduction of the outdoor terrace space but with the fickle English climate the new area would prove an agreeable amenity both for meals and during theatre intervals. Losses in the theatre could only be made up by profits from the Cinema, scenery studio and catering activities. Once the novelty of television had worn off an increasing number of people would again seek the solid satisfaction of live performances. 55 05 11 [3.14]

1956 New Theatre installs new electronic organ, February; closes March [3.21,3.22]

1956 Playhouse closes due to Entertainment Tax : used to have one single-turn music-hall artiste each week with pictures, had small orchestra [3.23,7.3]

1956 New Theatre closes in Jubilee year – review performers 56 03 17

1956 Danny Kaye, the world-famous comedian visited Cambridge Guildhall and in the 50 minutes he occupied the stage he promised to ‘liberate’ the wives of University Dons and sang popular songs such as ‘Ugly Duckling’. Crowds besieged his car, seeking autographs 56 05 15a & b & c

1956 Raymond Bennett, the talented comedian and theatre manager laments the closing down of the Playhouse in Mill Road. It was there he made his debut as a single-turn music hall artiste. In those days it had a small orchestra and had one turn each week with the pictures. They included Godwin Hunt, baritone and humorous vocalist, George Gass, comedian of ‘The Magpies’ concert party and Sydney Pratt the conjurer. 56 12 22a & b

1956 Hundred of people daily pass the unobtrusive grey brick Festival Theatre building in Newmarket Road, but few are aware that some of the foremost names in British acting began to learn their art there. Now used as a wardrobe and for scene painting by the Arts Theatre, the footlights have been dimmed and the seats are empty. But the stage and auditorium are in good condition and one day the curtain may rise again. [detailed feature 56 12 10 & a]

1957 ADC improvements to auditorium [4.8]

1957 Hugh Woodhouse of St John’s, playwright – 57 06 08b

1958 Derek Jacobi, a St John’s College Freshman, will take a part in a new production at the ADC. He played ‘Hamlet’ at the Edinburgh Festival this summer and is to have a film test with 20th Century Fox. It is possible, to judge from the identity of one member of the audience in this his first play of his student days, that the West End may be interested in him too. 57 10 23a

1959 Jack Hulbert, the famous actor, took his M.A. degree watched by his wife, the actress Miss Cicely Courtneidge. Jack became a B.A. of Caius college before the First World War and so has long been eligible for this higher degree. As an undergraduate he wrote and took part in a large number of entertainments and starred in the Footlights revue. His first big success was in ‘Cheer Oh! Cambridge’ at the Queen’s Theatre London in 1913. Local people wish success to one of the most warm-hearted couples in show business. 59 12 14

1960 Arts Theatre appeal for £75,000 memory Keynes [7.12]

1960 New Theatre history feature – 60 01 29

1961 ‘Beyond the Fringe’ hit the Arts Theatre audience with the force of a thunderbolt. The four young men performed throughout in lounge suits against an unchanging background. There was Jonathan Miller, elastic in voice, features and limbs, Peter Cook with his more serious type of humour and semi-apologetic expression and Alan Bennett who looks like a cross between an aged professor and an endearing but mischievous schoolboy. The music was in the hands of

pianist Dudley Moore, whose prize piece was a variation of 'Colonel Bogey'. It was certainly a revue in the highest calibre of entertainment 61 04 25

1961 Cambridge Pageant, Castle Hill – 61 07 21

1961 Frank Cross of Brampton Road Cambridge gave his first 'Punch and Judy' show when he was ten years old and has given countless performances all over the country. He is continuing a tradition of three generations of puppetry which started when his grandfather, a Wesleyan preacher in Lancashire, used to entertain the children at Sunday school parties. Frank uses the same script as his grandfather and a paper mache cast of a 300-year old oak Punch. He has taught his son and daughter to work the puppets and now his four-year-old grandson is under instruction. 61 08 07

1971 Technical College new auditorium, theatre completed last autumn [17.4]

1972 Arts The Cambridge Arts Theatre has suffered "staggering" financial losses this year - often £1,000 a week – and the Secretary and General Manager, Mr Andrew Blackwood, said yesterday : "We can't go on like that. We would soon be out of business". The reason for high production costs was that touring companies require guarantees of £1,500 or more before they would visit Cambridge. Seat prices generally ranged from 40p-90p and 50p-£1. Audience attendance figures were 14,000 down on the year - and he blamed Cambridge's impossible car parking situation for the loss c72 07 5 [7.13]

1972 Cyril Fletcher last performance as Dame [7.14]

1973 ADC cash shortage threatens shut-down [7.5]

1974 Arch-goon Spike Milligan hosted a reception at the University Arms Hotel with folksinger Jeremy Taylor to mark the release of a double album, "An adult entertainment : Spike Milligan live at Cambridge University", recorded in concert at the Lady Mitchell Hall last year before an invited audience. Spike made a military entrance dressed in a blue-denim jacket – buttoned up wrongly – and a flowery shirt and inspected the guests who lined up in military ranks. He had spent the day in Cambridge being filmed by a BBC crew. In the afternoon he visited the market and briefly served behind the counter of Mr Andy Gray's record stall c74 05 20

1977 Prospect becomes resident company at Old Vic, no longer visits Cambridge [8.10]

1978 Arts Theatre £70,000 loss 1977-78, may need to close for time unless get Local Authority money [8.1]

1978 marquee ballet may close Arts Theatre [8.2]

1978 Cambridge University Footlights Amateur Dramatic Club celebrated the opening of a new cellar clubroom at the Cambridge Union Society. Only a couple of crates of fish were lacking to evoke something of the atmosphere of the late lamented club room, situated above a fishmonger's in Falcon Yard. Clive James topped the bill at an inaugural cabaret. A chunky, rapidly middle-ageing figure with fast-receding, Sinatra-like hairstyle, his sharp vinegary wit seemed to be the essence of monologue. Clive Anderson demonstrated that there might be a place in show business for a genuinely sophisticated stand-up comedian. c78 02 26

1979 Shakespeare on Backs [7.4]

1980 supertent used pop, Canon & Ball [38.11.2]

1982 Footlights centenary, has base for first time in 6 years, since 1971, now cellar Union Soc [7.11]

1982 £1M appeal recital at Barbican by artists who started careers in Cambridge as tribute George Rylands who just retired as Chairman Arts Theatre Trust aged 80 [8.3]

1982 An Aladdin's cave of curious dusty lots comes under the hammer as former stage props are auctioned off at the old Festival Theatre in Newmarket Road, Cambridge. There's a glorious throne, the prow of a sailing ship and a pair of giant Corinthian columns, most of which have appeared at the Arts Theatre, which owns the building. It is said the Festival has a ghost – an old

woman who was brought in to die after being run down by a horse and cart which bolted when delivering scenery. Dame Flora Robson wrote of meeting her. 82 07 16

1984 The Festival Theatre in Newmarket Road, which dates back to 1808, is one of the oldest in the country. It still has many original fittings including what is probably the oldest revolving stage in the country. In 1878 it became an evangelistic mission with religious texts painted on the stalls. Some still survive and may be part of a new permanent display which will feature other memorabilia including a scrapbook of cuttings when it was rebuilt by Terence Gray in 1926. During WWII the building was used for storage by the RAF and is currently the Arts Theatre wardrobe and scenery workshop. 84 12 29 [8.7]

1985 Cygnus Studios, the Cambridge theatre workshop, is closing and the magic props and gadgets painstakingly made by Philip Bond for productions throughout the country and abroad are to be auctioned off. It will mark the end of another chapter in the mixed fortunes of the Festival Theatre on Newmarket Road which closed its doors to productions in 1938 and was bought by Cambridge's Arts Theatre. Now an axe and block, complete with severed head, a stuffed stoat and a thunder sheet to rival the Gods will go under the auctioneer's hammer 85 05 10a

1985 Visitors to Cambridge Festival Theatre's workshop were treated to a dazzling display of pyrotechnics and wizardry when the props and gadgets of Cygnus Studios went under the hammer. A vast severed head – complete with axe and block – swung like a macabre pendulum above the customers. An electric chair burst into life sending a thrill through the audience and Philip Bond, the head of the studios, made sure that the theatre's ghost had a star turn. Then as the auctioneer brought his hammer down for the last time it exploded into a thousand tiny fragments marking the end of another chapter in the Theatre's 250-year history 85 05 21b

1985 ADC history – 85 11 22a

1986 Actors, actresses and directors arrived in Cambridge to mark the 50th anniversary of the Arts Theatre. Eleanor Bron, whose career started with the Cambridge Footlights, arrived first to be followed by Dame Peggy Ashcroft, Timothy West with his actress wife Prunella Scales and Judi Dench. Sir Peter Hall laughed with his old friend Trevor Nunn and was joined by Ian McKellan, the irrepressible Arthur Marshall and the broadcaster Richard Baker. The occasion was a unique recital devised by Dr George Rylands, affectionately known as 'Dadie' 86 01 03 86 02 03b & c elite of British acting world give unique Shakespeare performance - "Strange eventful history" celebrate 50th anniversary Arts Theatre, £15,000 raised [8.5] loses £181,000 at box office [8.5]

1988 Andrew Blackwood retires as Secretary & General manager of Arts Theatre after more than 30 years ¢CEN 2.12.89

1989 Cambridge Theatre Productions will now open all its performances in its home town and hope to get all Cambridge entertainments bookable at a central ticket office. The new visiting director, Robin Midgley, is keen to make it truly local instead of being just a touring company

which happens to have offices in the city. He would also like to see a closer relationship with the Arts Theatre and do a children's show making use of young people from Cambridge. 89 05 18

1989 Cambridge Arts Theatre is to launch an appeal to replace its 650 aging and tatty seats, worn carpets and poor ventilation system. Despite artistic success it has financial problems. Even when a show is a roaring success and playing to packed houses, the theatre makes a £3,000 loss. The problem is worse when operas are performed as a full orchestra reduces seating capacity from 650 to 580. Small profits from catering services, costume-hire and renting out the building for conferences only makes a dent in the overall loss. 89 09 21

1989 ADC installs new behind-the-scenes technology for opening curtains – 89 11 24b

1989 Andrew Blackwood, who has been on call at the Arts Theatre for more than 30 years, has handed over the reigns to a new secretary and general manager. His predecessor, Norman Higgins became first secretary in 1939 89 12 02a

M.J.Petty. A Chronicle of Cambridge News 1888-

Parade of elephants, Chipperfield's circus, 1952

109.61

c.76.2 : circus

Readers have responded with information on Keith and Tudor's circus on Midsummer Common. Mr R. Bainbridge says it was a large wooden building at the junction of Victoria Avenue, where the lamp standard is, at the corner of Jesus Grove. It was pulled down due to the expense of standing there and rebuilt at the bottom of Auckland Road. Mr Keith was the ring master and Mr Tudor was the clown. Sam George competed for a cup given by the late Charlie Rowell. It was a race 20 times around the ring over four hurdles every round. The circus finished late 1893 or early 1894 just before the Royal Show was held on Midsummer Common. He still has some of the building that was built into a shed. 37 01 16f

'One with a memory' writes: "My father put Tudor's circus up twice in Cambridge and once in Ipswich and eventually at the Romsey Town Cement Works, where the main part still stands and is used by Messrs Macintosh for their ever-increasing agricultural department". He has a bill, dated June 1895 which includes six shillings and fivepence for 38 pints of beer from the 'Duke of Cambridge' for the workers. Another reader recalls Samuel Murfitt from Manea, the largest man in the world, who died 50 years ago. His girth was 100 inches and as no hearse could be found large enough he had to be conveyed on a flat. The sashes had to be taken from the windows and nearly 20 men were employed to get the body out. 37 01 22e

1897 At Cambridge County Court Alfred Whitmee, circus proprietor said he visited Shelford with his circus in the autumn of 1896. On the Monday it was a rough day and he could not get the tent up. The month of October was an unfortunate one for him. He owed 30s.(shillings) at Histon and about 7s at Trumpington. He had arranged to start for Sawston but was told he could not take anything away until £2.0.6 was paid for lodging his horses. CDN c. 30.4.1897

1897 Mr Tudor's circus have contrived week after week to place before their patrons a programme not entirely different from those preceding it. The last item on the programme is contributed by the Canadian troupe of comic and scientific skaters, one of the men representing a policeman of goodly proportions, his clothes being apparently inflated to bursting point! His many tumbles and his bounciness when on the ground do not fail to convulse the spectators c1897 06 13

1898 The Barnum and Bailey great street parade will be a wonderful and stupendous spectacle of men, women, children, horses, elephants, wild beasts, chariot, cars and floats. Christopher Columbus, as well as scores of other characters famous in his time, are all truthfully represented in rich costumes. Leading the pageant is one of the most magnificent sights imaginable, a wondrous team of 40 fine bay horses driven by one man. There are rich displays of open dens of wild beasts and carved golden chariots, containing the splendid zoological collections, followed by 20 elephants, and allegorical chariots, illustrating nursery rhymes and children's fairy stories. The whole affair is grand and inspiring CDN 1898 08 23

1898 Cambridge, the one and only, Barnum and Bailey Greatest Show on Earth, grounds on Huntingdon Road, September 8th. An overwhelming equestrian department, teeming with every valuable attraction, filled with wonders, overflowing with grand features, crowded with startling surprises, brimful of novelties, running over with mirthful scenes, and abounding with thrilling sensations and glorious events. Presenting, in vast Amplitude of Detail, Wild Beast, Chariot and Pedestrian Races, Fearless Contests, Trials of Speed, Skill and Endurance. A World's Fair of modern marvels. 1,000 men, women, giants, midgets, dwarfs, tattooed people, sword swallows, bearded and long-haired lady, dog-faced boy, armless and legless men, snake charmers. 1,000 marvellous sights and curious creations. One ticket admits to all the attractions. (Advert) CDN 1898 08 27

1898 The securing of the Midsummer Common for the show grounds of the Barnum and Bailey's Circus, having been completed, they have found it necessary to make a change in a number of their plans for the visit to Cambridge. The large number of excursionists from the country districts who will be attracted by the presence of the show will be thankful for the change. It will be possible to enjoy the evening show with comfort, in the consciousness that it is easy to catch the trains afterwards. The big show will arrive in Cambridge on four special trains, with a total of 74 railway cars. The unloading will be done in the G.E. railway yards, and the entire city of canvas, 14 tents in all, will be put up in the morning before the parade starts out. Every bit of the show is coming to Cambridge CDN 1898 08 31

1898 Today Cambridgeshire folk in their thousands have seen the a procession of the "greatest show on earth" and now they can exist through the remainder of a dull vacation chewing, mentally, the cud of their reflections. Before dawn Barnum-struck people could be found waiting for the arrival of the monsters and wonders of the world. And then for hours there was a steady traffic of all manner of men and beasts and creeping things. Huge elephants and gilded cars, endless teams of horses - a continual movement of deliberate and well ordered detail. First came four of our borough police, looking as smart as possible on their coal black steeds, though somewhat warm. The Sun came out full faced to see the show. It was broiling hot! Many a grizzled old agriculturist who came to scoff remained to praise, and exclaimed perpetually on the beautiful cattle. In their cages, amid lions, bears, wolves and hyenas came one after another keeper, calmly sitting on his stool, cynically surveying the wonder-struck lines of the town's and country's curious. Then the spectacular pageant, "The return of Columbus to Barcelona", another

band, the elephants wearing strange and curious instruments representative of far off climes, and at length that vast array of the world's collected curios is past. Everyone is going to see the show. For hours the box office has been a Klondike CDN 1898 09 08

1899 Tudor's circus provides thoroughly enjoyable evening's amusement, and large numbers continue to take advantage of the efficient catering. This week Mr Tudor has been successful in securing the services of George Lockhart and his troupe of performing elephants. They perform many clever tricks & a series of gymnastics exercises. The smallest of the three rides a tricycle around the arena; the older two waltz to slow music and the three combine in a short - happily short - concert and perform other diverting antics. The turn arouses a great deal of enthusiasm, and is really worth seeing c1899 04 19

1899 Tudor's Circus, Auckland road, Cambridge. At great expense. Engagement of the greatest Wonder on Earth. The Colibris midgets, nine in number, nine Liliputian people as read of in Gulliver's travels. These miniature male and female artistes ranging from 21 to 29 inches in height, acknowledged to be the marvels of the age. See the midget acrobatics, the midget Christy minstrels, the midget gymnastics and equilibrists, the midget musical grotesques, the midget vocalists. See their handsome midget ponies and the magnificent miniature carriages – Advert c1899 04 23

1900 The proprietor of Tudor's Circus of Varieties, Cambridge was sued by Foulger's Band. They had been hired for three weeks. The band was composed of five performers – cornet, piano, euphonium & two violins. They were each paid £1.12s.6d. per week. On the first night it was a “scratch band” as Mr Foulger could not be there, & the pianist could not accept the engagement. An important feature in the performance was singing and dancing but a piano was not an essential part of the orchestra. The only complaint was from an inferior artiste who could not sing & had no music c00 07 19

1900 It is doubtful whether a better programme has been presented at the Cambridge Circus of Varieties than that given this week. Mr Fred Brooks has probably appeared before the Cambridge public more than any artiste on the boards – first at Sturton Town Hall and later at Arcadia. He has lost none of his vocal ability and the best of his songs is “Good old Cambridge”, a topical effusion c00 11 03

1900 Lord John Sanger's circus is paying its annual visit to Cambridge. The spacious marquee is erected on Midsummer Common. This afternoon's performance was somewhat sparsely patronised. The absence of children was especially noticeable. This was probably due to a warning issued by the medical authorities to parents that they would “incur considerable danger if they were allowed to attend the performances” in view of the prevalence of diphtheria. The performance will be repeated this evening when a football match between a “centre-forward” elephant and a Cambridge footballer will be played CDN 1900 11 07

1901 The circus in Auckland Road, Cambridge, reopened on Eastern Monday, Mr G.S. King having become the sole lessee for a year. Leonie Clarke's cats are the prime attraction. Cats of all sizes and colour go through a performance the like of which has never previously been seen in Cambridge. Rope and wire-walking and balancing are all done with consummate care and a fine specimen of the feline tribe descends from the top of the building by means of a parachute. Rats and mice feature largely in the performance. The animals do everything but talk CDN 1901 04 09

1902 Thomas Askham applied for a licence for the public performance of stage plays at the Circus of Varieties, Auckland Road, Cambridge and presented a petition of 900 signatures in favour. The Committee would recommend it on condition that the old buildings were pulled down, that electric light was placed throughout and at least four hydrants connected with the

water supply. Plans would have to be produced. Mr Askham intimated his willingness to do so.
CDN c 2.4.1902

1902 The following notice has been issued by the Vice Chancellor of Cambridge University.
“Whereas the attendance of members of the University at certain public exhibitions, performances and places of dramatic entertainment has been productive of grave disorder, notice is given that the attendance of any member in statu pupillari at the Circus of Varieties, Auckland Road, is prohibited and will render him liable to be punished by suspension, rustication, expulsion or otherwise.”c02 06 06

1902 An entirely new company is responsible for the programme at the Auckland Road Circus, Cambridge this week. The judicious mixture of “turns” by music hall artists and items by circus performers of the old stamp seems to find favour with Cambridge audiences. Miss Babette Rose, a clever vocalist and dancer merited the applause awarded her. Ecnarf, a wire walker was vigorously applauded and one of the most enjoyable items was a clever act on horse back by Miss Daniels. The Sisters Korosko Bale gave a clever exhibition of juggling, a feature being their performing pigeons. c02 09 02

1902 The Auckland Road Circus, Cambridge, has re-opened under the name of the Empire Circus of Varieties and enjoyment of an excellent nature is assured at each performance. Several excellent ‘turns’ are included in this week’s programme including the London serio-vocalist comedian, George Egerton and the first appearance in Cambridge of Leno, the midget comedian. The Great Dakota, an American necromancer in original stage illusions, keeps the audience in wonderment and laughter from the start. c02 12 30

1903 Thomas Askham was summoned for presenting a stage play, “Robinson Crusoe”, at the Grand Circus and Hippodrome, Auckland Road, Cambridge, the building not being licensed as a theatre. There was pantomime action and considerable dialogue in verse. There was a temporary stage with scenery at the back and footlights. But it could not be described as a play, it was only an entertainment. The Theatre catered for the ‘Varsity and the better classes and the more humble people went to this music-hall and circus. c03 03 10 [4.4]

1903 An inquest was held on the former assistant manager of the Empire Theatre of Varieties, Cambridge. He had deposited £10 as security on taking the post and after he had held the position for a month this was to be returned to him in instalments. But the company was a failure and he had lost his savings in the venture. He had pawned his watch for half-a-crown and said he did not have a farthing. But he had £40 in his bank and his mind must have been deranged by his theatrical reverses. c03 04 02

1903 Mr Askham applied for a theatrical licence for the Auckland Road Circus, Cambridge. A dramatic performance was instructive to the working classes and tended to keep them out of public houses. But those who were labouring in connection with the various religious organisations felt strongly it would be injurious to the morals of the people. As soon as the audience came out they were ‘on the Common in the dark’. A poster for one play contained the figure of a young lady almost in a state of nudity and if a man took his wife or daughter in the vicinity of it the ladies would hardly know where to put their heads. c 03 05 01

1904 A new era in the chequered existence of Cambridge’s second place of entertainment, the Empire in Auckland Road, has opened. Hitherto its reputation for providing entertainment has not been entirely faultless but the new programme revealed a pleasant change and there was a packed audience. Performers included an impersonator of characters in the works of Charles Dickens, the Danby-Gordon Trio who displayed a tragic interlude entitled ‘The Penalty’ and Miss Gladys Fontaine, a singer with a cultivated contralto voice. Two comedians amused with ‘patter’ and songs of ‘nonsense rhymes’ and music was supplied by Miss Zetti Handel’s Ladies Orchestra.
CDN c 8.4.1904

1904 One day only. The one exhibition in the world that has no counterpart: Buffalo Bill’s Wild West and congress of Rough Riders of the World headed and personally introduced by Col W.F. Cody, ‘Buffalo Bill’. Three special trains, 500 horses, 800 people. 100 Redskin braves

including the famous warriors of the Sioux, Ogallallas, Brutes, Uncapappas, Cheyenne and Apache tribes in Indian pastimes and war dances. Includes the Battle of Little Big Horn, Custer's last rally. The vast arena illuminated at night by special electric light plants. The entire grand programme will positively be presented twice daily (Rain or Shine). Dennis James' Fields, Huntingdon Road, Cambridge. Friday June 24th – Advert. See Buffalo Bill, the master exponent of horseback marksmanship in his wonderful exhibition of shooting while riding a galloping horse. Introducing the pioneers of the plains who tell the story of the progress in the great drama of civilisation by pictures of border life. The stage coach 'hold-up'. Cowboys' 'round-up'. Riding wild bucking broncos. Indian war dances. Attack on the Emigrant train. The intrepid cowboy cyclist. Imperial Japanese troupe in ancient and modern war drill. Mexican Vanqueros. South American Gauchos. Cuban Patriots. – Advert. On Friday Cambridge is to be visited by Buffalo Bill's Wild West and Congress of Rough Riders. Beside the usual features of the show including Indian war dances, riding of wild bucking horses and a realistic scene of General Custer's last battle there will be a thrilling and daring bicycle feat of descending from a height of 85 feet and cycling through the air over a chasm of 41 feet, perhaps the most spectacular and dangerous of all bicycle novelties. The unique character of Buffalo Bill's Wild West Show was reflected in the character of the audiences, immense in number which the two Cambridge performances drew. Staid college professors, busy professional men and members of the clergy formed not an inconsiderable number of those who watched the performance with as much interest as the most ingenious juvenile and applauded as loudly as any. It is not everybody who has the opportunity to seeing a cowboy in his characteristic costume but the representation of incidents that have long since become historic were most interesting. There is no Deadwood coach now except in Colonel Cody's show and pony express riding has been superseded by the trans-continental railroad and the telegraph but he preserves the ancient method of carrying letters for the benefit of another age. Cambridge people thoroughly appreciated the visit. 1904 06 15

1904 Many old people will remember the time when Newsome's Circus was a great institution in Cambridge. For many years they conducted a permanent circus here and became very well known in the town, but of late years they have dropped out of the public gaze. James Newsome is still alive – aged 80 years of age – but his wife Pauline has just quitted the ring for ever. She died at Cleethorpes last week, at the age of 79. CDN 8.10.1904

1905 The Auckland Road variety theatre, Cambridge is now known as the Hippodrome. It has been taken over by Geo. Saphrini who has experience at the Britannia Theatre, Glasgow and Alex Aubrey who has performed at all the principal halls in Great Britain. Although the old circus ring has been retained there were no equestrian turns but Professor Garford's performing dogs and pigeons proved very wonderful and the hundreds who filled the building saw feats of agility and strength and extraordinary examples of human dexterity.. The programme was to have concluded with a bioscope exhibition but owing to a mishap with the lamp the pictures could not be shown. 05 09 12

1905 Having been closed for a week when it was handed over to the care of the carpenter, the Hippodrome, on Newmarket Road Cambridge reopened. The performances will now be carried out on the music hall principles, the old form of ring having been dispensed with and a large and spacious stage erected with all the necessary scenery and curtains. There will be one performance nightly with half-prices after nine o'clock. The Carr Brothers kept the house in a constant state of applause by their wonderful manipulation of a large inflated ball 05 10 24

1905 The licensee of the Cambridge Hippodrome made a claim for breach of contract against Charles Prinz, described as 'the most wonderful and sensational lion tamer on earth'. He had agreed to perform for a week at a salary of £40 but had taken another engagement at the Olympia, Liverpool. As a result their takings had fallen to £30, compared to £112 the week before. The Hippodrome would seat about 2,000 people and £25 had been taken one evening. The judge said that in his undergraduate days the University would not allow a theatre to pollute the atmosphere. They had changed their views since then. 05 10 25

1906 Thomas Askham, proprietor of the Hippodrome, Auckland Road applied for a licence for the performance of stage plays. The University had protested that a theatre near the common was detrimental to undergraduates but it would not be used as a low type of music hall, rather as a proper theatre for the poor classes at a time when students were not in residence. However the neighbourhood would not attract a first-class company and a lower type of entertainment would be detrimental to the morals of the people. 06 06 19a & b

1906 Thomas Askham applied for a licence to stage plays at the Hippodrome, Auckland Road. It was built for the poorer classes of Cambridge for whom there was no such accommodation. Plays would be presented of a high moral flavour such as 'East Lynne' & 'The Harbour Lights' which would have a good effect on the public. He would provide healthy amusement in a proper building. But local ministers felt it would not tend for the highest welfare of the people. The application was refused. 06 07 26

1906 The world-famed travelling Educator of Natural History will pay Cambridge a visit after an absence of 15 years. Bostock and Wombwell's circus was instituted in February 1805 and novel additions are being made to keep pace with the times including specimens of Tasmanian Devil and the gigantic blue and red faced mandrill. In olden days shopkeepers used to close and the public declare a holiday in order to explore the menagerie. The conditions of the animals speaks volumes for the kindness and attention with which they are treated. 06 09 19a

1907 The name of Fred Karno is synonymous with mirth and hilarity, his pantomimic sketches are popular everywhere. Two are being staged nightly at the Hippodrome, Newmarket Road which he has specially transformed into a comfortable music hall. Last night the place was crowded 07 04 02

1907 The Royal Italian Circus visited the Hippodrome, Auckland Road, Cambridge. Signor Volpi put his ponies, monkeys and dogs through their entertaining performance and the baby elephant played several instruments. An amusing scene was the carriage ride of 'Madame Batavia', a bear, dressed as a woman. It was grotesque to see the affectionate way she took the arm of her trainer and walked round the ring 07 09 03

1907 When Sanger's Circus marched into Cambridge from Newmarket, a roadman was sitting by the side of the road near the 'Paper Mills' devouring his breakfast. The observant eye of one of the elephants was quick to perceive this, and stretching out his trunk he 'commandeered' the poor man's basket, which contained his dinner as well. 07 10 12b 07 10 05

1908 Hippodrome licensed after acrimonious debate [1.10]

1908 Thomas Askham, manager of the Hippodrome, Auckland Road, was convicted of staging a play, 'Sally in Our Alley' which had not been approved by the Lord Chamberlain in a building which had three times been refused a licence. Afterwards he announced that it would be turned into a picture palace and a first-class, up-to-date set of animated pictures would be presented. The old artistes would not get the sack but would sing to them every night and have their 'funnies' all the same. He would also apply for a dramatic licence. The Hippodrome was required in Cambridge by the working classes – as a working-class theatre. CWN 08 10 23 p3, CWN 08 10 30 p3

1912 Thomas Askham was one of the oldest and best-known of Cambridge tradesmen. As a young man he worked for Thomas Hunnybun, the coach builder of Sidney Street, and then founded the coach builder businesses on Newmarket Road, Regent Street and a house in London. But as the motor industry grew, there was less for him to do and he had to employ fewer men. Jointly with Mr Tudor, he built the Hippodrome on Auckland Road, of which he was proprietor at his death. Before the era of the picture palace this place of amusement was exceedingly popular and provided many with healthy enjoyment who would otherwise have been walking the street. 12 01 19c

1913 The members of the company who are appearing in pantomime at the New Theatre had a narrow escape whilst travelling from Wolverhampton to Cambridge. Whilst the theatrical special was at a standstill, a passenger train ran into it from behind, but fortunately no life was lost. Mr Milton Bode's Company, consisting of about 50 actors and actresses was fortunately in the front of the train and beyond severe shocks, escaped without injury. Also travelling was the 'Wild Australia' Company including eight horses and a number of snakes and alligators. When the actors scrambled from the train they were mixed up with a giant python and an alligator that had escaped from their boxes 13 01 03b

1920 Sylvester's Circus comparatively new; has two rings, military band, elephants, rough riders, clowns - CDN 20 06 28

1922 Circus enthusiasts who were disappointed by the non-arrival of Sylvester's Circus will find ample solace for their disappointment should they visit the Great Empire Circus this week. To describe the numerous items provided by accomplished tricksters (both animals and humans) would be well nigh impossible. Gollywogs, tricksters, whose amazingly clever feats on cycles deservedly gain much applause. The climax of all the excitement is reached when Miss Eleonora accomplishes her daring tightrope feat entitled "The Slide for Life". Throughout the whole entertainment the audience experiences scarcely a dull moment, for which the humorous antics of several weirdly-attired clowns is largely responsible. It should be well patronised because the staff is composed entirely of ex-Service men c22 06 04

1924 Coming! Bronco Bill's wild west exhibition and mammoth circus. Broncho Bill's world famous elephants. Broncho Bill's new group of performing prairie horses and 20 other big acts. Monday next, Midsummer Common, Cambridge. The great show will also visit Royston and Huntingdon - Advert c24 05 11

1924 Broncho Bill's circus is always a great attraction and huge crowds attended the performances at Cambridge. The programme was divided into two parts, the first half consisting of typical circus "stunts" and the second an exhibition of the wild and woolly West. The Wild West portion of the programme consists of lassoing and rope spinning, trick rifle shooting, whip stock cracking and rough riding, the whole concluding with an attack on the stage coach by Red Indians c24 05 13

1935 The name of Bertram Mills is famous throughout the circus world. His two sons Cyril and Bernard were both up at college some 12 years ago. Cyril, who was at Corpus, had rooms with Miss Goff who now keeps a University lodging house at Maid's Causeway. She remembers him as one of a happy party of four at the house, all of whom used to ride motor-cycles. He took his MA degree the last time the circus was in Cambridge, three years ago. 35 04 20a

1936 Thirty of the smallest circus performers have arrived on the fairground at Cowper Road, Cambridge. Well-known on the Continent, these Lilliputian players range up to 36 inches in height and their 30 ponies are of similar build. They make their own village, consisting of hairdressers' shop, a newsagent, café and billiards saloon as well as their own church. There is added interest in the show as two of the tiny performers are to be married shortly 36 04 29

1937 Bertram Mills, the famous circus pioneer, is being considered as a possible parliamentary candidate by the Isle of Ely Conservative Association in opposition to the sitting Liberal MP, Mr James de Rothschild. In 1919 he saw a circus show at Olympia and thought he could put on a better one himself. He was offered the venue for the next Christmas season and took on the lease without ever having staged such a show before. He toured the Continent with his son – who was up at Cambridge – and selected the first circus turns which were to make him famous. Since 1928 he has been a London County Councillor 37 12 16a

1944 Cody's circus five day visit – 44 04 28

1947 Among the Big Tops, Bertram Mills' tenting-circus is surely the top. It is a circus-de-luxe. To begin with every one of the 3,500 seats has a back to it and you can see in comfort. And as the animals are the backbone of the circus let us take a look at the Bertram Mills collection. First the horses - horses clever, horses dignified, horses graceful and all beautiful. Less graceful, but with their own beauty of their quiet grey colour were the six performing elephants, everyone a lady - but not lady-like enough to stifle the yawn with which they sat up after lying down to "sleep" to the strains of dreamy music. Strength was combined with grace in the Tovarisch Troupe and finally of course, there were the clowns, a merry nonsensical crew CDN c. 23.4.1947

1947 Visitors to Bertram Mills Circus this week watching the daring acts carried out in a brilliant array of colourful costumes,, might be surprised to hear that as many as a thousand costumes and uniforms are used in the show. I had a talk with the wardrobe mistress, Miss Wilmer, and learnt that she designs them herself, cuts, fits and makes them. Like everybody else Bertram Mills Circus have their coupon problems - especially when costumes need replacing every year. They have two allocations by the Board of Trade but have to account for every coupon they spend and give an account of the number of yards used in each garment CDN cc 24.4.1947

1948 It is a good many years since there was a circus at the New Theatre, which makes this week's visit of Don Ross's Royal Imperial Circus all the more welcome. Everything that makes a circus is here – with the one notable exception of the elephants. There are the horses, dogs, monkeys, wire-walkers, the trapeze artiste, the lions, and the clowns – even two performing geese (said to be the only ones in the world). All the acts are interspersed with the appearance of the clowns, Edgar Cooke, Little Alf Pratley and Rabbit who also appears with a trampoline (one of those bouncing affairs) and invites members of the audience to have a go c48 12 08

1950 Bertram Mills' circus elephants will lend their weight to the National Savings drive when they arrive in Cambridge. Starting from the railway station the six elephants will parade through the streets to Midsummer Common, carrying as their trappings photographic reproductions of the well-known savings poster having a white elephant as its subject. All will be ready for the menagerie attached to the circus to be opened from Saturday afternoon c50 04 06

1950 Bertram Mill's famous "big top" show has opened in Cambridge. Here in the well-known romantic atmosphere, strangely fascinating in its queer smell of sawdust and canvas, is paraded an amazing display of human and animal talent. Have you ever seen dogs play football? Or a lion walk at tightrope? Or elephants that do the elephant equivalent of a handstand? Or ... but this review is in danger of becoming a mere catalogue of questions – an instance of the mood of questioning wonderment the Circus is apt to induce in the onlooker c50 06 11

1952 Chipperfield's Circus opened on Midsummer Common, Cambridge. A whole collection of animals show their paces and tricks including polar and grizzly bears, African lions and horses, while a "cowboy round-up" brings plenty of action. It goes with a Big Bang, especially the sensational final item, by Les Raluys, in which a man and girl are shot together from a big cannon, landing in a net on the other side of the ring. If the bang doesn't take your breath away the flight of the human cannonballs will. # c52 03 11

1953 Professor Testo's flea circus is currently featured in the Easter fair on Midsummer Common. There are jugglers, tight-rope walkers and acrobats all of whom live in a felt-lined cigar box. It is rather difficult to get fleas these days, he says. "They must be human fleas. Animal fleas don't live long enough and they're not as strong. Usually we advertise for them, but if I get

really short I get them sent from the College of Entymology. By looking after them carefully, and feeding them regularly on my own blood, I can keep them alive for about three months. I will pay sixpence each for them. But I don't want any of your thin, half-starved ones. They must be fat and well fed". c53 04 07

1953 The circus has come to town – and it was greeted by thousands of smiling Cambridge faces. Six of Bertram Mills' Burmese elephants marched from the railway station, trunk to tail as the midget clown, Nikki, distributed leaflets about the circus from the basket of his fairy cycle. Elephants Lechney and Company did not lose their way – they've taken the same stroll for the last 18 years. Crowds covered the roundabout at Hills Road. The one at the Four Lamps was unrecognisable, the circus-gazers had swept half-way across the road. Soon afterwards the 'two-ton-tessies; were under canvas, chained to a platform. c53 04 17

1954 New Theatre reopens [3.11] The crowds who queued up for tickets outside Cambridge's New Theatre put paid to the story that Music Hall is dying. There was slap-stick comedy, Eddie Arnold with his variety of voices, Brian Andro on the high-wire, a strong-man acrobat, Rusty – a dog of mathematical powers, Bobby Collins – a first-rate whistler and the Lee Youngsters, a trio of singers. The star attraction was Tony Brent, a crooner of promise, but surely there will come a time when we shall have heard his songs just once too often. Forthcoming attractions include Don Saunder's Circus and Don Lammaree and his Lone Star Road Show, Phyllis Dixey and Cinderella on Ice. If the Cambridge public give it support then even bigger names will be attracted from London. CDN 28.9.1954

1955 With the big top a blaze of coloured lights, people streamed to Midsummer Common to fill Chipperfields' Circus to capacity. It is the first time any circus has presented such a varied collection of animals, which include camels, llamas, zebras, a giraffe and Indian pythons. Polar bears are difficult to tame but Ricardo gets them to waltz, the black and grizzly bears delight the children, especially when one drinks a bottle of milk. The African lions were a little restless and snarled at Ricardo, but he made them form a pyramid and then lie at his feet. The seals balances balls, the oodles rode a pony round the ring and one of the elephants even did a handstand. .55 03 15a

1957 On Midsummer Common tents are mushrooming in readiness for Billy Smart's Circus. The show promises plenty of interest, thrills galore, glamour and excitement. In the Big Top 23 acts of superlative ability will perform twice daily. Amongst them are Tagora the sword-swallower, the Flying Lunasz trapeze stars, the Atlas Sahara Troupe of tumblers and the Larenty Troupe of trampoline artistes. Then there are the clowns led by Sasha Coco. The Wild West Show is a fast-riding affair of cowboys and Indians featuring Davy Crockett and the 'Cisco Kid. 57 10 24a & 23

1957 Billy Smart's circus show started with a parade of elephants, camels, seals, horses, chimpanzees and the artistes themselves. Then came his Arabian and Palomino horses, dancing, prancing and galloping around the ring, performing amazing tricks. The Rock 'n' Roll Elephants nearly brought the tent down with laughter: attired in jeans, one of these intelligent creatures expertly imitated Elvis Presley. To see the beautifully-groomed polar bears glissading down the slides with every evidence of enjoyment made one realise how the animals can find fun pleasing the audience. 57 10 29a

1958 A new high in circus history will be reached when Chipperfields open at Midsummer Common. That fantastic character, "Mr Pastry", international star of stage, screen and television, following terrific success on the Ed Sullivan TV shows in America, bounces into the sawdust ring to become an even greater name as Star of the Circus. There will be side-splitting yells when he joins the Western Rough Riding Routine. 58 10 09b, 58 10 14 & a

1959 Bertram Mills' circus began their visit to Cambridge under the big top on Midsummer Common. The huge canvas auditorium with improbable little bits of grass still visible between the rows of seats was packed to the walls. The ring was immaculate with white sawdust, and high above it the roof held the promise of balancing feats to come. The performance opened with the entrance of an elephant in a pink bonnet driving a yellow motor car accompanied by a cavalcade of clowns and augustes. 59 04 21b & c

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 As advance manager of Billy Smart's circus Reg Mankin must arrange for regular deliveries to Midsummer Common of 300 pints of milk a day, newspapers, laundry and cleaning as well as meat, fruit and vegetables. Then there is bread and cakes and the gas to cook it all on. Besides the provisions for the 300 artists and staff there are the needs of the 200 animals whose appetites are much larger than any human's. In one week they consume ten tons of hay, 600lb of horsemeat for the five hungry lions, 140lb of rice for the 12 polar bears and 12 sacks of stale bread for the elephants. 60 09 03

early moving pictures – 33 07 29

Arthur Melbourne-Cooper was the builder of St Alban's first cinema, a photographer and film-maker who was also a stunt man and acting coach. Having trained in his father's photographic business he became cameraman to Birt Acres, a scientist who in 1892 was experimenting with 'moving projection figures'. Arthur made short films which were presented by the showmen who travelled Hertfordshire showgrounds then set up a company and filmed extensively. Spectators often tried to disrupt proceedings and a crowd of undergraduates attacked his cast and camera crew when filming in Cambridge. He retired to Little Shelford 61 08 08 & a

1833 British Association meeting at Cambridge 1833 first moving pictures demonstrated, 'Phantasmoscope' – 38 08 13a

1896 first film shown in Cambridge at Tudors Circus, Auckland Road [M]

1896 films shown in Guildhall (used intermittently till c1924) [M]

1899 first films shown for The Navy League, Corn Exchange [M]

1899 The East Coast Mutoscope Company has been formed to popularise that entertaining piece of mechanism which is known as the mutoscope, a portable instrument for the production of animated pictures. The intention is to set up these machines throughout the region so that by dropping a penny in the slot one may experience all the pleasure of witnessing a cinematograph exhibition. The promoters have good grounds for their confidence that the mutoscope will return handsome profits 1899 06 30

1902 The New Edisonograph Animated Pictures were presented for the first time in Cambridge. They are by far the best yet seen, being considerably larger than usual and without any flicker. The Coronation pictures are exceptionally clear and very vivid are the pictures of the Prince and Princess of Wales visiting the dinners to the poor in London. For those sentimentally inclined nothing can be finer than the "Soldier's Return from the War" – to find the house to let and his mother in the Workhouse. The band of the University Volunteers is engaged and add much to the evening by their appropriate music. The pictures will be changed nightly and animated scenes of Cambridge streets will be presented. CDN 1902 10 14

1902 Notice to Entertainment Providers. Messrs Coulson & Co of St Andrew's Street Cambridge have purchased one of the latest Cinematograph Machines that it is possible to get. This machine is capable of showing 2,000 feet of pictures without any breakages. Pictures shown are very bright and steady and any size up to 20 feet may be obtained. It can be used either in dining room or public hall with equal safety. Sleight of hand and other items of entertainment can also be supplied. CDN 1902 11 10

1903 One of the best cinematographic entertainments ever seen in Cambridge is running at the Guildhall. The North American Animated Photo. Co. are showing some of the most interesting sights it is possible to conceive. Mr Joseph Chamberlain landed at Southampton on Saturday and on Monday a series of pictures were showing the Cambridge folk his reception. The operator was busy at work on Fenner's on Saturday where the Cambridge athletes achieved a sweeping victory. Music adds to the attraction. The entertainment will be repeated twice a day. c03 03 14

1904 films shown at Thurston's Royal Bioscope Show, Midsummer fair [3.8]

1904 The Midsummer Fair brought its usual amusements but the cinematograph held undisputed sway: it is the autocrat which swallows hundreds of 'tuppences' and is always ready for more. It was patronised liberally and showed some very excellent representations of national and local life. War pictures form no inconsiderable part of the programme and among the turns of local interest were views of the May Races and the boiler explosion at Linton. CDN 24.6.1904

1904 Dr Seaton's Animated Photographs and Concert Company visited Cambridge Guildhall on Boxing Day. The pictures include the latest Japanese and Russian war films, "Life in Canada" a grand film of 1,200 feet long, "The Kingdom of the Fairies" and a large variety of humorous subjects well worth witnessing. The performance included a high-class variety entertainment including Professor Carson, ventriloquist and mimic and Dr Seaton with his conjuring and plate-spinning. CDN 23.12.1904

1906 An alarm of fire was raised at one of the cinematograph shows at Midsummer Fair. A film and various odds and ends near the operating box became ignited and flames shot up above the front staging. Some alarm was shown by the audience who were assured there was not the slightest danger but all the exits were opened and those who wished were enabled to leave

without difficulty. The flames were quickly extinguished and the entertainment proceeded as usual. 06 06 23a & b

1908 Alexandra Hall (YMCA lecture hall) used for first regular film shows, (stopped 1914) [M]

1908 Last September a cinematograph entertainment was given by the Gaumont Company at Newmarket. The operator jarred the machine and a piece of hot lime ignited one of the films. In trying to extinguish the flames he knocked over the lantern, the cylinder of gas ignited and there was a rush for the door. One lady was thrown into the flames and so terribly injured that she died in hospital. The company had paid her funeral expenses. Now her husband demanded damages: she had earned 10s a week at the laundry and his prospects of work were much reduced since a married man had a better chance of a respectable position than an unmarried one. 08 03 17

1908 Poole's Myriorama is a unique entertainment comprising views of the lands beyond the seas. A special feature is 'A contest in the clouds' in which the aerial warfare of the future is strikingly forecasted by a remarkably clever series of pictures and effects and some splendid pictures were shown on the Bioscope. A capable company of entertainers include a troupe of Japanese performers whose feat of walking a rope from one end of Cambridge Guildhall almost to the ceiling is really marvellous CWN 08 10 09 p6

1909 Picture Palace opened in Working Mens Club (regular film shows till c1916) [M]

1909 The danger of fire at cinematographic exhibitions, such as that at Newmarket a couple of years ago which caused fatal panic, has now been eliminated. A demonstration of the new Mansell cinematographic machines was given at Cambridge Guildhall. The lantern is guaranteed fireproof and enclosed in an iron operating house. Even under circumstances of the grossest carelessness, which no operator would ever risk, all that would happen is that just two inches of film would be fired. 09 09 17

1910 demonstration of cinematograph machine at Guildhall for Corporation, "time coming when every town will have a hall especially constructed for viewing"; great precautions taken against fire [3.1]

1910 cinematograph shows attract crowds at Midsummer Fair [3.2]

1910 Empire opened with variety & pictures in Sturton Town Hall [M]

1910 Frederick Hawkins, proprietor of the Picture Palace, Workman's Hall, Fitzroy Street appeared in court under the Gaming Act. He had distributed numbered handbills and given half-a-crown to the person whose number he showed on screen. On Saturday night there were other prizes of a silver-plated teapot, silver-plated cruet and six teaspoons in a case. Hawkins said he'd done it to test if advertising by handbills was any good. But it was a breach of the law and he was given a nominal fine. 10 04 29a

1910 Henry and William Thurston, roundabout proprietors, were summoned for not having a supply of proper appliances at a cinematograph exhibition. Supt Lander said there were between 3,000 and 4,000 people at Histon Show. Messrs Thurston had a show there, which he visited. The machine was enclosed but the fire buckets were outside the tent, telescoped. Thurston's manager said they had hardly had time to put the fire appliances in the tent before the first show. It was a serious case and the public must be protected. They were fined £10 10 08 19a

1910 The Sturton Town Hall Company applied for cinematograph, music and dancing licences. At present the premises were used by the Salvation Army on Sundays and occasional week days but in future it would be used for entertainment, the chief part of which would be moving pictures. The cinematograph apparatus might be placed outside the hall by erecting a platform and making a hole in the wall, though the club billiard room made this impracticable, or the vestibule might be taken away and a platform erected there. 10 08 19f

1910 The People' bioscope car arrived at the Three Horse Shoes Inn, Harston, on Monday evening and gave an excellent exhibition of pictures with gramophone selections. There was a large attendance & the military scenes especially aroused the enthusiasm of the local Territorials and Harston Boy Scouts. Those who cared to do so were, by the courtesy of the manager of the car, enabled to listen to further gramophone selections until closing hour when hearty cheers were given for 'The People' car. 10 11 11f

1910 Bioscope show at Hippodrome, projector rented from London firm fails to work properly, court case – The Times 10 12 03 (copy in Research 2011 Bioscope file)

1911 The University and Town Roller Skating Rink will open its doors as the County Rink Cinema, Magrath Avenue. A small portion of the large building is being converted into an up-to-date picture theatre where the very best films will be shown. The ticket will also give free entry to the rink and use of skates. The ring will certainly be smaller but still allow for racing and hockey. Gymkhanas and carnivals will continue to be held. 11 11 24b [M]

1911 The Cambridge Electric Theatre Company applied for a cinematograph licence to show inflammable films at the Victoria Assembly Rooms on Market Hill. Only non-inflammable films are currently used but these do not give as clear a picture. The lantern chamber was situated outside the building and was fire-proof with iron shutters to block the two openings in the wall. The hall could seat 280 and be cleared in less than two minutes. But there was no back exit and magistrates refused the application 11 08 11h & 18c Electric Theatre opened Market Hill, cinematograph licence refused & restricted to non-flammable film [M]

1911 A slight outbreak of fire occurred at the Picture Palace, East Road. The heat during the day had been intense and the lantern operator, Harry Pink, became a little faint and accidentally knocked a small piece of film on to the lantern, the heat igniting it. The film flared up and Pink quickly turned off the light, pulled down the safety shutters of the box, which is a fire-proof structure, and jumped out. The film soon burnt out and the audience, consisting of 37 children and three adults, walked out without any panic 11 07 28d

1912 Varsity cads disrupt cinema [3.3]

1912 Cambridge Picture Playhouse Ltd issue prospectus for new cinema in Mill Road due to phenomenal success of their Cambridge Electric Theatre on Market Hill [3.4]

1912 Sergt Gilbey told magistrates he had visited James Chipperfield's cinematograph show at Gamlingay. The building, advertised to accommodate 1,000 people, was three-quarters full. Two men were working the cinematograph machine which was in an iron-lined case. He saw one bucket of sand and one of water, there was a blanket – a piece of horse cloth 15 inches square – but there was no grenade or fire extinguisher. Had there been an outbreak of fire the consequences might have been serious. The firm said they had more fire exits than required and nobody else had complained. But they were fined 16 shillings. 12 03 29j

1912 New Cinema Theatre in Mill Road, Covent Garden, should be set back – 12 07 12f

1912 Mr Lloyd ex-manager, pianist and vocalist of the East Road Picture Palace told the court that Mr Hawkins had informed him he would close it for a month but that he should move to a new hall in Herne Bay. But he did not give notice or fill in the month as promised. Mr Hawkins, the proprietor of this and other halls in Cambridge, said he had tried to find Lloyd work and he'd be pleased for him to open at the Picture Palace again on August Bank Holiday Monday. Lloyd was a very able and competent man and it was astonishing he should cut his throat in this way. The case was dismissed. 12 07 26n

1913 Playhouse Cinema opened, first purpose-built cinema in Cambridge: had its own orchestra & camera man who took pictures of local events for newsreels [2.10,M]

1913 Hippodrome reopened as Gaiety (closed c1915) [M]

1913 The question of where to spend a pleasant evening in Soham has been solved by Messrs Taylor who have opened a new picture hall in Red Lion Square. A large outbuilding has been converted into a comfortable and spacious cinema with seating for 250 and standing for 100 more. For three nights each week an excellent programme of first-class pictures will be shown. The opening performance was given on Boxing Day. The cinema apparatus, which is of the latest pattern, is contained in a fire-proof room at the rear of the hall 13 01 03 p11 CIP

1913 Mr W.L. Raynes applied for a cinematograph and music licence for the new Picture Playhouse being erected in Mill Road. The building, which is fireproof, will accommodate 167 in the gallery and 602 in the body of the hall. The architect, Mr Baines, said the walls, which were 25 feet high, complied with byelaws and steel stanchions had been embedded in the brickwork which could not possibly bend as the result of a strong wind. 13 04 11 p9 CIP

1913 The handsome new Electric Picture Palace being erected on the corner of Covent Garden, Mill Road, is making excellent progress with up to 35 men working on the job. When complete it will have the handsomest front of any place of entertainment in Cambridge. There will be a vestibule where 60 people can wait under shelter and the seats will be of the tip-up variety, upholstered in plush. The Electric Theatre, as well as that on Market Hill, will be under the management of Mr Adrian Jordan but the programmes will be quite distinct. 13 04 18 p9 CIP

1913 Yes! It is true! Perfectly true! That the new Picture Playhouse in Mill Road will open at 2.30 on Whit Monday, and present the strongest picture programme ever seen in Cambridge. It is also true, that an equally strong programme will be presented at the Electric Theatre, Market Hill 13 05 09 p01 CIP

1913 Picture Playhouse has been put up in record time. Films will include one taken by Mr Adrian Jordan's operators, 'Hustling at Cambridge' shows the remarkable rapidity with which the new Picture Playhouse has been erected 13 05 09 p07 CIP

1913 The newly-opened Picture Playhouse in Mill Road is the most comfortable in Cambridge. From the imposing frontage with its domes and balcony, through the hall, brightly lit and tastefully furnished, to the magnificent proscenium, everything is of the very best. A small orchestra adds much to the attractiveness of the entertainment. All the nearly 800 seats were filled on the first night and hundreds had to be turned away. The films included some taken by the Company's own operator and 'The 13th Man', about an undergraduate club whose reunion leads to some remarkable incidents. The show is continuous and the programme changed twice a week. . 13 05 16 p7 CIP

1913 Magistrates heard two cases involving the new Picture Playhouse in Mill Road. Messrs Picture and Sons, the builders, were summonsed under the Lords Day Observance Act for working there on Whit Sunday. There was no evidence and the case was dismissed. But the Manager of the Electric Light Company was fined for parking his car across the footway in Covent Garden at the back of the cinema. He claimed it was in the entrance-yard that was filled with parking materials. He had pushed it in as far as he could and pedestrians could pass easily. He was there for 20 minutes and had moved as soon as he'd been asked by a policeman. 13 04 23 p9 CIP

1913 The Rink Picture Palace, Hertford Street plans to show Dante's 'Inferno' was attacked by the Mayor: he had received many letters from residents; if shown any renewal of the licence by justices would be refused at once, he warned. The manager, Syd Byron wrote to the Presiding Magistrate. He offered to give a private performance and cut any objectionable scenes. Magistrates were equally divided and could not therefore prohibit the showing. They hoped he would not show it. But Mr Byron decided to go ahead 13 11 07 p10 CIP

1914 magistrates ban boxing film - "grandmotherly legislation" [3.7]

1914 Under the proposed new regulation every cinematograph house should have a fireman in uniform to take precautions against fire and attend to the appliances. But when the Cambridge Picture Playhouse was built on Mill Road it met all the regulations and they had blankets and appliances with a fire drill each week. To have a fireman in uniform would be expensive and was apt to produce a panic in the even of a fire, magistrates were told 14 04 10f

1914 The woman in the box office of the picture theatre at the Workman's Hall said she had been told not to let in any child under 14 unless accompanied by someone over 14. She had to turn away a great number. After they passed her they were questioned by the manager, Mr Billings. She could see the seats in the hall and children were supposed to sit together. Henry Kelly said he went with his brother and sister Blanche, 11. The boys sat at the back but she went to the front because she could not see. This was against the new regulations and a technical offence had been committed. 14 08 21 p3

1914 Mr W. Jaggard of Tenison Road said he visited the Empire Musical Hall. It was an exceptionally large house and people were sitting on the hot water pipes. The film suddenly stopped & he saw a piece of the film burning in the operator's box. Someone called out 'fire'. & there was a general stampede. The hall was quickly cleared but two tables had been placed in the exit to the right of the stage. The management was fined 14 08 28

1922 In the death of Mr Ernest Edward Hayward Cambridge has lost a much respected townsman. He was one of the first to start cinemas in the town, and used to arrange for displays at garden parties and gave performances in the Corn Exchange and Guildhall. The "Arcadia" on St Andrew's-hill was managed by him and he was famed for the excellent variety entertainment given there. Indeed, deceased was responsible for the commencement of high-class variety shows in the town. He was an amateur actor of repute and for many years played the humourous lead in Bijou Amateur D.C. productions. He belonged to the Cambridge Pierrot Troupe, a concert party which existed from 1897 to 1901 solely for charitable purposes c22 06 05

1923 On Thursday the Central Cinema once again opens its doors, and another step towards a brighter Cambridge will be achieved. The main scheme of alteration has been the heightening of

the roof, the removal of the pillars and improvement of the ventilation schemes. The absence of the pillars, which at times were a source of discomfort to some of the audience, will alone reconcile patrons to their long period of exclusion. The decorative scheme is entirely new and is based in shades of coffee and dark walnut, relieved with Wedgwood blue, an effective combination which is continued in the huge lampshades, which were always such a feature of the decoration. Another big feature is a new screen and projection which has been carried out by the Gaumont company. The projection is now situated about half way down the hall, and not at the back as previously c23 10 08

1923 The long-awaited for reopening of the Central Cinema, Hobson Street, Cambridge, took place in the presence of a good attendance. This popular house of amusement had so established itself with the lovers of the silent drama that its temporary withdrawal from the ranks of amusement caterers has caused no little concern. Not a few patrons felt that if a particular film did not altogether appeal to them, there was always a good orchestra to listen to, and this is doubtless one of the secrets of the Central's success. Under the renewed direction of Miss Norma Thomson the orchestra is better than ever, and some distinctly appropriate music was played with skill and efficiency c23 10 13

1924 After extensive alterations and repairs the Rendezvous cinema, Cambridge, which will now be known as the New Rendezvous, was reopened. Considerable improvement have been made in the appearance of the interior and the seating is now most commodious. At the head of a long and attractive programme is "The Cabaret Dancer" featuring Rudolph Valentino and Mae Murray. The film is good entertainment but one looks for a little more acting, especially on the part of Valentino who, as the lover, really fails to impress c24 08 13

1925 The "Tivoli", Cambridge's new cinema on Chesterton Road will be opened on Thursday and many people have been speculating as to what it looks like inside. A representative of the CDN who had a look around came away very much impressed with the general air of comfort and the attractiveness of the interior. Over 600 people can be seated in the body of the hall and gallery. It has comfort, excellent lighting and excellent decoration. If you want a private box for six people you may have one for the sum of 15s c25 03 17 [2.4,M]

1925 Described as "Chesterton's super cinema", the Tivoli made its debut before the Cambridge public when there were two opening performances. Elaborate, cosy, artistically lighted and efficiently ventilated, Cambridge's sixth cinema has every justification for expressing itself in superlatives. It has a courteous staff of brown-uniformed attendants, an excellent orchestra and a screen sufficiently large to do justice to the most elaborate film productions. The projection last night was not perfect, but this was merely a matter of adjustment c25 03 21

1925 The public examination of the film hirer of the Rendezvous Cinema was held at the Cambridge Bankruptcy Court. He had taken over the lease from Mrs Mason in June 1924 with Mr Wallace Lester and managed the business on behalf of the partnership. The concern never made any profits. He started with a salary of £10 a week and as the concern did not go very well it was reduced to £5. The cinema took about £90 a week, and wages and other expenses amounted to £120 a week, so that there was a gross loss every week c25 12 14

1926 It may not be generally known to the Cambridge public that Mr Carne, the manager of the Playhouse, Mill Road, is the "Victor Carne" who figures in the record list of the Vocalion Gramophone Co. He has recorded "The Holy City" and "The Star of Bethlehem" for their Christmas list and these and other of his records are obtainable at Messrs Leavis's, Regent Street. Wireless enthusiasts will no doubt remember the many times he has sung from London and Daventry c26 12 17

1927 The Rendezvous placard trolley, which has so many times gone its rounds of the streets of Cambridge advertising “thrillers” and “heart appeal” stories at this cinema met with an ignominious fate at the hands of undergraduates. It was seized by a party of merry gowmsmen and pulled in triumph down Hertford Street and Magdalene Street where they sought to dispose of it by pushing it into the river. It fell on to the landing stage moored at this point but with undamped ardour the undergraduates endeavoured by their united efforts to confine this “publicity agent on wheels” to the cold depths of the Cam. Then, the last rites having been performed, the revellers went on their way rejoicing. CDN c 5.2.1927

1927 The Rendezvous Dance Hall asked for an extension of the dancing licence. The hall was built in 1909 as a skating rink and there was then no houses in Magrath Avenue. Those who came to live there afterwards came knowing the hall was there. From 1912 it was used as a variety and picture hall and in 1915 was commandeered for the War Office. In 1919 it was returned and conducted as a dance hall and cinema. In 1925 magistrates decided it should be open until midnight but there were complaints that people leaving made a noise with their motors & cycles. It was the best dance hall in Cambridge and now no one ever dreams of a dance ever terminating until 12. The Guildhall and Masonic Hall had licences until 2 a.m. CDN c 6.2.1927

1927 The owners of the Playhouse, Mill Road, Cambridge, have just completed negotiations for the sale of that cinema to a syndicate who are said to be the owners of the Central Cinema and the Tivoli. We understand that the transfer will take place in September. The Picture Playhouses Ltd, who owned the Playhouse, also have property in Sussex Street and they are also disposing of this. CDN c15.3.1927

1927 “Grit” is an undergraduate film taken by a little Cine-Kodak and projected by the Kodascope at the Tivoli Cinema. It is believed to be the first serious attempt in an English University to obtain experience in the technique of film production and is one of the first amateur films to be exhibited in the country. It has been directed by Mr Dennis Arundell and we get some good views of Cambridge streets and colleges. It shows how the stroke of a college crew is kidnapped so his boat might not go head of the river. c27 06 10

1928 Cambridge Guardians have sanctioned the provision of a cinematograph at the Poor Law Institution. A Kodascope machine will be installed and a subscription raised to cover the cost of £1 a week. The provision of music on cinematograph or wireless was just as much part of the Institution as providing medical and dental treatment. The also considered the installation of a system of telephones c28 10 21

1929 Central Cinema shows first talking picture in Cambridge - Broadway Melody [M]

1929 Victoria Cinema final performance, building converted to Electricity offices [M]

1929 Talkies to start in Cambridge August – Central Cinema – CDN 28.6.1929

1929 The latest form of political propaganda, the Conservative’s touring ‘Talkifilm’ is visiting Cambridge. The programme includes a speech by the Prime Minister which gives an uncanny effect of realism and a silent film showing the opening up of Canada. The van will visit Pound Hill, the Premier Hall Chesterton and Occupation Road, winding up at Cherry Hinton Road corner CDN c 11.2.1929

1929 Central cinema preparations for talkies CDN 13.8.1929

1929 Broadway Melody at the Central cinema – CDN 20.8.1929

1929 Ely Rex cinema opened – CDN 4.9.1929

1929 Band of Hope cinema – David Moore – CDN 13.9.1929

1929 Performances of the talkie ‘College Love’ at the Central Cinema, Cambridge, were marred by undergraduates. The Manager admitted that to show such a film at the beginning of term was unfortunate. The undergraduates meet old pals, have drinks together and get more exuberant than usual. They were also resentful at the American features introduced into college

life as they know it. Scenes of a match corresponding to Rugby were greeted with many 'cat-calls' while nobody expects undergraduates to remain silent during the portrayal of anything in the amorous line. The cinema has a special telephone by which the volume of extraneous noise is gauged by an operator. He had occasion to request several of the disturbers to remain quieter. CDN 10.10.1929

1930 The new talkie installation nearing completion at the Tivoli cinema, Cambridge, is manufactured by British Acoustic and was selected on account of its purity of reproduction. The entire sound equipment is duplicated so that no failure or breakdown can interfere with the performance. The programme selected for the opening week features Maurice Chevalier in 'Innocents in Paris' supported by the comedy 'Talkie'. 30 05 10a & b

1930 Great liberties have been taken with Sherlock Holmes and in plays and films you can learn things that Sir Arthur Conan Doyle himself never knew. In 'The Three Students' Sir Arthur laid the scene in a Cambridge college but in the 'Moriarty' film Holmes and Watson are both shown as undergraduates. It was here that their great friendship began and from here that Holmes set forth to track down Moriarty and his gang 30 07 12b

1930 The whole of Mill Road, Cambridge, was affected by a two-hour electricity stoppage which came just as the first performance finished at both the Playhouse and Kinema cinemas. The Kinema audience who had been watching a Western thriller, whiled away the time in community singing. But some trouble was experienced with the queue for the last show at the Playhouse which did not finish until midnight. 30 09 20

1930 For the past few months workmen have been engaged in constructing Cambridge's new Central Cinema in Hobson Street. The interior is decorated in a style reminiscent of the Regal Super Cinema at Marble Arch. The prevailing colours are mauve, orange and blue and the whole is surmounted by a dome in the form of a large star surrounded by sky effects. On each of the walls there are large panels with ornamental plastering surmounted by a design in the form of sunrise and illuminated by hidden lights. 30 10 11 [M,3.5,3.12]

1930 Crowds thronged Hobson Street endeavouring to gain admission to the opening of the new Central Cinema. Many were unsuccessful. The Mayor gave a civic blessing to the picture house: it was appropriate because the assessment value of the property would go up and Hobson Street was going to pay a large contribution to the rates. The film was Harold Lloyd's first talkie 'Welcome Danger'. 30 10 13

1931 Thieves stole £250 from the Cambridge Central Cinema when a safe containing the day's takings was rifled. Spread along the gangway in the middle of the balcony were a quantity of coppers, the result of a lengthy sorting of coins. No trace of entry could be found and it is believed the intruders were among the audience at the last performance and hid themselves in the lavatories or storerooms, eluding the fireman who makes a final inspection of the building before leaving. 31 03 20c

1931 Cambridge professors were amongst scientists who made a film at Spicers of Sawston and less than four hours afterwards saw themselves in natural colours on the screen. Experiments in colour have been going on for two years. At present efforts are being concentrated on motion-picture film. One of the difficulties has been the provision for a sound track but this has been surmounted and talking colour films will be made. Sawston may become a complete film colony rivalling Elstree in importance. 31 05 29a

1931 Fire completely destroyed the Rendezvous Cinema and Dance Hall at Magrath Avenue, Cambridge. The only part left standing is the fireproof operating box, which is really a separate structure. Staff removed 12,000 feet of film which, if reached by the flames, might have caused a serious explosion. The most spacious dance floor in the Eastern Counties was reduced to charred bits of wood. Renovations and improvements to the dance hall lounges were nearing completion and were to be opened as a special attraction. 31 07 17j & k [M,3.14]

1931 The last of the Cambridge silent cinemas is to turn 'talkie'. The Western Electric system is to be installed at the Kinema and the first sound film to be presented will be "Song o' my Heart" starring John McCormack. With the new system the Kinema will be open continuously from 2.30 till 10.30. 31 07 31b

1931 The new Victoria Cinema on Market Hill, Cambridge opens today. The auditorium is an example of complete harmony between the architect and the decorative painter. No architectural enrichment is applied to the walls, which remain for the most part in darkness, but when the space is filled with light a gorgeous flow of rich colours rises like waves from the back of the house to reach a climax in the rich proscenium curtain of crimson and gold.

31 08 28h 1,500 guests, Sep [M,3.16]

1931 Cambridge's new Victoria Cinema possesses a theatre organ of the most modern type, a three manual Christie built by Messrs William Hill and Norman and Beard who have been responsible for many of the finest cinema organs in the world. It is placed on one side of the proscenium in two specially constructed chambers which house 2,000 wooden and metal pipes each of which has been 'voiced' by an expert. In the centre of the orchestra pit, placed on an electric lift, is the beautifully decorated console from which the entire organ is controlled. 31 09 04c

1931 Inquiries by the News confirm that the Central Cinema in Hobson Street is perfectly sound, despite rumours to the contrary. As part of the building is over the old King's Ditch, special attention was paid to the concrete foundations and reinforced with steel. The balcony, designed to carry 500 people, will take 2,000. The whole building is as sound today as it was when completed nearly 12 months ago. The only possible work is the renewal of some of the decorations as these were applied to wet plaster. 31 09 04e

1931 Cinemas – are they morally clean? – 31 10 02c

1931 A Band of Hope meeting in the Bethel Baptist Church, Swavesey welcomed Mr and Mrs David Moore and their programme of moving pictures. Mrs Moore deplored the fact that the gambling spirit was so rife and a scientific film showed the narcotic effect of alcohol. Pictures of the Skegness excursion gave great delight as many people saw themselves on the screen. They were followed by film of a garden party in Christ's College and the colleges in their winter mantle of snow. 31 12 11g

1931 If you spent Christmas in Cambridge you may see yourself on the screen at the Kinema. The enterprising management sent a man round with a cine-camera who took 'shots' of people doing their shopping on Market Square, a Christmas Day football match on Jesus Green and the Boxing Day meet of the Cambs Harriers showing many well-known faces including that of the Mayor drinking out of the stirrup cup. We hope it will not be the last time the Kinema send their camera round the town 32 01 01

1932 A new Rendezvous has risen from the ashes of the old in Magrath Avenue. Everything has been done to make it a place for entertainment, comfort and enjoyment. The cinema will seat 1,000 with plenty of leg-room while the ballroom, decorated in pink and gold, has a fine maple floor for 400 couples. A new band from London has been engaged for the dance season – it is distinctly hot in style. 32 11 25Bo [3.15]

1933 Cambridge's New theatre is to be run as a cinema but every effort will be made to continue some theatrical form of entertainment. It has been leased to Mr P.V. Wallis who was the originator of the Central Cinema ten years ago and later took over the Tivoli and Playhouse cinemas. A Western Electric sound projector system will be installed together with some structural alterations and it is hoped to reopen in September. 33 07 25, 33 08 15, 33 09 02 now 7 cinemas plus the Central Hall [1.14,M]

1933 The Central Hall in Market Passage may become a cinema where cultural films would be shown during the University term. It would be run by Openshaw Higgins, formerly manager of

The Tivoli cinema. Mr Mullett, the architect said the amount of film in the proposed projection box would not generate sufficient heat in event of a fire to buckle the iron armour of which it would be constructed. 33 07 28

1933 Five Cambridge playhouses remembered – 33 09 05

1933 Some early entertainments in Cambridge – magic lantern, Poole's Myorama etc – 33 08 21

1933 Cambridge's eighth cinema, the Cosmopolitan, otherwise the Central Hall in Market Passage, will provide a regular home for cultural films. Five years ago a Film Guild was started to show a more intelligent class of film, then Mr Openshaw Higgins tried putting them into the ordinary programme before deciding on a new small cinema. It will give three performances each day during Term. 33 10 14 33 10 17 [1.7,1.6M]

1934 A film entitled 'Cambridge and the University Town, directed by Peter Collin of Newmarket is a twelve-minute pictorial survey with shots of the backs, boating scenes and Grantchester. He had the collaboration of R. Colville-College, an undergraduate of King's. The photography, which reaches a very high standard, is by S.W. Bowler who shows considerable promise. The film, released by Equity British Films will be shown in Ely, Littleport and Newmarket. As a lad Mr Collin assisted in the operating box of the Victoria Cinema and is now a director of Argyle Talking Pictures. 34 01 08

1935 daylight cinema vans organised by National Publicity Bureau visit [1.18]

1935 Rendezvous Cinema enlarged [M]

1935 plans for cinema on St Andrews street approved [1.5]

1935 The Cosmopolitan Cinema in Market Passage was started two years ago by Mr N. Openshaw Higgins as an experiment. Increasing numbers of people have welcomed the opportunity of seeing cultural films that do not appeal to be masses. Now it is moving to the new theatre being constructed in Peas Hill. There has been discussion as to the most suitable name for the new venture. The Arts Theatre was talked of, but a more likely choice now is the Market Theatre. 35 06 15b [1.19]

1935 The Theatre Cinema returned to a programme of cine-variety with a programme of stage turns and films. The variety bill is headed by that inimitable comedian, Max Miller, 'the cheeky chappy'. All his jokes have the air of spontaneity and his suggestion of breezy good humour is infectious. The stage programme includes the most daring roller-skating acts we have seen, a juggler and a young lady who has achieved success as a wireless crooner. The principal film is 'The Personality Kid' with a clever cartoon and the News. 35 06 20

1935 The management of the Theatre Cinema (New Theatre) have returned to their popular cine-variety policy. There are four excellent stage turns and an exceptionally fine film. A snappily presented singing and dancing act featuring Jack Lewis and his Rolling Stones with the Wellington Sisters forms the principal item in the stage show, combining dancing by a cheery trio, saxophone work and percussion 'fireworks'. Savona is a remarkable juggler while 'the racketeers of mirth, Roy Lester and Jack Cranston offer a quick-fire cross-talk act. Finally Sereno and June's head-to-head balancing and tumbling act has much which is new even in these days when vaudeville simply abounds with this kind of act. 35 08 06a

1935 Political travelling cinema, New Square car park – photo – 35 08 27

1935 Cambridge Justices approved the plans of Associated British Cinemas for a new cinema to be erected in St Andrew's Street. The site had been left derelict after fire burnt down a large part of the Castle Hotel in 1934. The application was opposed by the Theatre Cinema and the Rendezvous. There were nine cinemas in Cambridge with 6,300 seats and it would be impossible for them all to carry on if a super cinema like this were built. The Victoria was built four years ago, the Arts Theatre was completely new and the Rendezvous was having more seats and an organ. But the Cosmopolitan had closed and the Guildhall and Corn Exchange licences were rarely used. 35 10 01 & a

1935 The new Rendezvous cinema and ballroom was opened with a recital by Reginald Dixon, the famous Blackpool organist. It is the latest in modern styles with new plush 'tip-ups' accommodating 1,100 people, the latest Penum heating and ventilation and the Compton organ. Film star Charles (Buddy) Rogers said it was as beautiful as any he had seen in the United States. The show was late starting as guests were unable to get through the congestion in the street outside. Afterwards a private reception and dance was held in the new ballroom which has also been redecorated and re-furnished throughout. 35 10 22, 35 10 19

1936 Arts Theatre holds regular film seasons, (till 1940) [M]

1936 Union Cinemas, the company controlling five Cambridge cinemas have joined forces with Arthur Segal to acquire more sites – 36 01 08a

1936 The Rendezvous, in Magrath Avenue has been turned into a modern luxury super-cinema with a new café restaurant. The latest talkie equipment ensures perfect reproduction and sound, the films are of the highest quality and patrons are assured of a three-hour programme. An added attraction is the illuminated Compton organ which is played at every performance. The ballroom has been re-decorated and is one of the finest in the Eastern Counties with popular tea dances and combined tea, picture and dancing tickets. 36 03 09

1936 A proposal to sell land adjoining Cambridge Cattle Market for the erection of a cinema was defeated. The Market was increasing every week and nobody could foresee what the land would be wanted for in 75 years time. There was not the slightest need for another cinema and it would spoil the area. People who had bought their homes adjacent to the site were very upset, fearing that their homes would be devalued. But others thought it was a jolly good idea: it was a long journey into town and it would be a blessing to be able to visit a show near home. 36 05 14a

1936 Mystery surrounds the disappearance of a brilliant young organist, Johnnie Francis. Originally he was a musician in a theatre orchestra but when this was replaced by an organ he was given the opportunity to learn that. He fell out of work and made his way to Cottenham when Miss Maud Gautrey found him work picking strawberries. He was given an audition at the Rendezvous Cinema in Cambridge, borrowing clothes to replace his own worn outfit. He obtained the post at once and played there for a week before drawing his salary and walking out. He has not been heard of since. 36 08 27

1936 All Cambridge listened to the farewell message broadcast by Prince Edward from Windsor Castle. At the Theatre Cinema an announcement was made that the feature film would be interrupted for the relaying of the speech by courtesy of the BBC. Just before ten the curtains over the screen were lowered. When they were drawn back a large receiving set was seen in the centre of the stage with a single spot-light shining on it. The lights were dimmed. A tense, almost painful silence fell on the audience. Suddenly it was broken. Sir John Reith was heard. 'This is Windsor Castle – His Royal Highness, Prince Edward' 36 12 12a

1937 The new Regal Cinema, seating about 1,900 people, includes all the latest luxury features with luxurious tip-up seats. It has equipment to enable those hard of hearing to follow the sound with ease and comfort. The first attraction will be the new Fred Astaire and Ginger Rogers show, 'Swing Time', when William Southwold will be at the mighty Compton organ. A resident organist will play at each performance 37 03 31 [1.4,2.16]

1937 The new Regal cinema opened – 37 04 05a & b

1937 One of the big attractions at the new Regal Cinema is the Compton organ, fitted with an illuminated console which produces a wonderful range and combination of colours. It is described as the 'most remarkable instrument of its kind in the world, producing every kind of music from the thrilling peal of a cathedral organ to the colour and tone of a symphony orchestra or the rhythm of a modern dance band'. 37 04 03b

1937 Fulbourn Hospital is to have a cinema projector following a demonstration of both a 16mm and 35 mm machine. The smaller one was noisy and while it would project for ordinary purposes it would need to be in the same room as the patients. The projectors were of a delicate nature and if they got men of the labouring class moving it about they would get a lot of damage. The larger one was superior, it was compact, easy to work and the pictures were clear and good-sized. . Mr Stubbs said: "The sound was clear and even with a Yankee voice was tolerable – and sometimes they are not" (Laughter). 37 01 26a

1937 A police cordon was thrown round the Regal Cinema in the early hours of Sunday morning after PC Parker saw a man's head out of a bottom floor window. Two men ran away; one was brought down with a rugby tackle by a passing cyclist, Arthur Wright, another punched Inspector Witham with a knuckleduster. One was alleged to have packets of gelignite in his possession, another was found with fuse detonators. Later Scotland Yard's Flying Squad arrested a fifth man. 37 05 17a

1937 Regal cinema raid – more details 37 06 01& a

1937 Rendezvous Cinema clerk fraud trial – 37 09 08 & a

1938 After a successful fortnight of the pantomime 'Cinderella', the Theatre Cinema is closing down without any indication as to what its future may be. It was 42 years ago that the New Theatre was opened and has had a great history. Many of our leading actors have appeared and all tastes catered for – comedy, drama, musicals and grand opera. It was the coming of films that changed the Theatre's fortunes and after a hopeless struggle it was converted into a cinema with an occasional week of variety. 38 01 08a (reopened 1939 but requisitioned 1940-47 [2.18,M])

1938 Rendezvous Cinema renamed Rex Cinema [M]

1938 Theatre cinema may be turned into ice rink or swimming pool. Was not suitable for talkies and with cine-variety those who maid the most got the worst seats – letters 38 01 19b

1938 Undergraduate misbehaviour in cinemas – 38 02 07

1938 Creditors of the Rendezvous cinema accepted an offer of 10s in the pound, payable immediately. After Mr C.L. Naylor took over management of the Company in 1937 it had made quite a profit but previous debts were responsible for the present unfortunate position. The sale was completed in Feb 1938 when the cinema and equipment was disposed of for £18,373, a loss of about £10,000. 38 03 03

1938 Memories of stage and screen – 38 05 31w

1938 The Theatre Cinema reopened after a closure of over nine months with a performance of 'The Mikado' by Cambridge Amateur Operatic Society. They had found the building in a poor and dirty condition and put in much work to recondition it Now it was crowded with a delighted throng; it was itself again. That pre-overture buzz of conversation created a delightful feeling of mild excitement. At the final curtain everyone was thoroughly happy 38 11 22

1939 Central Cinema, Hobson Street was burnt to a shell in the early hours of Tuesday morning. After a five hours' fight, only the walls, the fire proof operating box, the foyer, crush hall and offices and some rows of the back stalls remained intact. The damage amounted to several thousands of pounds. 39 04 28 CIPof (reopened 1940) [1.3,1.20,M,3.18]

1939 The Central Cinema, Hobson Street, was burnt to a shell in the early hours of the morning. Only the fire-proof operating box, the foyer, crush hall and some of the back stalls remain intact. Firemen hauled hoses up to the roof of the Dorothy Café and from the high ladder of the Merryweather turntable in Hobson Street P.C. Kelly poured another stream of water on to the flames. But after an hour-and-a-half the roof fell in amid a shower of sparks. There was concern about Christ's College chapel where the roof had been removed because of damage done by the death watch beetle and only a tarpaulin covered the wooden ceiling. But a shower of rain helped to prevent it catching alight 39 04 25a, b

1939 Theatre Cinema, St Andrew's Street, known for many years as the New Theatre, was closed in January of last year after the pantomime but specially reopened for one week in November for the annual production by Cambridge Amateur Operatic Society of 'The Pirates of Penzance' Now the ABC company has decided to use the building once again as a cinema 39 06 17

1940 Sunday opening of cinemas debated, rejected – 40 05 10

1940 Cambridge Building Material Supply Co started by Charles Lovell Naylor in 1930; built considerable number of houses in Scotland Road and King's Hedges Road and sold all but five. But problems at outbreak of war lead insolvency. Bought Rendezvous in 1930 and rebuilt it 1931 after fire. He lost £2,000 over fire. In 1935 a limited liability company took over the cinema but sold it again because of his ill health – 40 05 17

1940 cinemas allowed to open on Sundays to benefit RAF [1.21]

1940 Cosmopolitan opens full time [M]

1940 Mr Pointer owned Victoria Cinema and in 1929 Pointer & Co formed for purpose of building and running a modern cinema; attached was Still and Sugarloaf. In 1935 Cambridge Holdings Ltd was formed to acquire cinemas in Cambridge who wanted to acquire Victoria Cinema and restaurant. They paid Pointer & co for £30,500 – court case – 40 08 13a, 40 08 14b, 40 08 16

1941 A.J. Pointer cinema pioneer; took over Victoria Assembly Room in Market Hill which he ran as a roller skating rink, converting it into Cambridge's first cinema in 1910, had previously used Alexandra Hall for occasional picture shows. In 1916 he took over the Kinema, previously a variety theatre which is now the oldest cinema in Cambridge. Victoria closed 15 years ago and when new Vic re-opened under a company he handed over control to his son, Eric. Personally directed Kinema till last year when son Frank took over – 41 04 24a; had been occasional films at Midsummer Fair but Pointer responsible for first regular showings at Alexandra Hall, now YMCA and comfortable seating was not one of the main attractions. Performances were shorter but comprised nine or 10 items such as five 'comics', one 'coloured trick', one news film of racing and two dramas. Early films were crude affairs and constant flickering made it seem as if picture taken in heavy downpour of rain – 41 04 26a. Early films – old Victoria cinema was called Electric Theatre and run by a Mr Jordain – 41 05 03a

1943 Cosmopolitan cinema sustained considerable damage from fire, part of ground floor and seats destroyed and ceiling broken away in places – 43 07 24

1945 Music, singing and dancing licences for Theatre Cinema, Regal, Victoria, Tivoli, Central and Playhouse transferred to Max Milder from Eric Lightfoot who leaving the A.B.C. company – CDN 1945 06 29

1946 A.B.C. Minors, providing Saturday films for children, inaugurated – 46 02 16 (ends 1982) [4.1]

1947 Sunday opening due to expire [1.22]

1947 Theatre Cinema (New theatre) : reopens showing selected, probably continental films; building stripped of all furnishings during war & is now completely cleaned & redecorated, Aug [1.23]

1947 Cosmopolitan reopened as Arts Cinema [1.24,M]

1947 With regret many enthusiastic and appreciative cinema-goers have learned of the closing at the end of the week of the Cosmopolitan Cinema, Cambridge. For fourteen years now it has been open and has a proud record since right from its beginning it gave Cambridge something out

of the ordinary. The owners of the Central Hall, the Conservative Club, have seen fit to raise the rent to a sum which the directors of the Cosmopolitan Cinema Ltd feel unable to pay. Developing out of the first Cambridge Film Society, the Cosmo was opened on October 16th, 1933. (It later reopened as the Arts Cinema in October 1947) c47 06 05

1947 Cambridge's first midnight matinee, attended by film star Richard Attenborough, and stage-and-screen star Hermione Baddeley, drew a packed house of near 2,000 to the Regal last night. The show, organised by the Cambridge branch of the R.A.F. Association was part of the Battle of Britain Week activities. "Dicky" and "Totie" as the stars are popularly known made a stage appearance before the show. Major Simpson, area manager of A.B.C. cinemas recalled that Mr Attenborough was born in Cambridge. Dicky mentioned that thought he had been born in Cambridge he left the town "practically before my eyes were open". When the show finished shortly before two o'clock "Dicky" and "Totie" stayed behind to autograph programmes c47 09 16

1947 It was "L'Entente Cordiale" night when the redecorated New Theatre, Cambridge, after an almost ten-year closure, re-opened yesterday as a cinema for the showing of Continental films. The Cross of Lorraine hung side-by-side with the Union Jack outside the cinema in honour of the visit of Francoise Rosay, the famous French film star who performed the opening ceremony. The Mayor (Coun. Doggett) wished the venture every success and expressed the hope that successful films may be followed by stage plays. "We have one theatre in this town but in my opinion there is plenty of room for a second theatre, particularly one with a larger stage". Capt A.C. Taylor, Managing Director of the "Cambridge Daily News" echoed the hope that some theatrical shows would be staged c47 10 15 [2.9]

1947 The new "temple" of the fifth art was opened by the Mayor last night. The art is that of cinema; the "temple" the former Cosmopolitan in Market Passage, re-decorated and renamed the Arts Cinema. He said "I feel the cinema will prove an added amenity to Cambridge". The success of the cinema would depend to a very great extent on a wise selection of films and efficient management. Sound and projection have been improved since the cinema was the Cosmopolitan though teething troubles prevented both being experienced that their best. The seating - with seats from the Festival Theatre - is now sloped c47 10 16

1947 Many people unable to be in their homes listened to the broadcast of the Royal Wedding in Cambridge cinemas, all of which were thrown open for the purpose, free of charge. The biggest audience is reported from the Central Cinema who estimated the total as being in the neighbourhood of 500. The sound equipment at the Regal broke down at the last minute and the small queue which had formed there was diverted to the New Theatre opposite, where a set had been hastily brought from his home and installed in the foyer by the Manager and the thrilling, impressive and historic service of the wedding of H.R.H. Princess c47 11 20

1948 Theatre Cinema (New theatre) stage variety due to shortage of films [1.25]

1948 Arts Cinema try news theatre [1.27]

1949 Sir – I note with interest remarks about cinema entertainment particularly in reference to the 16 mm Film Exhibitors Guild. The Guild is well represented in this area. Mr Maddox of Orwell, trading as County Mobile Cinemas; Wrights Ltd of Cambridge, trading as Wright Mobile Cinemas and Mr Oddy of Waterbeach, trading as Globe Cinema Service. The Chairman is Mr David of David Film Library, Wisbech, a well-known film renter and mobile exhibitor c49 10 10

1950 film entitled "Scarlet Thread" being shot in Cambridge, shown Nov.1951 [2.5,2.6]

1951 The Playhouse Cinema, Mill Road, completed 38 years of service and entertainment. To celebrate the event the manager (Mr Eric Dallman) arranged a special birthday month. He opened with a brief history of the cinema and read telegrams of congratulation from Richard Todd and

Joan Dowling, the two popular British stars. A request for any member of the audience who was at the opening in 1913 resulted in one patron coming to the stage. He was Mr W.J. Pugh who had been a regular patron since it opened. The audience was then introduced to the longest serving member of staff, Mrs F. Hewett who had done most jobs except the operating box – but thought she would like to try that as well! c51 05 17

1952 Victoria restyled : “eurythmic”: designer, architect & illuminators combine to make symphony of shape, colour & tone” [2.7]

1952 Rex : newly appointed manager Lesley Halliwell turns it into repertory cinema [2.8]

1952 Some people at the Victoria Cinema almost believed they saw fish swimming above their heads in the middle of the auditorium. Others found it difficult not to duck when a cricket ball appeared to bounce right out of the screen. The cause was something new in cinema entertainment – the three-dimensional film. At present a special screen has to be used and audiences must wear tinted spectacles. Much still has to be done before stereoscopic films become commonplace but Cambridge is among the first places in England to welcome the arrival of the third dimension in the cinema c52 11 08

1952 Cambridge is the first city in the country to be able to see the latest model of the Synchro Screen in action. This R.C.A. invention has been installed at the Rex Cinema and will be a permanent feature. The new screen enhances the photography giving it extra depth. It does not go the whole way to providing three-dimensional pictures but is a great step forward. There are five similar screens now in existence but the one at the Rex is the latest type and 2,000 people came along to see it on Sunday. c52 12 30

1953 Rex : new synchro-screen [2.9]

1953 The Playhouse Cinema on Mill Road, Cambridge, celebrates its 40th anniversary as a place of cinematic entertainment. It opened at Whitsun 1913 when there were two shows per evening with a children’s matinee on Saturdays. Nowadays we are used to newsreels which are distributed on a national basis but then their own cameraman took the pictures for a newsreel of local interest, including the Cambridge Police Sports and Juvenile Fishing Match. Music was supplied by the Playhouse’s own orchestra under Musical Director Max Bennett c53 05 21

1953 “Man in the dark”, the first feature-length three-dimensional film to be shown in the Eastern counties was screened at the Rex Cinema, Cambridge, to an invited audience. They went away feeling they had witness the most exciting event in screen history since ‘The Jazz Singer’ introduced sound in 1927. Mr R. Halliwell, the manager, said the extra charge for admission covered only the cost of hiring the Polaroid spectacles. The three-dimensional film holds such possibilities of screen terror that the deepies may tend at first to be creepies. To what extent Cambridge will succumb to third-dementia remains to be seen but the pre-view audience spent an enjoyable time c53 08 12

1954 Regal : installs cinemascope [2.1]

1955 Cambridge will be the first city to show Marlon Brando’s new film ‘The Wild One’, which looked as if it would not be seen in Britain at all. The film censor refused to give any certificate saying was too brutal and might have a bad effect on young people. But the proprietor of the Rex Cinema, Mr George Webb, asked the film people to send him a copy of the film and invited Cambridge magistrates to view it. They have granted it a local ‘X’ certificate. Columbia Film Company will ask British Railways to arrange special trains to Cambridge during the run. The story concerns a gang of young hooligans who terrorise a town because of the weakness by the local policeman. 55 03 22

1955 With the installation of Perspecta Stereophonic Sound, a vivid realism hitherto unknown in film entertainment is to be introduced to the patrons of Cambridge’s Regal Cinema. Chosen to

introduce this very latest development in the cinema world is the film 'Seven Brides for Seven Brothers'. Until now the Regal has been equipped with loud speakers behind only the centre of the screen. Now the sound will come from the exact places on the giant screen where the action indicates them and will give a new and higher quality of sound reproduction. 55 03 26b [2.12]
1955 Cambridge Central Cinema has installed a wide screen which allows a perfect view from any angle & is a vivid contrast with the former 'postage stamp' model. It has now come into line with the other main cinemas and is fully equipped for the showing of CinemaScope. The first film will be the new Technicolor musical, 'Three for the Show' starring Betty Grable 55 06 24 [2.13,3.19]

1956 magistrates try to ban "Rock around the clock", Feb 1957 "Rock around the clock" shown at Kinema, followed by "Don't knock the rock", "Tommy Steele story" [69 : 3.1-3.3]
1956 removal of mighty organ from pit of Victoria cinema - only other cinema organ at Regal never seen without dust cover, came up through floor, organist already playing [6.3]
1956 On Thursday Clifford Birchall recorded a programme of popular music at the Hammond organ of the Cambridge New Theatre. Although the theatre is closing, the melodies will linger on, for this recording, arranged by King and Harper, will be played during the evening performance on Sunday at the Playhouse Cinema. 56 03 16b
1956 Hallens presented a feast of films to suit the taste of motor cyclists. Most were manufacturer's promotions but it was the film produced locally which aroused the most interest. It presented an entertaining picture of local scramble scenes with shots of local characters and celebrities. Those attending can also inspect the improvements to the workshops with special stands for the repair of the increasingly popular auto-cycle and scooter forms of transport. 56 03 20a
1956 The manager of Cambridge's Regal Cinema, Mr C.G. Mangold, won a glittering emerald-green Messerschmitt three-wheeler presented by 'Kinematograph Weekly' in conjunction with Columbia Pictures for arranging publicity for the film 'A Prize of Gold'. He organised a car rally, window displays and a personal visit of Andrew Ray. Mr Mangold is one of the outstanding managers in A.B.C. and has won a host of distinctions. 56 05 09
1956 Cambridge Licensing Magistrates have asked Associated British Cinemas not to show the controversial American musical film 'Rock Around the Clock'. The film features a new style of dancing known as "Rock'n'Roll". It is a rhythm similar to some of the African native 'beats' and is alleged to have a startling effect on young people who like 'hot music'. In London dancing youngsters have caused trouble in the streets and assaults have been made on the police. 56 10 09
1956 Two of Cambridge's long-established cinemas, the Playhouse and the Tivoli, will close after the last performance on Saturday. Associated British Cinemas say the heavy burden of entertainments tax has made them uneconomic. The majority of the 35 staff will be absorbed by the other cinemas in the group and others will join the private cinemas run by Mr George Webb. 56 11 19b [2.20, 2.21]
1956 Raymond Bennett, the talented comedian and theatre manager laments the closing down of the Playhouse in Mill Road. It was there he made his debut as a single-turn music hall artiste. In those days it had a small orchestra and had one turn each week with the pictures. They included Godwin Hunt, baritone and humorous vocalist, George Gass, comedian of 'The Magpies' concert party and Sydney Pratt the conjurer. 56 12 22a & b

1957 The closing of two Cambridge cinemas has made us aware of the difficulty they face. One major problem is Entertainment Tax. Out of every pound paid at the box office, 6s.5d. (33p) is taken for this tax and after film hire and wages the exhibitor gets only 5½d (2.5p) out of which he has to pay rent, depreciation and living expenses. No wonder 180 cinemas were forced to close last year. 57 02 16a

1957 The removal of the mighty organ from the pit of the Victoria Cinema illustrates graphically how far this kind of musical entertainment has fallen from public favour. The only other cinema organ in Cambridge – that at the Regal – is never seen without its dust cover. The management says it is kept in good order and could be played at any time. However it would need a travelling organist to come up from A.B.C. headquarters in London. If the truth be told it is in permanent retirement. 57 10 01b

1958 “The Freshman”, a light-hearted film about life at Cambridge University, will bring in all the well-known local angles – the May Races and balls, chases by Proctors and their ‘Bulldogs’, visits to coffee bars – and of course, a local romance. It will star Hardy Kruger and Sylvia Syms. But they have had a mishap. While a motoring scene was being shot along Trumpington Road the crankshaft of a vintage 1927 Bentley car suddenly snapped. Now mechanics are searching for a spare, or a new car! 58 08 29a [2.23, 2.24]

1958 ‘The Freshman’ film has already established itself on the Cambridge scene. The appearance of cameras, technicians, stars and generators at various locations still causes a stir and there is never any lack of people watching the action. German film star Hardy Kruger, who plays an undergraduate, has had a bewildering initiation into real student life. He has seen the May Balls swinging on till dawn. And he has seen that car park on the Senate House roof. No wonder he looks worried! 58 06 13c, 58 06 12

1959 The Regal Cinema was crowded for the Cambridge premier of ‘Bachelor of Hearts’, the film of University life which was made on location in the city. A reception was attended by the film’s producer, Mr Vivian Cox, director Wolf Rilla and one of the ‘starlets’ from the cast, Miss Gillian Vaughan. The film deals with the adventures of a young German student, played by Hardy Kruger, and an attractive Girton girl (Sylvia Syms). Comments varied widely but everyone agreed there were many good laughs along the way. No plans have been made for it to be shown in Oxford. 59 01 16c, 59 01 20, 56 01 21

1960s The Cambridgeshire Collection has detailed newspaper cuttings files from this date

1960 old Playhouse to become supermarket [5.2]

1961 Bingo is the new national craze. During the first few games of a Cambridge session television refugees toiled away at their bingo booklets, smog descending over their bent heads. Most of the audience were regulars. They ‘never missed’ because ‘it was an evening out’. They were not lonely there, neither were they bored. The jackpot was a modest one – if it reached previous heights of £30-40 people would be queuing to get in. But at sixpence a time and with not a ‘line’, let alone a ‘house’ in credit, the evening could be an expensive one. 61 11 10a

1962 last picture show for minors, Victoria, 1st was 1946 [5.13]

1962 The new Victoria Ballroom was opened by Ronald Fraser, the film and television star, who had previously appeared at the Regal Cinema as part of its 25th anniversary celebrations. Converted from a café above the Victoria Cinema, it will reduce the number of ‘wallflowers’ on Saturday nights when special buffet dinner dances are being run at a cost of a guinea for a double ticket. When not in use for dancing it will still be put into service as a café 62 04 05 [5.3]

1962 first Cambridge film festival [2.26]

1962 Council bans bingo on its premises – 62 01 18

1962 Maurice Stevenson started as a cinema projectionist in 1927 as a lad of 16 at the old Tivoli Cinema in Chesterton Road. They were the silent days. Then he went to the Regal and later the Central. In the old ‘disc’ days you had to be careful even closing the door in case you shook

the needle out of its groove in the record. If you lost the synchronisation between the record and film it was the devil's own job getting it back again, he remembers. The machinery is much more simple to operate now.. 62 09 14

1964 Every Saturday children start arriving at the Victoria and Central cinemas for the matinee performances. Many are brought by their mothers who are grateful for the chance to do the weekend shopping without them. Before the film starts they sing 'We are Minors of the A.B.C.' to the tune of 'Blaze Away'. There's always one cartoon like Tweetie Pie, then the serial in which the action is fast and furious. It's followed by a short comedy film, then a full-length feature with plenty of action, usually made by the Children's Film Foundation 64 05 08

1964 Arts Cinema is oldest repertory cinema in country; Norman Higgins opened it in 1933. Previously at the Tivoli he founded an undergraduate film society and leased Conservative Hall in Market Passage. Began showing films all year round in 1947 – 64 05 01cc

1966 Alfred Hitchcock visits film society [7.3]

1966 Kinema cinema, Mill Road closing; has 400 seats and staff of seven. Owner is George Webb. It may continue as cinema under new ownership – 66 03 12a reopens for Bingo & films [M]

1966 Bingo at the Kinema – feature – 66 07 08 & a

1967 Rex Cinema used as Bingo Hall (till 1970) [M]

1967 Victoria Cinema reopens with giant 70 mm screen, luxury lounge area replacing seats on ground floor; restaurant and ballroom refurbished – 67 10 06

1969 ADC Theatre given permission to show films all year round , stands empty for much of year – 69 03 19d

1969 Maurice Stevenson, longest-serving film projectionist – memories – 69 09 08

1970 Rex Cinema reopened after expensive refit [M5.7]

1971 Regal Cinema to be twinned – two different films to be shown – 71 04 14

1971 Regal cinema organ – last chance to preserve – 71 05 12

1972 Regal Cinema reopens as ABC 1 & 2 twin cinemas – illustrated feature – 72 01 12 [M,4.7]

1972 Victoria Cinema renamed ABC 1 & second screen installed [M]

1972 Central Cinema final film performance, converted to Bingo [M]

1972 Rex Cinema closed suddenly (demolished 1979) [M]

1972 It was "eyes down" for the first time last night in Cambridge's new £10,000 bingo hall which will offer enthusiasts an almost non-stop programme throughout afternoons and evenings six days a week. The bingo hall which can accommodate nearly 1,000 players at a single sitting, is in the converted former Central Cinema in Hobson Street c72 03 24

1972 The Rex cinema in Cambridge may soon echo to the moans and groans of live wrestling. This is just one of several ventures planned for the cinema by Victory Theatres who will take over as new owners

in a few days time. The front of the cinema is to be re-modelled and additional heating installed. In keeping with its luxury refit The Rex is to be renamed the Royal Luxury Cinema. "It will be a cinema of the seventies", said the Managing Director of Victory Theatres, Mr Victor Freeman. Other ideas for the revamped Rex include a Christmas pantomime. Victory Cinemas are buying The Rex from Abbey Sports Club. The ballroom at the cinema will continue to be owned by Abbey Sports Club c72 08 18

1972 "The demolition of the old Y.M.C.A. building will no doubt bring a touch of nostalgia to many of the Cambridge residents who have lived here for well over 70 years. I can remember that the very first "talking pictures" in Cambridge were shown there. These took the form of a rather jerky film show, screened from the rear, and the talking was done by a lady and gentleman behind the screen. After the performance they came to the front and bowed to the audience, which, on Saturday afternoon mainly consisted of children, and each child was given either an orange or a bag of sweets on the way out" - letter from F.C.Woolfenden c72 09 05

1976 Plans for a nightclub in the former Rex Ballroom and Cinema at Magrath Avenue, Cambridge, have been scrapped after residents succeeded in opposing both a drinks licence and a music, singing and dancing licence for the club. Mr Gordon Cave wanted to open 'The Carioca Club' on the premises but faced violent objections from the police, the city council and residents who have for years protested about the noise and nuisance caused. Their complaints intensified when the ballroom was turned into a nightclub a few years ago and the cinema became a bingo hall c76 08 29

1977 first film festival [6.1]

1977 The Central EMI Bingo and Social Club, a converted cinema in Hobson Street, Cambridge, could quite comfortably have found a place in the zaniest of science fiction movies – with its brash psychedelic mish-mash of colours and huge electrically operated board that rises high behind the caller. The four-year-old club has 10,000 members and is an addict's paradise – open every afternoon and evening except Sunday and with hundreds of pounds at stake at each session. On Saturday the club linked up by phone to the EMI club in Oxford for a game which boasted a £400 jackpot. In the few seconds between games people dashed for the fruit machine which spills out its £30 jackpot in 50p pieces CDN c21.1.1977

1979 Kinema last film [M]

1979 The old Rex Cinema and ballroom in Magrath Avenue Cambridge which has been a source of controversy among nearby residents is now owned by Cambridgeshire County Council who paid £33,000 for it at auction. The building has been almost derelict since the Abbey Sports and Social Club closed in October 1973. The exact future of the site has yet to be decided but it will extend the present facilities at the Shire Hall CDN c 10.2.1979

1980 When the word first went out that a major feature film, 'Chariots of Fire' was seeking 150 undergraduates for a couple of day's filming in Cambridge the film-makers found themselves oversubscribed. But the response from other sections of the University was less enthusiastic. Gonville and Caius and Trinity College have refused to allow filming and several 'Cambridge' scenes are being shot at Eton 80 04 17 [6.2]

1982 Film fans need have no fears that Cambridge cinemas may be converted into Bingo halls. EMI, which owns the two-screen Victoria say they have plans to convert it into a triple. It is the largest in town and attracts an average audience of about 600 people. Seats are now £2.10 for adults but the manager rejects the idea it is too expensive. One of the long-term threats is the home video market 82 01 20

1982 Maurice Stevenson is Cambridge's longest-serving projectionist; he recently retired from the Victoria Cinema after showing films for 54 years. He started aged 14 at the old Tivoli Cinema in Chesterton Road, moved to the Central, then the Playhouse where he was chief projectionist at the age of 18. Later he was at the Regal. He has seen it all from the 'silent' days to the coming of 'talkies', then colour; from the advent of 3D and wide screen to stereophonic sound, from traditional projection methods to highly-developed technology.

82 03 12d

1982 The lights went up for the last time on the ABC Minors Matinee at the Victoria Cinema, Cambridge. The final credits brought to an end an institution which has won a place in the hearts of thousands of children. No more will Keith Kendall and his part-time cleaner colleagues sneak into the lavatories to catch some 12-year-olds having a crafty cigarette. Sid Perkiss, who has manned the box office, remembers when two or three hundred children packed the cinema. Now it has been killed by the one-eyed villain, television. 82 06 01

1983 ABC Victoria 1 damaged by fire (reopened 1984) [M]

1983 There can be no doubt about the popularity of film libraries; they range from cinema classics to soft porn. Some shops have the cassettes on shelves behind the counter leaving the hirer to choose from catalogues, others kept the cases on open display. It costs about £1.50 to hire a film for 24 hours with a deposit of £30. It is usual to leave a signed cheque which is exchanged for the return of the film. But tapes only have a limited life; constant use results in 'stretching' and tape 'slap' caused by poor rewinding. 83 02 20

1983 A fire at the Victoria 1 cinema on Market Hill completely destroyed the screen and part of the stage, causing damage estimated at £50,000. There appears to have been a forced entry and it is being treated as arson. The cinema was showing 'War Games'. It is hoped to open the 139-seater Victoria 2 today 83 12 05 p [4.2]

1983 The Central EMI Bingo and Social Club offers cash prizes all the way up to £1,000 on Saturday night. This is shared with three other clubs in Oxford, Wellingborough and Colchester. But winning comes second: its social function is undeniable. It is raucous but never resigned. "You get all classes here", said the highly-popular afternoon caller. Maggie Bennett. "You get a few who are a bit rough and who you can tell by their clothes are playing with the family allowance. In the evening you get much younger people. Basic costs are an admission fee – pensioners may only 23 pence – and the buying of books of cards for each session – two books cost £1.70 - 83 03 15 p10

1984 Cambridge's Victoria cinema reopened after the disastrous fire and is now one of the best-equipped in the country with new equipment, new seats and much-improved lavatories. It has six-track stereo, a new screen and the new 70mm projector is seen at full benefit in films like 'Ghandi' and 'The Star Wars' trilogy which will be brought back by popular demand. When the seven-hour programme was tried out last year it attracted a full house with people in fancy costume 84 02 08 p14

1984 A blaze swept through the ABC Regal cinema in St Andrew's Street, gutting the central part of the 730-seat auditorium. The recently-renewed screen melted with the heat and the rest was damaged. The Polyurethane seat and floor coverings caused a lot of smoke which penetrated the upstairs ABC2 cinema. It is believed to have been started by a cigarette end left smouldering by a cinema-goer. Last year the Victoria cinema was damaged by an arson attack 84 09 06 [4.3]

1985 6-screen cinema planned to replace Victoria. sold for new Marks & Spencer store [4.4]
Cambridge's Victoria Cinema has been sold to make way for a new Marks and Spencer store. The prime market square site has housed the city's largest cinema since 1931 and underwent a major refurbishment following a fire two years ago. The sale will leave Cambridge with two other cinemas, the ABC 1 and ABC 2 complex and the Arts Cinema. But there are plans to change the old Kinema bingo hall in Mill Road back into a cinema 85 12 17 [4.4]

1985 The Kinema is no more. Like the Central Cinema it became a bingo hall. But at least it has not been pulled down to make room for a supermarket, like the Playhouse, nor turned into a warehouse like the Tivoli, nor demolished to become a car park like the Rex. Leslie Halliwell who was manager at the Kinema and Rex is now regarded as the country's leading cinema bluff. And in his new book 'Seats in All Parts' he has plenty to say about the way cinemas used to be run in Cambridge. 85 03 26c

1985 The old 100-year-old Kinema bingo hall in Mill Road, which is currently on the market for £170,000, may be restored and turned back into a cinema to meet the fast-growing demand for the showing of old-time and specialist films. The City Council, who owns most of the property nearby, think it could become a major tourist attraction helping to tempt visitors away from the city centre 85 12 12

1985 The Kinema in Mill Road was built in 1882 when it was called the Theatre Royal. It was also known as Sturton Town Hall and Gladstone Liberal Club and staged shows until 1885. It was taken over by the Salvation Army who were ousted in 1910 then renamed the Empire, showing variety and pictures until 1916 before changing its name to the Kinema. It was badly supported and became a bingo hall. Now it may be restored as a cinema with a café, bookshop and entertainment complex. It is owned by the Sturton Town Hall Liberal Company, named after Joseph Sturton, a powerful Liberal who bought land in the area in 1897 and built houses for poor people. 85 12 27

1986 Plans for a super cinema complex on the site of the main Post Office sorting office in Mill Road could see six separate cinema units each capable of holding 300 people together with a massive cycle parking space. Thorn-EMI says they need more screens and the Victoria Cinema site is unsuitable for conversion. The Post Office, which is currently building a new sorting office on the Clifton Industrial Estate, already has permission for housing or the site might accommodate Technical College students. 86 04 08 EMI plans for Mill Road complex rejected [4.5]

1986 Cambridge City Council has abandoned its plans for the former Kinema in Mill Road. When the building closed as a bingo hall there were hopes it might be restored and reopened as an Edwardian music hall and become an out-of-centre tourist attraction. Others felt the site could be used for housing or demolished to allow the widening of Mill Road. Now a private entertainments company hope to reopen it as a specialist cinema. 86 04 10

1986 Tivoli - plan for entertainment centre rejected [5.18]

1987 Arts Cinema consider move Festival site £CEN 7.10.87

1987 Victoria to close 1.88 £CEN 23.10.87

1987 Cambridge councillors have abandoned plans to buy the old Kinema cinema and bingo hall in Mill Road because repairing the century-old building would cost too much. It had been hoped to restore it to its former glory as a Victorian entertainments palace but a structural survey has revealed more than 40 major faults. Some of the walls bulge, the building needs a complete new roof and all the woodwork would have to be renewed. Now it might be demolished to widen the road. 87 01 26

1988 Lights went up for the last time at the Victoria Cinema as the final performance of its last show came to an end. As the audience left after seeing 'Spaceballs' or 'Predator', manager Richard Wright reflected on the cinema's long history. Memories of MGM musicals, Saturday morning minors and all-night horror shows came flooding back. Mick Wells, who has been the chief projectionist for 24 years recalled the halcyon days when 'South Pacific' ran for two solid years and 'The Sound of Music' for three. Now the building on Cambridge Market Hill will make way for a new Marks and Spencer store. 88 01 15

1988 Victoria Cinema staff recall history – 88 01 27b

1988 proposed cinema, Corn Exchange £CEN 16.6.88

1988 Corn Exchange to be regularly used as cinema £CEN 12.10.88

1988 planning granted for £30M expansion Grafton Centre, including cinema £CEN 3.11.88

1988 The former Kinema music hall may be turned into a multi-million pound block of student accommodation. Sawston-based William Sindall has applied to build an 80-room scheme for CCAT but will wait until the college gains Polytechnic status in April 1989 before handing over

the lease, avoiding Government restrictions. It comes as food news for the college which has seen its hopes of turning the former Owlstone Croft nurses' home into 200 flats dashed by a change in rules over lease-back schemes. Now residents will be consulted. 88 04 30

1988 The former Tivoli cinema building which opened on Chesterton Road in 1925 has been converted into 'The Exchange' with two large cocktail bars and a 120-seater restaurant. Later will come a basement gym, a punt landing stage and a roof garden restaurant with panoramic views over Jesus Green. Entertainment facilities include a huge electronic roll-down screen, the latest audio equipment and closed circuit television relaying film of the dance hall, But great care has been taken to preserve the distinctive atmosphere with plaster ceiling mouldings and a combination of rich dark and red wood 88 12 15a

1894 Free Library open to those living in country Ch 5.1.894 p8

1895 New Cherry Hinton reading room opened [2.1]

1895 Boots subscription libraries opened Cambridge 1895 – feature – 88 06 30

1897 Mill Road library opened, Barnwell reading room closed, June, Barnwell reading room reopened, November [1.3,2.2]

1897 The Guildhall floor has become so unsafe that when a ball is held in the large room the most elaborate precautions have to be taken to support the beams in the ceiling of the Free Library beneath. This shoring-up process costs something like 30/- each time and is a sheer waste of money 1897 02 27 CDN

1897 Sir - It has been a cause of much regret and dissatisfaction to many to hear of the closing of the Barnwell Branch Free Library. It was understood that the opening of the new library on the Mill-road would not interfere with the progress of the Barnwell branch, but it seems that the East-road library is to be closed to supply the Romsey Town Library with books. When it is closed I am afraid many people who would otherwise read, will patronise public-houses, for many men who have worked 12 hours would hardly care to walk a mile before they could get a book to read
1897 05 20 CDN

1897 The Mill-road branch of the Free Library was opened by the Mayor last night amid every manifestation of pleasure and satisfaction. The Mayor said that people who lived in that neighbourhood were too far from the Guildhall to be able to get the full advantage of the Free Library. Within a half-mile radius of the handsome new building there is a population of not less than 12,000 people. It was in May 1891 that the Guardians conveyed the site to the Corporation for the express purpose of erecting thereon a building for a branch free library. No public body ever made better use of public ground
1897 06 03 CDN

1897 How many of the inhabitants of "aristocratic" Cambridge have penetrated the depths of Barnwell through the lovely labyrinths of Brewhouse Lane? A mere outsider might suppose that the city of colleges had no dark parts; that its workmen's tenements were models of sanitation and comfort; that its streets were well paved and lit; and that no foul smells arose from its sewers - in short, that a learned city would be raised and modelled on enlightened lines. For the dwellers in the "town" proper there is a reading-room and library. In Mill-road there is another reading-room and library amongst those who are, at least, moderately well to do; but in Barnwell, the abode of the toiler there is now nothing but hard work, smaller houses, surroundings much more unwholesome than in the other parts of the town - and his reading-room has been taken away. Can it be that those in authority are carrying out the scriptural prophecy: "To him that hath shall be given, and from him that hath not shall be taken away even which he hath"?
c1897 08 28

1897 Barnwell to get back Reading Room, 1897 10 14, p2-3 CDN

1897 Sir. The Reading Room on East Road, Cambridge will be re-opened on Monday next, from six till half-past nine o'clock. Everything has been done to make the room as efficient and comfortable as possible, new gas fittings and furniture provided and the floor has been covered throughout with linoleum. By the liberality of the Mayor about one hundred volumes of useful works of reference, biography and travel will be placed upon the open shelves. There will be supplied 15 daily newspapers and it is hoped that there will be a large attendance and an appreciable use made of the literature supplied - John Pink, Librarian
1897 11 27 CDN

1897 Once again the good folk of Barnwell are in possession of their reading-room. This time improvements have been carried out and the workers around East Road will not only have a convenient room, but also an attractive and comfortable one. The room is the same as of yore, and the exterior is as ugly as ever, but inside everything has been re-painted and varnished, & incandescent lights have replaced the old-fashioned flickering gas jet. Although Mr John Pink, the borough librarian, opposed the re-opening, since the decision of the Council to again provide facilities for the thoughtful working men of Barnwell he has done his utmost to ensure they are as full and liberal as possible
1897 11 30 CDN

1898 new reading room Castle End reopened in deference to wishes of public[1.4,2.3]

1898 In the publication "Public Libraries," which is published in Chicago, is an article with reference to Cambridge libraries. "At the free public library, visited on Saturday evening, a changing crowd stood in line for nearly three hours, in spite of the fact that they were waited on at the rate of one a minute. We found several labour-saving devices and conveniences in this library, which seemed to be a little ahead of the average Library we visited. One of the finest collections of Shakespeariana in the country is in this building
CDN 1898 07 19

1898 At the Cambridge Free library committee meeting an offer was made by Mr W.H. Hattersley to present an oil painting of Mr John Pink, who has been the librarian ever since the

commencement of that other institution in 1855. It was agreed to make the necessary arrangements for placing the portrait in the Reading Room. It is painted by Mr P Hall, master of the School of Art CDB 1898 08 08

1898 The annual report of the Cambridge public Free Library has been issued. Under competent management and the able direction of Mr Pink, it has continuously added to its resources. It is now as well equipped as any one could desire. It has a reference library and in the Shakespeare and dramatic collections a special features of great interest and real value. Moreover there is the branch library at Mill road with 6,600 volumes and during the past year reading rooms have been opened at East road and Castle end. The people who enjoy these facilities of access to the best literature may well be envied by those who do not CDN 1898 10 05

1899 However poor the local newspaper its files are the best source of information as to what has taken place in the district. It is only in the British Museum that files of the newspapers are preserved as a matter of course. In places where there are free libraries a good deal is done but very often the files are incomplete and in some cases the importance of preserving these records is not realised as it ought to be. County councils should undertake the work of filing these newspapers, of binding the volumes and keeping them in a place ready of access by the public - 1899 01 04

1899 Looking over the catalogue of the Cambridge public library we were struck with the care exercised in obtaining and preserving copies of every publication of local bearing, even down to the most occasional leaflets. This is as it should be. It may well be that there are documents lying in inaccessible places what contain information for which even now students of local history are searching in vain. Why should these not be deposited in the public library, accessible to those who desire to make use of them? c1899 09 09

1899 There are some who deplore it very much that the Free Library readers should resort so much to fiction. There can be no greater waste of time than the reading of novels that are not worth reading. At the Central Library there were issued during the year 67,661 volumes in the class of fiction and it must be admitted that Cambridge might with advantage become a little more serious in its reading. At the Mill Road branch 293 borrowers were added whereby it is made clear that the branch supplies a very real demand 1899 09 26

1900 Sir – As an old user of the East Road Reading Room, Cambridge may I complain of the insufficient supply of newspapers there. Morning newspapers are entirely absent, excepting one a day old. I received a severe shock some time ago when I founded posted up a copy of the “Times” newspaper, but found it was an old copy. In the old days we were allowed the “Times”. The reading matter is so seriously curtailed as to prevent one from arriving at a consensus of opinion; this tending to keep in darkness a not highly favoured part of the town – A. Clark, Walnut Tree Lane CDN 1900 05 09

1900 Cambridge Library Committee state that during the past year the institution has been used by a larger number of persons than before. The war in South Africa necessitated a larger supply of newspapers, war maps and a service of telegrams. Every hour of the day there was a constant stream of visitors & during two weeks in February the reading rooms were visited by more than 57,898 persons CDN 1900 09 28

1901 Sir – In two hours on Saturday evening, with the aid of the efficient staff at the Central Library, two hundred books were exchanged – one every twenty-four seconds; taking back, making returns, finding fresh books and entering same in register and books. All this was done with a politeness and steadiness of deportment most commendable, Mr Pink jun. calling out in clear tones the numbers returned and those taken in place of them and his assistant staff, especially Mr Fenton proved themselves to be the right men in the right place. - One of the Crowd c01 04 10

1903 Cambridge Library Committee considered the supply of literature for the use of the blind; they will subscribe for the supply of books provided a sufficient number of persons expressed their willingness to use them. It is hoped that those who “live in darkness” will be made acquainted with his decision. From 1895 to 1899 books were issued in response to applications but the number of blind readers never reached double figures. The average citizen will always be inclined to stretch a point with regard to expenditure in order to provide food for the brain for the blind. But how many are able to read the Braille type which has superseded the Moon system that was in vogue for some considerable time. c03 08 26

1903 We do not think there is the slightest risk of smallpox spreading through the use of books belonging to the Cambridge Free Library. Almost directly the epidemic was made public, Mr Pink, the librarian, wrote to us stating that every infectious case was immediately reported to him by the Medical Officer of Health. If such persons were borrowers a notice was despatched informing them they would not be able to borrow any book until the house had been properly infected. Any books or cards they had were collected and promptly destroyed. We do not see any necessity for the closing of the Library – Editor c03 08 29

1903 Ald Spalding said the Free Library was a very worthy institution, but it was supported by the rates of the town & these should be used in opposition to legitimate businesses. There were three lending libraries in Cambridge, the proprietors of which paid a considerable sum of money for the rates. He did not think it right that the Library enter into competition by offering the use of fiction and the other advantages of the Library to county residents for the minimum annual subscription of 5s. It was not fair and should be discontinued. c03 10 23

1903 If the scene that attended the opening of the children’s reading room at the Mill Road branch of the Cambridge Free Library can be relied upon the experiment ought to be attended with the happiest results. Within a few minutes of opening it was fully occupied by boys and girls and the demand for admittance was in excess of expectations with a large number waiting patiently outside until room could be made for them. Some had a long wait as once the children had settled down to the store of attractive books and pictures provided the employment became completely absorbing. Their clean faces and hands and well-brushed hair helped form a charming sight which their complete quietness and good behaviour rendered all the more attractive. c03 12 04

1903 Mill Road library opened a reading room for the exclusive benefit of children. Apart from the love of books and pictures likely to be instilled into the youthful mind there are habits of cleanliness, order & discipline. Dirty hands and faces are not permitted to enter and bad behaviour is punished by immediate expulsion. The children will be well looked after and tired mothers and weary fathers can rest with easy minds knowing their offspring are enjoying themselves without injuring either their bodies or their morals. c03 12 09

1904 survey shows most readers under 30, 173 under 20 and only 15 between 50 & 60 [2.22]

1904 The Cambridge Free Library committee are desirous that no resident should remain ignorant of the means at their disposal for acquiring knowledge. They have authorised the sale of the new catalogue at considerably less than cost price and issued a circular to every house. The Central Library reading room, with its wide selection of newspapers and periodical literature, invariably has its full complement of readers. Borrowers are induced to take a work of fiction and another work away together and so a taste for reading of the useful kind is being instilled. CDN c15.1.1904

1904 fire at Bell’s corn merchants, Peas Hill, June

1904 Sir – I would like to know who is responsible for the very cold atmosphere in the Cambridge Free Library Reading Room. A few weeks ago I tried to enjoy an hour’s reading, but the cold and draughts were so severe that, although a hearty vigorous man accustomed to outdoor work in all weathers, I caught a severe cold. There are three stoves in the room but I have never seen more than one alight and a radiator which is usually almost cold. In the recent cold snaps the

room has been under 45 degrees all day long. There is only a little cylinder boiler about the size of a beer cask inserted in an ordinary fireplace behind the counter of the lending department. Now they have installed a ventilating fan which works at intervals which not only causes a distinct chill but the noise and vibration are maddening, resembling the sound of a motor car running round the room – ‘Ouvrier’ CDN c 12.4.1904

1904 Cambridge Library committee referred to the recent fire on Peas Hill and the destruction of the premises adjacent to the library. But for the skill of the fire brigade the reading room must have been destroyed and the contents lost. The accumulation of books, pictures and scarce literature could never be replaced. Now the old dilapidated buildings should be cleared away and a more appropriate building erected. Next year they would celebrate the jubilee of the opening of the library and the appointment of Mr Pink as Librarian. The Library Association should be invited to hold their annual meeting at Cambridge, free of charge. 1904 06 16

1905 Library Association Conference in Cambridge [1.5]

1905 Borough Library 50th birthday [1.5]

1905 John Pink, the veteran Cambridge Librarian says that a man ceases to read books after attaining the age of 40. Library statistics show that older men do not borrow books but read more periodicals. The newspaper of today is a very different thing to what it was 40 years ago; around the newspapers in the reading room were many men, some eagerly peeping over each other's shoulders and several reading monthly magazines. Nor does the present generation read as much as before, athleticism occupies too much of their time, he feels 05 05 01a & b

1905 Cambridge Free Library is singularly rich in local literature due mainly to the Librarian, John Pink. He was born some 67 years ago and is steeped in Cambridge lore. There is little that he does not know and is always able to tell where the answer is to be found. His catalogues testify to a conscience for detail and a zeal to make the library as comprehensive as possible. His conscientious manner and obliging disposition are reflected in all the members of his staff. 05 08 21b

1905 Library Association conference debate on Sunday opening – 05 08 21aaa

1906 Cambridge Library committee recommended that a branch reading room be opened in a room in St Paul's Institute, Coronation Street. But Prof Sorley said a reading room supplied people with ephemeral newspapers and magazines, it did not supply literary, technical, scientific or reference works and the central library did not have the works it should have. However it would prevent a great deal of loafing about in the streets which was productive of crime. 06 10 25b

1906 Library usage – buy sixpenny editions of novels – 06 10 27e

1906 It is with regret we announce the death of Mr John Pink, the Cambridge Borough Librarian. He started life as a bookseller's assistant but the adoption of the Public Libraries Act in 1853 opened up the walk in life which he has conscientiously and with dignity trodden for over half a century. Around him and his personality the Cambridge library has grown from small beginnings to its present state as one of the finest in the provinces, a permanent memorial to its first librarian. 06 11 26c & d funeral 06 11 28, 06 12 01[1.6]

1907 A warm well-lighted room in St Paul's Institute New Town was opened as a reading room. There was a collection of current literature ready for the first arrivals who drew chairs to the tables and took advantage of the comfort and facilities provided. The Free Library was one of the most popular institutions in Cambridge, ten years ago a branch was established at Mill Road with other reading rooms at Castle End and East Road. 07 01 02 & 2a

1907 Cambridge Library – W.A. Fenton appointed librarian – 07 01 03b, 07 01 25

1907 Public library salaries – details – 07 01 07

1907 Some years ago Cambridge Free Library opened a public reading room at the Castle End Mission and Working Men's Institute. It has proved a boon to those who have used it. However the Institute's work is growing and their newly-formed men's club now has a comfortable room well equipped with daily, weekly and monthly papers, a cosy parlour for games, conversation & smoking and a first-class billiard room with full-sized table. Membership is open to all men over 18. 07 03 19

1907 Cambridge Central Library Reading Room opened in 1884 but has now fallen behind many towns of similar size. The Reference library contains a Shakespeare library and an important Cambridge collection accommodated in galleries in the lending department. They have many old books, prints and artistic works they are unable to exhibit and cannot give the community the full enjoyment of their own possessions. There is a pressing need for an extension of its premises. 07 06 11a & 14, 07 03 16

1908 Cambridge Free Library never gave details of their expenditure and it was wrong that a large spending committee should keep its operations in the dark. Members of the committee supplied goods to the library, it might be lawful but it was not expedient, a councillor claimed. But Mr Bowes had been a benefactor to the library whose advice had been invaluable and supplied books on the same terms as to other people. CWN 08 08 07

1909 during reflooring of Central Library annexe to Corn Exchange fitted up as reading room [3.1]

1909 Cambridge Free Library is to introduce a system of 'card charging' in place of the present system of 'ledger charging' for the issue of books. This is the most up-to-date and efficient method of issue known and will be a boon to borrowers and staff alike. In another reform that will meet with general approval any burgess may now borrow on signing a "burgess's voucher" rather than get the signature of a guarantor for the safe return of the books CWN 09 01 08

1909 Cambridge Free Library has acquired at auction a somewhat badly bound volume of Cambridge newspapers which are unique. They start as 'The Huntingdon, Bedford, Cambridge and Peterborough Gazette' of 15 April 1818 but change title to 'The Cambridge Independent Press'. The purchase shows the happy understanding between the University and Town Libraries both of which were anxious it should not pass into private hands. They agreed the Borough Library should have the first chance but that if the price were too high then the University would bid. 09 06 04

1910 Free Library given Hattersley Bros ledger 1765-5 – 10 04 08a

1911 The present opening hours of the Central Library Reading Room do not meet the needs of people who commence business at 9am or earlier and must wait until 10 before they can consult directories or other reference books. Persons in search of situations are also at a disadvantage through not being able to see the newspapers at an earlier hour. In future it will open daily from 8.30 am to 9.30 pm. The advantages would justify the small additional expense involve. 11 06 30c

1913 Guildhall extension ratepayer's opposition – any money spent on libraries should provide reading rooms for Chesterton, Cherry Hinton and Newnham: when a man got home from business he doesn't feel inclined to walk down to the town again – if you look into the Mill Road reading room at night you will see how much it is appreciated. 13 09 05 p5 CIP [3.5]

1913 Cambridge Free Library reports an increase in use with as many as 3-400 visitors in one hour. The cultivation of interest in local history shows every probability of the future Reference Room being well used. It possesses a very fine collection of books, maps and plans on local subjects for which there is considerable demand. John E. Foster had been a generous donor and presented many volumes of local and antiquarian interest. 13 08 15 p9 CIP

1914 Cambridge Library was one of the finest in the country but all available floor space was utilised and extensions must be made, especially to relieve congestion in the Reference department. They should develop the site now occupied by houses in Wheeler Street and adjoining vacant land, councillors heard. But a library was a luxury and ratepayers did not want it. The plan was agreed 14 05 22f & g £5,000 scheme for additional offices for library passed council [3.9]

1914 library starts events diary [3.6]

1914 protest against open access system, at present apply for volume & after profitless period of waiting learn that book out [3.7]

1914 Proposals for extra accommodation for the Library, Education Department, Juvenile Employment Exchange and Weights and Measures Department on the site now occupied by houses in Wheeler Street prompted long discussions Nearly every councillor found it incumbent to express his opinions and an hour was passed away more or less pleasantly and profitably in this fashion. 14 03 27h

1915 Interesting Engraving -The Cambridge Borough Librarian has been authorised to purchase, at cost of 35s. a local engraving, entitled the Dinner given to 15,000 persons on Parker's Piece. 1916 Reference Library and Education department, Peas Hill – photo & details – 16 05 10c

1918 Free library continues popular; not convenience for adopting the open shelves of the most up-to-date Free Libraries but compromise putting up of counter and wall cases in which a selection of books is placed for the inspection and choice of borrowers. The advantages of the recently added Reference Library are beginning to be appreciated and the number of users daily increases ... the general reading room in the evening is literally crowded. The Librarian, Mr Fenton who is in khaki has reached France & hope to soon be back. In his absence duties being carried out by his chief assistant Ch 18 11 27 p3

1921 Village libraries – provision of a properly-organised service similar to that enjoyed by residents in towns; apply Carnegie Trust – 21 11 16c, 26 11 23a

1922 Cambridgeshire rural circulating library proposed with grant from Carnegie & appointment of Librarian 22 01 04

1922 The Cambridge Library Committee has resolved to convert the Free Library into an open access library, which will enable borrowers to go straight to the shelves and select books for

themselves. It is a somewhat heroic experiment, as the library premises are old-fashioned, confined and ill-lighted. A thousand persons a day rummaging at will over the shelves in the limited space available is a serious proposition and considerable expenses will be involved in the rearrangement of shelves and bookcases 22 05 06

1922 open access introduced to Lending Library, closed for 3 weeks while reclassify 15,000 books & construct 3-sided counter near entrance [2.25,3.2]

1922 premises old fashioned, confined & ill-lighted; 600 issues, hope for 1,000, considerable expense rearranging shelves [3.4]

1922 "Sir. At one time I was a fairly constant user of the Free Library, but of late my visits are not so

frequent for the sole reason that one cannot sit down and read with ease and comfort. As I enter the Library I am watched. I am stared at practically the whole time I am there, and when I leave the eyes of some official stare at me until I am off the premises" - A friend of the library "Sir. I am in the Free Library practically every week day during the year, but I have never seen any member of the staff either "killing time" or "staring round private corners". They always appear to me to be well occupied; but however busy they are they are always most obliging and go to a very great deal of trouble to find out information if any is required". - Another Reader c22 06 30

1923 open access introduced to Mill Road [2.26]

1923 As a frequent visitor to the Cambridge Free Library, I have noticed with interest the very good use to which the reference library is put. It is especially satisfying to notice the number of school teachers and senior scholars who spend their Saturday mornings there, and this I have observed at the Mill Road branch as well as the Central Library, showing that the Cambridge library is, as it should be, a valuable auxiliary to the educational machine. The Mill Road Library was the worst sufferer in the necessary economies of wartime and is to receive preferential treatment in consequence c23 04 07

1924 A largely attended meeting at Cherry Hinton carried unanimously a resolution urging the necessity of providing a branch reading room and library. Some said they should not ask for a library at the moment when all building was required for houses but they might ask public authorities sometimes a long time before they got anything. If they asked for a public library and reading room there was some chance they might get a box of books. (Laughter) c24 02 12

1924 Here is a piece of information that will interest those of an inquiring turn of mind. The Cambridge Public Free Library is now on the telephone and the Borough Librarian, Mr W.A. Fenton invites inquiries by 'phone on any subject. The idea is to place the whole resources of the library at the disposal of any person seeking information by phone - in fact to set up an Information Bureau c24 08 17 [1.8]

1924 The Cambridge Library committee proposes to transfer the local collection to a more easily accessible position. At the present time it is shelved on the gallery in the committee room and few people realise the wealth of material to be found. It is proposed to transfer all bound volumes to the shelves in general, but it would be fatal to allow unlimited access and it is suggested that frames be fitted with brass wire lattice. The whole collection requires to be classified so that readers may see at a glance the extent of material on any subject c24 10 20

1924 Sir - One evening a friend and myself decided to spend an hour at the Central Library. No sooner had we entered the building than the eyes of the watch-dog firmly covered us and continued to do so the whole of the time we were there. We took our seats and my friend took from his pocket one of his own newspapers and began to read it inaudibly. This was too much for the watchers who came forward and told him to replace the newspaper in his pocket, adding that newspapers and books bought in by the visitors were not allowed to be read in the library and writing was only allowed when copied from the papers and books there. - "Economy, impartiality and courtesy c.24 11 01

1925 display of material from Cambridgeshire Collection TT [25 05 16] [1.9]

1925 In the course of his address on “How to carry on a village library centre” Mr Milner said that at Cottenham he tried to hire a warm room and did not hurry people. Some librarians mixed the books with the hope that a borrower would be led to read a non-fiction book. But that was a trick which would probably make a person stop away from the library. The librarian should not spend his time issuing books. He had far more important work than that – to talk to borrowers and interest them in books. Mr Chapman, Whittlesford, spoke of choosing books for borrowers and said he had been greatly praised for giving people good books, when he knew nothing about the books (laughter) c25 02 25

1926 display of playbills [1.10]

1927 complaint that books covered with dust [2.18]

1927 new arrangement of Reading Room

1927 Cambridge Library Committee recommended that steps be taken to provide reading rooms in Chesterton and Cherry Hinton. At the time of amalgamation in 1911 it was one of the conditions that Chesterton should be given a public library. At Cherry Hinton they had in 1924 prevailed upon the council to provide a public reading room. It was hoped to set up a small reference library at each. Suburban Cambridge was growing rapidly and they were a necessity. CDN c8.3.1927

1927 Time was when “a village library” implied a shelf or two of antiquated and goody-goody books which had been discarded and presented by bygone residents who had fixed opinions as to the literary fare appropriate for villagers. Nowadays the books sent each quarter to a village can be selected by the residents, and their quantity and quality have only one limit – the demand that exists. There is a branch of the county library in every village, which means that everybody can now obtain any book needed for study from the Central Library for Students. The amount spent on a free library service which benefits every person in the community is not likely to be grudged by ratepayers. c27 12 13

1932 sends out 15 reminders a week [1.11]

1933 Cambridge library ban on Shaw – 33 02 06b

1933 While those living on the outskirts of Cambridge had many advantages in the way of fresh air and beautiful surroundings they did suffer certain disadvantages such as facilities for book-borrowing. Now two branch libraries have been opened in Morley Memorial Schools on the Rock Estate and Shirley Schools in the Green End Road districts. Each contains four hundred modern novels (mostly entirely new) and 100 popular non-fiction works and are open one evening a week from 6-8. This pioneering service could spread, if successful 33 04 06, 33 03 06b [1.13]

1934 One of the first results of Cambridge borough expansion has been the taking over of the lending libraries in Trumpington and Cherry Hinton and these new branches were opened by the Mayor. He was sure the new libraries would be well looked after. Both are established in the

parish schools and contain 400 modern novels and 100 popular non-fiction works. Approximately 100 volumes will be exchanged monthly with books from the Central Library. 34 04 12

1934 Rock Estate Library approved – 34 10 18

1935 Sir – Burwell Public Reading Room has been closed for several months. The closure arose through some noisy louts who were permitted to become a great nuisance. For many years its tables provided daily and weekly newspapers and journals and some reference shelves were available. Never in the history of our country is it more necessary for the public to be able to read newspapers of different views. Burwell is the largest village in the county but the number of borrowers through the County Lending Library is very low: the building is only open for an hour or so on certain evenings which is quite inadequate – “Old Burwell Boy” 35 09 17b

1935 ASLIB conference – 35 09 21a

1935 A local history exhibition in the Central Library Reference Room in connection with the Local Government Centenary Celebrations shows how Cambridge looked in days gone by. Schoolchildren are showing the greatest interest as they make tours of the exhibits. Photographs show the changes more vividly than anything: it is hard to believe that the Hobson Street pictured is the same one today. Political broadsheets from the 1840s comment on the ‘horrible extravagance’ of police expenditure and hint that all was not well with the painting of the inside of the Council Chamber - it advises local painters to have nothing to do with the job. 35 12 10

1936 At the opening of the new Rock Road library the Mayor said that in these difficult times it was important that there should be in every district a building which would help to circulate the best ideas and information for the guidance of residents. In the days to come the building will become more and more the intellectual home of the people who live around it. All would agree it was the right policy to encourage children to use it. He regretted the absence of a representative of the Carnegie Trust, which had helped with the money for the library 36 05 21a [1.2,1.16]

1936 Mr W.A. Fenton, the Borough Librarian, has seen a tremendous growth in the reading public since he took office. The new Rock Road Library has had an excellent start-off this week. When I looked in last night I found a continuous flow of adults and juveniles. The children’s reading room was practically full and some boys to whom I spoke assured me that everything was quite all right. Work on a new branch library at the corner of Milton Road and Ascham Road will begin almost immediately. The site appears to be an ideal one and new building should be complete before 1937 is very far advanced 36 05 23c

1936 The Central Library Lending Department is housed in the oldest and most unhygienic part of the building in Wheeler Street. The room is badly provided with natural lighting and artificial light has to be used. When ‘open access’ was installed in 1921 the annual circulation was 141,968 books and now it is over 309,000. It should move into the present domed Reading Room. Most of the bookcases have been in use since 1862 and would be unsightly; they should be replaced by steel shelving. 36 10 13c

1936 Sir – I use the Public Library very frequently. The Reading Room is extremely popular and is at all hours of the day well patronised. But the Lending Department might be bettered. The conditions are most undignified and unworthy of Cambridge. The great bulk of borrowers are centred around the ‘Fiction recently returned’ shelves making use of light from the Wheeler Street windows. However it is a pleasure to watch the extreme precision and incredible speed of the assistants receiving or dating books. 36 10 20b

1936 W.A Fenton, Borough Librarian has done much to raise the standard of library books in Cambridge. He is a worthy servant to the public whose willingness to help all and sundry who frequent the Reading Room is well-known. – 36 12 05c

1937 Opening Ascham Road library, the Mayor said it was a great day for Chesterton. In that beautiful building, with good light and accommodation they could look at the books and select

them for themselves. The children's library would encourage youngsters to read. At present physical education was the fashion. We were in danger of producing a nation finely developed from the waist down. The library would help to counteract it. Ten months ago they opened a branch library in Rock Road and so far 87,799 books had been issued, very close to the number at Mill Road branch which had been in existence 40 years. (Applause). 37 04 23c & d [1.1]

1937 Searle cartoon about reading 11.9.37p6 [2.13]

1937 Microfilm will bring the library resources of the world to the desk of an individual scholar, a Cambridge conference was told. The prodigious daily flood of newspapers can be compressed photographically into little rolls of microfilm making them perpetually 'in print' while censuses, birth and death records and correspondence can be duplicated. The technology is still being developed and will take much longer than expected, but a satisfactory reading machine should cost about as much as a portable typewriter 37 09 27

1938 Searle cartoon about library issues 7.5.38p5 [2.14]

1938 Mr H.G. Wells criticised Cambridgeshire Village Colleges: "They are very beautiful specimens of architecture. I admired the decoration of the rooms, the beautiful chairs and tables. And then I went into the library and was shocked beyond measure at the unattractiveness and want of imagination. There were no dictionaries or encyclopaedias. There were no books of reference. There was not even a Whitaker. These things are of great educational importance" If some of the money spent on flowers and tables was expended on reference books it would be better for the village college as an educational institution", he told a conference. 38 08 22a. also 38 08 23 response from wardens – 38 08 24a

1939 Cambridge Central Library lending department will transfer to what is now the main reading-room making it more commodious and in every way more convenient both for borrowers and the library assistants. With better natural lighting and the new bookcases the books will be shown to greater advantage and readers should be able to move round more freely. The present lending department will be used mainly for the newspapers. Magazines and periodicals will be found on the other side in the present reference room and librarian's room which will open into each other. The librarian's new room will be upstairs in the present education offices, and there too the reference room will be found. 39 02 11a

1939 major changes in Central Library as Education offices become available, Reference Library moved upstairs, Lending Library rehoused & long queues of borrowers [1.18,1.19]

1939 War Measures at Cambridge. Banks, buses and libraries are among the services affected by the situation. Both lending departments and reading rooms of the public libraries in the borough are closing by sunset, in view of the lighting regulations. 39 09 08 CIPof

1939 Parts of Milton Road branch library are unsafe and re-building is the only cure, the Library Committee was told. It was constructed on the site of an old brickyard and there has been a serious settlement. Every cove cornice in every part was cracked and the whole library should be pulled down. A new building a short distance away was erected a short time ago and when the foundations were exposed it was found they had no bottom. It had to be built on piles that went 15 feet down to get a foundation. 39 03 23a

1939 Milton Road Library – surveyor's report on site; some movement but hundreds of houses have been built on sites excavated for gravel or coprolite – 39 05 09. But cracking continues – 39 05 11b

1939 Mill Road library was built on part of the old workhouse field; a Chesterton reader recalls "The firm who did the plumbing were so short of work that they 'small-ganged' this job and in the forming the foreman used to say "Mill-road gang, fall in". The library is very handy to pop in to read the papers. A.E.H. remarks: "I have good reason to know it as I spent many happy hours

in the management of that establishment when I was an assistant librarian under the late John Pink” 39 07 01

1939 Cambridge Town council held its last meeting at Shire Hall while the Guildhall was reconstructed. The Library committee asked to use the Small Room as temporary reading room during the re-arrangement of the Central Library. But it had a very expensive carpet that might get spoilt. The library might use the Corn Exchange annexe if the cycles were moved. Ald Briggs said that was not a proper alternative: “The fact is that we have had made a beautiful Guildhall, but must not use it”. The carpet could be taken up. But the Guildhall might not be finished by that time and it would be unfortunate if people were allowed in the Small Room before the rest were completed. The request was denied – 39 07 28b & c

1939 Work re-arranging Cambridge Central Library is going on well. Book cases are being installed in the domed room, the Reference Library has moved to the Education Offices and its old home will house magazines. 39 10 13b

1939 The first part of the new scheme for improving the Central library is complete. In the new lending department book shelves radiate from a central staff inclosure, providing more room and improved natural lighting. The old lending library will become the newspaper reading room while the old reference room will be used for magazines. An innovation is the transfer of the reference room upstairs to the old Education offices, entrance to which is gained through Peas Hill.

Refugees, evacuees and any person resident in Cambridge are eligible as borrowers. 39 11 10

1939 The changes at the Central Library are working well with at least 200 books dealt with in the first half hour. There was a long queue of borrowers with half-a-dozen assistants in the centre issuing books as hard as they could go. From the point of view of light and supervision the new Lending Library will be very much better than the old. In the new magazine room – the old reference room and Librarian’s office rolled into one – the mural decoration is tasteful. The new Reading Room opens in a week or so. The new reference room upstairs has been open for some time and a good many townspeople have found their way up there 39 11 11b

1940 Paper strips should be placed over the settlement cracks at Milton Road Library to see whether there was further settlement. It was of very nice design but parts would have to be taken down and rebuilt. If the surveyor had known what was going to happen it would have been built on piers. But he had no knowledge that the ground had been disturbed. However any idea the library was going to fall down on the people who were consulting books was absolutely ridiculous. 40 02 02b

1940 Red Cross supply books for wounded in hospital from Magdalene Street – 40 07 24b

1944 J.H. Bullock retires from Library Committee after 55 years, presents Cooper’s Annals to two branch libraries – 44 11 25a

1944 Cambridge library has dearth of up-to-date books, auctions old periodicals – 44 12 20b

1945 Fenton retires as Borough Librarian after 50 years, W.A. Mumford appointed [1.23,1.24]

1945 W.A. Mumford appointed Borough Librarian, comes from Dover – CDN 1945 07 19

1945 Old Post Office had been purchased about 1937 to give council control of improvements to the corner of Petty Cury; would have to be set back; might make ideal site for new library – CDN 1945 07 20a

1946 S.C. Roberts of Pembroke College, chairman of Borough Library committee to chair University Library Syndicate – 46 05 04

1947 A period piece, the period of which the members of the Library Committee do not particularly appreciate, was how the present high domed roof of Mill Road branch library was described when a resolution authorising the provision of a new false ceiling was criticised at Cambridge town council meeting. Ald E.S. Peck said "When I was chairman I thought it was rather a charming building architecturally and I think it would be entirely spoilt if they put a new ceiling in c47 05 06

1950 joint city & county library exhibition in Guildhall to mark Centenary of Public Libraries, John Franklin organises model train set display [2.6.4.1]

1950 A century of public libraries is celebrated with an exhibition in the Guildhall. A most striking feature is the stand showing ten great volumes of The Times together with 15 small boxes which house the same record of the newspaper, but on film. With children's books is exhibited Mr J.W. Franklin's model electric railway engine, which will be worked for the benefit of juvenile visitors c50 10 18

1950 Referring to the 'controversial question' of whether the public library should keep open longer in the evenings the Cambridge Borough Librarian, Dr W.A. Munford, said that libraries tended to close earlier than before the war simply because there was no demand for later opening. He referred to an experiment three years ago when they had opened an hour longer – and been accused of wasting fuel c50 11 29

1952 The possibility of Cambridge librarians co-operating in the attempt to compile a union catalogue of all books in the University, City and County libraries relating to the University, City and County of Cambridge was enthusiastically received by members of the Cambridge Library Group. It would enable anyone to look for a book which was to be found in any of 25 libraries. On the whole the college libraries' catalogues of old books were not good & in two colleges the librarian had said it was useless to rely on them. CDN c 5.2.1952

1953 Mumford resigns, E. Cave appointed [2.8]

1953 Mr W.A. Munford, Cambridge City Librarian for the last eight years, has been appointed to one of the great national library posts, that of Director-General of the National Library for the Blind. He is one of the best known librarians in the country and was chosen for a total of 300 applicants. He will continue to live in Cambridge, which he describes as "too good a place to leave unless you have to". c53 11 25

1955 issue record number of books - 2,043 - after closure for Royal visit [2.11]

1955 new Reading Room opens, Junior Library expected soon [3.12]

1955 The County Council agreed that an assize court on the Guildhall site was not practical. When the City had suggested the adapting the Central Library site they must have known it was inadequate. Some of the supporting columns of the Lending Library could have to go and hardly any of the reading rooms would be retained. Cambridge needed a new Central Library but this would not be sent from Heaven. It would have to be paid for and that was behind it – the City wanted someone else to pay for it. 55 05 02b [2.9]

1955 Opening an exhibition celebrating 100 years of public libraries in Cambridge, the Master of Pembroke College, F.C. Roberts, said he was proud to have been chairman of the Library committee for some years adding: "I should have been even prouder if my first name had been correctly spelt! But these occasional mistakes show librarians have humanity as well as scholarship". There are books of every description, a machine through which microfilm copies of newspapers are shown and a cartoon by Ronald Searle. 55 06 27 a-b [2.10, 4.2]

1955 Cambridge Reference Library is normally well used – on average over 200 people each day consult material. But last week has seen it fuller than normal; additional tables and chairs have been brought in and frequently all are taken. This is because the Reading Room is being divided to create a new Junior Library. A number of the more serious periodicals will be transferred to the Reference Library where book cases will be removed to make more space. 55 10 31

1956 East Road Reading Room site demolished [2.16]

1956 Proposals for a mobile library service for Cambridge failed by a single vote. The present service was hopelessly inadequate; the Newmarket Road area had a population of over 10,000 with only the difficult-to-find Ditton Fields branch library. The council would not become bankrupt by buying a lorry for a mobile library. But maintenance would be £1,000 a year and they should not spend such a large amount on a service which was not a necessity.

56 01 20c

1956 Mill Road Library has been transformed from ‘a barn of a place’ to a branch library in keeping with the present-day idea of the service. The Reading Room that occupied more space than the lending library, which issues over 1,000 books on peak days, has been reduced in size yet will still accommodate more than 40 readers and the newspapers will be displayed on slopes and tables. 56 02 25c [2.17]

1956 Non-Cambridge users of the City Library service will have to pay more to borrow their books. The annual subscription is to rise from five to ten shillings to take account of the increasing cost of providing the service. It seems unlikely that many will discontinue their subscription as last month nearly 60,000 books were issued. Another change sees the scrapping of tickets on which only ‘non fiction’ books could be borrowed. Now readers can have three tickets for any books. This will help readers who do not remember on which particular ticket a book has been issued. 56 07 28b

1956 Councillors decided not to increase the salary of the Lending Librarian to £780 though NALGO had protested that the grading was not high enough, and warned the post would be blacklisted. But if one librarian was regraded then his deputy would also want an increase and things would go on one above the other. No library assistant needed more than a good pair of feet and courtesy towards the public. But in a University city the service should be first class. 56 12 01c

1957 Cambridge councillors argued for 40 minutes over whether to regrade the post of Lending Librarian. When advertised the Library Association had advised against its member applying and there had been no suitable candidates. They were dictating to the council who should be masters in their own house. They decided to keep the present salary of a little over £12 a week. 57 01 18

1957 Barbara Sandall, children’s librarian, Cambridge Central – 57 05 17

1957 Miss Lilian Clarke has left all her books on Cambridge and her pamphlets, pictures, maps, newspaper cuttings, lantern slides and negatives to the City Library with the request that all duplicate items be sold and applied towards the publication of her book ‘Cambridge Calling’. She also left all her papers relating to the Clarke family to the County Library at March and her blankets and pillow cases to the Evelyn Nursing Home. 57 07 25

1958 Newmarket Road branch library was the first to be opened in Cambridge for 21 years. “That is the progress in this enlightened City in providing the citizens with books”, commented Ald. Howard Mallett. The premises were of a temporary nature and later another building would be erected when finances permitted. The librarian would be Mrs M.A. Traviss and it would open every weekday from 10 am to 7pm, (1pm Wednesdays) 58 09 27a [2.20. 4.3]

1958 Cambridge City Libraries' annual staff dinner and party was held in the Guildhall. Librarian, Eric Cave recalled they had closed 'that museum piece, the East Road Reading Room and the Ditton Fields Sub-Branch while sub-branches at Cherry Hinton and Trumpington had more to better accommodation. The Libraries were much appreciated and he looked forward to their continued progress. Games, dancing and entertainment followed organised by J.W. Franklin, L.J. Horspool, C.C. Marsh, R.J. Tarrant and Miss B.K. Wadsworth 58 12 16b

1959 Lion Yard scheme envisages new Central Library, Downing Street [2.19]

1960s *The Cambridgeshire Collection has detailed newspaper cuttings files from this date*

1960 Ninety small boys and girls flock to Rock Road library every Thursday to hear stories read by Miss Kathleen Asbery, the recently-appointed children's librarian. She visited a school's youngest infant class and when told she was from the library one small girl asked "Is she here because we have some books missing?" "It seems awful that children should think of librarians as ogres who stand behind counters, stamp books and charge them a penny for a late-returned item", Kate said 60 03 18

1960 City libraries' staff shortages – 10 changes means service may fall below usual high standards 60 04 09a

1960 East Anglian Bibliography launched – 60 05 28a & b

1960 Cambridge's City Librarian, Eric Cave (46), looks upon his job as a vocation. Its prime function is to provide a book and information service for the public it serves. The Reference Library take delight in answering any question on any subject including the date of erection of a certain house in Orchard Street, the best method of cultivating edelweiss and the best food to give a pet frog. They also had a telephone call from a rather harassed married man, whose wife was on holiday, asking for details of how to cook a joint of meat with its trimmings. 60 11 04b

1961 People joining Cambridge City Library will not in future have to pay one penny for each ticket taken out. The legalities of the charge, which produced about £100 annually, was 'very doubtful. The Library Committee accepted the gift of an oil painting of the Cambridge Mays by Percy Craft which will be hung in the children's library 61 06 28

1961 Cambridge Library Group re-formed – 61 10 19

1962 The establishment of a gramophone record lending library should be deferred. A scheme was proposed for the reading room at the Central Library in Wheeler Street to be closed and the junior library moved there. Then a music library would take its place. 62 01 15

1962 Cambridge Central Library – photos of readers – 62 03 23

1962 Cambridge Central Library has spent 100 years in Wheeler Street. Drastic and effective reforms took place between 1954 and 1959 to make more efficient use of staff, facilitate access to the shelves for ticket-holders and give the children their own library. Space was cleared in the reference library (formerly the reading room) to seat 47 people. Reference library staff are generally able to lay their hands on a diversity of volumes relating to every aspect of any subject almost before the reader has formulated his real requirements. Year by year the service becomes more far-reaching and the qualifications demanded of librarians become more exacting.. 62 03 30

1962 Cambridgeshire County Library service lent 622,735 books last year, more than ever before, following the abolition of the distinction between general and non-fiction readers' tickets. The numbers of readers has risen by 1,000 to more than a quarter of the population. But issues from village centres continue to decline showing the limited service is not meeting the needs of present-day readers. With the closure of so many village schools where the library is often housed and the growing scarcity of married women with time to spare, this becomes a greater problem every year, says Miss G.M. Powell, the County Librarian 62 12 07b

- 1963 "Tropic of Cancer" banned [2.21]
- 1963 City Librarian not allowed a new carpet, difficult conditions – 63 02 09a
- 1963 County mobile library service approved – 63 02 25
- 1963 Cambridge Central Library is 'bursting at the seams'; 'general inquiries' should be made about completely new accommodation. The Herbert Robinson garage could be used for a record library – 63 06 06a
- 1963 Minutes after the opening Cherry Hinton's new branch library by the Mayor of Cambridge, there were complaints that working men cannot get there before it closes at 7pm and it should stay open an extra hour. There has been a library of sorts for many years. Originally books were kept in a locked bookcase at the entrance to the Church of England School in High Street. It moved to Colville School in the mid-50's. Now work has started on Newmarket Road library after which another will be constructed on Arbury Road 63 08 07b Profile of librarian, Margaret Traviss – 63 08 07c [4.4]
- 1963 Work starts on new Barnwell Road Library - pic – 63 08 27
- 1963 Eric Cave, the Cambridge City Librarian reported that book issues in August were a record high at 108,551. More people were making personal inquiries at the Reference Library, taking up a lot of time, and other work is falling into arrears; soon more staff will be needed. There should be a new central library with information bureau nearby but care needed to be taken that readers were not disturbed by people rushing about trying to find information. When a new building was acquired it would be possible to carry out some of the ideas they were at present unable to fulfil 63 09 12d
- 1964 Plans for a temporary information office in a caravan or sectional hut on Market Hill found little favour with councillors: it would be inaccessible because it would be surrounded by stalls or parked cars. They think the present information centre should remain in the Central Reference Library in Wheeler Street which has experienced much greater use since direction signs have been erected. There would be little demand for Sunday opening – we are not in the same position as Southend or Brighton in trying to attract people. 64 01 02
- 1964 June Robertson a librarian at Cambridge central library – profile – 64 04 13
- Cambridge library service must be aware of the increasing opportunities the future is likely to bring, say City Librarian, Eric Cave. They had issued over half-a-million books for the first time in its history but there can be no complacency over the increasing usage of the libraries. The coming of Anglia television had slowed demand for books. There has been a steady increase in the number of readers using the reference library. But the number of staff changes has been too great to make the provision of a smoothly-running service possible; young trainees move on to other libraries, attracted by better working hours and higher pay 64 04 24f
- 1964 City librarian Eric Cave to deny car charges – 64 04 29a
- 1964 County Library first mobile library [3.10]
- 1964 Alderman H.R. Mallett officially opened the new branch library in Barnwell Road (Newmarket Road), nine years after it was first announced. Because of the credit squeeze the Library Committee were refused permission to raise a loan in 1955. Three years later a library was opened in a shop where it continued until now. The first book was issued to ten-year-old Susan Northfield of Priory School by City Librarian, Eric Cave 64 05 28 [4.3]
- 1964 A new system of issuing books is to be introduced to Cambridge libraries to reduce waiting times. During peak periods queues have built up whilst staff search for tickets. Now borrowers will be given a small plastic card in exchange for books returned and they will hand back the tokens when the new books are date-stamped on the way out. City Librarian Eric Cave expects a lot of users will find it strange at first but it will be more efficient and relieve pressure on staff 64 05 30a, b

- 1964 City Librarian, Eric Cave's MG car demolished a Belisha beacon. He had a past history of severe concussion after an accident in 1941 64 07 08a
- 1964 Central Library a 'public disgrace'; is cramped but wrong to spend money now; trying to give 1964 service from 1882 building. The old rooms have pipes running through them and are full of dust. The number of readers has doubled since 1954 but wish had building to display stocks and comfortable reading conditions for borrowers – pictures of Cambridgeshire Collection and school lending department – 64 10 22a & 64 10 21
- 1964 Cambridge Library is gloomiest place in Cambridge; needs redecoration; no wonder they are short staffed; who would want to work in such a depressing atmosphere – letter - 64 10 24
- 1964 Library service wasn't too good when Dr W.A. Munford was Librarian – 62 12 10a
- 1964 Library staff shortage due pay – only 5 chartered librarians, although establishment was for 18 – 64 12 10c
- 1964 Terracotta crib scene in Central Library junior department – 64 12 21a
- 1965 Cambridge Librarian, Eric Cave, is anxious to provide a permanent home in the central library for odd items of Cambridge interest like old books, scrapbooks, prints and photographs. He had recently received a scrapbook of the public activities of the late Ald W.L. Raynes when he was Mayor from 1931 to 1932. His executors sent them having seen a report about a similar gift from another former Mayor 65 01 28

1972 record year for city libraries [72 04 11]
1972 City asked to build library at Fen Road [72 07 10]; turned down [72 09 23]

1972 computers will run libraries of the future – Eric Cave –[72 09 23]

1972 An 1875 bicycle made a rare appearance on the streets of Cambridge to promote Cambridge City Library's exhibition "Tourism in Cambridge" at the Small Hall of the Guildhall. Its owner, Mr J.D. Howes took it from his Regent Street shop and gave it a spin along the road before it went to the Guildhall. The third exhibition of its type to be staged by the library it puts Cambridge into its proper setting for both Fenland, county and city are covered by the various displays 72 10 10

1973 Cambridgeshire Collection may be given to District Council [73 03 17]

1973 Cambridgeshire Collection to be kept in Cambridge [73 04 27]

1973 Cambridge City Council and the new county council have to settle a who-pays-what dispute that could delay the opening of the city's new public library by many months. The row centres on the cost of fitting out the new library. Local government reorganisation means that the city council will disappear and their successors will not have any legal responsibility for running libraries. This will rest with the new county council. They are worried that rural area ratepayers will be saddled with the cost of a large prestige building mainly for the benefits of city residents and if they pump hundreds of thousands of pounds into it other large towns in the county will demand similar treatment 73 09 15

1973 new county will pay costs new library [73 09 28]

1973 The cost of improving and modernising the public library at Mill Road, Cambridge, has risen to £13,790 due to inflation. For a number of years the Library Committee have had a programme of improvements they hoped to make to some of their ageing branch libraries. But repeatedly the economy-conscious city council have cut back on the projects. This year they agreed that the Mill Road scheme could go ahead to brighten up and repair the buildings. But since the estimates were received inflation has taken its toll c73 09 29

1973 Frederick Houghton, Cambs County librarian to retire [73 10 31]

1973 A Cambridge councillor told the city council meeting he hoped there would be some money left over for books after meeting the £490,000 bill for fitting out the new central library in Lion Yard. But Councillor Neville Auken said; "We have been in need of an up-to-date library in Cambridge for many years. The staff at the present library do enormously well. But for a city of Cambridge's standing the library has long been a disgrace c73 10 14

1973 A £13,000 facelift for Mill Road branch library in Cambridge has been shelved by the city council to leave their architects free to concentrate on housing schemes. The Library Committee were forced to postpone the modernisation plan after hearing that it would be caught in the Government's current economic policy to cut back local council's capital spending. Mill Road was to have been the first of three branch libraries in the city to be modernised with new lighting, decorations and layout. Those at Rock Road and Milton Road were to follow. Members agreed to contact the new Cambridgeshire County Council, who will take over libraries in April, to ask them to consider the three schemes sympathetically c73 10 20

1974 Mr Eric Cave, who has been the Cambridge city librarian, officially announced his retirement today. There have been many developments in the Cambridge library services since he was appointed in 1954. He seen three new libraries built, the introduction of mobile libraries, the opening of the record lending library, and the introduction of library services to old people's homes. He hopes to see the final completion of the fitting-out contract of the new library being built in the Lion Yard c74 02 22

1974 Central - row over who owns library [74 12 12]

1975 The Cambridgeshire library service will break down if money to run it continues to be withheld by the County Council. The warning has been given by County Librarian, Mr Royston Brown, in a report on the effects of "no growth" budgets. The report adds "demands in many

areas for provision will continue to increase in the next few years and be accelerated by the current economic and social difficulties. Short of new laws being made to forbid people from attending their local libraries it is impossible to regulate the use of them” c75 04 14

1975 For the first time since it was produced almost 20 years ago a prize-winning history of Cherry Hinton is to be available for reference at libraries. The contents were compiled by the Women’s Institute in 1958. But the book, hand-written and with water-colour sketches, was too fragile to be easily available. But now staff from the Cambridgeshire Collection have made three complete copies of the book. One will be at Cherry Hinton library c75 05 25

1975 Cambridge’ new £1 million plus central library being built in the Lion Yard, is due to open at the end of September – three months late. The task of transferring more than 100,000 books and reorganising the library’s various departments is likely to take up to a fortnight. But Librarian Andrew Armour is hoping to keep the closure of the main library down to three days to minimise inconvenience 75 08 08 c

1975 Over 25 years of argument, several million pounds of ratepayers’ money and three years of toil what will we get? The Lion Yard development. On the first floor is a modest entrance to a building that Cambridge has desperately needed for many years ... the new library. It has three floors. The top will be used for housing the Cambridgeshire Collection. On the first floor is a children’s’ room where young readers can comfortably browse through their selection. The building bears about as much comparison with the old Wheeler Street library as Buckingham Palace does with the Black Hole of Calcutta c75 09 19

1975 When the new Cambridge Central Library opens in Lion Yard it will have some of the most up-to-date individual listening booths in the country in its gramophone record section. But the booths will remain unused for the time being – because the economy conscious County Council cannot afford the £2,000 needed to equip them with cassette tapes. The booths would have enabled music lovers to listen individually to various recordings of music so they could decide which ones to choose. They would keep down noise levels and prevent disturbance to other library uses c75 10 16

1975 Never had the cherubs on top of the marble columns looked down on a scene of such noise and commotion. For years they have held sway over an atmosphere of dignified hush in the library in Wheeler Street, Cambridge. But all that changed when removal men dismantled bookcases and piled thousands of books into crates ready to go to the ultra-modern library in Lion Yard. As men stripped away its contents the room with its faded splendour and peeling yellow paint looked remarkably small. It was never easy to reach the top or bottom shelves of the tall bookcases. Anyone bold enough to crouch down and survey the low shelf inevitably collided with some other borrower standing behind c75 10 18

1975 Princess Anne, making her first official visit to Cambridge, insisted on an impromptu chat with some of the thousands of sight-seers who thronged the city centre Lion Yard shopping centre. An estimated 10,000 people packed the Market Square and stood eight deep each side of Petty Cury as she walked into the new shopping centre. She stopped to talk to the delighted shop girls who were crowding their doorways and also to the eager shoppers who pressed forward to get a closer look at her. She explained: “I am not a complete stranger here because I have been shown around the university and city unofficially by two previous students who are both fans of the old city” c75 12 05

1976 The branch library at the Cambridge Shire Hall is to close down and will be replaced once-a-week by a visit of one of the county council’s mobile libraries. The decision to close down the library – to save an estimated £6,000 a year was taken at the county budget meeting. A petition of more than 500 signatures of readers asked for the building to continue. When a vote was taken there were 25 for and 25 against and the decision was taken on the casting vote of the Chairman 76 03 03

- 1977 Central – new technology system [77 06 20]
- 1977 Mill and Milton Road libraries possible closure [78 08 23]
- 1977 A campaign has been launched against the threatened closure of the Mill Road public library, Cambridge. It library is one of six which may close because of lack of money caused by severe cutbacks in Government grants. The County Librarian, Royston Brown, said the library needed £15,000 worth of repairs – and the county council did not have that sort of money. But the Romsey area has the highest percentage of old people in the city who use it as a daily reading room because they cannot afford to buy newspapers and magazines c77 09 02 [77 08 23]
- 1977 City suggests return of historical records, Cambridgeshire Collection, to them [77 09 03]
- 1977 Mill Road closure fight reaches government level [77 09 10]
- 1977 Sir – some months ago Cambridge central library introduced a new computer system. The computer broke down and 250 borrowers were notified that books which they had already returned were overdue. The Electronic machine is our century's God and to suggest that a human being with ballpoint pen would be more efficient than a computer is, to those idol-worshippers, plain blasphemy. Since the Browne system was abandoned folly reigns in the pixilated Library – Mrs M. Daniels. c77 12 04
- 1977 Plans to save branch libraries from closure by moving careers advice offices into Cambridge central library have angered librarians. Andrew Armour said the move could lead to conditions as cramped as those in the old library in Wheeler Street. "It seems that just as we were settling down to being librarians we are back in the melting pot again". It would mean moving the children's & music libraries into the lending library with possible closure of the picture loan service, closure of the 'quick reference' section and moving the Cambridgeshire Collection into the reference library causing enormous disruption in services to readers. c77 12 12
- 1978 Mill Road library dual use as social centre, pilot scheme [78 01 20]
- 1978 No public libraries in Cambridgeshire will be closed this year – and books stocks will not be depleted – although the County Council is facing a continuing financial crisis. The council had threatened to close the Milton Road and Mill Road libraries in Cambridge, village libraries at Stapleford and Milton and two libraries in Peterborough. The threats caused storms of protest and now financial experts have discovered the council has saved £60,000 on last year's spending which can be used to buy new books. c78 03 04
- 1978 Robert James says villages, not central library, should have money [78 03 15]
- 1978 Hostile public reaction to the doubled fines introduced for overdue books at Cambridgeshire libraries is forcing a rethink on the matter. Although the council is nearly £20,000 better off since the fine went up to 10p a week for each book, the library service has been hit badly. A lot of people have stopped using the libraries and staff are subjected to constant complaints from readers. Assistants have become embarrassed to ask for the large fines and staff morale has dropped. A new report now suggests the fine be cut to 5p for the first week. c78 09 05
- 1978 Mill Road seeks government grant for renovation [78 10 26]
- 1978 Cambridgeshire Collection receives two major donations [78 12 11]
- 1979 Mill Road community centre complex go-ahead [79 02 27]
- 1979 Cambridgeshire county council took a step towards the transport of the future when it brought into service the country's first electric mobile library. One of the largest electric road vehicles to go into commercial service, it was built by Hyrotechnick of Toft and is based on an electric travelling shop which has been successful in Holland. It is powered by four independent motor-drive systems on the rear wheels and has a speed of 12½ miles an hour, suitable for its task in the city. A second one on order will be faster with a speed of around 40 mph CEN 25.7.1979

1979 Mill Road mobile library has difficulty in parking - tickets[79 09 17]

1980 Duke of Edinburgh opens Lion Yard law courts, visits Library [80 02 27]

1980 Central installs computerised catalogue etc [80 03 21]

1980 Mill Road Library, Cambridge, which faced closure three years ago, has been given a new lease of life with a £30,000 facelift. During the five-month renovation work the library staff operated from temporary mobile quarters, which on one occasion collected a parking ticket. The library includes a new community meeting room in place of the old reading room. County councillor Jean Ganczarski who protested against the planned closure said; "It is very good to think the building has now got a new life" 80 04 19b

1980 Cambridgeshire County Council may soon own the largest fleet of big electrically-powered library vehicles in the world. An experiment started a year ago has proved so successful that the Library Service now wants to dispose of its entire fleet of diesel and petrol-powered vehicles and go electric altogether. The new vehicles would be twice as fast as the present 17 mph vehicle which has proved to be at least £1,000 a year cheaper to run than the others and been free from breakdowns. 80 05 22a

1980 125 years of Free Library [80 06 27]

1980 A move to put Cambridgeshire libraries under the control of the education committee was blocked by county councillors. The Hay Report had suggested the library service should join with community education. But the education bureaucracy was already too large and needed trimming. "We have one of the finest library services in the country and no-one with any common sense will see that destroyed", a Peterborough councillor said 80 09 10

1981 Mill Road more books borrowed, but fewer books [81 03 04]

1981 The much-heralded fleet of electrically-powered mobile libraries with which Cambridgeshire County Council had hoped to save a small fortune in energy costs has been scrapped. The first vehicle was banned from public roads because of braking defects, the second has been returned to the manufacturers after unsuccessful attempts at improving range and speed. Now the remaining eight vehicles have been cancelled and a diesel-powered mobile library will be bought instead. 81 09 18b

1981 Makers of mobile libraries hit back over faults – 81 09 21

1981 Silence greets shock report on electric libraries – 81 09 23

1981 Spending on Cambridgeshire libraries will be cut next year, despite a warning from the County Librarian that much of the stock is poor in both physical condition and subject coverage and the number of books available to the public has already been reduced. But the replacement for St Neots library was a clear priority as the present one was inadequate for a growing town and to postpone the scheme would be 'bad business' 81 12 03

1982 Chris Marsh replaces Maurice Nauta [89 03 11]

1982 new service of information on registered firms [82 05 20]

1983 Colonel Guennadi Primakov, one of three Russians ordered out of Britain for spying, openly used the Cambridge Lion Yard Library for part of his intelligence-gathering work. He consulted newspaper cuttings files on civil defence in the Cambridgeshire Collection. At that time, in 1980, Defence Secretary Francis Pym had announced the decision to site Cruise missiles at Molesworth prompting 2,000 opponents of the scheme to march in protest. Librarians noticed him photocopying the files and consulted local police, but they said it was a matter for Scotland Yard. 83 04 06

1983 Ratepayers could be more than £40,000 worse off because a much-heralded 'money-saving' scheme has collapsed. Three years ago the council decided to buy a fleet of 12 electrically-powered mobile libraries to serve outlying rural areas. But from the start things went wrong. Faults developed and the council became involved in a long legal battle with the suppliers

who have since ceased trading. Now councillors are trying to dispose of three electric vehicles
83 12 30 p5

1984 On Saturdays 3,000 books arrive and depart from the lending department of the central library in Lion Yard. But there is more to the library than that including 100,000 reference books and a stock of 850 paintings and pictures which borrowers can take home. There are 19 staff in the lending, music and children's department with another dozen in the various reference services. When things are tight the last thing to go is service to the public, said Andrew Armour, the Librarian. Library use continues to increase, funds remain tight, staff levels stay level but new technology skills should enable them to both maintain and improve the service 84 03 17
1984 County library HQ moves from Huntingdon to Cambridge [84 07 25]

1985 Cambridgeshire Collection Mike Petty address conference Sardinia [85 03 01]
1985 Central caretaker Leslie Collins retires [85 11 07]

1986 Two city libraries are again under threat of closure, only years after a successful survival battle. Mill Road library is on the wrong side of the railway bridge while Milton Road library is only half-a-mile from Arbury Court. But Councillor Janet Jones describes the plans as disgraceful and says many children and elderly people will be devastated if Milton Road is closed. However Bar Hill and Milton villages are fast-growing and need some library facilities, a report says. 86 03 18

1986 Campaigners protesting against the threatened closure of Mill Road and Milton Road branch libraries are to lobby councillors when they visit the buildings. A report that says libraries are now in the wrong situation to give the best service to the community. But Mill Road local councillor Anne Campbell said "It is an essentially facility for the area. Many of the present users cannot visit the central library in Lion Yard". 86 04 22

1986 Two Cambridge libraries threatened with closure are facing their second crisis in eight years. The axe first loomed over Milton Road and Mill Road branches in 1977 but they were saved together with others in Milton and Stapleford. Now a report says they are old and in the wrong position to provide the best service. But Cambridgeshire Labour councillors have started a campaign to save them and Alliance councillors are organising a petition against closure. 86 04 25

1986 Cambridgeshire Collection given Jack Overhill books [86 05 27]

1986 The much-heralded fleet of electrically powered mobile libraries, with which the County Council had hoped to save a small fortune in energy costs, has been scrapped. One vehicle has been banned from public roads because of braking defects, a second returned to the manufacturers for unsuccessful attempts at improving range and speed. The remaining order for eight vehicles has been cancelled and now the county council and manufacturers are locked in a legal battle. New diesel-powered libraries will be bought to keep the service running. 86 09 18
manufacturers blame council indecision – 86 09 21. councillors hear report – 86 09 23a

1987 An Alliance county councillor's plans to close Milton Road public library and sell off the site for redevelopment has staggered his party colleagues. He claims the closure together with another in Lt Downham and two in Peterborough would be in accordance with plans to 'rationalise' the number of libraries. But other councillors say they will start a campaign to keep them open. Robert Rhodes James, MP, has also vowed to fight 'tooth and nail' to save Milton Road library from closure 87 03 07, 12a

1987 Milton Road library is not to be closed – 87 03 13

1988 Central Library asbestos scare, ceiling – 88 07 19

1988 Cambridgeshire Collection produces sepia pictures for sale [88 12 01]

- 1989 Cambridgeshire Collection Librarian receives T.C. Farries 'Librarian of Year' award
- 1989 Libraries of the Future conference envisages co-operation between county and university libraries – 89 03 21a
- 1989 A high-tech computer system set to revolutionise Cambridgeshire's 15 main libraries has gone on line. Chief librarian Brendan Dwyer checked out the first book on the 'Cambook' system at Arbury Court. It will provide instant information about books on loan and a faster reservation system. "Pioneering the latest technology will help us to continue to offer a faster efficient service throughout the 1990s", he said 89 04 04a
- 1989 Cambridge Library is to close for two weeks as part of a computerisation programme to streamline efficiency. It will replace the system installed in 1976. But the Cambridgeshire Collection will be open as normal 89 07 10a
- 1989 Cambridge Central Library is closed while details of every book in stock are fed into an ambitious new computer programme. When complete staff will be able to pinpoint exactly who has borrowed which book and when it is due back. That was the information that was recorded on handwritten ledgers when it opened in 1855. Open access, allowing readers to select their own books by browsing the shelves was introduced in 1922. Now on an ordinary weekday 2,500 people call at the library in Lion Yard 89 09 07
- 1989 VCH vol.9 published, exhibition in Cambridgeshire Collection – 89 08 03
- 1989 Part of the front entrance to Cambridge Central library is to be turned into a shop and sold off as part of the council's policy of disposing of surplus assets. The staircase will be redesigned with electric sliding entrance doors. The county council, which owns the prime site, has given itself planning permission for the new shops against the wishes of the city council who think it will destroy a large space which serves useful community purposes. 89 09 19c
- 1989 John Franklin retires from Cambridge library after 45 years – 89 10 06
- 1989 Mill Road library – public to have say on closure, and Lt Downham [89 11 25]
- 1989 Bar Hill library to open [89 11 29]
- 1989 Mill Road library reprieved from closure – 89 12 22a
- 1990 Cambridge Central Library to close for two weeks in July for alterations and repairs including controversial refurbishment of the entrance foyer, which is to be divided into a separate retail unit. The City objected saying it would deprive the community of an important space. A wall will be built to separate the new foyer from the proposed shop and electric doors introduced. 90 06 01

c.77.81 – University Library

note started May 2009

1910 The late John Willis Clark has willed to the University Library all his books, pamphlets, manuscripts and collection of views relating to the town, county, colleges or university of Cambridge. – 10 12 02f

1913 Suffrage attack St John's college library 13 06 20 p8 CIP

1923 By the death of its librarian, Mr F. H. Jenkinson, the university loses one who has served it with great distinction for many years. He was a man of remarkable and attractive personality. But possibly what most people will recall were his remarks on the care of books. He told a Library Association conference that it seemed incredible that educated men would send packages of six books by parcel post wrapped in one thickness of indifferent paper and held together with string. Strapping books on bicycles was another deleterious practice. "Perhaps some of us care too much for books, but most people care much too little," he said c23 09 25

1928 'The Times' has published a picture of the proposed new Cambridge University Library from the provisional designs prepared by Sir Giles Gilbert Scott. For some years past the imperative need of additional rooms to accommodate the never-ending increase of books has been urged but the enormous cost of erecting an entirely new library on another site – the old

playing field of King's and Clare Colleges - presented what seemed an insurmountable difficulty. Even if the proposed scheme is realised it provides for only one-half of the projected library and involves a debt which will not be cleared for 50 years c28 04 16

1928 Conditions at the University Library have become more and more serious and in 1924 a Syndicate recommended a new library on a new site. Land was bought and plans prepared by Sir Giles Gilbert Scott, estimated at £500,000. But it was possible for them to finance only half that amount. Now an offer has been received from the Rockefeller Foundation of a sum to enable the building of the complete library without delay. c28 10 08

1934 The great move has begun. At four o'clock the doors of the old University Library near the Senate House closed to readers. There had been many visitors all day to say farewell to the building and some tender-hearted ladies left the library in tears before the bell rang for the last time. Librarians have been packing volumes into boxes and Eaden Lilley's staff began the work of loading the horse-drawn carts for the journey to the new library in West Road. The process will go on day after day for about three months. 34 06 01

1934 University Library big move – 34 09 06

1934 Cambridge Rotary Club did a good piece of work when it undertook the organisation of the public visits to the old University Library. During the first three afternoons close on 3,000 people made the tour of inspection of these old buildings, previously closed to all but a favoured few. It appealed to all classes – old and young, tradespeople and artisans, clerks from University offices and school children. The old Pebble Court, the original centre of the University, was a special source of attraction and here Mr P.C. Fitzgerald fascinated continuous groups by his characteristic talks 34 09 22

1934 Thousands greeted the King and Queen when they made their way to the new University Library. Washing and cooking alike was forgotten in hundreds of homes as women formed a great part of the crowds which were thickest in Trinity Street where undergraduates in cap and gown added to the number. Of all the wonderful products of man's skill in art and labour the Library must rank of one of the most inspiring and peculiarly permanent of our national institutions and with while clouds scudding over its lofty tower this unique building occupied the centre of a delightful scene. An exceptionally good film of the visit, taken by Gaumont especially for the Victoria Cinema will be shown next week. 34 10 22 & 25

1971 Trinity Wren Library to reopen after restoration – 71 04 30

1973 Cambridge college libraries, which are of fundamental importance to undergraduates, have strikingly small staffs, states a report published this week. It says "No fewer than nine college libraries, including two large ones, have no full-time staff. They have well under half the ratio of staff to books found necessary for the efficient administration of departmental libraries". In the present year, it is estimated that the University will give college libraries a total of £12,000 c73 05 13

Bernard Nutter – Story of Cambridge Baptists – review 12 11 01c & d

1885 Cambridge Salvation Army's earliest days, 50 years ago were recalled by the Mayor, Ald Ralph Starr. He told how a band from Liverpool had come to give them a send-off: "I remember seeing them go down King Street, a singing multitude of people thronging around the band, who were trying to play, and some lads and lasses marching behind. The crowd were not only hustling and pushing them but dealing out blows to those who were playing. Several bandsmen had blood on their faces, but they did not retaliate. It was that which affected me most", he said. 35 04 29

- 1892 Catholic Apostolic Church, Pound Hill ceased [2.27]
1892 Holy Sepulchre vestry built [9.1]
- 1894 Hobson Street Methodist chapel rebuilt [13.6]
1894 Friends Meeting House built [2.22]
- 1896 St Johns Church chancel & nave consecrated [1.7,7.9]
1896 St Matthews clock tower erected in memory vicar's wife [7.7]
- 1897 Holy Trinity reopens [1.11]
1897 Hills Road Methodist Chapel reopened [1.1]
1897 Tenison Road Baptist Chapel opened replacing Hope Chapel, Paradise Street [2.7,12.10]
1897 Yesterday afternoon a ceremony of the deepest import to the Presbyterian Church of England took place at Cambridge, when Mrs Lewis and Mrs Gibson jointly laid the foundation stone of the Westminster Theological College. A large number of people assembled on the site many of the visitors coming from a distance. The building will stand on the piece of ground between Madingley-road, Northampton-street and Pound-hill. The building is in the English Renaissance style c1897 05 27
1897 The foundation stone of the new building of St John's church, Hills Road, Cambridge, was successfully laid on the 4th May last year. The first section was completed and consecrated December 15th, 1896. The result of opening the new building has amply justified the decision to hasten the commencement of the work. The congregations have been most encouraging and the average of the weekly collections doubled c1897 05 29
1897 St Andrews Chesterton new East window & reredos, 1897 06 28 p2 CDN
1897 Tenison Road chapel foundation stone, 1897 07 01 p2
1897 A special meeting was held in the Hills-road Wesleyan Chapel, Cambridge, in celebration of its re-opening. The chapel has been closed for three weeks and during that time the seats and galleries have been re-varnished, the walls and pillars painted, the heating apparatus renovated, the electric light substituted for gas, coloured windows for plain and a rostrum has been made to take the place of the old pulpit. Mr Isard, hon.sec. said those who worshipped in the side galleries had spoken to him for years past on the badness of the light. Those who sat just behind the gas standards too, found a great difficulty in seeing the speaker and were continually dazzled. They resolved to put in the electric light at a cost of about £60. The Minister said he was sorry they had not got the electric light on but in consequence of the engineers' strike the company had not been able to get the connections on c1897 09 23
1897 Holy Trinity church, Cambridge, was filled with a large congregation, the occasion being the re-opening service after the church had been closed for purposes of restoration. When the cement was removed from the buttresses, real solid stonework was found to be concealed underneath, and on these buttresses the date 1516 was discovered. An old consecration cross was also found by the architect. This cross, he says, is very unique and it is intended that it should be covered with glass in order to preserve it c1897 09 30
- 1898 Holy Trinity renovation of interior and enlarged electric lighting CDN 1898 04 13

1898 St Bene't's Church, Cambridge, reopened for public service with an improved organ and newly elected organ chamber, beside several minor renovations in the decoration of the interior of the building. Archdeacon Emery said that the condition of the Church in 1849, when he was ordained Deacon, with its organ Gallery at the West End, and those high pews in the nave, and green baized pews in the Chancel was then far different to what it was now. Since that time the South aisle had been erected, the West End and Tower opened and restored, the Chancel and church generally restored and seated in such a manner that all the worshippers could feel they formed one family of God 1898 05 09 [1,1]

1898 St Edmunds House founded as hostel for future priests attending the University [5.5]

1898 Mr Foster told a meeting in the parish room adjacent to St Mark's temporary Church, Newnham Croft, that he remembered hearing about 20 years ago, that it was seriously proposed that St Botolph's Church should be removed bodily and re-erected on the present site of Caius fellows' garden. The idea was not responded to and the consequence was that that part of Newnham was left without a place of worship, and eventually that Little St Mark's Church was erected. When he first came to that neighbourhood, 15 years ago, he remembered thinking what a poor, dilapidated place it was, and wondering how long they in that corner of Cambridge would have to worship there. But he had got to know St Mark's so well that he looked upon it now has a dear little place. They would all be sorry to have it removed but it was only a temporary building, and temporary buildings must give way to permanent ones CDN 1898 07 06

1898 The population of the town of Cambridge has increased very much during the past 10 years, especially in the Petersfield and Romsey town area. Up till 10 years ago the chancel of the present St Barnabas Church was the only place of worship in the extensive district. Mainly by reason of the enterprise of Mr Sturton in providing land for building purposes, the district became so large that it became necessary to carry out the building of the complete Church; this was done in 1887. The substitution by the Great Eastern Railway Company of a handsome bridge for the old level crossing in Mill Road gave a great impetus to building in what is now Romsey town and the church of ease of St Phillip's was established. Now the time has come for Romsey town to be raised to the status of an ecclesiastical Parish, with St Phillip's as the parish church CDN 1898 10 27

1898 St Augustine's Church dedicated CDN 1898 11 21

1899 The new clergy training school in Jesus Lane Cambridge was opened by the Bishop of Durham. It has been erected adjacent to All Saints Church at a cost of nearly £8000. The most experienced teachers in Cambridge have long felt a want of a centre to which the younger members might naturally turn when they wished for conference, or counsel, or sympathy in reference to the choice of their vocation in life. Many men of ability were lost to the Ministry of the church through the want of such opportunities for brotherly conference with men nearly of their own age - 1899 05 18

1899 The formal opening took place of Westminster college, the theological college which the Presbyterian Church of England has established at Cambridge for the training of students for the ministry. It is a great thing that the work has been done so well in so short a time, but a much greater thing that the cost of building it – albeit over £40,000 has all been met. Professor Ryle, President of Queens', extended a welcome to the new college c1899 10 18 [3.12]

1899 first Christian Science service held in Victoria Assembly Rooms [2.28]

1899 At midnight the new clock which has been erected at St Matthews Church, Cambridge, will chime for the first time. Until recently the bells of the church hung outside the building, but now a turret has been erected at the West End and here the clock has been placed. It is "Ting Tang" quarter clock erected as a memorial to the vicar's late wife c1899 04 01

1899 The new clergy training school in Jesus Lane Cambridge was opened by the Bishop of Durham. It has been erected adjacent to All Saints Church at a cost of nearly £8000. The most experienced teachers in Cambridge have long felt a want of a centre to which the younger members might naturally turn when they wished for conference, or counsel, or sympathy in reference to the choice of their vocation in life. Many men of ability were lost to the Ministry of the church through the want of such opportunities for brotherly conference with men nearly of their own age c1899 05 19

1899 Victoria Road Congregational Church foundation stone laid, 1899 08 28, p3

1899 The Vicar of St Michael's church, Cambridge, spoke of the restoration of the mural decorations executed by Mr Gilbert Scott which had become much decayed, and the erection of the inside porch. The installation of the electric light answered very well. He did not think it was as good to read by as gas but there was the advantage of the easy regulation of the light and quickness in lighting the church. Instead of having the nasty, stuffy feeling they had with gas, there was a decent atmosphere in which one could breath c1899 10 05

1900 The building which stands off St Andrew's street, Cambridge, and which has recently been erected through the munificence of Mrs Lewis & Mrs Gibson, members of the congregation of St Columba's Presbyterian Church was formally opened. The need for such a hall had long been felt and is undoubtedly one of the best buildings of the kind. It has cost no less than £2,000 & is lighted with electric light CDN 1900 02 28

1900 The first khaki wedding in Cambridge was held at St Botolph's church. The bride was attired in regulation khaki tight-fitting bodice, braided Hussar, with braid to match, khaki straw hat, trimmed with white chiffon and silk. She wore a spray of orange blossom and carried a bouquet of lilies of the valley and snowdrops, covered with maidenhair fern. The bridesmaids wore khaki shirts with silk tunics to match. They also wore scarlet shoes and hats c00 03 09

1900 On Good Friday the members of Trumpington Free Church held a tea meeting in their new place of worship in the village. To the tea about one hundred persons sat down. There was a small attendance at the subsequent meeting. The chairman said the building was very nearly paid for. 118 persons had contributed a shilling or less which showed a large number of people in Trumpington had a share in the building. CDN 1900 04 14

1900 A period of nearly 30 years has elapsed since St Mark's church, a primitive wooden structure, was erected at Barton Road, Cambridge, to meet the needs of churchmen. Newnham is destined to become one of the principle residential districts & as the neighbourhood has gradually developed so the need of a permanent church has been the more keenly felt. The scheme which is now intended to carry out is but a part of a larger and more liberal one. The foundation stone now laid will only consist of the main parts of the nave and the north aisle and the extreme west end, and the south aisle will be left for future extensions. The new church will provide for a congregation numbering about 300 CDN 1900 05 23

1901 Presentations were made to the Rev Monsignor Scott, Rector of the Church of Our Lady and the English Martyrs, Cambridge, in recognition of his recent appointment by the Pope. The Bishop of Northampton presided over a large and influential attendance. The honour that had been conferred was that he was appointed domestic prelate of his Holiness, so certainly it was the action of the Holy Father himself who had deigned to look upon this poor diocese and kindly raised to a high degree the Vicar General. The conferring of the dignity of prelate did not imply he was leaving them. (Applause) c01 03 16

1901 Two new classrooms at the primitive Methodist Chapel, Sturton Street, Cambridge, were formally opened. The space available at the chapel for teaching the scholars on Sundays has long proved inadequate and the extra accommodation will furnish room for at least fifty persons and may be expected to meet the requirements for some time to come. The opportunity was also taken of entirely renovating the interior of the chapel itself, which has been furnished with new seats, and the ceiling covered with match-boarding CDN 1901 03 18

1901 The new church of St Mark, Newnham, built to supersede the structure that had done duty for so many years was consecrated by the Bishop of Ely. The Master of Corpus said that in the new church they had visible proof of the continuity of the Church of God and that the gates of hell should not prevail against them; it was a visible link in a long chain of God's claim on the adoration and service of mankind CDN 1901 04 26

1901 The 32nd anniversary of the Theatre Royal Barnwell Mission, Newmarket Road, Cambridge was celebrated. Three private boxes had been prepared for the comfort of those who attended the meetings, the building frequently containing over 1,000. If the theatre had been altered when it came into their possession it would not have done a tenth of the good it had done. By keeping it in the original form they get people who would not attend an ordinary place of worship. They had introduced lantern services, which had caused prejudice, but people were very nervous about any new form of service. CDN 1901 11 22

1902 The memorial window to the late Mr James Hough is now complete and the church of St Benedict is in possession of a work of art which will be a constant reminder of a Christian life. It is a three-light stained glass window immediately over the altar, designed by Arthur Savell of London and Regent Street, Cambridge. CDN 1902 02 07

1902 On 13th June 1889 the foundation stone of St Philip's Church, Mill Road, Cambridge, was laid by Professor Babington; on June 11th 1902 it was consecrated by the Bishop to the worship of God and "for ever set apart from all profane and common uses". A small wooden church was built by a pious, but somewhat eccentric Churchman, which was eventually to give place to the present building. It is a chapel-of-ease to the populous parish which ere long may be a distinct ecclesiastical parish. CDN 1902 06 12

1902 It is not a common feat to take down stone by stone, transport for fourteen miles and re-erect, practically without alteration, a solidly-built church capable of accommodating some 250 worshippers. That is what has been done with regard to the old Roman Catholic Church of St Andrew at Cambridge which has been removed to St Ives. The church is one of Pugin's earlier masterpieces and for 59 years it was in use in Cambridge. Then it was superseded by the magnificent new church of Our Lady and the English Martyrs. It was in danger of falling into a ruinous condition when the idea was conceived of transporting it to St Ives. CDN 1902 07 10

1902 Cambridge Paving Committee had approached the vicar and churchwardens of St Giles' church to ascertain whether it would be possible to acquire a portion of the churchyard for the widening of Castle Street. They would agree provided that the work of excavating and collecting human remains be screened by a hoarding & the bodies reverently re-interred. Chesterton Road corner was a most dangerous one and when the improvement was carried out one corner out of the four would be cut back. CDN 1902 07 17

1902 When Cambridge council decided to widen Castle Street by acquiring part of St Giles' churchyard the improvements necessitated the demolition of the wall and the removal of human remains from the consecrated ground. This work is now being proceeded with as reverently as possible. A considerable exhibition of morbid curiosity to view what is being done has been manifested, but it has received every discouragement from those responsible for the proper exhumation and reinterment. c02 11 15

1903 The Sabbath calm at the Barnwell Mission services held in the Barnwell Theatre was rudely disturbed. Religious fervour had been well sustained and the atmosphere became somewhat overheated. The superintendent requested that the hot water might be shut off. The warming apparatus gave a series of resounding reports and the supply cistern overflowed, causing steam to pervade the auditorium. The congregation jumped to the conclusion that the Theatre was on fire and dashed out. The panic was worst in the gallery, which was filled with about 150 young people who made a dash for the steep stairs. The band stuck to their posts and played the greater

part of the congregation out and the Benediction was pronounced to those who remained. c03 01 28

1903 St Andrew's Street Baptist Chapel, Cambridge, is to be swept away and another more ornate is to be substituted. It has often excited the curiosity of strangers and not a little ridicule has been bestowed upon those who have worshipped in such a prison-like building. Even Charles Spurgeon described it as suitable for private executions. The new building will have both a tower and spire and be worthy of the prominent position it will occupy. c03 02 03 [2.9]

1903 Why do men forsake public worship, asked the Rev Joseph at Cambridge Guildhall. Inquiries had been made of four men in a college kitchen. One said: "Because we don't want to be hypocrites"; another: "I get nothing there worth listening to"; the third: "The parsons are such humbug". The fourth said: "Because so-called Christian men don't live up to the teaching of Christ and they standard they themselves set up". In summer it was beneficial and in no way harmful to spend Sundays in the open air. c03 03 25

1903 Since the members of Kensit's Wycliffe Preachers came to Cambridge there has been a general anticipation that a 'protest' by them would be made in one of the local churches. In an attempt to gain information as to their intentions two dozen opponents, most of them undergraduates, assembled at the Alexandra Hall to listen to an address. Afterwards a very heated linguistic duel raged over the doctrine of transubstantiation. Applause and counter-applause urged on the contestants to further efforts. A lull in the debate gave an opportunity to take a collection, which was contributed to by the opponents of the preachers. At the end one undergraduate asked whether they were going to brawl in any other churches tomorrow. c03 04 02

1903 The work of rebuilding St Andrew's Street Baptist Chapel, Cambridge, has reached an important stage with the ceremony of laying the foundation stone. The travelling crane upon the elevated railroad around the site was stationary, the workmen had turned their attention to the erection of a platform to accommodate the spectators. An important factor was the bottle placed under the stone which may in some remote age meet the gaze of an explorer yet unborn, the contents being a plan of the church, a programme of the day's ceremony and a copy of the CDN. c03 05 07

1904 Cherry Hinton Rd Free church opened, 1922 voted to join Congregational Union & new church built 1926 [446.13.1]

1904 Bible Society centenary [3.16]

1904 The new St Andrew's Street Baptist chapel, Cambridge, was formally dedicated. The exterior of the building is captivating, the interior is beautiful and the structural arrangements for the comfort of the congregation well considered. Unfortunately the pastor who had so strenuously worked on the scheme was unable to attend due to illness but so that he should not be entirely deprived of participation in the events the deacons arranged to have the speeches delivered in the building transmitted to his home by means of electrophone CDN c 27.1.1904

1904 The Mormon missionary propaganda has extended to Cambridge. Two Elders from the Headquarters in Salt Lake City are in town for the purpose of explaining the beliefs of the sect to which they belong and hope to establish a branch of their church before they return to Utah. Circulars have been left at many houses saying: "By reading the accompanying tract you will discover the way of salvation and learn that some precious truths as taught by Christ are no longer understood by many of the Christian sects". It is signed: Elder Franklin P. Foster, 6 Abbey Road, Cambridge" CDN c 4.5.1904 church abandoned after 1904 [2.11]

1904 The stone laying was held of a new Wesleyan chapel being built at Old Chesterton to supersede one which has been in use for 60 years and is dilapidated and unsightly. It was first intended to erect it on Chesterton Road facing De Freville Avenue but a site in Church Street was chosen and the builders, Messrs Kerridge and Shaw have commenced operations of a simple structure capable of accommodating 150 persons together with 120 Sunday School scholars. The building was within sight of two other Christian churches but they came in the old Methodist

spirit, as friends of all and the enemy of none and would not injuriously rival or detract from their work. CDN c 5.5.1904 [1.9, 13.10]

1904 St Andrew the Great church, Cambridge, has been thoroughly renovated and the congregation sat within spotless walls, under a roof which afforded no resting place for the busy manufacturer of webs and in an atmosphere suggestive of spring cleaning. The dignified furniture shines anew, the walls are nicely painted and distempered, the windows (coloured and plain) admit the full quota of light. Gas has given way to electric light and there is a sermon switch which will turn off the current from two-thirds of the lights. The organ has been removed from the west gallery and will be placed on the south side of the choir, at present it is in London and a harmonium sufficed for the Sunday services. CDN 20.6.1904

1904 Sunday saw the realization of a scheme in connection with Great St Mary's church, Cambridge, which has been in progress 15 years: the filling of the clerestory with windows. The church was re-opened having been closed so that the remaining three windows might be put in. Two were given in memory of W.H. Hattersley & Alderman Scales. They are a great improvement to the church and represent the three verses of the Te Deum CDN 20.9.1904

1904 The Wesleyans have added another to their places of worship by opening a new chapel in Church Street, Chesterton. It is the successor of a building in the High Street which during the latter period of its existence has been difficult to reconcile with conventional ideas of what a place of worship should be. Though doubtless hallowed in the memory of many its defects were numerous. Mr B.C. Jolley provided a piece of land upon which building operations began a few months ago. The architect adopted a Queen Anne style and the result is a pleasing-looking building with an appearance more domestic than ecclesiastical. CDN 13.10.1904

1904 A few says ago I dropped across a couple of gentlemen of the religious persuasion known as the Church of Jesus Christ of Latter Day Saints. Elder S.S. Downes and Elder H.B. Brown are their names and they are endeavouring in a quiet way to found a church in Cambridge. For and against Mormonism is not my mission to preach but they have as much right to extend their views as other folk on mission bent, providing they do it in a decent way. CDN 24.12.1904

1905 It is approaching 20 years ago that the strange sect called the Agapemonites founded by the late Brother Prince first secured a footing in Cambridge. Its advent is surrounded in some mystery and owing to the secrecy imposed on its followers it is difficult to speak with any degree of certainty of its growth. It was the time when the Wesleyan community was undergoing a severe trial and many families left the church, some joining the Abode of Love at a little school room in Elm Street where services were marked with great simplicity. The death of Prince was a severe test to his followers' faith but things have gone on much as before. 05 09 05 – 05c

1905 The vicar of St Philip's Church Cambridge recalled he had opposed a scheme for abolishing the boys', girls' and infants' Church Schools in Ross Street. There would now be a new mixed school where nonconformist children would relieve religious instruction – but not from him. If parents cared for Church instruction they should fight to keep Ross Street schools open and support the new master, Mr Meakin. 05 09 22a & b

1905 Old Baptist chapel, Old Chesterton new infant's classroom – 05 11 03a

1905 St Paul's church memorial window, Elizabeth Jones – 05 12 18c

1906 Mill Rd Methodist church [13.8]

1906 Two large meetings of Cambridge church people passed resolutions strongly condemning the Government's Education Bill. The Bishop of Ely said the dying of church schools would only be a matter of time. Religion was the only part of education worth having, the great question was how it would be taught. The Bill denied parents the liberty to have their children educated in the faith which they themselves held. 06 05 26d e

1906 When the Wesleyan chapel in Romsey Town was erected in Hemingford Road, space was left for a more commodious structure. The new chapel of which Mr W. Wren of Castle Street

is the architect is designed in the Queen Anne style with utility, rather than elaborate decoration; nevertheless the building with its cathedral-like windows will be a considerable addition to the notable buildings of that end of Mill Road. 06 06 05 [1.11]

1906 Members of two religious sects came into collision on Parker's Piece. For the past six weeks representatives of the Mormons have been holding Sunday evening meetings and have attracted some opposition. A member of the Romsey Town Mission began to argue on the subject of polygamy; a hostile demonstration ensued and the Mormons were hustled off along Mill Road followed by a booing crowd. 06 07 16 [2.13]

1906 The new Wesleyan Chapel in Romsey Town opened for public worship. It will accommodate over 400 people and is lighted by incandescent gas and heated by radiators. Though a plain building internally it is comfortable and has a pleasant appearance. The architect was W. Wren of Cambridge and the builders Coulson and Lofts.

06 10 26a

1906 St Barnabas church opened a drill room in Covent Garden for gymnastic exercises with recesses in the walls for the firearms of the Boys Brigade. Other rooms will be erected for bible classes, reading, refreshments and also for the practice of carpentering, making it a centre for social work among young men and boys. 06 11 07b St Barnabas institute opened – 06 11 09b & c

1906 A terrible calamity has overtaken the St Ives Catholic community, the interior of whose beautiful Mission Church of the Sacred Heart was wrecked in one of the most astonishing cases of sacrilege ever recorded. A madman broke into the church by battering the door with a sledgehammer and then swept round the building like an avenging fury, raining blows on every object until there was nothing left to break. 06 12 03a & b [2.13]

1907 General William Booth, founder of the Salvation Army, was welcomed to Cambridge by thousands of spectators who lined the road from Trumpington to the Guildhall. Three red motor cars with a Salvation Army flag in each were given quite an oration en route to Market Square where the Band struck up a popular Army tune. But the General entered the building from Peas Hill and ignored the cries of 'Speech' as he disappeared from view 07 07 17 [3.17]

1907 The vicarage of St Michael's church Cambridge has become vacant and Trinity College has offered the living to the Vicar of St Mary's, to work the parishes in conjunction. People have moved away from central Cambridge where there is a larger number of churches than now needed and since 1870 colleges have ceased to be exclusively Church of England institutions. The Church is inadequately supplied both with men and money and it is extravagant to maintain so many small parishes as separate cures. 07 01 15

1907 A movement is on foot amongst English Roman Catholics to establish a college for women, on the lines of Girton or Newnham, at the University. The leader is Miss Eleanor Warner who recently visited the Catholic Convent in Bateman Street. She is now in Rome for a meeting with the Pope. Opinion is strongly favourable and that Cambridge may soon see an addition to her institutions. 07 03 18a

1907 The 'Unity Brotherhood' had conducted some sort of mission for some months, circulating pamphlets couched in violent language attacking a Cambridge minister. The two men took up position on the Market Hill reading from a bundle of papers until there were about 1,000 people there. The crowd became hostile, hooting, shouting and trying to hustle them until police intervened. They were remanded in gaol so their mental condition might be inquired into. 07 06 19 & a

1907 The chimes of St Giles church clock in Cambridge have been restored after a silence of six years. Notice was given in the Parish Magazine but all do not read that excellent periodical and there was much astonishment when the bells entered anew upon their purpose of telling out the hours. The tone of the large bell is much improved now it has been re-hung so that it no longer rests against the wall. 07 06 22c

1907 Sir – I have been guilty of a gross and sinful mistake which has lead me open to attacks from subtle satanic spiritual influences. During the past months the Unity Brotherhood has solicited financial assistance from many people. Some of this money has been spent for charitable purposes but some has been given to a private account. Now I publicly ask forgiveness and wish to settle down quietly and earn an honest livelihood. A.C.G. 07 07 10a

1907 Cambridge has been favoured with a visit from Mr Smyth-Piggott, the self-styled ‘Messiah’ and leader of the Agapemonites. He has a marked distaste for publicity but, unfortunately for the Prophet of Free Love’s retiring disposition, he adopts a mode of travel which is not conducive to secrecy. Motor cars are not quite so common that a powerful machine, equipped with a comfortable tonneau, can pull up before a modest house in a quite street where the sect is wont to meet without attracting attention 07 09 24

1907 St Mark’s church, Newnham Croft, presented a scene of unwonted beauty and impressiveness when a large congregation assembled to witness the dedication of the new organ. It will meet a need which has been long felt, the harmonium being quite inadequate to lead the singing. The organ was built by Messrs Norman and Beard, is a two manual with 11 stops and cost £276. 07 10 11

1907 Holy Trinity church redecoration – 07 11 05b

1908 For years bachelor Harris Norman lived the life of a miser in Romsey Town. He was endowed with a positive genius for accumulating money but never spent more than would suffice to keep soul and body together. He laid the foundations of his fortune as a hawker of cheap jewellery, then speculated in stocks and shares. In his will he bequeathed the whole of his property to be divided between Addenbrooke’s Hospital and the London Jewish Synagogue. 08 01 31b – details 08 02 07 & a

1908 Fire damaged the Christadelphian Hall in Coronation Street, Cambridge, but fortunately the harmonium was not injured to any great extent. Another fire which broke out at Hale’s Farm, Haverhill is believed to have been caused by the heat of the sun. During the afternoon the sun’s rays had been extremely hot, the roof of the shed, under the slates was boarded and during the last winter had been stocked with stover. CWN 08 07 10 p2

1908 The police and the Cambridge corps of the Salvation Army came into conflict on Sunday evening. With full band, officers and followers, the customary demonstration commenced at the top of Kingston Street, a pitch which the Salvationists have occupied without interruption for twenty years. A song, followed by a prayer opened the service before a police officer asked them to ‘move on’. The S.A. Officer refused but did say that when a sick person complains of the band it is silenced at once CWN 08 10 09 p2

1909 building begins of Wesleyan Manse on Poplar House Estate, Christ’s Pieces [1.15]

1909 Wickliffe Preachers paid a visit to St Clement’s church while the vicar was hearing confessions and asked him to produce his authority for hearing confessions in the Church of England. An argument ensued and the vicar locked the Preacher in the church whilst he sent for the police. They then visited St Giles and sat down near the curate and an undergraduate who was confessing, refusing to move. Thereupon the curate whispered to the student to go to the vestry where they locked themselves in. In the evening there was a banner procession through the streets but a Protestant meeting was broken up by undergraduates. CWN 09 02 12

1909 The Protestant Demonstration called by Mr Kensitt at the Alexandra Hall resulted in the wildest uproar. The small hall was crowded with ladies, undergraduate and townspeople, while outside a band of disappointed ‘Varsity demonstrators increased. Inside shouting and whistling commenced before the opening hymn but the earnest portion of the assembly did not give in and by singing as loudly as possible almost drowned the discordant shouting of the opposition. Mr Kensitt’s speech was constantly interrupted. Missiles struck the windows and the hall was filled with the smell of sulphuretted hydrogen 09 02 19

1909 A domestic servant of Renfig, Hills Road, was sued for 50 shillings instalments on a Bible. A representative of the Bible Union Society had called at the house and after a great deal of persuasion she had agreed to join. He then produced a special bible with explanatory notes and pictures, saying it was only lent to her. But then they wrote demanding payment. She'd returned it but they had taken her to court. These men roved around the town back doors and got girls to sign; it was a misrepresentation. She was awarded costs 09 04 02

1909 The Rev Charles Joseph, minister of St Andrew's Street Baptist Church, has had a varied career, having been a commercial traveller and journalist with a weekly column in the 'Baptist Times'. He came to Cambridge in 1898 and oversaw the erection of the new chapel in 1903. His forcible preaching is so much appreciated that he is in constant request as a special preacher and his engagement book is full many months ahead. 09 04 09

1909 Harris Norman of Romsey Town, a Jewish hawker, lived to all appearances in extremely poor circumstances. But when he died was found to be worth £12,000. He'd divided his assets between Addenbrooke's Hospital and the 'London Jewish Synagogue for the Poor and Needy Jews'. However four groups disputed to whom this second bequest should go and it came before a Judge in the Chancery Division to decide. 09 05 07

1909 A new religious house has been founded at Cambridge. It will have no official connection with the University and be used for serious study. Its head is Father Waggett who gave a series of lectures which attracted considerable attention. The house in Malting Lane is a beautiful structure whose deeds date back to the time of Charles I. Its delightful old-world garden of nearly two acres would permit of ample additions in future years CWN 09 09 17

1909 St Botolph's Church reopened after restoration. The old ceiling in the nave, which was in a very dilapidated condition, has been replastered and re-decorated. A new hot-water pipe heating apparatus has been installed by Messrs Headley and Edwards together with a hydraulic appliance for blowing the organ by Messrs Miller of Sidney Street. CWN 09 10 08

1910 Church Congress held [3.18]

1910 Cambridge Baptist women's league founded [13.1]

1910 Jews acquire lease of hall at back of Grays, Sidney St as synagogue consecration of new synagogue, Sidney St [5.11]

1910 Congregationalists assembled in large numbers to celebrate the centenary of the church at Fulbourn. Its origins can be traced to 1776 when worship was carried out in a barn. In 1810 they took possession of a small meeting house erected by Thomas Harlock. The Rev. S. Smooty had been appointed in 1878 making him the longest-serving minister and no church had ever had a more faithful servant 10 04 29d & e

1910 Very quietly and unostentatiously the self-styled 'Messiah', Mr Smyth-Pigott of 'Abode of Love' fame revisited Cambridge and spend the day with what remains of the 'faithful few' of the sect who still go by the name of the Agapemonites. Some time ago there was quite a number but most of the younger members have fallen away and now they can be counted on the fingers of one hand. His arrival was a great contrast to his last visit when, clad in clerical garb, he dashed into town in a swagger motor car. There was no one to meet him at the station and he walked slowly into Devonshire Road where he entered a house. Later four ladies visited but no noise was heard except the clatter of knives and forks and the rattle of cups. 10 09 23a

1910 Signal success has attended the Cambridge Jubilee Church Congress. Fifty years ago when a few ardent Churchmen met together in the Hall of King's College, public interest in their proceedings was practically non-existent. Since then great changes of thought have taken place and this week three thousand members of Congress together with an Archbishop and 28 Bishops have attended. 10 09 30 & a

1910 The venerable head of the Salvation Army, General Booth, revisited Cambridge. He has aged since his last visit. The burdens of years now rests heavily upon his venerable shoulders. His long hair and beard are white, his sight is dim, his shoulders are bowed, his voice has lost its

volume and penetrating quality and he had to be assisted on and off the platform. But he is as eloquent and earnest as ever. For nearly an hour and a quarter he stood, his spare form closely buttoned up in his long military frock coat, upright and soldierly, a truly wonderful old man. 10 10 07

1911 meeting 'to expose Mormonism' [5.10]

1911 Methodist Chapel, Panton Street sold to Christian Scientists, previously met in Southgate Lodge, Emmanuel street for 8-10 years [1.13,1.17]

1911 consecration of new synagogue, Sidney St [5.11]

1911 The work of beautifying St John's Church in Wellington Street has been carried on steadily. The chancel curtains and all windows were thoroughly cleaned and the walls brushed down, the Holy Table has been restrained, the communion rails polished and the ironwork regilded. It is hoped the organ may be cleaned and repaired and that a new lectern may be purchased. Mrs de Candole's kind gift of shrubs and plants has done much to beautify the churchyard 11 05 12e

1911 Cambridge seems to afford congenial soil for the propagandists of peculiar religions. The Christian Scientists and Christadelphians have branches and even Smyth Pigott, the leader of the Agapemonites and founder of the notorious Abode of Love, has followers. Now Mormons have made half a dozen converts and two young Romsey town women are leaving for America. But the Mormon missionaries deny they are going to Utah: they did not preach emigration but preferred them to stay and help build up churches here 11 09 08c & d

1912 Hobson Street Methodist Chapel sold to County Council for County Hall [1.10]

1912 St Andrews Chesterton consecrates additional land [5.16]

The bride, Miss Katharine Heycock, daughter of a Fellow, wore a beautiful dress of white brocade and a train of old lace made by Mrs Thompson of Panton Street. The six bridesmaids wore Kate Greenaway coats trimmed with swansdown and hats trimmed with mistletoe and holly. Amongst the presents were a silver hot-water kettle, silver egg-stand and toast-rack. Afterwards the bride and groom left for the Riviera. The earliest wedding in the chapel was in 1666. 12 01 12c

1912 Wesley church raises £15,500 for rebuilding – 12 01 26c

1912 Monsignor Provost Scott anniversary ordination as priest 50 years ago – 12 04 26b

1912 "New Tunes to Hymns, Ancient and Modern" is the title of a little collection composed by the Rev Richard Owen of St Giles' Vicarage and published by Mr A.J. Gillson of Cambridge. In these days of multitudinous hymnals, when every church, sect and connection has its own original compilation of hymn tunes, cribbed and purloined from each other, one seeks the reason for any fresh one. This one is intended for a practiced body of choir singers, the stanzas are unsymmetrical and the rhythm is unconventional. We cordially recommend it to the attention of up-to-date choirs. 12 05 10h

1912 Hobson Street chapel was opened in 1849 by Wesleyans had previously met in a chapel in Fitzroy Street and a room in Green Street. It became a spiritual home for residents and undergraduates and was improved in 1891. But it has become inadequate. The Fitzroy Street chapel had become a jam warehouse but Hobson Street will be replaced by the new County Council offices. They will now meet in the Victoria Assembly Room until the new Wesley Chapel on Christ's Pieces is ready. 12 09 20c

1912 The laying of the foundation stone of the new Wesleyan Chapel adjoining Christ's Pieces to replace the old Hobson Street church marks an important epoch in Cambridge history. Built of white Bath stone, the style is Late Perpendicular and all the seats will be of oak. Thomas Ferns was handed a silver trowel by Mr Gunton, the architect, as a memento of the occasion but he did not use such a lovely object and took another to perform the ceremony. He was followed by Mrs

Lavender, who was a young girl teacher when the stone was originally laid in Hobson Street. A bottle placed under the main stone states that the site was purchased in on 7th August 1903. 12 10 11 f & g 12 10 18b & c

1912 Alterations to Castle End Institute Mission Hall mean that rooms are now well ventilated, brilliantly lighted with incandescent gas and have hot water heating apparatus. Two classrooms have been fitted up as a billiard room with a reading cum smoke room and a games room upstairs. The mission had begun at Frost's Passage and Kettle's Yard Night School where they had to tell the boys that soap was cheap and water was cheaper. The first site had proved unsuitable so the present site with a tiny grocer's shop at the corner and some back-to-back cottages had been bought. Now it would meet the needs of the neighbourhood and make residents lives more beautiful 12 10 25c

1912 It was one of the noisiest 'rags' seen for some years, for the introduction of a variety of bomb-firework, which gives a report louder than a rifle shot, more than compensated for the fewer Varsity men than usual. The liveliest scene occurred in King Street where the crowd were attracted by the sight of the hoarding outside the partly-demolished Hobson Street Chapel. Instead they turned their attention array of woodwork in connection with the building of the new Wesleyan Chapel near Christ's Pieces, but this was strongly guarded by police. Another battle broke out in Grange Road where some 400 undergraduates damaged the fence around Mr Ebenezer Smith's garden. 12 11 08a & b

1912 The new vestry at St Mark's Church, Newnham Croft, given by Mr & Mrs C.F. Foster in memory of their two sons, was dedicated. The vestry, which is the work of Mr W. Sindall, is built with ordinary red brick and stone, with oak wood. It is partitioned off with a moveable screen allowing the choir to use one side and the clergy the other. A heating chamber is situated beneath it. The architects were Mess James, Laycock and Bellamy of London. 12 11 01g

1912 Wesley church bazaar raises final funds; publication of a shilling souvenir with all chapels in circuit and on Hobson Street Sunday School. The other compiled by Mrs Ryder, Hobson Street, who wrote to old ministers and asked for a shilling and a quotation. – 12 11 01h & i

1913 The beautiful new buildings for the Wesley Church at Four Lamps are growing rapidly. The builders have made headway with the schools and the outline of the church itself is already clearly indicated. Looking at the operations from Christ's Pieces one hears the hum of an engine and sees a busy swarm of men climbing about the scaffolding. The room to be used by Universitymen is already up, with the roof virtually on and the schools next the Manse are well forward. The church itself will not be finished before September but the pillars and main porch are already above ground. 13 01 10d

1913 Wesley Chapel Christ's Pieces opened [1.10.6.22]

1913 A pathetic tragedy occurred in Cambridge when a German teacher committed suicide after killing his two children by shooting them with a revolver. His wife, to whom he was devoted, had died in February. He was an advanced Spiritualist and had written to the coroner stating that by the time he received the letter he and his children would have rejoined their loved one. He was firmly of the belief that the step he was taking was merely a means of reuniting the family. 13 04 11 p6 & p9 CIP [5.12]

1913 Castle End Institute is carrying out splendid work in this thickly-populated area. There is a first-rate billiard room for men, with reading and games room upstairs; boys have a gymnasium and there are weekly sewing classes for girls. A pulpit will shortly be added to the mission room which presents very bright appearance after its redecoration 13 01 24 p12 CIP

1913 Rev M.E. Aubrey, minister St Andrew's Street Baptist church – profile, 13 02 28 p3 & 5 CIP

1913 The strained relations between the Superintendent of the Zion Sunday School and other church officers have resulted in a definite split. When the Sunday School was closed three weeks

ago the local Press were asked to make no mention of the trouble in the hope that a peaceful settlement might be reached without publicity. But negotiations have failed and a new Prospect Sunday School and Mission Room has now been started in the former 'Express' Printing Works in Eden Street. 13 04 18 p5 CIP

1913 Ordination in Jesus College chapel 13 05 23 p5 CIP

1913 The foundation stone of the new Cheshunt College buildings in Bateman Street was laid by the Lord Chancellor. The college was formed in 1768 by Selina Countess of Huntingdon to prepare men for evangelistic work and its students can enter any church. It moved to Hills Road Cambridge in 1905 and is now attached to the University. Most of its students take the Theological Tripos. A number have risen to eminence as missionaries in the foreign field 13 06 13 p7 CIP

1913 Welsh Church bill protest, Parker's Piece 13 06 20 p7 CIP

1913 The Church of England's service on Midsummer Common was about to begin and the clergy and choir had taken their places when one side of the platform gave way and those standing on it were thrown down. The people on the other side were about to go to their assistant when that side also collapsed and they disappeared from view. The Rev F.B. Gwinn had one leg caught between two boards and Councillor Hawkin's face was cut. The service was proceeded with as soon as possible. The platform had only been put up during the day and insufficient props had been placed under it 13 06 27 p11 CIP

1913 Rev Holt Shafto, Wesley Church leaves – 13 08 29 p6

1913 A new Church Army mission van was dedicated, replacing one that had been on the road for 18 years. Called the Ely No.1 van, it bears the name 'Mary Ann' and is much more convenient for those who have to pass their lives in it. There is larger floor space with two bunks instead of three, giving greater comfort. Mounting the steps there is a hall which can be turned into a covered-in platform to address open-air meetings. The living part is cosy and comfortably furnished with a cooking range and a chest of drawers which opens to make a fair-size table. Folding chairs and cushions make it as home-like as possible. 13 10 03 p7 CIP

1913 Christ Church, Newmarket Road, has undergone a much-needed transformation. An ugly roof of matchboarding has been decorated, the east end has been enclosed by panelling which will form two new vestries and the stone work of the pillars, hitherto painted brown, has been restored. The cumbrous pulpit staircase has been brought under the gallery, giving space for the choir stalls. It gives a feeling of lightness and beauty to a church hitherto not marked by these characteristics, with evident regard to modern taste 13 10 10 p8 CIP

1913 Salvation Army citadel planned, Tenison Rd 13 12 19 p12

1914 The old Primitive Methodist Chapel in St Peter's Street is now in the hands of the house-breaker and is fast disappearing, together with the adjoining cottages. From the ruins will rise new, handsome and commodious buildings. The old premises have been altogether inadequate and only a lack of funds have prevented the work starting earlier. Now work can be commenced and we are witnessing the passing of the old meeting house that for nearly 50 years has been the home of Primitive Methodism in this part of the town. It was used for the last time on Sunday week, when impressive farewell services were held. 14 01 30f pics of ext & int.

1914 The laying of the foundation stone of the new Primitive Methodist Church in Castle Street was well attended in spite of the unpleasant weather. The site was gaily decorated with flags and a platform erected for those taking part in the ceremony. The layers of stones were presented with small silver trowels as mementoes of the event and those who wished were invited

to purchase the privilege of laying a brick. Amongst those who did so was Mrs David Moore of the Band of Hope Union 14 02 20a & b Castle Street Methodist Chapel opened [1.3]

1914 Salvation Army citadel opened by Mrs McKenny Hughes. The first hall was the Sturton Town Hall and years later the Junior Hall in Gwydir Street 14 06 04 p7 [4.3]

1914 "Brawling" in Church.- Interruptions in Divine Service were made at Holy Trinity Church, St. Matthew's Church and the Friends' Meeting House by militant suffragettes. Militant methods of madness have already put a brake on the advancement of an. excellent movement and the disturbance of church worshippers is no argument in favour of votes for women 14 02 13 CIPof

1914 St Philip's - Rev. E.Lloyd Rees, senior curate leaving for Sheffield. Will be accompanied by Mr. H. W Flory, who has been in charge of the mission church of St. John's. He will then be appointed curate there 14 06 05 CIPof

1914 The foundation stones of the Salvation Army Citadel in Tenison Road were laid by several prominent people and a large crowd gathered to witness the ceremony. The citadel will consist of a large hall accommodating 400 people with a band room, tea room etc. The bands of the Cambridge and Cottenham corps were present and accompanied the hymns. The weather was threatening but fortunately the rain held off until the final vote of thanks 14 03 27g

1914 The foundation stones of the new Primitive Methodist Church Sundays Schools in Castle Street were laid when a large crowd gathered. A public tea was held afterwards in the Palace Rink, Magrath Avenue, when 350 attended. 14 04 03d

1914 Castle Hill Methodist Sunday school opened 14 07 31

1914 The handsome new Castle Street Methodist chapel was formally opened. The Mayor referred to the 'tie rods' of the building which might detract from the artistic appearance but were needed because of the traffic which passed. When they laid the foundation stone no one thought that before it was completed the nations of Europe would be in deadly conflict. In Cambridge they had no forts or ramparts against their human foes, but this was a defence against spiritual enemies 14 10 16

1915 Theatre Royal Barnwell Mission Hall closed [5.3]

1915 All Saints church suffered serious damage to roof and spire as result of recent storm. A stone pinnacle fell from the spire and struck the roof of the vestry. A large hole was knocked in the roof and a mass of debris fell on the organ below. The damage caused was serious and the cost of repair will be heavy. Workmen are now engaged in mending the damaged roof 15 01 09

1915 Fire Christ Church parish room 15 09 17 p5,7

1915 Cardinal Bourne at Cambridge. — His Eminence Cardinal Bourne. Archbishop of Westminster, visited Cambridge on Friday and blessed the foundation stone of the chapel being erected at St. Edmund's House. St. Edmund's House, Cambridge was established in 1896. The purpose is to provide an extended university course for Roman Catholic priests and ecclesiastical students. The Duke of Norfolk is the founder and St. Edmund's is under the control of the Hierarchy being managed by a body composed of Clergy and laity of which the Duke of Norfolk is the president. The present master is the Rev. Father T. L. Williams 15 11 10 CIPof [3.7], 15 11 10h Ch

1922 Impressive scenes were witnessed at the funeral of an Indian undergraduate. The funeral was carried out according to the Mohammedan ritual, and the interment was at St Giles' cemetery, Huntingdon Road, Cambridge. The coffin was conveyed in a hearse and was followed on foot by over 50 Indian undergraduates. Arrived at the cemetery the coffin was placed on the lawn at the entrance. Then several of the mourners, removing their shoes, conducted a short form of service, after which the coffin and mourners were photographed by an Indian student. The body was carried to the graveside and lowered by a party of the mourners. Nobody who was not directly concerned with the ceremony was allowed within 25 yards of the grave CDN c 21.4.1922

1922 Salvationists in Cambridgeshire and Huntingdonshire were greatly heartened during the holiday weekend by a visit from Mrs Booth, the beloved wife of the General, who addressed a series of meetings in several of the towns and villages which come in what is known as the Northampton Division. Mrs Booth made her tour in a motor car kindly lent and driven by Councillor H. Franklin of Cambridge. At all the meeting places large crowds had assembled and along the roads through which the cars passed not only Salvationists but many others came to the doors or stopped at their work to wave their hand to Mrs General Booth. Although it is a very long time since any Salvation Army gathering was held in St Ives there was a very large muster on the Market-hill to welcome her. c22 08 11

1922 Recent issues of "The Inquirer" have contained matter interesting to the Cambridge public. About £4,318 has been received up to date in response to an appeal for the cost of a site and buildings for the Unitarian Church. A hall is now being built and will be opened for worship

in the autumn. The site has apace for the erection of a church, which will ultimately be built beside the hall. The projected building will only be a development of a subsisting entity. A Unitarian church has existed at Cambridge for the best part of 18 years c22 09 03 [11.1]

1922 Cambridge is very different from most places. Most of the churches here, until quite recently, have been served by ministers who were Fellows of colleges and lived in their college rooms. Before the colleges came there can be little doubt that each parish has its vicarage but in course of time these houses disappeared. But St Botolph's has been more fortunate. During the last 700 years there has always been a lodging for the incumbent somewhere within the parish, either in Corpus, or in Queens' or outside college walls. For 300 years the parsonage house was opposite the church at the corner of Silver-street. A little more than 50 years since, when the old churchwarden built the present fine house, the lodging there was given up. But the parish still had its rector on the spot with a succession of rectors having the same rooms in Queens' college. In these times when there are so many undergraduates the college needs all its available space and it is no longer content to have the rector inside its walls c22 09 03

1922 At a meeting held in the Parish Hall, Union-road, Cambridge it was decided to erect a memorial to the late Mgr Provost Scott, rector of the Church of Our Lady and the English Martyrs. The chairman said the late rector had been nearly forty years in the parish and he was the initiation of the change from the little old church which used to stand in Union-lane to the present large and handsome edifice. He had built up all its traditions and had set up a high standard of services. He mentioned proposed schemes including the erection of a Calvary over the tomb, a monument in the church - a recumbent effigy or a brass, or some definite work further beautifying the church which the late Provost built and loved c22 09 24

1923 Holy Sepulchre trees removed [NI.1.15]

1923 Cambridge Methodist Sunday Schools Centenary [1.14]

1923 Saturday and Sunday were great days in the history of local Unitarians, for they witnessed the realisation of a dream - the opening and dedication of a permanent Unitarian Church building in Cambridge. For something like 20 years Unitarians in Cambridge have been meeting in hired halls. The new hall is a particularly fine one in Victoria Street and eminently suitable for the purpose intended. It was also stated that a member of the congregation had now undertaken to erect a memorial church, which would mean that the new hall would be greatly extended c23 01 26

1923 A ceremony unique in Cambridge and of a very impressive nature took place at the Carmelite convent on Chesterton road when his eminence Cardinal Bourne, Archbishop of Westminster gave an address. The ceremony was that of enclosing nuns. The house consists of two former dwelling houses joined together and possesses a small public chapel in which there will be public mass every day. With the exception of the nuns choir chapel, no part of the building is actually new c23 11 16

1924 Emmanuel Congregational Chapel 200th anniversary [4.8]

1924 The Fiery Cross, which has been circulating throughout the dioceses of England since the beginning of the year, was met at the gates of St Mary the Less, Cambridge, on Thursday night by a full choral procession. It came from St Luke's Chesterton and proceeds to Tilbrook, Hunts. Wherever the fiery cross goes it has a perpetual stream of watchers. It may be described as a missionary pilgrimage, an intercession for the conversion of the heathens in England c24 11 29

1925 Monday was an important day in the lives of Roman Catholic members of the University. The blessing of the chapel at Fisher House took place and was followed by a luncheon. Fisher House is on the site of the Black Swan, one of the oldest inns in Cambridge, and the Dug Out. It has been turned into the residence for the chaplain and the old billiard room at the back has been adapted to serve as a chapel c25 05 08 [4.10]

1925 After nearly 700 years – except for a period during the Great War – services are again to be held in the Leper’s Chapel at Barnwell. The chapel is the property of the University by whom permission to use the building was readily given. Negotiations have also had to be conducted with the owner of the field, so that a right-of-way may be obtained from the road. The services will be regular and open to the public. Members of Westcott House are now busy at the chapel removing some of the ravages of time as the building remains just as it was left at the end of the war c25 05 04

1925 Wesley House, the new Wesleyan Methodist post-graduate theological college which has risen on a site in Jesus Lane, was formally opened. It was five years ago that the Wesleyan Methodist Conference decided to set up the college at Cambridge and a site was purchased from Jesus college. The architect, Sir Aston Webb, has carried out a pleasing design in red brick. The building comprises accommodation for 29 students. The work of the college has been carried on for the past four years in hired buildings c25 10 27

1925 Regular services were resumed in the Leper chapel last summer, conducted by members of Westcott House. If these services are to be continued a proper floor (there being at present no other floor than beaten earth) and some form of heating apparatus are necessary, while the condition of the interior plaster, which is continually dropping, calls for immediate and careful repair. This means the raising of a considerable sum of money and it is estimated that £300 will be required c25 12 12

1926 Cambridgeshire Congregational Union Jubilee of foundation [4.11]

1926 New Cherry Hinton Free Church opened [4.12]

1927 The stone-laying ceremony in connection with the new hall at Hills Road Wesleyan Church, Cambridge took place. It will be a single-storey building but with a view to enlarging later, if necessary. Mr C. Kerridge and Mr W.A. Gray, members of the church, are the honorary architects and the building is being done by Messrs J.R. Bennett & sons. Too often had they had to work under most depressing and unfavourable conditions. The Young Men’s Fraternal had increased from five to nearly 50; if they did not make provision for these young fellows others would step in and reap what they had sown. CDN c 2.5.1927

1927 Cambridge Guildhall was packed for “Welcome Home” and jubilee celebrations organised in honour of Gypsy Smith, the world-famed evangelist, who has just returned from Australia and New Zealand. The Gypsy told of some of his experiences during this last tour and recounted again how he was converted in the little chapel in Fitzroy Street. A telegraph of “much satisfaction” was received from the King and he was presented with a history of Cambridge. The Mayor said that 50 years of service was a wonderful record. He was the missionary and evangelist to the English-speaking people and had probably spoken to more of the English race than any person, living or dead. Cambridge ought to be particularly proud as his career had started here. CDN c 8.5.1927

1927 It was a memorable day in the history of St John’s Church, Hills Road, Cambridge with the opening of the new Parish Hall and Sunday School. The hall, which is dedicated chiefly to the use of young people, is a fine building of red brick and is situated on the site of the old Mission Church in Blinco Grove. The Women’s Union have made themselves responsible for the porch and entrance, raising £130 & money for the electric light has been raised by Miss Gwatken and her Bible Class. c27 11 25 [1.17]

1928 St Clements steeple demolished due to condition [1.18,6.3]

1928 Cambridgeshire Baptist Association 50th anniversary meeting [2.3]

1928 Unitarian Church Emmanuel road dedicated - “an architectural gem” (had built Carpenter Hall 1922 which served till church [4.14,6.6,11.1])

1928 Cambridge National Spiritualist Church formed, services held at Cosmopolitan Cinema, Market Passage [5.1]

1928 It was with feelings of justifiable pride and deep gratitude that the Unitarians of Cambridge assembled in their new Memorial Church, Emmanuel Road for its dedicatory service. It stands as a perpetual memorial to the memory of Mr G.W. Brown. The church has been designed by Ronald P. Jones who was responsible for the Church Hall in 1922 and follows the normal "college chapel" design. Prof Burkitt referred to the difficulties the movement experienced in the '80s when services were held in the smoky atmosphere of a billiard room in Green Street. c28 01 28

1928 Finding that the spire of St Clement's church, Cambridge was in a dangerous condition a small army of workmen are busy erecting scaffolding. The pinnacle above the tower is to be taken down and will not be re-erected. A hole in the spire about ten feet by three feet is visible from the road and it is believed that the trouble was caused by the recent gale. The spire is a later addition to the church, having been erected in 1832 according to instructions under the will of William Cole of Milton. c 28 02 06

1929 St Johns Church Hills Road consecrated 33 years after opening of first portion [1.20]
CDN 16.6.1929

1929 Hope Chapel, Cambridge Place opened [2.8]

1929 Gospel Standard church formed [12.11]

1929 Abbey church new porch dedicated – CDN 10.5.1929

1929 Band of Hope cinema – David Moore – CDN 13.9.1929

1930 There were remarkable scenes at the opening services of the Arbury Road Baptist Church Hall and School. When the doors were flung open the crowd was far too large for the building. Although many stood at the rear many more had to be content with standing outside and taking part in the proceedings through the open windows. It meets the religious needs of a large residential area of 4,000 people which has come into existence since the war and it is hoped to build a chapel within a few years 30 07 18 [2.14, 13.4]

1930 St Augustine's church in Cambridge was erected on land given by the Rev. T.J. Puckle in 1897. It was a memorial to the late Canon Churton, who was a saint; he considered its most important function was the training of children. His brother was a member of Westcott House and he suggested their men should assist. The new vestry was a much-needed improvement. It would be used as a storeroom for chairs and provide a room for small meetings. 30 09 17-a

1931 Little St Mary's Chapel consecrated [1.26]

1931 St Paul's church, Cambridge, having been closed for a month during which extensive restoration work and some constructional changes were effected, reopened for worship amid an atmosphere of thanksgiving and delight. The improvements amounts to nothing less than a transformation and the previously unattractive interior is now pleasing in the extreme. Pews have been modernised with a wide central aisle, new choir stalls and chancel screen erected and a small clergy vestry provided. New arches and windows have greatly improved the lighting of the chancel. 31 04 03h & i

1932 St Peters Church underpinned to stop it falling down [1.28]

1932 Christian Spiritualist church constituted [11.3]

1932 The residential population of All Saints church in Cambridge is dwindling on account of commercial progress. Of 1,500 residents when the church was built, only 600 now remain due to the conversion of houses into shops and offices. The time is rapidly approaching when parishioners will have to consider the state of the church, the vestry meeting was warned. 32 03 30a

1932 St Paul's church hall, Suez Road was dedicated to serve the large community resident in the Coleridge Road district. Jesus College had given the site with sufficient land at the rear to build a church while Mrs E. Rowcroft of Torquay had send a cheque for £1,000 for the building work. 32 05 06 c & d

1932 St George's church appeal – (detailed) – 32 05 28 & 28a

1932 St George's church foundation stone – 32 06 11 [3.6, 6.7]

1932 Salvation Army young people's hall foundation – 32 06 10a & b

1932 The Union of British Methodism – bringing together the Wesleyan, Primitive and United Methodists - is the most important event in the history of British Nonconformity since the birth of Wesley. Cambridge's first Methodist chapel in Fitzroy Street was where Gipsy Smith heard the sermon which led to him becoming an evangelist. It is now Fellowship House for the local unemployed. 32 09 23b & c

1932 The new church of St George, Chesterton, was packed for the dedication by the Bishop of Ely. He welcomed those from the local district: it was for them that the church had been built. It was only a hall at present but he wanted them to see to it than an actual church was built in due course. 32 10 14a

1932 The Rev Herbert Appleford was a notable benefactor to the new parish of St George that covers the new housing estates in the Milton Road district. It has been an open secret that his enthusiasm and generosity made possible the work of the church. He provided money to purchase a site, he laid the foundation stone and was present at its dedication. He also furnished the sanctuary and gave half the cost of the clergyman's house. The new church practically owes its existence to his generosity. 32 11 04

1933 Jewish Synagogue, Thompson's Lane opened [5.7,13.1

1933 Oxford Movement centenary celebrations [5.15]

1933 St George's church – why not move St Michael's – 33 01 27g

1933 Gt St Mary's bells a nuisance – 33 03 09

1933 Dr R.M. Salaman addressed Cambridge Rotary club on the persecution of the Jews in Germany. Hitler was destroying the whole people: it was more serious than the mere 'beating up' of individuals who happened to be Jewish, it was a movement which struck at the very roots of civilisation. Paid advocates of the Nazis had been sent to Palestine and the Ukraine and the doctrine was being taught in schools in the most scandalous way. 33 07 12 p8

1933 The centenary of the Oxford Movement was celebrated at St Giles' church when the congregation was exceptionally large. Prof Wynne regretted the tendency of the Church to be manned with old men. It was the younger man who saw visions and who must carry on the work. These days a mass attack was being made upon Christianity, the world was growing increasingly evil. The English Church Union and the Anglo-Catholic Congress should work together. 33 07 15 p6

1933 St Botolph's church has never had a house for its incumbent. Former rectors have generally been Fellows of Queens' and entitled to a set of rooms in the college. But recent clergy have been family men and had to provide their own living accommodation. Now a new rectory in Summerfield, Newnham Road, has been designed by C.F. Skipper 33 12 12

1934 Extensive repairs are being carried out to the roof of Great St Mary's church. Once again the cause is the death-watch beetle whose activities in the wooden beams have wrought tremendous havoc. The area around the chancel is in 'splints' with steel scaffolding but services are being held as usual. The church has only recently been cleaned and the organ renovated. One can only hope the ravages have been checked before they could cover the whole of the roof. 34 09 15 [6.13]

1934 In 1921 members of Sturton Street Methodist Church erected a school hall as a temporary building. Now plans have been prepared for extensions to the church itself with choir stalls and

pews. They have launched an appeal for £2,300 to include a new hall. Old scholars are invited to give a contribution, however small. 34 04 11

1934 There was great rejoicing among members of the Sturton Street Methodist Church at the opening of the new school hall, adjoining the chapel. The building, which seats about 200 and has a fine platform and convenient ante-rooms, was beautifully decorated with flowers for the occasion. It was opened by Arthur Harding, the senior trustee who has been associated with the church for 37 years. He hoped it would be of great service amongst young people. 34 10 12

1936 The new electric clock in the tower of Cherry Hinton Church was given by Mrs Newport-Willson in memory of her husband. She also bore the expense of leading an electric cable into the church. The three feet dial is Coventry blue with gilded figures and hands. The hours are struck on the beautiful toned fourth bell and are heard all over the village. Churchyard trees have been lopped to give an unimpeded view. Over 50 years ago Mr Carter Willson built Brooklyn on Cherry Hinton Road which was then the only house between Cherry Hinton brook and the railway bridge and the family is devoted to the parish church 36 05 25a

1936 Mrs Arthur Walters book 'My Wayside' describes life in Cambridge where Arthur Walters was minister Hills Road Methodist church - 36 06 06b

1936 William Allen, retired railwayman, joined Wesley Methodist Church, Hills Road in 1867 when it worshipped in a temporary building at the rear of the present church. He compiled a book telling how he started at Wesley Church but found them unfriendly 36 08 22e

1936 The opening and blessing of the new Roman Catholic Schools and Hall at Union Road, Cambridge, presented a picturesque spectacle of stately ceremonial. In the morning Archbishop Goodier preached following a Pontifical High Mass in the Church of Our Lady when the glory of mauve and splendour of gold vestments stood out vividly among the black cassocks and white surplices. The new buildings were opened and blessed in the afternoon whilst the Roswitha Players from London gave the first stage show at the new Houghton Hall in the evening. 36 09 24b 36 09 25a

1937 St Radegund's Hall on the corner of Brooks Road and Coldham's Lane was inaugurated by the Bishop of Ely. It is the property of the Jesus Lane Sunday School trustees and is the third building to be used for their work since its inception nearly 100 years ago. It is hoped that ultimately a new parish church will be built in this rapidly-developing part of Cambridge. The hall will be used not only as a Sunday school but also for regular church services and is an important new centre of Christian worship and teaching 37 10 15c (renamed St Stephens in 1947) [7.4] St Stephens church on site since 1937 & previously used services now as Church Hall [446.11.1]

1937 The Cambridge Hebrew Congregation's new synagogue in Thompson's Lane was consecrated by the Very Rev, the Chief Rabbi of the British Empire. Jews were to be found in Cambridge before the Middle Ages and the stone walls of the medieval synagogue were said to be still standing. Cambridge University was the first seat of higher learning in the modern world to have given Jewish studies academic recognition. Arthur Cohen was the first Jew to take up residence at Magdalene College in the early 1850s after representation had been made to the Prince Consort, the then Chancellor, by Sir Moses Montefiore. 37 10 22 (started 1935) [5.7,12.1]

1937 Speaking at the Zion chapel centenary celebrations the Mayor, Ald Briggs, said he'd been born in Bradmore Street 60 years ago and had many memories of the meetings in the building. He associated Zion with evangelical work and for a 100 years there had not been one instance when they'd turned to a 'stunt' to keep their religion going. All the ministers had relied on preaching vividly, strongly and in a clear-cut manner to get the response they'd hoped for 37 03 05h & i

1937 The death occurred of Mrs Ann Smith, wife of Gypsy Smith, at their home, Romany Tan in Hinton Avenue. She was associated with Hills Road Methodist Church but led a very quiet life

and although she once or twice went on tours abroad, she generally remained at home. The funeral service will be held at the house. The famous preacher is absent in America on an evangelical tour; he is at present in Charlotte, North Carolina. It is not expected that he will be able to return home until April. 37 03 05k

1937 When the Salvation Army first came to Cambridge Ellis Merry gave them what was then his wash-house in which to hold their meetings. He was one of the early sergeant-majors and associated himself with their work in the villages, using a concertina and violin to good effect. He was the first to run a penny bus, from Mill Road into town and also did the horse mail work. Until his retirement Mr Merry carried on the business of undertaker. 37 03 24c

1937 The ceremony of the enclosure of the new Carmelite Convent at Waterbeach was performed by the Bishop of Northampton in the shade of a huge plane tree. The Gregorian Chant was led by the priests while Catholic hymns were sung by the laity, numbering over a 1,000. The old convent in Chesterton Road, opened 12 years ago, has proved inadequate so a house standing in extensive grounds has been chosen. Visitors have been seeing over the building at the rate of 100 a day. But never again, except in extremest necessity, will anybody other than nuns enter the door. 37 09 15 & a

1937 Jesus Lane Sunday School was set up in 1827, later moving to King Street where many local children were taught religion by undergraduates who rose to positions of eminence in the church. A new large school was erected in Paradise Street in 1868. But times change. After the war many families have moved further out so now they have sold that building and erected a new hall in Brooks Road which will also serve as a temporary church until a new one can be built. All children between eight and 15 are invited 37 09 25

1937 Cambridge Spiritualists held a fair in the Carpenter Hall, Victoria Street, in aid of their building fund. They had bought a piece of freehold land, despite some misgivings, and were anxious to put a church on it. There was no state support. All the spiritualist churches in the country had been secured by their own efforts. "If we are not here in physical form we shall be in the spiritual body to see the church" they were told by Mr A.J. Case, the president 37 10 01f

1938 Huge crowds turned out to welcome the Princess Royal when she laid the foundation stone of St George's new church on Milton Road. The building with its 107 ft tower is visible for several miles around and has become a new landmark in the northern part of Cambridge. The ceremony took the form of an open-air service conducted by the Bishop of Ely. Practically all the local clergy came together with the Lord Lieutenant, the Mayor, architect (T.H. Lyon) and the builder (Mr C. Kerridge) 38 04 23, a & b, 25 [3.2]

1938 St Giles church stained glass window unveiled in memory Bishop Charles Gore – 38 01

1938 Churches have changed – the breaking down of intolerance - 38 05 31e, f

1938 St George's church consecration – 38 10 13b

1939 First vicar of St George's – 39 01 13

1939 The small new Roman Catholic chapel on the corner of High Street, Old Chesterton is a corrugated iron structure but its lines are good and the interior fittings and decoration are in excellent taste. After the Reformation there was no Catholic church in Cambridge. Then Mass began to be said in the room of a house and in 1841 a small church opened in Union Lane. This was supplanted in 1890 by the fine building in Hills Road. Now there are large congregations at four Masses every Sunday and two other chapels of ease beside the one now opened. 39 10 09

1939 When Christ Church was established, 100 years ago, Barnwell inhabitants were described as 'heathen and dissolute'. Nelson Street was known as 'Devil Street' and there were many proctorial raids. The credit for the change was due to churches such as Christ Church and Zion who had now eliminated many of the differences between themselves. Congregations had been very hard hit by the demolition of houses in the districts but they hoped more young people would offer support, the centenary celebrations were told 39 05 17

- 1940 St Andrews Street Baptist Chapel Mission Hall, Cambridge Place sold [2.6]
1940 Church hit by bomb. — Bombs were again dropped on various parts of East Anglia, but the most serious damage appears to have been to a village church. In the area four high explosive bombs were dropped, but no casualties have so far been reported. At the church, the bomb fell on the tower and continued into the churchyard. Chancel, choir stalls, organ and pulpit were all undamaged, and all the stained glass, which was covered with thick brown paper, was unbroken. The church holds about 250 people and a service had been held there in the evening. Recently £200 was spent on renovation to the fabric and the bells. Another village a few miles away also received several bombs, but no information has been received of serious damage or casualties and some of the bombs are known to have fallen in open fields. 40 10 18 CIPof
1940 Salvation Army veterans, Gillson, recall early days of movement – 40 09 04a
1940 First marriage at the People's Mission, Abbey Walk – 40 12 03c
- 1941 Mill Road Baptist Chapel school hall demolished by enemy action , (reopened 1949) [2.1,2.2]
1941 Aug 29 Argyle St, Sturton street chapel bombed (replaced 1954), A bomb dropped within a few feet of the west wall, removing the greater part of the roof slating, opening a large hole in the external vaulting and causing severe damage to the fabric. The whole of the roof lifted and many of the roof timbers were fractured. The building was of no use for public worship which had to take place in the Assembly Hall c53 11 18 [6.21,1.7]
1941 St Barnabas church now restored with new bell – 41 04 17
- 1942 Jehovah's Witnesses hold memorial meeting in front room [12.2]
- 1943 St Andrew the Great celebrates centenary of present church – 43 10 21a
- 1944 All Saints church new windows in honour of womanhood – 44 10 26
- 1945 Jewish refugees should stay, says meeting – CDN 1945 05 03
- 1946 Mgr Canon Marshall resigns from Our Lady parish – 46 08 26
- 1947 death of Gypsy Smith : was converted in Cambridge 1876; 1927 given civic reception on return from mission to Australia & New Zealand
1947 An event of unusual interest took place on Sunday night when the congregation of St Andrew-the-Great held their ordinary evening service in the chapel of Christ's college. The organ of St Andrew's church has been out of action since melted snow came through the roof some weeks ago. As the estimated cost of repairs lies between £100- £200 and will take some months to effect, the congregation was grateful for this opportunity for a service accompanied by an organ and the College chapel was crammed from end to end c47 04 15
- 1948 St Stephens church district created from parishes of St Andrew the Less & Fen Ditton [1.15]
- 1949 Society of Friends meeting house damaged by fire [4.2]
1949 Myers Memorial Hall, Thompson's Lane, Cambridge, was the home of the Cambridge National Spiritualist church was opened. The Hall, brightly decorated, lighted, furnished & heated, bears little resemblance to the army hut it once was. The organ was dedicated to the memory of the late Mr C.W. Brown, a former member and benefactor of the church c49 10 22 [5.1]

1949 St Edward's : oak pulpit used by reformers restored to church [9.12]

1949 During the war the Tabernacle Methodist Church in Newmarket road, Cambridge, was closed and the property sold. The history of the church went back over many years, having its early beginnings in the old Fitzroy Street chapel. There were hopes that at some future date the work so nobly done by the two old chapels would be carried on. In the very near future some of these hopes may be realised, as the trustees intend to acquire the piece of land adjoining the YWCA hall and opposite the Borough cemetery, Newmarket road, for the purpose of commencing a new Methodist cause c49 01 21

1951 St Stephens services begin in Priory School [1.15]

1951 University offer Stourbridge Chapel (acquired 1817) to Cambridge Preservation Society [1.14]

1951 The death occurred of Rabbi Dr David Margules. He was arrested in 1938 by the S.S. and taken to the notorious concentration camp of Dachau but fortunately released within a few weeks. The indignities he had suffered left an indelible mark on his mind, but did not change his innate kindness towards all his fellow men. He came to Cambridge in 1941 where he became the "honorary" Rabbi and devoted himself with great zeal to supplying the religious needs of both residents and students c51 02 15

1951 The annual ceremony on top of Cambridge castle mound at 7.30 am on Eastern Sunday morning is becoming traditional. The company sings 'Christ the Lord is Risen Today' and then asks for God's blessing on Cambridge and its people. The event originated with Victoria Road Congregational Church and was intended to be a simple act of cheerful witness to the Easter message. Now it is attended by people from many churches. It has been held annually for the past five years and attracts around 50 people. It is strangely impressive to look over the quiet town in the light of early morning and to hear the words of Christian faith lifting from the hilltop to be carried far and wide c51 03 23

1952 After years of planning, working and hoping, members of Chesterton Methodist Church have at last a building of their own, a new church on the corner of Green End Road and Scotland Road, which was officially opened by Mrs Elliot Ridgeon. Now they have a light and bright building and the friendliness of the many members at the ceremony reflected joy and thankfulness at the completion of the new church. But their struggles are not yet over for they plan to build a school hall and hope one day to build a bigger church. CDN c22.1.1952 [1.4, 1.11, 13.10]

1952 Meadlowland Methodists in Cambridge revealed a venturesome spirit when, in driving snow, they dedicated the site of the proposed new church and offices. The simple service was conducted in the East Barnwell Community Centre & Coun Herbert Finbow cut the first turf. Mr Henry Hughes, the architect, explained a model of the new building which will present an impressive aspect when viewed from Newmarket Road. Finance will come in part from the sale of the Tabernacle Church. CDN c 3.4.1952 [1.5]

1952 Jesus Lane Sunday School has been wound up. It was founded in 1827 by a group of University men distressed by the spiritual desolation of Barnwell who decided to start a "Gownsmen's Sunday School". Four of them set out to visit every house in search of scholars and on the first Sunday the school opened with over 200 children attending at the Friends Meeting House. Later they erected a large new building in Paradise Street where 600 children were on the books. The 1914 war dealt the school a blow from which it never wholly recovered and in 1936 the building was sold to the Boy Scouts Association. c52 09 26 (every Parish now has own Sunday School & its work redundant after 120 years) [4.15]

1952 Two hundred people gathered around the doorway of the new Memorial Hall of Cherry Hinton Free Church. In their midst stood the bricklayers and electricians, the carpenters and the painters who had built it. And there were the ladies who had made the tea. Churchgoers have built it with their own hands. It was a memorial to all those in the church who had played their part in

the last war: on the civilian as well as on the military field of battle. It was a memorial to the living as well as to the dead. c52 10 17 [4.16]

1952 More than 100 people watched a key being turned in a lock last night before they entered the youngest Methodist Church in England. For that was how the Meadowlands Church, sparkling cream-and-cosy, was described at the first service to be held in the new building. Rev. W.H. Beales glanced over the congregation who had helped to pay for the cream-painted church, at the small intimate organ in the corner and the simple altar in light oak with its gleaming brazen cross & said the community of Meadowlands owed these workers a debt which could never be repaid c52 12 23

1953 Mormon missionaries tried but lack of response

1953 St Martin's Church dedicated [1.23]

1953 St Edward's Church coronation window [6.5]

1953 Cambridge Christian Spiritualist Church moves to Corn Exchange Street [5.2]

1953 Ditton Fields Free church opened, founded 1947 [4]

1953 St James : first services attended by 6 people [9.16]

1953 The new branch church of St Andrew's Street Baptist Church built in Dudley Road, New Barnwell for the people living on the new housing estates was opened on Saturday. The church was filled to capacity. It took about a year to build & seats a congregation of 150 in the main hall; there is a junior room for Sunday School meetings large enough to accommodate 100 children, and a primary room for the under-eights. c53 05 13

1953 Twelve years after a high explosive bomb partially destroyed the Sturton Street Methodist Church plans are now complete for the building of a new place of worship. The original chapel was built in the 1820s but in August 1941 a bomb dropped within a few feet of the west wall, removing the greater part of the roof slating, opening a large hole in the external vaulting and causing severe damage to the fabric. The whole of the roof lifted and many of the roof timbers were fractured. The building was of no use for public worship which had to take place in the Assembly Hall. c53 11 18

1954 Billy Graham visits Cambridge [4.17]

1954 Catholic Apostolic Church, Pound Hill ceased [2.27]

1954 The new Methodist church in Sturton Street, Cambridge was opened and dedicated at a largely-attended ceremony. It is of pleasing, simple design and replaces the building damaged by bombs in 1940. The Mayor, Coun Hallett, said it was the only here to have been completely bombed and it was encouraging to know that the congregation had come to the rescue and rebuilt it in a most impressive style. The architect, D.C. Denton-Smith acknowledged the work of the builders, Eric Kidman, Mr Linsey foreman; Messrs Cooks plasterers; Messrs Pratt builders' merchants; Messrs Scotts electricians & other associated with the re-building. CDN 24.9.1954 [13.11]

1955 St James temporary building dedicated [1.24]

1955 Catholic Apostolic Church, Pound Hill ceased [2.27]

1955 Bishop of Ely announced 5 new churches that must be built to serve people living in new housing areas : St Stephens (services in Church Hall since 1937; St James first part new building dedicated 1955, Arbury Rd near East Barnwell community centre & St Martins where dual purpose building serves as church & hall in Suez Rd

1955 The Bishop of Ely dedicated the building which is to be known as St James' Church in Wulfstan Way. He said that later they would need a new church and the present building would become the church hall. It was part of the challenge of new housing estates; in St Paul's parish they were trying to build another church and there was magnificent evangelistic work in the Coldham's Lane area which rendered another one necessary. 55 06 20 & 20a

1955 Dr Billy Graham said his Cambridge mission had been one of the most rewarding of his life. It had won people to Christ, got the University talking about religion and started a revival among Christians. Every available inch of space in Gt St Mary's was filled and many had to be re-directed to Holy Trinity where the service was being relayed. It also went to the universities of Aberdeen, Durham, Manchester and four others. Now he has started his journey back to America
55 11 14

1956 St Stephens Church District dissolved (had been intended as an independent Parish but the abandonment of the by-pass scheme meant that its area was split by Coldham's Common & there was little traffic between the two halves. Areas revert to original Parishes) [1.29]

1956 Sturton street Methodist chapel opened, replaces chapel bombed in 1941 [13.11]

1956 Queen Edith Hall - Christian Brethren opened, previous Sunday school 1953 & evening service since 1954 in primary school [4.21,12.7]

1956 The new choir vestry of Holy Trinity Church, Cambridge, was dedicated. Using materials of old Cambridge brick and stone it fits well with the existing buildings. It has folding doors leading into the older vestry, making a useful room for meetings. Now urgent repairs to the organ can be undertaken. 56 01 19b

1956 The Sisters of Saint Margaret, East Grinstead, an Anglican community founded a century ago by Dr John Mason Neale of Trinity College, have opened a centre in Huntingdon Road, Cambridge. The small number of Sisters in residence must endeavour to make their house self-supporting, in accordance with their Community's rules, and plan 'open teas' on Sunday afternoons. 56 01 31b

1956 The Christian Brethren opened their new Queen Edith Hall in Wulfstan Way. It is an undertaking of faith and cost a great deal of money but now they have a splendid position in the centre of what would be the ultimate building estate. 56 05 01

1956 The bells of St Andrew the Great, Cambridge, were there long before the present church but are in poor condition. They are individually tuneless and badly blended together. Many are 'odd-struck' with the clapper not placed centrally inside the bell making ringing difficult. The bears are worn and rough and the frame in which they are hung was roughly constructed and moves when ringing is in progress. Now they have been taken down to be recast and rehung and are lying in the churchyard. 56 08 02

1956 St James church extension dedicated. 56 07 26b [2.7]

1956 The new organ at Cambridge's Holy Trinity church will cost approximately £6,000 as compared with the £300 spent on the original organ built in the 1850's by Messrs Walker of Ruislip, who are carrying out the present installation. The original two-manual organ was rebuilt in 1904 by Messrs Bedwell of Cambridge who moved it from the north transept into the organ chamber. 56 09 29b

1956 A new library in memory of Herbert Martin Loewe, Honorary Fellow of Queens' College and a Reader in Rabbinics was opened in the Cambridge Synagogue, Thompson's Lane. He had worked hard for the many displaced refugees fleeing from Nazi armies and kept open house for students. The family had been honoured for their scholarship and respected for their public works and the library was a happy choice to commemorate his life. 56 10 22

1956 Great St Mary's church has been connected with the University since very early times and was used in the past not only for religious services but for academical proceedings. Under an agreement of 1843 the University and parish met the costs of repair and maintenance, but most of the terms are now out of date. Now they are being urged to meet the sole cost of maintaining the clock and the University organ at the west end, and sharing costs of insurance, heating, repair and cleaning. 56 11 01c

1956 After 25 years and nine previous meeting places, Cambridge Christian Spiritualist Church moved into their own permanent home. The former Crown and Harp public house, John Street, can hold 100 people. The church had its beginning in July 1931 and met at 11 Ram Yard which

was hit by a bomb and totally destroyed on 27th July 1942, a brass cross being the only thing saved. 56 12 04a

1957 Mormons start present Unitarian church [Mormon history]

1957 St Andrews St Baptist church Sunday School 150th anniv [12.15]

1957 Restoration of the Round Church began in 1951; the 'Round' and the interior has been done, now it is the turn of the three gabled roofs. A month ago the Vicar could see the sky through the tiles of the choir roof and the church through the medieval wooden ceiling. Now work is nearly finished. Only one piece of decayed woodwork was found and no ravages of the death-watch beetle 57 01 11

1957 The bells of St Andrew the Great returned to the church after being away for re-casting and re-tuning at Taylor's Foundry, Loughborough. The oldest was installed in 1660 when the new church was built. They are being re-hung and a full peal will be rung after they have been dedicated by the Bishop of Ely. 57 02 13a

1957 Two groups of Cambridge people, one small and ageing, the other large and young will always carry vivid and happy memories of Princess Margaret's visit. One are the happy band who are passing away their 'twilight years' in the comfort and beauty of Langdon House, which she officially opened. The other are the young families who live on the new housing estate at Arbury Road where the foundation stone of a new church was laid. The Princess came into their midst, laughing, joking and chatting with them, radiating her charm and personality wherever she went. 57 08 01c & d & e & f (Lady chapel dedicated 1958) [8.9.2.7]

1957 The Cambridge Christian Spiritualist Church held a service of spiritual healing at the Guildhall to commemorate their 25th jubilee. Mr Gordon Taylor lead the demonstration, treating a man with rheumatoid arthritis: when he walked onto the stage he was unable to comb his own hair, after Mr Taylor had manipulated his joints he could. He also improved hearing and restored sight. 57 09 20 & a

1957 Emmanuel Congregational church hall dedicated – 57 12 02b

1958 Six Cambridge churches are redundant, according to a committee appointed by the Bishop of Ely. St Peter's presents no pressing problem, St Michael's has for long been an embarrassment and should be converted into a parish hall, St Clement's is clearly redundant with few worshippers. With active evangelisation All Saints could justify its purpose as a parish church but St Botolph's would probably be taken over by Corpus Christi as a library and Great St Andrew's might be bought by the City to develop, they speculate. 58 01 28 [7.3]

1958 The foundation stone was laid of the new Roman Catholic Church of St Laurence the Martyr in Milton Road, Cambridge. Since the Rev Father P. Oates was appointed in 1951 he has worked hard to make the building possible. Already £4,000 has been raised, but there is still a long way to go. 58 03 13 (parish began 1947 as daughter of Our Lady) [3.1,14.2] St Laurence's church replaced little church in Chesterton High St which now moved to Ditton Lane [446.15.1]

1958 Neale House, the Cambridge base of the Society of St Margaret, was opened in December 1955. It is a small hostel for young professional or University women of any denomination and the chapel is open all day for private prayer. The Anglican sisterhood was founded by John Mason Neale of Trinity College, widely known for his English versions of Greek and Latin hymns. 58 03 21

1958 St Andrew the Great was rededicated by the Bishop of Ely after a restoration costing thousands of pounds. The church has undergone a complete transformation: the bells have been recast and rehung, the pulpit moved, the East End renovated and a new altar built. The lighting has also been modernised. 58 04 29

1958 Restoration work has been undertaken at Little St Mary's church. The interior had to be re-plastered, rainwater was seeping into the walls and new gutters needed. The roof timbers were

suffering from the ravages of death watch beetles. These have all now been completed. But the crypt is in need of restoration too. 58 05 14b

1958 Six members of the Order of the Irish Christian Brothers lived together in a Victorian house in Hills Road. There was a retired teacher in charge, a practically bed-ridden man, one who acted as a general factotum, one who did the cooking and two members they were sending to the Technical School and University. The house closed in the vacation. The Valuation Panel decided it was not a hostel but a private house, which reduced their rating assessment. 58 06 06

1958 The four bells of St Michael's church, Cambridge, which have not been rung for many years, are going as a gift to the church of St Augustine, Cashmere Hills near Christchurch, New Zealand where they will be in regular use. They date from the seventeenth-century prompting great excitement that bells of such antiquity should be going out there. Financial responsibility for the removal and shipping has been assumed by New Zealanders. The project was initiated by Michael Stewart-Smith of Fitzwilliam House which used St Michael's as its chapel. 58 07 12 [2.6]

1958 The new Roman Catholic Church of St Laurence at Milton Road is one of the most modern Catholic buildings in the diocese and replaces the existing church in Chesterton High Street. Heating is of the 'underfloor' electrical type and the lighting is also by electricity. The pews are of polished mahogany and the altar is made of stone. Much of the money has still to be raised and a local football pool is being run between the parishioners. 58 08 22a 58 08 25b

1958 Edith Morrison, vergeress, St Botolph's church – 58 08 27 & a

1958 A 70 year-old Cambridge grandmother was the oldest of 18 Jehovah's Witnesses who received baptism by total immersion at the City Football Ground, Milton Road. They radiated confidence and seemed in very high spirits as, wearing bathing costumes, they stepped into a bath which contained two feet of luke-warm water and were immersed one at a time. It was part of a three-day Assembly attended by over 700 58 09 01b

1958 Mervyn Stockwood, Gt St Mary's, appointed Bishop of Southwark – 58 11 27

1959 Roseford Hall, on the new Arbury Estate, is an extension of the activities of the Christian Brethren of Panton Hall. It has well equipped classrooms, all of which will be needed, for already over 200 children are enrolled for the Sunday School. An invitation to local residents to inspect the new building was met by such a large response that there was 'standing room only' 59 06 15 [12.5]

1959 Meadowlands Methodist church hall stone laying – 59 06 01b [13.12]

1959 St Peter's church, Castle Hill, which was founded in 1087 and has been in almost continuous use, is once again open after its recent restoration. It has been given a new stone floor, a modern simply designed altar and a clean white limewash coat to its walls. In addition the unique Norman font, bearing a merman holding his twin tails at each angle, has been moved to a more prominent position. Now they are looking for a few pews which will retain the spacious atmosphere of the very small church 59 07 25

1959 Knowledge of the Baha'i World Faith reached Cambridge in the 1800s through Professor Edward Browne, the well-known Orientalist and the only European to mean Baha'u'llah, the prophet-founder of the faith. Five years ago the first Baha'i came to Cambridge and in 1958 the community elected their first spiritual assembly. Now they have dedicated their first Centre in Gonville Place. 59 11 18a

1960 A Cambridge church in the course of erection, at present serving families whose membership extends from babies in arms to septuagenarians, once again could not cope with the size of its congregation at Easter. It is the Church of St Nicholas Ferrar on the Arbury Road Estate. The foundation stone was laid in July 1957 by Princess Margaret and part of the building was dedicated in December of the following year. But the congregation has grown too large and

at Easter the parish communion had to be divided into two to accommodate the 80 families who meet there on Sundays 60 04 29b

1960 Work has begun on the new church of St Martin, Suez Road, in the heart of the housing estates it is intended to serve. The present building, used both as a hall and church, was built over 25 years ago and it is time some more permanent place of worship was available for the 5,500 parishioners. The architects have made minimum maintenance costs an important feature: by using cedar window frames and alloy drainpipes, practically all outside paintwork is eliminated. 60 06 09

1960 Cambridge ranks with the cathedral cities as being one of the most pro-clerical towns in the country. It has been called a very spiritual place. Several clergymen speak of a continued increase in congregations with an ever-growing proportion of young people and of young parents now in the first 10 years of their married lives. A number come to church as families, the father and mother in their 30's with their children. But Nonconformist numbers are not rising with a normal congregation of 200 at Zion Church. 60 10 07

1960 The first stage of the restoration work on Christ Church, Cambridge, has now been completed. The battlemented parapets have been taken down and replaced by unbroken ones. Whilst this work was being done it was found that the main roof had to be repaired and it was decided to reslate it completely. So far £3,750 has been spent and it is estimated a further £8,000 will be required for the remaining work. So far only £1,000 had been received from appeals. 60 11 18

1961 A new vestry block, a garden of rest, memorial tablet and some new windows were dedicated at Great St Mary's Church. 61 12 18 [10.3]

1961 The striking roof of St Martin's Church in Suez Road is now in course of erection. At a 70 degree angle of slope it must seem nearly vertical to the men working on the job. Such a steep roof is intended to obtain the impression of height and at the same time keep the amount of air to be heated to a minimum. Cost is also kept down because the roof rests directly on the ground. When completed at the end of April it will be a big change from the flat-roofed Church-cum-Hall which has served the congregation for 30 years 61 02 04b

1961 The Rev Peter Barratt is helping to move some of the oak pews into his new church – St Martin's in Suez Road. The church, which will be consecrated on Saturday, has a seating capacity of 400, 280 of which will be provided by the pews. Most of these, together with other chairs, come from a Liverpool firm and were brought to Cambridge by road. 61 10 05b

1961 Hundreds of parishioners and clergy were present at the consecration of the new church of St Martin's in Suez Road, Cambridge. In accordance with tradition the Bishop of Ely, Rt Rev Noel Hudson, knocked on the door three times with his pastoral staff before taking the service. It is the first church to be consecrated in the Diocese for many, many years and will help meet the large overspill from Peterborough and other neighbouring towns which at the moment is very great indeed. 61 10 09

1962 St Stephens Church dedicated : 1937 hall built for Sunday School called St Radegund's, 1947 changed name to St Stephens; apart from 5 years in 1950s when became conventional district half-way to independent parish has been under Christ Church [2.10,7.4]

1962 Holy Cross Church Hall dedicated, first stage development of new parish which grown from 700 in 1921 to 8,000, church to be built 4-5 years [8.2, 446.15.3]

1962 St Martins constituted independent parish [10.2]

1962 The newly-formed Cambridge branch of the Gideons International held its first public meeting. Almost all the local hotels have received Bibles, as have nearly 300 school-leavers and it is hoped to cover all such youngsters each year. Young folk from Queen Edith's Chapel have volunteered to read aloud Bibles given to the Blind Homes in Glisson Road. Twenty Bibles have

been given to the Rehabilitation Centre in Brooklands Avenue. The replacement Addenbrooke's Hospital will be a major challenge in the near future 62 04 06b [12.4]

1962 Westfield House has been formally opened as a Lutheran House of Studies with an inaugural lecture by the Bishop of Gothenburg in the presence of an invited audience of senior members of the University. The spacious building on Huntingdon Road will take students from home and abroad who are preparing for the Lutheran ministry and will have a library specialising in Reformation studies. 62 02 23

1962 A chapel for the deaf and dumb in Romsey Terrace was packed with people for its ordination. The service was taken and translated into deaf and dumb language by Mr E.G. Gollup, the Missioner. More than £900 is still needed to finish paying for the timber-built chapel which seats about 60 and has an expected life of 30 years. The Ely Diocesan Deaf and Dumb Association's work began a great many years ago and a hall – close to the chapel – had been used as a meeting place. But people found it easier to pray in a church or chapel and needed a space apart where they could worship. 62 03 19

1962 The parish of St George, Chesterton, has practically doubled in the past five years. Twenty four members of the congregation were engaged in welcoming new families on the new King's Hedges Estate. But the need for the appointment of a curate to assist the Vicar, the Rev J. Degwel Thomas, was urgent. Amongst those elected to the Parochial Church Council were Donald & Derrick Flory. 62 04 16a

1962 St Michael's Church in Trinity Street is "an intolerable disgrace", says the Vicar of St Mary the Great, its sister church. Now there are plans to turn it into a modern parish hall with kitchen for meetings while the east end will become a small chapel for prayer. The massive restoration scheme will cost £10,000 and to promote it the church will be flood-lit. The youth club will give a show on the lines of a 'Review' and operate a 'talent scheme' where young people will be given money to be taken away and multiplied. 62 09 27

1962 Police closed Little St Mary's Lane after they were told that a church spire was in danger of collapsing and crashing down into the road. Workmen carrying out an examination of Emmanuel Congregational Church found the sandstone spire was badly cracked and the weight was pushing the wall out. They are now removing it brick by brick using supports to stop it from falling down on them. The road will be closed for two weeks 62 10 15

1962 The population of Fen Ditton has soared in the last 50 years. In 1952 its boundaries were extended to include the Whitehill and Peverell estates and took in the Leper Chapel. Students from Westcott House had taken services there since 1922 but it could not seat more than 50. So the Priory School was used for Family Eucharist. Now a hall which will become part the new Church of the Holy Cross has opened and the Leper Chapel will be only used for monthly celebrations of the Holy Communion. Many will be saddened by the move away from the unique Normal chapel which they have come to love 62 11 16c

1962 St Stephen's is not very important as Cambridge churches go. It does not feature in guide books, visitors do not flock there and some parishioners have never seen it. 25 years ago a hall was built to house a Sunday School for the children of what was then an expanding part of Cambridge. Now a fine new building has been dedicated alongside it. But the task is not finished. One day the asbestos end will be knocked away and a proper chancel added with a vestry for the minister. Until then it is business as usual. No gimmicks, no elaborate ritual, just regular offering of worship in the simple time-honoured way 62 11 24 dedication – 62 11 26

1962 Emmanuel Congregational Church turret tower cone, which is in danger of collapse, has been removed and walls are being rebuilt. 62 12 08

1963 Gt St Mary's holds beat service to attract young [10.3]

1963 The new Seventh Day Adventist Church in Hobart Road was dedicated at special services held to mark its opening. Mr Roger Scott, the architect, was congratulated on designing such a 'clean, bright building full of light, commodious and comfortable' by Pastor J.A. McMillan,

president of the Seventh Day Church in England. Builders, Robinson & Gimbert had ensured that the construction went smoothly and without fault. 63 01 07 (had met in Cambridge for 45 years) [11.5]

1963 German Lutheran Church inaugurated, Shaftesbury Ave (previously met in other churches) [11.8]

1963 St Peter's church spire to be restored – 63 06 10

1963 Canon Hugh Montefiore has been inducted as Vicar of Great St Mary's church. – 63 09 26

1963 St Luke's church installs first centrally-positioned altar in Cambridge. 63 12 30

1964 St Matthews church celebrates centenary of foundation stone [7.7]

1964 All Saints church centenary [8.4]

1964 Good Shepherd church consecrated : Church of Nicholas Ferrar; area 10,000 people; 10 years ago estate announced, decided build church; land acquired 1955 for temporary church but permanent building planned; foundation stone 1957, dedicated 58 & regular use but number of worshippers too large, [8.9] Good Shepherd church consecrated – 64 10 26a

1964 St Michael's church is a very important prototype of college chapels with much 14th-century building. The architectural interior would be improved by proposals to convert it to other uses. Some services would continue to be held. Ald Warren said he supported a grant if it was to be an ecclesiastical museum but not if it was to become a meeting room or youth centre. The committee decided a grant would not be justified. 64 07 10a

1964 The Community of St John the Baptist of Neale House, Huntingdon Road, Cambridge have been told that their temporary chapel has been granted planning permission until September 1967. It was built in 1959 by the former occupants of the house, the religious order of the Sisters of St Margaret, from East Grinstead. 64 10 07

1964 All Saints church centenary – feature – 64 11 27d, e

1965 The new Mormon Church in Queen Edith's Way – the Church of Jesus Christ of Latter Day Saints – is an imposing structure with a simple interior. The neat and modern design incorporates a sports room marked out with a basketball court. It was constructed using many hours of voluntary labour, many not members of that faith, and will be open to all. 65 01 25a (dedicated in 1967 when completely paid for) [11.8]

1965 Green End Road Methodist chapel opened [13.14]

1965 St Luke's church starts co-operation Congregational Church [10.1]

1965 St Edward's : first stage restoration - rededication chapel Trinity Hall [9.12]

1965 Fisher House not to be demolished as part of Lion Yard redevelopment – 65 04 01 # c.83

1966 St Michaels church hall opened following reconstruction of church [7.6]

1966 Gt St Mary's holds first ecumenical service of Holy Communion [10.3]

1966 Hills Road Methodist chapel celebrates centenary [13.15]

1966 Franciscan order to leave Cambridge after 27 years [14.1]???

1966 St Barnabas church arson – bibles and hymn books set alight – 66 08 30, 30a

1966 Arbury Road Baptist church opened; small chapel built on site 125 years ago – 66 01 27

1967 Gt St Mary's multi-faith service picketed [10.3]

1967 Billy Graham visits [14.10]

1967 Quaker Meeting House, Jesus Lane to be replaced; dates from 1894 – 67 04 11

1967 St James' church, Wulfstan Way expansion programme needed; first phase will be sanctuary nave and extra rooms – 67 07 05b

1967 Trumpington church Black Magic celebration & desecration – 67 08 31 & a

- 1969 Society of Friends new meeting house opened [11.4]
1969 Jehovah's Witnesses start to build new Kingdom Hall in Stanley Road using volunteers; 10 years ago were 40 Ministers of Jehovah in Cambridge, now are 140; lists rooms used since 1933 – 69 02 03
1969 St James : extensions dedicated, doubles size [9.16]
- 1970 Ely Diocesan report says four churches may close – St Andrew the Great, All Saints, St Giles and St Peter- 70 07 29, a,b
- 1971 St Peter's declared redundant (taken over by Redundant churches fund 1973) [10.5]
1971 Jehovah's Witness' new Kingdom Hall in Stanley Road nearly ready – feature – 71 03 25 dedicated – 71 05 25
1971 Jehovah's Witnesses dedicate Kingdom Hall, Stanley Rd [12.3]
1971 Roman Catholic mass and confirmation service held to be held in St Edward's church for first time since Reformation – 71 04 24a
1971 Pentecostal church opens Tenison Rd (old chapel near Gas Works pulled down 1970) [11.6]
1971 St Andrews St Baptist church 250 anniv [13.3]
1971 Tracy Hall Cockburn St sold [7.5]
- 1972 It's whatever turns you on, man, and for 3,000 people who gathered at Parkers Piece last night the message was : "If you're gonna turn on, turn on to Jesus". The "drop your dope" call came from 31-year-old Arthur Blessitt, the self-styled leader of the Jesus People movement in America. His message was simple: "Go,Go,Go with Jesus" -and his technique was the fast-talking hard sell of detergent commercials. Mr Blessitt became known in Britain after a mammoth nation-wide walk and his followers grew from a handful to many thousands c72 05 13 [7.1]
1972 Moslems start to meet at 175 Chesterton Road [11.7]
1972 St Andrew the Great proposal to be closed & sold [9.2]
1972 St James : designated parish centre of worship [9.16]
1972 Cambridge folk have become accustomed to large scale demolition in various parts of the city, and soon yet another prominent building will disappear when the premises of the Hills Road Methodist Church are sold and taken down for development. The building is much too large; its seating capacity is 750 and the present membership is less than 200. Secondly the premises are over 100 years old, and while the sanctuary is in good condition, the premises downstairs are in a poor state and hopelessly out of date. As the adjoining premises were being developed it seemed a suitable time to sell c72 09 01 (demolished 1973) [13.16]
- 1973 All Saints parish amalgamated Holy Sepulchre [8.6]
1973 Christian Spiritualist church 'Myers Hall' dedicated [11.3]
1973 St James : now full parish due growth area, 6,500 people [9.16]
1973 Cambridge Moslems will soon have their own mosque if a scheme to convert a property goes through. The City's Moslem Association have bought 175 Chesterton Road and hope to use it for their Friday prayer meetings as well as religious festivals and other meetings. A Trustee of the foundation said "We have about 70 members and we hope that it will be a meeting place for all Moslems who are living or staying in Cambridge. If we get permission for it we shall be sending back to our home countries for donations and help from there c73 01 27
1973 Latest casualty in the Hills Road office redevelopment programme is the 100-year-old Methodist Church. Demolition work started yesterday. In autumn last year many people were surprised to learn that an active church in so sound a financial position and such good repair should close its doors. But the trustees had been aware for some time that the building was just

too large; it has a seating capacity for 750 and a congregation of less than 200. The congregation transferred to the Wesley Church, Christ's Pieces, or to other Methodist churches closer to their homes. The property went on the market in November 1972 c73 06 29

1973 The Dalai Lama held the attention of a 1,000-strong Cambridge audience last night while he talked for almost an hour on Buddhist doctrine - mostly in Tibetan. Hundreds of people queued for nearly an hour outside the Senate House. They filled every seat, crowded four-deep in the side galleries and were left clinging to the outside window sills to get a view of "Kundun" - The Presence. In his crimson and saffron robes His Holiness delivered his address in a casual, conversational style, occasionally breaking into English to drive home a point. After his address he walked through the Cambridge traffic to Trinity college where he was due to attend a buffet supper c73 10 28

1974 St Luke's celebrates centenary [10.1]

1974 Emmanuel United Reformed Church celebrates centenary [14.6]

1974 When Christ church, in the parish of St Andrew the Less, Cambridge, was built in 1839 the cost was £3,800. On Saturday a new church- installed at gallery level in the original building at a cost of £40,000 - was dedicated. Rebuilding began nine months ago, following the sale of Abbey church hall and Christ church institute to Cambridge city council as part of the planned redevelopment of the Burleigh street area. Now the building provides a new church with seating for 465 and at ground level a hall with seating for 200 c74 02 02 [8.3]

1975 Wesley Centre modernised school building, Wesley church, opens [13.17]

1976 Good Shepherd : Princess Margaret attends service to celebrate completion of church for which she laid foundation stone 1957 [8.9]

1976 It is 19 years since Princess Margaret laid the foundation stone of the Church of the Good Shepherd in Arbury Road, Cambridge. At the time the first houses on the Arbury estate had been occupied for nearly four years and acres of land still remained to be built on. Today as she sees the church finally completed the changes in the area are striking. The population of the parish is now about 17,000. When the rest of the Kings Hedges estate is finished in a few years it will be nearer 20,000 – a fifth of the people in Cambridge. Houses stretch in every direction. Arbury now forms, in effect, a small town on the edge of Cambridge c76 10 29

1976 rebuilt Fisher House opened [14.3]

1977 German Lutheran Church opened Westfield Lane [11.9]

1977 Victoria Road United Reformed Church centenary of first meeting (building started 1884) [14.7]

1978 A leading churchman gave warning on the aims of the Moonies sect, which have been operating from a terraced house in Norwich Street in Cambridge for the past six or seven years. The Regius Professor of Divinity said the movement demanded total commitment and obedience from the young people who joined & was not a Christian organisation as it claimed to be. A Unification Church spokesman said the church was far more representative of the living Christianity than many of the more traditional denominations c78 08 11 [11.2]

1979 Gt St Mary's 5th centenary appeal launched [10.3]

1979 Castle End Mission celebrate centenary [12.8]

1979 Romsey Methodist chapel closed, congregation continues at Diocesan chapel, Romsey Terrace, will reopen as Youth & community centre [13.18]

1979 St James : dedication extension, now over 200 congregation [9.16]

1979 Romsey Methodist Church in Mill Road, Cambridge will have its final service before closing down. The congregation will continue to worship in the nearby Diocesan Chapel in Romsey Terrace. After alterations it will reopen as a youth and community centre. The church buildings will become a gymnasium, the hall will remain a youth club and a coffee bar and social centre will be built onto the car park. It is also hoped to include a quiet room and tv den. The main users will be a playgroup, over-60s and youngsters. The scheme is being organised by five Cambridge churches. CEN c. 8.1.1979

1979 Two hundred Iranian students made Cambridge demonstration history when they knelt on Parker's Piece, prayed and recited from the Koran. In what is thought to be the first political demonstration starting with a mass prayer ritual on improvised prayer mats covering the wet turf, the Muslims called upon Allah to bless the efforts of the Ayatollah Khomeini to establish a republic in Iraq based on Koranic law. They then marched to the Market Square. No incidents were reported though some confusion existed among Saturday shoppers, knowing it was the first day of Rag Week. But the slogans ' "Death to the Shah" and "Long live Khomeini" soon dispelled their doubts. CEN c 13.2.1979

1980 Sinclair Research, the company founded by Mr Clive Sinclair who pioneered the world's first pocket calculators and micro-televisions wants to buy the church of St Andrew the Great and turn it into a laboratory. They are currently researching computers and electrically-powered vehicles and are looking for premises in central Cambridge. But the church say he is unlikely to get permission because schemes for offices, shops, a language school and a mosque had already been rejected. 80 07 08g

1981 Kings Hedges Ecumenical Centre dedicated [8.1]

1981 All Saints Church in Jesus Lane, Cambridge, is to be preserved and taken over by the Redundant Churches Fund. A masterpiece of Victorian architecture, it was designed by George Bodley in the Gothic style and contains windows and wall stencils designed by William Morris. Now £100,000 will be spent on urgent repairs to the roof 81 12 07

1982 All Saints church taken over by Redundant Churches Fund [8.8]

1982 Eden Baptist church new building opened (old which opened 1874 incorporated into Grafton centre) [13.5]

1982 Christian Brethren open North Arbury Chapel (temporary building had opened 1973) [12.6]

1982 Moslems permanent mosque opened, Mawson Hall [11.7]

1982 St Andrew the Great : Robinson charitable trust offer £500,000 turn into day centre old people; cash withdrawn after adverse article about speed with which decision needs to be taken [9.7]

1982 The Bishop of Huntingdon, the Rt Rev Gordon Roe conducted the opening service at the new community centre at St Andrew's Church. Cherry Hinton. Much of the money has been raised by the Vicar, Rev Chris Barber, his son John and parishioners including 30-hour sponsored croquet marathon by the church youth club 82 02 08

1982 The North Arbury Chapel in Cameron Road started in 1971 with weekly children's services in a building contractor's site hut. The numbers soon grew to 100 and they moved to the Grove Primary School, then swelled to 200 so they used a mobile prefabricated building. Now the first permanent building will be opened by Sir Fred Catherwood. 82 05 20

1983 All Saints church in Jesus Lane, which was threatened with demolition despite being described as one of the finest examples of Victorian architecture, will open to the public for the first time in ten years. About £40,000 has been spent by the Redundant Churches Fund to make it

watertight after years of rain leaking through the roof. The next project will be to clean up the interior and in particular the wall paintings 83 06 14 p10

1983 The Carioca Club in Newmarket Road is today a burnt-out shell after fire was started in three different parts of the building. The entire contents were destroyed and walls and floors wrecked. Police say an 'inflammable liquid' was poured over materials in the building to start the blaze. 'Racks' night club which has 450 members is now looking for a temporary venue. The Carioca was originally a chapel and was used as a furniture depot before it became a night-club in 1978 83 09 26 p1

1984 Society of Friends opening additional meeting house due to increased attendance's [11.4]

1984 St Mary the Less : Princess Margaret visits mark 700 anniversary association Peterhouse [10.5]

1984 The church of St Andrew the Great officially became redundant on St Andrew's Day. Sunday services would have ceased immediately but the Greek Orthodox congregation, who use the church, protested that they couldn't find anywhere else at such short notice. Now diocesan authorities will allow both Greek and Anglican services to continue until January. Under the terms of the closure the parish will merge with neighbouring Holy Trinity 84 12 03

1984 St Andrew the Great : officially redundant St Andrews Day but Greek Orthodox church use church & protest; Privy council dismiss appeal, closed from beginning Dec 84; Greeks are Parish of St Athanasius & have used church since 1968 [9.7-11]

1984 A Cambridge designer will be the first bride ever to marry in the 800-year-old Leper Chapel at Barnwell Bridge. Sarah Thornhill has always set her heart on marrying at the church next to her family home and applied for a special licence from the Archbishop of Canterbury. Now she is busy cleaning the floor, laying a red carpet and moving the altar back to make more room for the congregation 84 08 07

1985 Greek worshippers share St Clements church who fighting redundancy [7.10,12.4]

1985 Wesley chapel : plans for demolition announced [13.19]

1985 The Salvation Army celebrates its centenary in Cambridge with a programme of events at their Tenison Road citadel. The Norwich Citadel Band was pelted with mud and many of them knocked over as they heralded the arrival of the corps in 1885. In Burleigh Street a crowd knocked their hats off and smashed both ends of the drum. Police had to use hosepipes to clear the protestors. Businessmen involved with the drinks trader and drinkers both violently objected to the Army's tee-total ideas. Churches objected to the brass bands crusading tactics which they thought lowered the tenor of Christianity. 85 03 22a [14.4]

1985 The Carioca Club on Newmarket Road is finally being demolished after years of doubt about its future. It was built in the 1870s as a Methodist Chapel but with falling attendances it was a financial embarrassment and as early as 1909 there was talk of selling it. In 1941 it became a furniture storage depot and was turned into a nightclub and disco in 1976 with a take-away kebab shop. But it was gutted by fire in 1983 and never reopened. 85 11 22

1985 Hundreds of Muslims in Cambridge regularly make their way to the mosque, tucked discreetly away near bustling Mill Road. Leading the gathering was the Imam, an Egyptian PhD student in chemistry at Cambridge University. He spoke in Arabic and English, stressing the importance of unity among Muslims. Many of the congregation were of Middle-Eastern origin but there were also several Orientals and English people. They were predominately in the 25 to 40 age range and listened intently. Upstairs a woman followed the service alone, out of sight. After 40 minutes the meeting ended, as it had begun, with a reading from the Koran. 85 11 29b

1985 After more than a century of almost unremitting dreariness the Methodist Tabernacle in Newmarket Road is being pulled down. The hideous old bulk of a chapel wore sunlight like a shroud. The foundation stone was laid in 1876 but within 14 years the congregation shrank and in

1909 there was talk of selling it. It struggled on and in 1941 was given over to the storage of furniture. Later it became the Carioca nightclub and its face daubed with appalling blue and orange paint. Worse was to come: the lower part was turned into a take-away kebab joint. Fire gutted the old pile in 1983 and its doors finally closed for ever 85 12 02b

1986 St Augustine's designated a parish centre of worship for Parish of the Ascension [7.12]

1986 Victoria Road United Reformed Church combines with St Luke's [14.8]

1986 Major structural faults have been discovered in St George's Church, Chesterton – less than 40 years after it was built. The front wall is leaning away from the roof and cracks have been found on the arches inside the building. An architect's inspection has advised that the problem areas are roped off, but services are still continuing as normal. Built in 1938, St George's was the last Cambridge church to go up before the war. It was designed by Henry Lyon, the man responsible for the chapel at Sidney Sussex College. 86 01 23 may need demolition [9.15]

1986 St George's Church, Chesterton is crumbling so badly that it may have to be pulled down – even though it is only 48 years old. Already the front door has been closed because the gable ends are being pushed outwards, tiles need replacing and two flat roofs need resurfacing. Arches inside are cracked and the brickwork needs re-pointing. Rev Peter Tamplin says the congregation would have to raise the money for rebuilding and residents are being asked what they would like to see in a new church 86 07 28

1987 Peoples Mission last service Abbey Walk after 55 years, started 1922 as breakaway Salvation Army, building passed to Church of Christ [NS3.14]

1988 Wesley church closes for rebuilding çCEN 25.5.88

1988 priest celebrates Latin mass at Mill Rd home çCEN 27.6.88

1988 Controversial plans to turn the redundant St Andrew the Great Church into a shopping centre have been rejected. The Environment Secretary says the new centre would be an unsuitable place to house the memorial to Captain Cook, the explorer, whose wife and two sons are buried in the church grounds. The expanse of glazed area coupled with the commercial appearance of what would be behind would cause conflict to the character and setting of the building. 88 12 15

1988 St Luke's, one of Cambridge's most prominent Victorian churches in Victoria Road, is to be converted into a community centre for the whole of the parish of the Ascension,, formed in 1982 by the union with St Giles and St Peter. The adjacent United Reformed Church will be demolished and the land sold for housing. There are no plans to amalgamate the two congregations who will share the new-look church. 88 07 12a

1988 Religious faith is showing signs of growth in Cambridge. The Eden Baptist Church has doubled its congregation to 600 over 10 years which now will be split into three, meeting in different parts of the city. The Roman Catholics also report steady growth with 2,000 at mass on one Sunday. Methodist churches in Cottenham and Histon see 100 attend services on Sunday mornings and the Cambridge Christian Fellowship report numbers increasing from 20 four years ago to 300. Islam too has been making advances in Cambridge – 150 attend Friday prayers at the Mosque in Mawson Road with 700 at the Eide Prayers 88 07 13

1988 'Honest' Paul Tippet was one of the first traders to set up shop at Addenbrooke's Hospital 15 years ago. Now he has taken over a new purpose-built supermarket on the main concourse. The shop has been designed to accommodate wheelchairs or patients coming in with their drip stands. It does them good to get out of the wards and back into the real world for a little while. Although Concourse Mini Market sells alcohol and medicines staff check with the patient's ward sister before supplying them. 88 12 21b & c

1989 St Andrews St Baptist church open new meeting area çCEN 28.12.88

1989 The leader of the Greek Orthodox Church in Britain celebrated the feast of St Athanasios at the Cambridge parish he founded in 1968 when he was studying in Cambridge. The congregation now regularly numbers about 40. Otherwise known as St Clement's, the church is shared with the Anglican community – 89 01 20

1989 The Union Society debating chamber may start being used as a church on Sundays since services at the 300-seat Round Church next door have become so crowded. Some worshippers have to sit on the floor and many who cannot see round the Norman pillars have to follow the service on television. Under the plan services would be held in the chamber and relayed by TV back to the church. It would be the first time the 130-year-old Union building would be used as a church on a regular basis. 89 05 12

1890 Church of Our Lady & the English Martyrs consecrated [4.9]

1892 Catholic Apostolic Church, Pound Hill ceased [2.27]

1898 St Edmunds House founded as hostel for future priests attending the University [5.5]

1902 It is not a common feat to take down stone by stone, transport for fourteen miles and re-erect, practically without alteration, a solidly-built church capable of accommodating some 250 worshippers. That is what has been done with regard to the old Roman Catholic Church of St Andrew at Cambridge which has been removed to St Ives. The church is one of Pugin's earlier masterpieces and for 59 years it was in use in Cambridge. Then it was superseded by the magnificent new church of Our Lady and the English Martyrs. It was in danger of falling into a ruinous condition when the idea was conceived of transporting it to St Ives. c02 07 09

1906 A terrible calamity has overtaken the St Ives Catholic community, the interior of whose beautiful Mission Church of the Sacred Heart was wrecked in one of the most astonishing cases

of sacrilege ever recorded. A madman broke into the church by battering the door with a sledgehammer and then swept round the building like an avenging fury, raining blows on every object until there was nothing left to break. 06 12 03a & b [2.13]

1907 A movement is on foot amongst English Roman Catholics to establish a college for women, on the lines of Girton or Newnham, at the University. The leader is Miss Eleanor Warner who recently visited the Catholic Convent in Bateman Street. She is now in Rome for a meeting with the Pope. Opinion is strongly favourable and that Cambridge may soon see an addition to her institutions. 07 03 18a

1912 Monsignor Provost Scott anniversary ordination as priest 50 years ago – 12 04 26b

1919 Fisher House opening [NI.1.11]

1919 Cambridge University Catholic Oratory, Round Church Street opened [4.5]

1921 Catholic Bible Congress - practically all English Roman Catholic hierarchy present, July [4.7]

1925 chapel, Fisher House opened for use of University Catholics [4.10]

1933 The centenary of the Oxford Movement was celebrated at St Giles' church when the congregation was exceptionally large. Prof Wynne regretted the tendency of the Church to be manned with old men. It was the younger man who saw visions and who must carry on the work. These days a mass attack was being made upon Christianity, the world was growing increasingly evil. The English Church Union and the Anglo-Catholic Congress should work together. 33 07 15 p6

1939 new Roman Catholic Church, Chesterton inaugurated [3.1]

1954 Catholic Apostolic Church, Pound Hill ceased [2.27]

1955 Catholic Apostolic Church, Pound Hill ceased [2.27]

1958 The foundation stone was laid of the new Roman Catholic Church of St Laurence the Martyr in Milton Road, Cambridge. Since the Rev Father P. Oates was appointed in 1951 he has worked hard to make the building possible. Already £4,000 has been raised, but there is still a long way to go. 58 03 13 (parish began 1947 as daughter of Our Lady) [3.1,14.2] St Laurence's church replaced little church in Chesterton High St which now moved to Ditton Lane [446.15.1]

1958 Six members of the Order of the Irish Christian Brothers lived together in a Victorian house in Hills Road. There was a retired teacher in charge, a practically bed-ridden man, one who acted as a general factotum, one who did the cooking and two members they were sending to the Technical School and University. The house closed in the vacation. The Valuation Panel decided it was not a hostel but a private house, which reduced their rating assessment. 58 06 06

1958 The new Roman Catholic Church of St Laurence at Milton Road is one of the most modern Catholic buildings in the diocese and replaces the existing church in Chesterton High Street. Heating is of the 'underfloor' electrical type and the lighting is also by electricity. The pews are of polished mahogany and the altar is made of stone. Much of the money has still to be raised and a local football pool is being run between the parishioners. 58 08 22a 58 08 25b

c.83.05 : Baptist

1897 Tenison Road Baptist Chapel opened replacing Hope Chapel, Paradise Street [2.7,12.10]

1903 St Andrew's Street Baptist Chapel, Cambridge, is to be swept away and another more ornate is to be substituted. It has often excited the curiosity of strangers and not a little ridicule has been bestowed upon those who have worshipped in such a prison-like building. Even Charles Spurgeon described it as suitable for private executions. The new building will have both a tower and spire and be worthy of the prominent position it will occupy. c03 02 03 [2.9]

1903 The work of rebuilding St Andrew's Street Baptist Chapel, Cambridge, has reached an important stage with the ceremony of laying the foundation stone. The travelling crane upon the elevated railroad around the site was stationary, the workmen had turned their attention to the erection of a platform to accommodate the spectators. An important factor was the bottle placed under the stone which may in some remote age meet the gaze of an explorer yet unborn, the contents being a plan of the church, a programme of the day's ceremony and a copy of the CDN. c03 05 07

1904 The new St Andrew's Street Baptist chapel, Cambridge, was formally dedicated. The exterior of the building is captivating, the interior is beautiful and the structural arrangements for the comfort of the congregation well considered. Unfortunately the pastor who had so strenuously worked on the scheme was unable to attend due to illness but so that he should not be entirely deprived of participation in the events the deacons arranged to have the speeches delivered in the building transmitted to his home by means of electrophone CDN c 27.1.1904

1905 Old Baptist chapel, Old Chesterton new infant's classroom – 05 11 03a

1909 The Rev Charles Joseph, minister of St Andrew's Street Baptist Church, has had a varied career, having been a commercial traveller and journalist with a weekly column in the 'Baptist Times'. He came to Cambridge in 1898 and oversaw the erection of the new chapel in 1903. His forcible preaching is so much appreciated that he is in constant request as a special preacher and his engagement book is full many months ahead. 09 04 09

1910 Cambridge Baptist women's league founded [13.1]

1928 Cambridgeshire Baptist Association 50th anniversary meeting [2.3]

1930 There were remarkable scenes at the opening services of the Arbury Road Baptist Church Hall and School. When the doors were flung open the crowd was far too large for the building. Although many stood at the rear many more had to be content with standing outside and taking part in the proceedings through the open windows. It meets the religious needs of a large residential area of 4,000 people which has come into existence since the war and it is hoped to built a chapel within a few years 30 07 18 [2.14, 13.4]

1940 St Andrews Street Baptist Chapel Mission Hall, Cambridge Place sold [2.6]

1941 Mill Road Baptist Chapel school hall demolished by enemy action , (reopened 1949) [2.1,2.2]

1949 Mill Road Baptist hall reopened [2.2]

1953 The new branch church of St Andrew's Street Baptist Church built in Dudley Road, New Barnwell for the people living on the new housing estates was opened on Saturday. The church was filled to capacity. It took about a year to build & seats a congregation of 150 in the main hall; there is a junior room for Sunday School meetings large enough to accommodate 100 children, and a primary room for the under-eights. c53 05 13

1891 Methodist mission chapel Hemingford Rd [13.8]

1894 Hobson Street Methodist chapel rebuilt [13.6]

1897 Hills Road Methodist Chapel reopened [1.1]

1901 Two new classrooms at the primitive Methodist Chapel, Sturton Street, Cambridge, were formally opened. The space available at the chapel for teaching the scholars on Sundays has long proved inadequate and the extra accommodation will furnish room for at least fifty persons and may be expected to meet the requirements for some time to come. The opportunity was also taken of entirely renovating the interior of the chapel itself, which has been furnished with new seats, and the ceiling covered with match-boarding c01 03 19

1901 The new church of St Mark, Newnham, built to supersede the structure that had done duty for so many years was consecrated by the Bishop of Ely. The Master of Corpus said that in the new church they had visible proof of the continuity of the Church of God and that the gates of hell should not prevail against them; it was a visible link in a long chain of God's claim on the adoration and service of mankind c01 04 26

1904 The stone laying was held of a new Wesleyan chapel being built at Old Chesterton to supersede one which has been in use for 60 years and is dilapidated and unsightly. It was first intended to erect it on Chesterton Road facing De Freville Avenue but a site in Church Street was chosen and the builders, Messrs Kerridge and Shaw have commenced operations of a simple

structure capable of accommodating 150 persons together with 120 Sunday School scholars. The building was within sight of two other Christian churches but they came in the old Methodist spirit, as friends of all and the enemy of none and would not injuriously rival or detract from their work. CDN c 5.5.1904 [1.9, 13.10]

1904 The Wesleyans have added another to their places of worship by opening a new chapel in Church Street, Chesterton. It is the successor of a building in the High Street which during the latter period of its existence has been difficult to reconcile with conventional ideas of what a place of worship should be. Though doubtless hallowed in the memory of many its defects were numerous. Mr B.C. Jolley provided a piece of land upon which building operations began a few months ago. The architect adopted a Queen Anne style and the result is a pleasing-looking building with an appearance more domestic than ecclesiastical. CDN 13.10.1904

1906 Mill Rd Methodist church [13.8]

1906 When the Wesleyan chapel in Romsey Town was erected in Hemingford Road, space was left for a more commodious structure. The new chapel of which Mr W. Wren of Castle Street is the architect is designed in the Queen Anne style with utility, rather than elaborate decoration; nevertheless the building with its cathedral-like windows will be a considerable addition to the notable buildings of that end of Mill Road. 06 06 05 [1.11]

1906 The new Wesleyan Chapel in Romsey Town opened for public worship. It will accommodate over 400 people and is lighted by incandescent gas and heated by radiators. Though a plain building internally it is comfortable and has a pleasant appearance. The architect was W. Wren of Cambridge and the builders Coulson and Lofts.

1913 Wesley Chapel Christ's Pieces opened [1.10,6.22]

1914 Castle Street Methodist Chapel opened [1.3]

1921 Sturton Street Sunday school hall opened [1.19]

1923 Cambridge Methodist Sunday Schools Centenary [1.14]

1925 Wesley House, the new Wesleyan Methodist post-graduate theological college which has risen on a site in Jesus Lane, was formally opened. It was five years ago that the Wesleyan Methodist Conference decided to set up the college at Cambridge and a site was purchased from Jesus college. The architect, Sir Aston Webb, has carried out a pleasing design in red brick. The building comprises accommodation for 29 students. The work of the college has been carried on for the past four years in hired buildings c25 10 27

1927 The stone-laying ceremony in connection with the new hall at Hills Road Wesleyan Church, Cambridge took place. It will be a single-storey building but with a view to enlarging later, if necessary. Mr C. Kerridge and Mr W.A. Gray, members of the church, are the honorary

architects and the building is being done by Messrs J.R. Bennett & sons. Too often had they had to work under most depressing and unfavourable conditions. The Young Men's Fraternal had increased from five to nearly 50; if they did not make provision for these young fellows others would step in and reap what they had sown. CDN c 2.5.1927

1932 The Union of British Methodism – bringing together the Wesleyan, Primitive and United Methodists - is the most important event in the history of British Nonconformity since the birth of Wesley. Cambridge's first Methodist chapel in Fitzroy Street was where Gipsy Smith heard the sermon which led to him becoming an evangelist. It is now Fellowship House for the local unemployed. 32 09 23b & c

1934 In 1921 members of Sturton Street Methodist Church erected a school hall as a temporary building. Now plans have been prepared for extensions to the church itself with choir stalls and pews. They have launched an appeal for £2,300 to include a new hall. Old scholars are invited to give a contribution, however small. 34 04 11

1934 There was great rejoicing among members of the Sturton Street Methodist Church at the opening of the new school hall, adjoining the chapel. The building, which seats about 200 and has a fine platform and convenient ante-rooms, was beautifully decorated with flowers for the occasion. It was opened by Arthur Harding, the senior trustee who has been associated with the church for 37 years. He hoped it would be of great service amongst young people. 34 10 12

1936 William Allen, retired railwayman, joined Wesley Methodist Church, Hills Road in 1867 when it worshipped in a temporary building at the rear of the present church. He compiled a book telling how he started at Wesley Church but found them unfriendly 36 08 22e

1941 Sturton street chapel bombed (replaced 1954) [6.21,1.7]

1949 During the war the Tabernacle Methodist Church in Newmarket road, Cambridge, was closed and the property sold. The history of the church went back over many years, having its early beginnings in the old Fitzroy Street chapel. There were hopes that at some future date the work so nobly done by the two old chapels would be carried on. In the very near future some of these hopes may be realised, as the trustees intend to acquire the piece of land adjoining the YWCA hall and opposite the Borough cemetery, Newmarket road, for the purpose of commencing a new Methodist cause c49 01 21

1952 After years of planning, working and hoping, members of Chesterton Methodist Church have at last a building of their own, a new church on the corner of Green End Road and Scotland Road, which was officially opened by Mrs Elliot Ridgeon. Now they have a light and bright building and the friendliness of the many members at the ceremony reflected joy and thankfulness at the completion of the new church. But their struggles are not yet over for they plan to build a school hall and hope one day to build a bigger church. CDN c22.1.1952 [1.4, 1.11, 13.10]

1952 Meadlowland Methodists in Cambridge revealed a venturesome spirit when, in driving snow, they dedicated the site of the proposed new church and offices. The simple service was conducted in the East Barnwell Community Centre & Coun Herbert Finbow cut the first turf. Mr Henry Hughes, the architect, explained a model of the new building which will present an impressive aspect when viewed from Newmarket Road. Finance will come in part from the sale of the Tabernacle Church. CDN c 3.4.1952 [1.5]

1952 More than 100 people watched a key being turned in a lock last night before they entered the youngest Methodist Church in England. For that was how the Meadowlands Church, sparkling cream-and-cosy, was described at the first service to be held in the new building. Rev. W.H. Beales glanced over the congregation who had helped to pay for the cream-painted church, at the small intimate organ in the corner and the simple altar in light oak with its gleaming brazen cross & said the community of Meadowlands owed these workers a debt which could never be repaid c52 12 23

1952 Jesus Lane Sunday School has been wound up. It was founded in 1827 by a group of University men distressed by the spiritual desolation of Barnwell who decided to start a "Gownsmen's Sunday School". Four of them set out to visit every house in search of scholars and on the first Sunday the school opened with over 200 children attending at the Friends Meeting House. Later they erected a large new building in Paradise Street where 600 children were on the books. The 1914 war dealt the school a blow from which it never wholly recovered and in 1936 the building was sold to the Boy Scouts Association. c52 09 26 (every Parish now has own Sunday School & its work redundant after 120 years) [4.15]

1953 Twelve years after a high explosive bomb partially destroyed the Sturton Street Methodist Church plans are now complete for the building of a new place of worship. The original chapel was built in the 1820s but in August 1941 a bomb dropped within a few feet of the west wall, removing the greater part of the roof slating, opening a large hole in the external vaulting and causing severe damage to the fabric. The whole of the roof lifted and many of the roof timbers were fractured. The building was of no use for public worship which had to take place in the Assembly Hall. c53 11 18

1954 The new Methodist church in Sturton Street, Cambridge was opened and dedicated at a largely-attended ceremony. It is of pleasing, simple design and replaces the building damaged by bombs in 1940. The Mayor, Coun Hallett, said it was the only here to have been completely bombed and it was encouraging to know that the congregation had come to the rescue and rebuilt it in a most impressive style. The architect, D.C. Denton-Smith acknowledged the work of the builders, Eric Kidman, Mr Linsey foreman; Messrs Cooks plasterers; Messrs Pratt builders' merchants; Messrs Scotts electricians & other associated with the re-building. CDN 24.9.1954 [13.11]

1966 Hills Road Methodist chapel celebrates centenary [13.15]

1972 Hills Road & Wesley Methodist congregations merge, Hills Road chapel sold (demolished 1973) [13.16]

1973 Latest casualty in the Hills Road office redevelopment programme is the 100-year-old Methodist Church. Demolition work started yesterday. In autumn last year many people were surprised to learn that an active church in so sound a financial position and such good repair should close its doors. But the trustees had been aware for some time that the building was just

too large; it has a seating capacity for 750 and a congregation of less than 200. The congregation transferred to the Wesley Church, Christ's Pieces, or to other Methodist churches closer to their homes. The property went on the market in November 1972 c73 06 29

1975 Wesley Centre modernised school building, Wesley church, opens [13.17]

1979 Castle End Mission celebrate centenary [12.8]

1979 Romsey Methodist chapel closed, congregation continues at Diocesan chapel, Romsey Terrace, will reopen as Youth & community centre [13.18]

1979 Romsey Methodist Church in Mill Road, Cambridge will have its final service before closing down. The congregation will continue to worship in the nearby Diocesan Chapel in Romsey Terrace. After alterations it will reopen as a youth and community centre. The church buildings will become a gymnasium, the hall will remain a youth club and a coffee bar and social centre will be built onto the car park. It is also hoped to include a quiet room and tv den. The main users will be a playgroup, over-60s and youngsters. The scheme is being organised by five Cambridge churches. CEN c. 8.1.1979

1983 The Carioca Club in Newmarket Road is today a burnt-out shell after fire was started in three different parts of the building. The entire contents were destroyed and walls and floors wrecked. Police say an 'inflammable liquid' was poured over materials in the building to start the blaze. 'Racks' night club which has 450 members is now looking for a temporary venue. The Carioca was originally a chapel and was used as a furniture depot before it became a night-club in 1978 83 09 26 p1

1985 The Carioca Club on Newmarket Road is finally being demolished after years of doubt about its future. It was built in the 1870s as a Methodist Chapel but with falling attendances it was a financial embarrassment and as early as 1909 there was talk of selling it. In 1941 it became a furniture storage depot and was turned into a nightclub and disco in 1976 with a take-away kebab shop. But it was gutted by fire in 1983 and never reopened. 85 11 22

1985 After more than a century of almost unrelenting dreariness the Methodist Tabernacle in Newmarket Road is being pulled down. The hideous old bulk of a chapel wore sunlight like a shroud. The foundation stone was laid in 1876 but within 14 years the congregation shrank and in 1909 there was talk of selling it. It struggled on and in 1941 was given over to the storage of furniture. Later it became the Carioca nightclub and its face daubed with appalling blue and orange paint. Worse was to come: the lower part was turned into a take-away kebab joint. Fire gutted the old pile in 1983 and its doors finally closed for ever 85 12 02b

1985 Wesley chapel : plans for demolition announced [13.19]

c.83.09 : Jewish

1908 For years bachelor Harris Norman lived the life of a miser in Romsey Town. He was endowed with a positive genius for accumulating money but never spent more than would suffice to keep soul and body together. He laid the foundations of his fortune as a hawker of cheap jewellery, then speculated in stocks and shares. In his will he bequeathed the whole of his property to be divided between Addenbrooke's Hospital and the London Jewish Synagogue. 08 01 31b – details 08 02 07 & a

1909 Harris Norman of Romsey Town, a Jewish hawker, lived to all appearances in extremely poor circumstances. But when he died was found to be worth £12,000. He'd divided his assets between Addenbrooke's Hospital and the 'London Jewish Synagogue for the Poor and Needy Jews'. However four groups disputed to whom this second bequest should go and it came before a Judge in the Chancery Division to decide. 09 05 07

1910 Jews acquire lease of hall at back of Grays, Sidney St as synagogue consecration of new synagogue, Sidney St [5.11]

1911 consecration of new synagogue, Sidney St [5.11]

1933 Jewish Synagogue, Thompson's Lane opened [5.7,13.1]

1933 Dr R.M. Salaman addressed Cambridge Rotary club on the persecution of the Jews in Germany. Hitler was destroying the whole people: it was more serious than the mere 'beating up' of individuals who happened to be Jewish, it was a movement which struck at the very roots of civilisation. Paid advocates of the Nazis had been sent to Palestine and the Ukraine and the doctrine was being taught in schools in the most scandalous way. 33 07 12 p8

1937 Jewish Synagogue, Thompson's Lane consecrated (started 1935) [5.7,12.1]

1956 A new library in memory of Herbert Martin Loewe, Honorary Fellow of Queens' College and a Reader in Rabbinics was opened in the Cambridge Synagogue, Thompson's Lane. He had worked hard for the many displaced refugees fleeing from Nazi armies and kept open house for students. The family had been honoured for their scholarship and respected for their public works and the library was a happy choice to commemorate his life. 56 10 22
